

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

2nd Semester of B. Pharm. Examination (New)

University Theory Examination May 2016

PH117 – Human Anatomy and Physiology - II

Date: 03/05/2016, Tuesday Time: 10.00 a.m. to 1.00 p.m. Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat sketches wherever necessary.

SECTION - I

Q.1 Attempt all questions. Each question is of one mark.

20

1. Depolarising Phase of action potential require
 - A. Opening of K⁺ channels
 - B. Closing Mg channels
 - C. Na⁺ Channel Opening rapidly
 - D. Cl⁻ Channel opening
2. Following is one type of Neurotransmitter
 - A. Kinin
 - B. Prostaglandin
 - C. Cytokine
 - D. Dopamine
3. One of the following is not a functionally classified neuron
 - A. Sensory neuron
 - B. Motor neuron
 - C. Multipolar neuron
 - D. Interneuron
4. Functions of Hypothalamus is
 - A. To control sensory function
 - B. control of brain waves
 - C. control of speech
 - D. Regulation of circadian rhythm & state of consciousness
5. Wernicke's area is for control of
 - A. Sleep pattern
 - B. Language
 - C. Intellectual thinking and cognition
 - D. Imagination
6. Presence of following hormone is an indication of Pregnancy
 - A. Relaxin
 - B. Progesterone
 - C. Human chorionic gonadotropine
 - D. Estrogen

7. Which hormone is secreted by Seminal Vesicles?
 - A. Prostaglandin
 - B. 5-HT
 - C. Histamine
 - D. Gonadotrophin
8. Following hormone is stored & released by Posterior pituitary gland
 - A. Norepinephrine
 - B. Oestrogen
 - C. Oxytocin
 - D. Testosterone
9. What is a synonym for Thyroxine?
 - A. Thoroidin
 - B. Tetraiodothyronine
 - C. Triiodothyronine
 - D. Monothymine
10. Which hormone promotes glycogenesis?
 - A. Testosterone
 - B. Insulin
 - C. Glucagon
 - D. Somatostatin
11. Which hormone promotes glycogenolysis?
 - A. Insulin
 - B. Glucagon
 - C. Estrogen
 - D. Epinephrine
12. Melatonin is secreted by which gland?
 - A. Pineal
 - B. Adrenal
 - C. Thyroid
 - D. Thymus
13. How many pairs of thoracic nerves are there in human body?
 - A. 8
 - B. 9
 - C. 5
 - D. 12
14. Major Motor function of Vagus nerve is to
 - A. Release hormone
 - B. Decrease heart rate
 - C. Speech
 - D. Swallowing
15. Shoulder joint is a type of
 - A. Hinge joint
 - B. Gliding
 - C. Ball and socket
 - D. None of above
16. Red bone marrow is housed in
 - A. Spongy bone
 - B. Compact bone
 - C. Short bone
 - D. Epiphysis

17. Full form of EEG is
 - A. Electromyogram
 - B. Electrocardiogram
 - C. Electrophysiograph
 - D. Electroencephalogram
18. Autacoids are
 - A. Local hormone
 - B. Endogenous hormone
 - C. Exocrine hormone
 - D. Neurotransmitter
19. The process of resorption is carried out by
 - A. Osteone
 - B. Osteoblast
 - C. Osteocyte
 - D. Osteoclast
20. Histamine is present in which type of cell?
 - A. RBC
 - B. WBC
 - C. Endocrine cells
 - D. Mast cells

SECTION – II

Q 2 Attempt any FOUR of the following (draw figures where ever necessary)

- | | |
|---|----|
| A Provide detail functions of different parts of brain | 05 |
| B What is CSF? Write its composition and Functions | 05 |
| C Explain in brief concept of Physiology of nerve with generation of action potential | 05 |
| D Discuss in brief about different types of nerves in Human body | 05 |
| E Provide structural and functional classification of neurons | 05 |
| F Draw neat labeled diagram of spinal cord. Add a note on reflex action | 05 |

SECTION – III

Q 3 Attempt any FOUR of the following

- | | |
|---|----|
| A Discuss the process of spermatogenesis in the testes. | 05 |
| B Describe the location, hormones, and functions of the thyroid gland. | 05 |
| C Classify bones based on their shape or location. | 05 |
| D What are the functions of articular cartilage, synovial fluid, and articular discs? | 05 |
| E Describe the location, hormones, and functions of the adrenal glands. | 05 |
| F Discuss the process of oogenesis in the ovaries. | 05 |

Q 4 Attempt any FOUR of the following

- A Discuss the female reproductive cycle. 05
- B a. Which seven bones form the orbit? 05
b. The body's normal metabolic rate is regulated by _____
a) Thyroid hormones b) Epinephrine c) Metaboloxin d) Prolactin
c. What are the bones that compose the skull?
d. Sperm cells can survive up to ____ hours in the female reproductive tract.
a) 10 b) 24 c) 36 d) 48 e) 52
e. Fertilization usually occurs in the _____
a) Vagina. b) Cervix. c) Uterus. d) Uterine tubes. e) Ovaries.
- C Define the following: foramen, suture, paranasal sinus, and fontanel. 05
- D Write a note on oxytocin and Anti diuretic Hormone 05
- E Describe the components of the mammary glands and the structures that support them. 05
- F Write a note on Physiology of Menstruation 05
-
