

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

5th Semester of B. Pharm. Examination

University Theory Examination November 2017

PH315 Pharmacology-III

Date: 28.11.2017, Tuesday

Time: 10a.m. to 1 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat labeled sketches wherever necessary.

SECTION - I

- Q 1** Attempt all questions. Each question is of one mark. **20**
1. What is often the first symptom of Parkinson disease?
[A] Turning of the head
[B] Shaking of a hand or foot
[C] Nausea
[D] Headache
 2. NMDA is a agonist of
[A] Glutamate
[B] GABA
[C] Ach
[D] Dopamine
 3. Sodium valproate is
[A] Inhibit GABA reuptake
[B] GABA receptor stimulator
[C] cause GABA release
[D] Inhibitor of GABA transaminase
 4. Heroin is a
[A] Natural
[B] Semisynthetic
[C] Synthetic
[D] None of above
 5. **Dysphoria and hallucinations effects are due to which morphine receptors**
[A] Mu
[B] Kapa
[C] Sigma
[D] Gamma
 6. In psychosis
[A] Increase in NA and 5- HT transmission
[B] Decrease in NA and 5- HT transmission
[C] Increase in GABA and 5- HT transmission
[D] Decrease in GABA and 5- HT transmission
 7. In parkinsonism, Dopaminergic neurons damaged by a substance
[A] MPTP

- [B] COMT
[C] L-DOPA
[D] Carbidopa
8. Picrotoxin inhibit
[A] GABA
[B] Glycine
[C] Dopamine
[D] 5-HT
9. Xanthine alkaloids inhibit
[A] adenylate cyclase
[B] Nitric oxide
[C] Phosphodiesterase
[D] Diacylglycerol
10. Strychnine cause inhibition of which neurotransmitter
[A] GABA
[B] Glycine
[C] Dopamine
[D] 5-HT
11. The primary mechanism of action of benzodiazepines is
[A] Dopamine antagonism
[B] Cholinergic antagonism
[C] Opening of neuronal chloride channels
[D] Facilitation of GABA-mediated chloride influx
12. The antihypertensive agent most likely to increase cardiac output is:
[A] guanethidine
[B] reserpine
[C] hydralazine
[D] alpha-methyldopa
13. Dopamine is distributed in which neurones?
[A] Nigrostriatal tract
[B] Mesolimbic system
[C] Tubero infundibular system
[D] All of above
14. Mechanism explaining calcium channel blocker effectiveness in managing exertional angina
[A] decreased contractility
[B] decreased afterload
[C] decreased preload
[D] increased coronary blood flow
15. The most specific agent for treatment of petit mal epilepsy is:
[A] carbamazepine
[B] phenytoin
[C] gabapentin
[D] ethosuximide
16. Gingival hyperplasia is a common side effect of:
[A] procainamide
[B] digitalis
[C] indomethacin
[D] phenytoin
17. Pure narcotic antagonists:
[A] naltrexone
[B] naloxone
[C] diphenoxylate
[D] nalmeferne

18. Drug associated with the hepatic/renal toxic metabolite: N-acetyl-p-benzoquinone.
 [A] diclofenac
 [B] acetaminophen
 [C] aspirin
 [D] indomethacin
19. What is the preferred NSAID for children?
 [A] Ketoprofen
 [B] Acetaminophen
 [C] Aspirin
 [D] Diclofenac
20. Which NSAID undergoes enterohepatic circulation
 [A] Phenylbutazone
 [B] Aspirin
 [C] Ibuprofen
 [D] Piroxicam

SECTION – II

- Q 2 Attempt any **TWO** of the following
 Differentiate followings:
- A i) Barbiturates and Benzodiazepines 05
 iii) MAO-A and MAO-B inhibitors
- B Classify diuretics and explain mechanism of loop diuretics. 05
- C Describe Pathophysiology of Angina Pectoris. 05
- Q 3 Attempt any **TWO** of the following
- A Write classification of Antihypertensive drugs. 05
- B Give a note on Plasma volume expanders. 05
- C Describe mechanism of actions of oral and parenteral iron in Anemia. 05

SECTION – III

- Q 4 Attempt any **FOUR** of the following
- A Explain stages of anesthesia 05
- B Discuss mechanism of action and pharmacological actions of barbiturates 05
- C Write a note on disulfiram 05
- D Explain types of epilepsy 05
- E Classify narcotic analgesics and explain Morphine in detail 05
- F Give a note on Clozapine- A atypical antipsychotics 05
- Q 5 Attempt any **FOUR** of the following
- A Explain classification and mechanism of action of local anaesthetics 05
- B Discuss effect of alcohol on Central nervous system with alcohol intoxication stages 05
- C Explain antiepileptic agents acting through GABA receptor 05
- D Discuss pharmacological actions of NSAIDs- Salicylates 05
- E Enlist drugs used in parkinsonism and explain any one in detail 05
- F Explain Dopamine - A neurotransmitter 05
