

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

4th Semester of B. Pharm. Examination (New)

University Theory Examination May 2016

PH221 - Pharmacology-II

Date: 02/05/2016, Monday

Time: 10.00 AM to 1.00 PM

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat sketches wherever necessary.

SECTION - I

Q 1 Attempt all questions. Each question is of one mark.

20

1. Serotonin: platelet effects
 - A. Promote aggregation
 - B. Inhibit aggregation
 - C. Induce coagulation
 - D. none
2. The smooth muscle stimulating action of 5HT is most marked in the
 - A. Bronchi
 - B. Intestine
 - C. Ureter
 - D. Biliary tract
3. The principal stimuli acting on parietal cell is
 - A. Gastrin
 - B. Histamine
 - C. Prostaglandin
 - D. All of Above
4. One of the following is an example of antacid
 - A. Omeprazole
 - B. Renitidine
 - C. Lansoprazole
 - D. Aluminium hydroxide gel
5. Proton pump inhibitors are clinically used for following condition except
 - A. reflux oesophagitis
 - B. hepatitis
 - C. Zollinger Ellison syndrome
 - D. peptic ulcer
6. The unwanted effects of Proton pump inhibitors are
 - A. Impotence & gynaecomastia, pain in muscles
 - B. Dizziness, Mental confusion
 - C. Both A & B
 - D. liver failure, pain in chest, mood changes

7. Asthma is characterized by
 - A. Inflammation of airways
 - B. Bronchial hyperactivity
 - C. reversible airway obstruction
 - D. all of above
8. Triple therapy used for H-pylori infection is
 - A. Proton pump inhibitor, amoxicillin and Metronidazole
 - B. Antiemetics, Proton pump inhibitor & amoxicillin
 - C. Proton pump inhibitor, Antacid and Penicillin
 - D. Purgatives, Antacid and Penicillin
9. The following is a selective 5HT₄ agonist
 - A. Buspirone
 - B. Sumatriptan
 - C. Cisapride
 - D. Clozapine
10. Examples of Bulk laxative are
 - A. Methyl cellulose
 - B. Steculia
 - C. Ispaghula
 - D. All of above
11. In which type of cell adaptation Number of cells increase
 - A. Hypertrophy
 - B. Hyperplasia
 - C. Metaplasia
 - D. Cell Injury
12. Archidonic acid pathways devided into following pathways
 - A. Cyclooxygenase
 - B. Lipoxygenase
 - C. Phospholipase
 - D. Both A & B
13. Which enzyme is responsible for conversion of Arachidonic acid into Prostaglandin
 - A. Lipase
 - B. Cyclooxygenase
 - C. Prostagladinase
 - D. Protease
14. What is the Half life of mercury
 - A. 6 days
 - B. 6 months
 - C. 70 days
 - D. 72 hrs
15. Acute Lead arsenic poisoning have symptoms of
 - A. Inflamantion of mucus membrane, Jaudice, anemia, neuropathy, liver failure
 - B. orange coloration of toungue, bone weakness, silver skin, skin irritation, immune compromised
 - C. metallic taste, GI irritation, parasthesia, muscle cramp, stool containing lead sulphate
 - D. Heart failure, sudden rise in blood pressure, kidney failure
16. One of the following is antidote of metal poisoning
 - A. Dimercaprol
 - B. Thalidomide
 - C. Sulphonamide
 - D. Loparamide

17. Primary Mediators of allergy
 - A. CCK
 - B. Thymine
 - C. Both A & B
 - D. Eosinophils
18. Which of the following is the regulator of Lymphocyte activation, growth & differentiation?
 - A. Interferon
 - B. TNF alfa
 - C. IL2, IL4
 - D. Gamma interferon
19. Which of the following are methods for Gene therapy?
 - A. Chemotherapy & radiation
 - B. Microinjection, Viral vector, Liposome mediated DNA transfer
 - C. Gene manipulation and DNA transcription
 - D. Combinant technology and Cloning methods
20. Following are the functional manifestation of Inflammation
 - A. Vascular changes
 - B. Edema
 - C. Neutrophilic infiltration
 - D. All of above

SECTION – II

Q 2 Attempt any FOUR of the following

- | | | |
|---|---|----|
| A | Define Inflammation. Discuss etiology & Pathophysiology of Acute Inflammation | 05 |
| B | Write a note on chemical mediators of Inflammation | 05 |
| C | Explain in brief pathogenesis of Asthma and discuss the drugs used to treat it. | 05 |
| D | Explain Expectorants and Antitussive drugs | 05 |
| E | Discuss concept of Phagocytosis and leukocyte related cellular events | 05 |
| F | Explain in brief outcomes of Acute and chronic Inflammation | 05 |

SECTION – III

Q 3 Attempt any FOUR of the following

- | | | |
|---|---|----|
| A | Explain the followings in short | |
| | 1. Cell adaptation | 05 |
| | 2. Types of Cell Injury | |
| B | Write a note on Ondansetron | 05 |
| C | Classify Purgatives & write a note on it | 05 |
| D | Classify 5-HT antagonists & Explain Pathophysiological role of 5-HT | 05 |
| E | Discuss Applications of Gene therapy | 05 |
| F | Describe Emetics and antiemetics drugs in short | 05 |

Q 4 Attempt any FOUR of the following

- | | | |
|---|--|----|
| A | Discuss the Pathophysiology of Cell death | 05 |
| B | What is Peptic Ulcer? Enlist etiology of it & Discuss the drugs used in peptic ulcer | 05 |
| C | Discuss Pharmacological actions, therapeutic uses & adverse effects of Histamine | 05 |
| D | Explain Arachidonic acid pathways in detail | 05 |
| E | Enlist Heavy Metals & Write a note on Lead Poisoning | 05 |
| F | Write a note on Leukotrienes | 05 |
-
