

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
3rd Semester of B. Pharm. Examination
University Theory Examination November 2019
BPH3004 Pathophysiology

Date: 11/11/2019, Monday

Time: 10:00 a.m. to 1:00 p.m.

Maximum Marks: 75

Instructions:

1. There are three sections in this question paper.
 2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
 3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
 4. Figures to right indicate marks.
 5. Draw neat labeled sketches wherever necessary.
-

SECTION - I

Q 1 Attempt all questions. Each question is of one mark. 20

1. Followings are the constitutional factors of atherosclerosis, **except**:
[A] Age
[B] Sex
[C] Hypertension
[D] Genetic factors
2. _____ among the 4 cardinal signs of inflammation means **swelling**:
[A] Rubor
[B] Tumor
[C] Calor
[D] Dolor
3. The process of engulfment of solid particulate material by the cells is called as:
[A] Emigration
[B] Margination
[C] Phagocytosis
[D] Chemotaxis
4. Clinical features of the diabetes mellitus involve followings, **EXCEPT**:
[A] Polyuria
[B] Polydipsia
[C] Oliguria
[D] Muscle wasting

5. Which of the following ethanol metabolites responsible for hepatotoxicity that leads to alcohol liver disease?
[A] Malondialdehyde-Acetaldehyde
[B] Acetone
[C] Formaldehyde
[D] Benzene dione
6. Acute renal failure can be categorized as followings, **EXCEPT**:
[A] Prerenal
[B] Intrinsic
[C] Extrinsic
[D] Postrenal
7. Caspases are involved in:
[A] Necrosis
[B] Apoptosis
[C] Atherosclerosis
[D] Inflammation
8. Parkinson's disease signs and symptoms **does not** include:
[A] Tremor
[B] Rigidity
[C] Tachykinesia
[D] Bradykinesia
9. _____ is relatively protected from infarction because it is supplied by the oxygenated blood.
[A] Right atrium
[B] Left atrium
[C] Right ventricle
[D] Left ventricle
10. Which among the followings is a **non-atherosclerotic cause** of Ischemic Heart Disease?
[A] Coronary atherosclerosis
[B] Vasospasm
[C] Plaque haemorrhage
[D] Plaque fissuring
11. The commonest form of Chronic Obstructive Pulmonary Disease includes:
[A] Chronic bronchitis
[B] Pulmonary emphysema
[C] Both
[D] None

12. Which among the followings is the hypothyroidism?
[A] Thyrotoxicosis
[B] Grave's disease
[C] Cretinism
[D] Haemophilia
13. Transmission of HIV infection **does not** occur by:
[A] Sexual transmission
[B] Shaking hands
[C] Perinatal transmission
[D] Transmission via blood
14. Compensatory mechanisms working to maintain cardiac output in heart failure includes following **EXCEPT**:
[A] Myocarditis
[B] Cardiac dilatation
[C] Tachycardia
[D] Cardiac hypertrophy
15. Irreversible damage to the nucleus in the form of condensation and clumping of nucleus is called as:
[A] Amorphous densities
[B] Karyolysis
[C] Karyorrhexis
[D] Pyknosis
16. Clinical features of Asthma **do not** include:
[A] Dyspnoea
[B] Cough
[C] Wheezing
[D] Bronchodilation
17. Inadequate intake of vitamin B₁₂ or folic acid causes _____ anaemia.
[A] Iron deficiency
[B] Thalassemia
[C] Megaloblastic anaemia
[D] Sickle cell anaemia
18. Following is **NOT** the type of generalized seizures.
[A] Myoclonic seizure
[B] Clonic seizure
[C] Partial seizure
[D] Absence seizure

19. _____ is the sexual transmitted disease caused by spirochaetes, *Treponema pallidum*.
 [A] AIDS
 [B] Gonorrhoea
 [C] Syphilis
 [D] Leprosy
20. Excessive accumulation of potassium in blood is called as:
 [A] Hyperkalaemia
 [B] Hypervolemia
 [C] Hyponatremia
 [D] Hypercalcaemia

SECTION – II

- Q 2** What are carcinogens? Give its types with examples. Describe pathogenesis of cancer. **10**
- Q 3** Attempt any **TWO** of the following
- A** Define hypertension. Write clinical classification of hypertension. Describe pathogenetic mechanism of renal hypertension. **05**
- B** Write etiopathogenesis, sign and symptoms of Acute renal failure. **05**
- C** Write in detail about types of Hepatitis and its causes. **05**

SECTION – III

- Q 4** Attempt any **ONE** of the following
- A** Define cell injury. Enlist etiology of cell injury. Describe pathogenesis of reversible and irreversible cell injury caused by hypoxia/ischaemia. **10**
- B** What is inflammation. Mention the signs of inflammation. Describe in detail the vascular and cellular events of acute inflammation. **10**
- Q 5** Attempt any **FIVE** of the following
- A** Define and classify diabetes mellitus. Differentiate type 1 and type 2 diabetes mellitus. **05**
- B** Write a note on mechanism of atherogenesis with neat labeled diagram. **05**
- C** What is AIDS. Mention the causative agent and routes of transmission of HIV. Describe pathogenesis of HIV infection. **05**
- D** What is angina pectoris? Describe different types of angina. **05**
- E** Define peptic ulcer. Mention its causes. Differentiate duodenal ulcer and gastric ulcer. **05**
- F** Write a note on etiology, mode of transmission and pathogenesis of tuberculosis. **05**
