

**CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY**  
**4<sup>th</sup> Semester of B. Pharm. Examination**  
**University Theory Examination April/May 2015**  
**PH208 Pharmacology-I**

**Date: 20.04.2015, Monday**

**Time: 10 a.m to 01p.m**

**Maximum Marks: 80**

---

**Instructions:**

- 1. Figures to right indicate marks.**
- 2. Section wise separate answer book to be used.**
- 3. Draw neat sketches wherever necessary.**

**SECTION- I**

- Q 1** Attempt any **TWO** of the following
- A Classify Parasympathomimetics. Write Pharmacological actions, adverse effects and therapeutic uses of parasympathomimetics. **10**
- B Write pathophysiology of peptic ulcer. Explain mechanism of action of different class of antiulcer agents. **10**
- C Write a short notes on: **10**
- (i) Beta receptor blockers
- (ii) Local anesthetics
- Q 2** Attempt any **TWO** of the following
- A Explain pathophysiology of vomiting. Classify antiemetic and write therapeutic uses. **10**
- B Explain pathophysiology of Bronchial asthma. Classify and describe drugs used in Bronchial asthma. **10**
- C (i) Differentiate between d-tubocurarine and Succinylcholine. **10**
- (ii) Describe pharmacological actions of adrenaline.

**SECTION- II**

- Q 3** Attempt any **TWO** of the following
- A Explain in detail Pharmacokinetic and Pharmacodynamic drug interactions. **10**
- B Explain factors modifying drug dosage and action. **10**

|            |                                                                                                                         |    |
|------------|-------------------------------------------------------------------------------------------------------------------------|----|
| C          | I) Explain following terms :                                                                                            | 03 |
|            | <ul style="list-style-type: none"> <li>• Half life</li> <li>• Bioavailability</li> <li>• Iatrogenic diseases</li> </ul> | 07 |
|            | I) Explain Drug absorption.                                                                                             |    |
| <b>Q 4</b> | Attempt any <b><u>TWO</u></b> of the following                                                                          |    |
| A          | I) Explain Dose response relationship.                                                                                  | 05 |
|            | II) Write a note on Mechanisms of drugs action                                                                          | 05 |
| B          | Write a note on routes of drugs administration.                                                                         | 10 |
| C          | I) Write a note on Adverse drug effects and monitoring                                                                  | 05 |
|            | II) Explain basic concept of Preclinical & clinical studies in new drug development.                                    | 05 |
