

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

2nd Semester of B. Pharm. Examination

University Theory Examination May 2015

PH117 Human Anatomy & Physiology-II

Date: 11.05.2015, Monday

Time: 10 a.m. to 1 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat sketches wherever necessary.

SECTION - I

- Q 1** Attempt all questions. Each question is of one mark. **20**
1. In humans, transmission of nerve impulses across a synaptic cleft is carried out by _____.
A. Sodium Ions
B. Potassium Ions
C. Neurotransmitter Molecules
D. The Nodes of Ranvier
 2. Sympathetic stimulation of radial muscle of eye produces
E. Contraction of pupil
F. No effect on eye
G. Dilatation of radial muscle
H. Dilatation of pupil
 3. Full form of EEG is
A. Electromyogram
B. Electrocardiogram
C. Electroencephalography
D. Electrocardiography
 4. Following Cranial nerves are classified as Motor Nerve
A. Cranial nerve I, III, IV, X
B. Cranial nerve II, III, V, XI
C. Cranial nerve III, IV, VI, XI, XII
D. Cranial nerve IV, VI, VIII, X
 5. What are the main divisions of the nervous system?
A. The sensory system and the motor system
B. The peripheral nervous system and central nervous system
C. The dendritic and the axonal systems
D. The sympathetic and parasympathetic systems
 6. Which part of the brain contains centers for heartbeat, breathing, and blood pressure?
A. Cerebellum
B. Cerebrum
C. Spinal cord
D. Medulla oblongata
 7. The main function of the cerebellum is _____.
A. Consciousness
B. Muscle coordination
C. Homeostasis
D. Sense reception
 8. Which of the following hormones is not released by the anterior pituitary?
A. Melanocyte-stimulating hormone
B. Gonadotropin-releasing hormone
C. Thyroid-stimulating hormone

9. Parathyroid hormone acts to ensure that
 A. Calcium levels in the blood never drop too low.
 B. Sodium levels in urine are constant
 C. Potassium levels in the blood don't escalate.
 D. The concentration of water in the blood is sufficient.
10. What is the function of insulin?
 A. Agonistic to glucagon
 B. Decrease glycogen storage in liver and muscles
 C. Reduces hyperglycemia
 D. All of the above
11. What is the name of the stalk that connects the hypothalamus to the pituitary?
 A. Cerebral cortex
 B. Anterior
 C. Corpus collasum
 D. Infundibulum
12. What is another name for thyroxine?
 A. Tetraiodothyronine
 B. Thyroid
 C. Thymus
 D. Triiodothyronine
13. Which is an example of negative feedback?
 A. Nursing action stimulates the hypothalamus to release oxytocin that triggers mammary gland milk production.
 B. When the blood becomes dilute, ADH is no longer released from the hypothalamus.
 C. Uterine stretching sends nerve impulses to the hypothalamus that releases oxytocin that triggers uterine contraction.
 D. FSH and LH stimulate the gonads to produce sperm or eggs.
14. Which hormone stimulates the production of estrogen and progesterone?
 A. Growth hormone
 B. Antidiuretic hormone
 C. Gonadotropic hormones
 D. Thyroid-stimulating hormone
15. Which hormone is secreted through Seminal Vesicle?
 A. Prostaglandin
 B. Histamine
 C. 5-HT
 D. Cytokines
16. One of the following is not a part of female reproductive Hormone?
 A. Testosterone
 B. Progesterone
 C. FSH
 D. LH
17. Ovulation is triggered by _____.
 A. Follicle-stimulating hormone
 B. A mid-cycle surge of luteinizing hormone
 C. Hormones from the follicular cells
 D. Hormones from the theca interna
18. Which type of joint is the most mobile? The shoulder and hip are two examples of this type of joint.
 A. Condylloid joint
 B. Hinge joint
 C. Pivot joint
 D. Ball-and-socket joint
19. Which of the following factors would not provide stability to a synovial joint?
 A. The presence of tendon sheaths and bursae
 B. Well-fitting articular surfaces between the bones involved in the synovial joint
 C. Ligaments binding the bones together
 D. Good muscle tone in those muscles that cross the joint
20. The following bones form the elbow joint except
 A. Scapula
 B. Radius
 C. Ulna
 D. Hummers.

SECTION – II

- Q 2** Attempt any **FOUR** of the following
- A** Define following terms
Reflex action, Neurofibrils, Nerve fiber, Nerve terminal, Blood Brain Barrier 05
- B** I) Explain anatomy of Spinal cord 05
II) Explain different types of Neurones
- C** Enlist various parts of Brain and give functions of it 05
- D** Write a Note on Sleep and CSF 05
- E** Write a note on Male and female reproductive hormones 05
- F** Explain spermatogenesis 05

SECTION – III

- Q 3** Attempt any **FOUR** of the following
- Explain the following terms
- A** 1. Pheochromocytoma 05
2. Rheumatois Arthritis
- B** Explain the Anterior pituitary gland 05
- C** Explain structure and function of Skeleton 05
- D** Write a short note on PAF 05
- E** Discuss various types of movements at joint 05
- F** Write a detailed note on Histamine 05
- Q 4** Attempt any **FOUR** of the following
- A** Define hormones and give its chemical classification 05
- B** Explain Synthesis, Storage, Release & Metabolism of Thyroid Hormone 05
- C** What is Autacoid ? How they differentiate from Endocrine Hormone 05
- D** Classify Joint. Explain Synovial Joint 05
- E** Discuss the hormones of Adrenal glands with their functions 05
- F** Write a detailed note on Hormones of Pancreas with their disorders 05
-
