

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

Fourth Semester of B. Pharm. (New) Examination

University Theory Examination OCTOBER 2017

PH221 PHARMACOLOGY II

Date: 02/10/2017, MONDAY Time: 01:30 p.m. to 04:30 p.m. Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat labeled sketches wherever necessary.

SECTION - I

- Q 1** Attempt all questions. Each question is of one mark. **20**
1. Which of the following autacoid is known to produce triple response?
(a) 5- Hydroxytryptamine
(b) Histamine
(c) Prostanoids
(d) IL-2
 2. Which of the following autacoid is used to terminate pregnancy?
(a) Prostaglandins
(b) Histamine
(c) Leukotrienes
(d) Bradykinin
 3. Which of the following is the precursor of Leukotrienes?
(a) Histidine
(b) Arachidonic acid
(c) Prekallikrein
(d) Tryptophan
 4. Which one of the following autacoid is not involved in pathogenesis of asthma?
(a) Leukotrienes
(b) PAF
(c) Histamine
(d) Prostaglandins
 5. Which one of the following is not classified as bronchodilators?
(a) Salbutamol
(b) Prednisolone
(c) Zafirlukast
(d) Ipratropium
 6. Histamine is involved as a mediator in the following pathological situations except:
(a) Delayed hypersensitive reaction
(b) Inflammation
(c) Variant angina
(d) Allergic rhinitis

7. Which term is used to describe an increase in the size of cells resulting in increase in the size of the organ?
 - (a) Hyperplasia
 - (b) Hypertrophy
 - (c) Metaplasia
 - (d) Atrophy
8. All of the following vascular changes are observed in acute inflammation, except?
 - (a) Vasodilation
 - (b) Stasis of blood
 - (c) Increased vascular permeability
 - (d) Decreased hydrostatic pressure
9. Identify the correct order of events of leukocyte recruitment happen in cellular changes during acute inflammation?
 - (a) Rolling; migration through endothelium; firm adhesion;
 - (b) Firm adhesion, migration through endothelium; margination and rolling
 - (c) Migration through endothelium, Firm adhesion; Rolling
 - (d) Rolling; Firm adhesion; Migration through endothelium
10. Chronic inflammation is characterized by all of the following except
 - (a) Tissue destruction
 - (b) Angiogenesis
 - (c) Infiltration with neutrophils
 - (d) Fibrosis
11. Which cellular organelles are involved in the initiation of the intrinsic pathway of apoptosis?
 - (a) endoplasmic reticulum
 - (b) lysosomes
 - (c) mitochondria
 - (d) peroxisomes
12. Which of the following is used to treat migraine?
 - (a) Sumatriptan
 - (b) Buspirone
 - (c) Ondansetron
 - (d) Prostaglandins
13. Which of the following is a preferred vector for transferring genes to nerve cells?
 - (a) Adeno-associated viral vector
 - (b) Herpes Simplex viral vector
 - (c) Retroviral vector
 - (d) Vaccinia vector
14. Which of the following antimicrobial agent is used to treat H.pylori infection?
 - (a) Penicillins
 - (b) Aminoglycosides
 - (c) Metronidazole
 - (d) Chloramphenicol
15. Dextromethorphan is an:
 - (a) Analgesic
 - (b) Antitussive
 - (c) Expectorant
 - (d) Antihistaminic

16. Which of the following is likely to cause gynecomastia?
 - (a) Famotidine
 - (b) Ranitidine
 - (c) Cimetidine
 - (d) Loratidine
17. Select the drug which is an inhibitor of gastric mucosal proton pump:
 - (a) Carbenoxolone sodium
 - (b) Sucralfate
 - (c) Famotidine
 - (d) Lansoprazole
18. Which of the following agent is also known as BAL?
 - (a) Disodium edetate
 - (b) Dimercaprol
 - (c) Penicillamine
 - (d) Deferiprone
19. Which of the following agent is used as anti-emetic and anti-histamine?
 - (a) Meclizine
 - (b) Hyoscine
 - (c) Aprepitant
 - (d) Metoclopramine
20. Which of the following drug belongs to the leukotriene antagonists?
 - (a) Misoprostol
 - (b) Montelukast
 - (c) Carboprost
 - (d) Epoprostenol

SECTION – II

- Q 2** Attempt any TWO of the following
- | | | |
|----------|---|-----------|
| A | Discuss therapeutic indications of prostaglandins analogues. | 05 |
| B | What are the uses of antihistamines? | 05 |
| C | Explain the role of bronchodilators in the treatment of asthma. | 05 |
- Q 3** Attempt any TWO of the following
- | | | |
|----------|--|-----------|
| A | Discuss treatment of migraine. | 05 |
| B | Explain the applications of gene therapy. | 05 |
| C | Discuss the role of PAF and leukotrienes in pathophysiological situations. | 05 |

SECTION – III

- Q 4** Attempt any FOUR of the following
- | | | |
|----------|---|-----------|
| A | Explain the pathophysiology of emesis. Classify anti-emetics. | 05 |
| B | Classify the laxatives. Explain bulk laxatives in details. | 05 |
| C | Discuss the role of 5-HT in physiological and pathophysiological situations. | 05 |
| D | Explain the vascular events in acute inflammation. | 05 |
| E | Enlist the chemical mediators for inflammations. Write role of prostaglandins in inflammations. | 05 |
| F | Classify the anti ulcer drugs. Explain pharmacology of H ₂ antagonist. | 05 |

- Q 5** Attempt any **FOUR** of the following
- | | | |
|----------|---|-----------|
| A | Explain the role of endogenous factors in peptic ulcer. | 05 |
| B | Explain the pathophysiology of chronic inflammations. | 05 |
| C | Write a note on prokinetic agents. | 05 |
| D | Discuss pharmacology of anti-tussive agents and expectorants. | 05 |
| E | Classify the types of cell injury in details. | 05 |
| F | Explain the cellular events in the pathophysiology of acute inflammation. | 05 |
