

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Fourth Semester of B. Pharm. Examination

University Theory Examination October 2017

PH211 PHARMACEUTICAL ANALYSIS - II

Date: 07.10.2017, Saturday

Time: 1.30 p.m to 4.30 p.m

Maximum Marks: 80

Instructions:

1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

Q 1 Attempt any TWO of the following

- A What is chromatography? Give detail classification of chromatography on the basis of mechanism of separation. 10
- B Write a detail note on the thin layer chromatography. 10
- C Describe in detail Thermogravimetric analysis. 10

Q 2 Attempt any TWO of the following

- A Explain the following terms. 10
- i) Melting point, ii) R_f value iii) Resolution, iv) Capacity factor, v) Specific rotation
- B Write a detail note on Column chromatography. 10
- C Write a note on the followings (Any Two) 10
1. Factors responsible for chromatographic band broadening.
2. Signal to noise ratio
3. Qualitative and quantitative applications of Polarimetry

SECTION- II

Q 3 Attempt any TWO of the following

- A Enlist different types of indicator electrode. Explain calomel electrode in detail. 10
- B What is Kohlrausch's law? Write about conductivity cell. Write down application of conductometry in brief. 10
- C Write down principle, advantages and limitation of Amperometry 10

Q 4 Attempt any TWO of the following

- A Explain Biamperometric titration in detail. 10
- B Write a note on DME. 10
- C i) Write about Factors affecting conductance. 10
- ii) What is Reference electrode? Write down ideal characteristics of it with example.
