

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

6th Semester of B. Pharm. Examination (New)

University Theory Examination October 2017

PH321 - Pharmacology-IV

Date: 06/10/2017, Friday

Time: 10.00 AM to 1.00 PM

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
 2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
 3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
 4. Figures to right indicate marks.
 5. Draw neat sketches wherever necessary.
-

SECTION – I

Q.1 Attempt all questions. Each question is of one mark.

20

1. Following antimetabolite are antineoplastic agents, except
 - A) Folic acid analogues
 - B) Pyrimidine analogues
 - C) Nitrosoureas
 - D) Purine analogues
2. One of the following is a DNA polymerase inhibitor
 - A) Interferon
 - B) Docosanol
 - C) Gancyclovir
 - D) Indinavir
3. What is the mechanism of action of Streptomycin?
 - A) It inhibits DNA dependent RNA polymerase enzyme
 - B) It combines with r-RNA in microbial cell and prevents interaction with m-RNA
 - C) It inhibits PABA and alter folic acid synthesis
 - D) It inhibits DNA synthesis of bacterial cell
4. Following sulphonamides are absorbed and excreted rapidly, except
 - A) Sulfisoxazole
 - B) Sulfamethoxazole
 - C) Sulfadiazine
 - D) Sulfasalazine
5. One of the following is a fourth generation cephalosporin
 - A) Cefuroxime
 - B) Cefotaxime
 - C) Cefepime
 - D) Ceftazidime

6. Which one of the following is a first line therapy for M.Tuberculosis?
A) Isoniazid + Rifampin + Ethambutol
B) Isoniazid + Rifampin + Ethambutol or Streptomycin + Pyrazinamide
C) Rifampin + Ethambutol
D) Dapsone + Rifampin + Clofazimine
7. Following are DNA viruses, except
A) Orthomyxo viruses
B) Poxviruses
C) Herpes viruses
D) Adenoviruses
8. Which one of the following agent is having longest half life?
A) Norfloxacin
B) Sparfloxacin
C) Ofloxacin
D) Ciprofloxacin
9. Which of the following drugs is an antiprogestin?
A) Gemeprost
B) Megestrol
C) Tamoxifen
D) Mifepristone
10. The insulin receptor is a:
A) Ion channel regulating receptor
B) Tyrosine kinase linked receptor
C) G-protein coupled receptor
D) Steroidal receptor
11. Full name of DOTS is _____.
A) Directly observed treatment short course
B) Daily observed treatment
C) Dose of therapy short course
D) Direct observation transmission service
12. Mefloquine acts by
A) Intercalation of DNA
B) Inhibition of DHFR
C) Interference of electron transport in the parasite
D) Inhibiting polymerization of heme
13. The site for action of penicillin is _____.
A) Cell membrane
B) DNA
C) Cell wall
D) RNA
14. Which one of the following agents is a first generation Sulfonylureas?
A) Metformin
B) Pioglitazone
C) Glipizide
D) Tolbutamide

15. Glucagon like peptide-1 (GLP-1) suppress the secretion of:
 - A) Glucose
 - B) Insulin
 - C) Glucagon
 - D) Somatostatin
16. The following glucocorticoid has significant mineralocorticoid activity also:
 - A) Hydrocortisone
 - B) Triamcinolone
 - C) Dexamethasone
 - D) Betamethasone
17. Following hormone is used in a hormone replacement therapy for the management of menopause in women.
 - A) Testosterone
 - B) Oestrogen
 - C) Androgen
 - D) Parathormone
18. Bone resorption is accelerated by _____.
 - A) Estrogens
 - B) Bisphosphonates
 - C) Calcitonin
 - D) Parathormone
19. The drug of choice for hypoparathyroidism is
 - A) Parathormone
 - B) Calcium lactate
 - C) Vitamin D
 - D) Pamidronate
20. Progestin is used in _____.
 - A) Threatened abortion
 - B) Cushing syndrome
 - C) Thyrotoxicosis
 - D) Cervical ripening

SECTION – II

Q 2 Attempt any **TWO** of the following

- | | | |
|---|---|----|
| A | Write a mechanism of action and therapeutic uses of Mineralocorticoids. | 05 |
| B | Write a short note on Thiazolidinediones | 05 |
| C | Describe the Pharmacological actions of Thyroid hormones | 05 |

Q 3 Attempt any **TWO** of the following

- | | | |
|---|---|----|
| A | Classify Antidiabetic drugs. Enlist different Insulin preparations. | 05 |
| B | Compare and contrast: Somatropin and Somatrem. | 05 |
| C | Justify the use of Selective Estrogen Receptor Modulator's for the treatment of post-menopausal osteoporosis. | 05 |

SECTION – III

Q 4 Attempt any FOUR of the following

- | | | |
|---|--|----|
| A | Classify antimicrobial agents based on their mechanism of action. | 05 |
| B | Mention mechanism of action and therapeutics uses of sulphonamide. | 05 |
| C | Give adverse effects and therapeutic uses of chloramphenicol. | 05 |
| D | Classify antitubercular drugs and give mechanism of action of first line agents. | 05 |
| E | Give pharmacological actions of Glucocorticoids | 05 |
| F | Explain pathogenesis of Diabetes mellitus. Provide mechanism of action of Insulin. | 05 |

Q 5 Attempt any FOUR of the following

- | | | |
|---|--|----|
| A | Classify antiretroviral drugs and give their mechanism of action. | 05 |
| B | Differentiate ampicillin and amoxicillin. | 05 |
| C | Answer the followings: | 05 |
| | I. Why tetracyclines are not safe during pregnancy? | |
| | II. What are the adverse effects of third generation Cephalosporins? | |
| D | Write a note on antifungal drugs. | 05 |
| E | Classify Anticancer drugs along with examples. | 05 |
| F | Explain Life cycle of malarial parasite. | 05 |
-
