

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY (CHARUSAT)

Second Semester of B. Pharm. Examination (Backlog)

November 2016

HS121 B: English Language and Literature

Date: November 11, 2016, Friday Time: 10:00 a.m. to 11:00 a.m. Maximum Marks: 25

Instructions:

1. The question paper comprises of four questions.
2. All questions must be attempted.
3. Make suitable assumptions and draw neat figures wherever required.

Q - 1 (A) Fill in the blanks by choosing the appropriate word from the brackets. [03]
(Any Six)

1. Vishal went to _____ Lake Miramar to go fishing. (a, an, the, no article)
2. _____ laughter is the best medicine. (a, an, the, no article)
3. He said that he _____ go as soon as it was possible. (would, will, will be)
4. The lion told the mouse that he was very weak and that his teeth _____ out. (fell, have fallen, had fallen)
5. Harshal doesn't like his job but stays at it because _____ salary is good. (a, an, the, no article)
6. You _____ him a fool. It really upset him. (shouldn't have called, shouldn't call, can't have called)
7. _____ the professor angry? (were, was, had)

[03]

(B) Fill in the blanks by choosing the appropriate verb forms from the brackets.
(Any Three)

1. My aunt _____ it to me yesterday afternoon. (to give)
2. The president _____ a speech now. (to give)
3. My brother _____ Korean. (to be + not + speak)
4. He was very busy so he _____ to the party yesterday. (do + not + go)

Q - 2 Appreciate the following Poem in 200 words by discussing tone, rhyme, rhythm, figures of speech, central theme and critical summary of the poem. [07]

Oh, lovely day

- Heidi Sands

Oh, Lovely Day!

Oh, lovely day
Greets me at the doorstep.
For now I won't let
Bad memories in.
The kind that make me
Sick, startle, cry and scream.
There is no room, today.
Oh, lovely day

(D) Even the paper's author admits it's possible that in some of the studies e-cigarettes may only have been used once, which he says would not be a good predictor of whether they had affected people's ability to stop smoking. And there is another problem. You might expect, if you were going to draw conclusions about how useful e-cigarettes are in helping

"grossly misleading".

(C) "I am concerned at the huge damage this publication may have - many more smokers may continue smoking and die if they take from this piece of work that all evidence suggests e-cigarettes do not help you quit smoking; that is not the case." Prof Peter Hajek, director of the Tobacco Dependence Research Unit at the Wolfson Institute also called the findings

(B) Smokers who use e-cigarettes have a 28% lower chance of quitting than smokers who don't use them, according to Prof Stanton Glantz, one of the authors. But while the conclusion is surprising, so is the number of academics who have criticised the paper. One was Ann McNeill, professor of tobacco addiction at Kings College London, whose own research is included in Glantz's analysis. "This review is not scientific," she wrote on the Science Media Centre website. "The information... about two studies that I co-authored is either inaccurate or misleading... I believe the findings should therefore be dismissed.

(A) People trying to give up smoking often use e-cigarettes to help wean themselves off tobacco. Most experts think they are safer than cigarettes but a surprising paper was published recently - it suggests that people who use e-cigarettes are less successful at giving up smoking than those who don't. "E-cigarettes WON'T help you quit," reported the Daily Mail. "Smokers using vapors are 28% less likely to ditch traditional cigarettes," read the paper's headline. The story was reported on many other websites around the world, including CBS: "Study: E-cigarettes don't help smokers quit," it said.

Do e-cigarettes make it harder to stop smoking?

Summarize the following article in 250 words by discussing an evaluative summary.

OR

Deserves a medal for
These blue skies
With sun so bright.
It is easy to forget
There is even a night!
I will tuck the dreams
I had, under the blanket
To retrieve them when
I am ready.
Oh, lovely day
I will make it to be
A perfect living harmony
With all who walk
This path with me.

people quit, to focus on studies looking at people who are trying to give up.

(E) Both are quite small and one was funded by the e-cigarette industry. They took two groups of smokers, and gave one real e-cigarettes, and the other a placebo. The studies reach a broadly similar conclusion to a large, real-world study called the Smoking Toolkit run by West. West's investigation follows people in their daily lives and assesses how successful various methods of giving up smoking are - this includes nicotine patches, medicines and going cold turkey. These studies suggest that people using e-cigarettes to help them quit are 50% to 100% more successful than those who use no aids at all.

(F) In his paper, Glantz acknowledges there are limitations to the research that he analysed. He agrees there are problems with the way the use of e-cigarettes is measured and accepts it's not clear which devices people are using. But he is sticking by his analysis because he believes he has taken these factors into account. The editor of Lancet Respiratory Medicine, Emma Grainger, defends the article too. She says she does not see a problem with the paper and that it has been through the normal peer-review process.

Q - 3 Write conversation on any TWO of the given situations.

[06]

1. Request your teacher to accept your assignment as you have missed the deadline of submission a week ago.
2. Invite a friend to your sister's wedding.
3. Telephonic talk at a dentist clinic to take an appointment for your father.

Q- 4 Write an Essay on any ONE of the given topics.

[06]

1. Eating a balanced diet is the most important factor for a healthy life. To what extent do you agree?
2. The prevention of health problems and illness is more important than treatment and medicine. To what extent do you agree?
