

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Second Semester of B. Pharm. (New) Examination

University Theory Examination October / November 2016

PH117 – Human Anatomy and Physiology - II

Date: 10/11/2016, Thursday Time: 10.00 a.m. to 1.00 p.m. Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
 2. SECTION – I comprises of Question 1. Total marks for Section I are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
 3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
 4. Figures to right indicate marks.
 5. Draw neat sketches wherever necessary.
-

SECTION – I

Q.1 Attempt all questions. Each question is of one mark.

20

1. Neuron consists of following part/s
 - A. Cell body
 - B. Dendrites
 - C. Axon
 - D. All of above
2. Following is not a type of Neurotransmitter
 - A. Kinin
 - B. Acetylcholine
 - C. noradrenaline
 - D. Dopamine
3. Which of the following is the example of the action of the Autonomic nervous system?
 - A. Swallowing of food
 - B. Papillary reflex
 - C. Knee jerk response
 - D. Peristalsis of intestine
4. Higher thought processes for learning and memory are primarily in the _____.
 - A. Cerebrum
 - B. Cerebellum
 - C. spinal cord
 - D. medulla oblongata
5. How many pairs of cranial nerves do humans have?
 - A. 4
 - B. 12
 - C. 16
 - D. 21

6. A refractory period is _____.
A. the period during which potassium and sodium ions are completely stable
B. the same as the resting potential
C. a brief time when a neuron is unable to conduct an impulse
D. the short time the myelin sheath provides insulation from another impulse
7. Schwann cells are one of several types of _____ cells in the nervous system
A. sensory
B. neuroglial
C. motor
D. association
8. The hypothalamus regulates _____
A. Heart rate
B. Body temperature
C. Water balance
D. All of above
9. The posterior pituitary stores and secretes _____
A. growth hormone and gonadotropin-releasing hormone
B. ADH and oxytocin
C. estrogen and testosterone
D. adrenaline
10. Growth Hormone promotes _____
A. cell division
B. protein synthesis
C. bone growth
D. All of above
11. Hypothyroidism in adults produces a condition called as _____
A. Myxedema
B. Goiter
C. Cretinism
D. dwarfism
12. Which hormone is produced by thyroid gland, in addition to thyroxin and triiodothyronine?
A. TSH
B. ACTH
C. Calcitonin
D. FSH
13. ACTH controls the secretion of _____
A. Aldosterone
B. Testosterone
C. Noradrenaline
D. Cortisol
14. Seminal fluid is composed of _____
A. Sperm
B. prostate gland secretions
C. seminal vesicle secretions
D. All of above

15. The rupturing of the follicle is referred to as _____
 - A. Graafian termination
 - B. Endometriosis
 - C. Ovulation
 - D. oogenesis
16. Major Motor function of Vagus nerve is to
 - A. Release hormone
 - B. Decrease heart rate
 - C. Speech
 - D. Swallowing
17. During days 6-13 of the uterine cycle, increased _____ production causes the endometrium to thicken and become vascular and glandular.
 - A. Progesterone
 - B. Estrogen
 - C. Progesterone
 - D. Oxytocin
18. Which hormone promotes glycogenolysis?
 - A. Insulin
 - B. Estrogen
 - C. Epinephrine
 - D. Glucagon
19. The process of resorption is carried out by
 - A. Osteon
 - B. Osteoblast
 - C. Osteocyte
 - D. Osteoclast
20. Which of these is not a normal function of the skeleton?
 - A. mineral storage
 - B. protection of underlying tissues
 - C. storing hemopoietic tissues
 - D. All of above functions

SECTION – II

Q 2 Attempt any **TWO** of the following

- | | | |
|---|---|----|
| A | Define the following terms: | 05 |
| | I) Neuron | |
| | II) Nerve fiber | |
| | III) Cerebrospinal fluid | |
| | IV) Electroencephalogram | |
| | V) Neurohumoral transmission | |
| B | Write about functions and subdivision of nervous system | 05 |
| C | i. What is the functional advantage of myelination? Write a short note about Myelinated axons.

ii. What is responsible for the white appearance of white matter? Give a short note on grey matter. | 05 |

- Q 3** Attempt any TWO of the following
- A Explain generation of action potential by subdividing its phases with diagram. 05
 - B Classify different neurotransmitters. How do they exert their effects? 05
 - C Classify different parts of Brain. Provide functions of it. 05

SECTION – III

- Q 4** Attempt any FOUR of the following
- A Enlist hormones of Anterior Pituitary Gland. Discuss role of Posterior Pituitary Gland 05
 - B Draw a well labeled diagram of Female Reproductive System 05
 - C Write a detail note on Histamine 05
 - D Discuss Spermatogenesis process in detail 05
 - E Describe Formation, Storage & Release of Thyroid Hormones. 05
 - F Classify types of Joints. Explain Synovial joint in detail 05

- Q 5** Attempt any FOUR of the following
- A Classify the Hormones of Adrenal Gland & Discuss role of Glucocorticoids 05
 - B Explain reproductive cycle of female in detail with role of hormones in its regulation 05
 - C What is Hormone? Explain hormonal control of the Testes 05
 - D Explain the role of Serotonin as a Local hormone 05
 - E Discuss various types of movements of Joints 05
 - F Explain the following terms 05
1. Rheumatoid Arthritis
 2. Dwarfism
 3. Goiter
 4. Cushing's Syndrome
 5. Diabetes Mellitus
