

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

7th Semester of B. Pharm. Examination

University Theory Examination March 2018

PH415 Clinical Pharmacy and Pharmacotherapeutics-I

Date: 27.03.2018, Tuesday

Time: 1.30p.m. to 4.30 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat labeled sketches wherever necessary.

SECTION - I

Q 1 Attempt all questions. Each question is of one mark. **20**

1. One of the following is important laboratory marker for cardiac disorders.

[A] Rheumatoid factor
[B] Alkaline phosphatase
[C] c-reactive protein
[D] CK-MB
2. Which of the following would not hasten the progression of chronic kidney disease (CKD) to end-stage kidney disease (ESKD)?
[A] Cigarette smoking
[B] High blood pressure
[C] Hyperglycemia
[D] Proteinuria
3. This is example of Pharmacodynamic drug interaction

[A] Digoxin + Metoclopramide
[B] Tetracycline + Antacid
[C] Warfarin + Vitamine K
[D] Penicillin + Probenecid
4. Mechanism of action of ACE inhibitor is.

[A] produce oedema
[B] Blocking formation of Angiotensin II
[C] increase preload
[D] Blocking renal blood flow
5. Measurement of following is an indicator of chronic glycemc control in patient with diabetes.
[A] Fasting glucose
[B] Nonfasting glucose
[C] HbA_{1c}
[D] None

6. Hypersensitivity reaction belong to following type in Rawlin-Thompson classification of adverse drug reaction

[A] Type A
[B] Type B
[C] Type C
[D] Type D
7. Extinsic pathway for clotting process can be evaluated int the laboratory by the

[A] Activated partial thromboplastin time (APTT)
[B] Prothrombin time (PT)
[C] Clotting time (CT)
[D] Bleeding time (BT)
8. What are Adverse drug reaction?

[A] The synergistic effects that are seen when some drugs are administered concurrently.
[B] Responses to increased drug doses required to achieve the same physiological outcome.
[C] Unintended alternative physiological responses caused by the drug that cause harm to the patient.
[D] Harmful chemical interactions between two drugs that are used to treat the same clinical symptoms.
9. Pharmacovigilance is done for monitoring

[A] Drug price
[B] Unethical practices
[C] Drug safety
[D] Pharmacology students
10. How are prescription medicines different from OTC ones?

[A] They contain higher amounts of active ingredients
[B] They don't contain dyes or preservatives
[C] They can be toxic
[D] They're unsafe for use without medical supervision
11. Uncontrolled hypertension can lead to which of the following:

[A] Lung cancer.
[B] Kidney failure
[C] High cholesterol
[D] Diabetes.
12. Concerning the treatment of hypertension, which of the following statement is false ?

[A]Sodium nitroprusside is a good topical drug
[B]Angiotensin II antagonists tend to cause a cough
[C]An angiotensin converting enzyme inhibitor would be a good choice in a diabetic patient
[D]An alpha 1 adrenergic antagonist would be a bad choice in a patient with prostatic hypertrophy
13. Following are the Red blood cell related markers

[A] MGC, MCH
[B] MCV, MCHC

- [C] MHVC, MBC
[D] NCV, NCHC
14. What is the reference range of Blood urea nitrogen?
- [A] 8-20 mg/dl
[B] 26-35 mg/dl
[C] 3-8 mg/dl
[D] 18-28 mg/dl
15. The kidneys control blood pressure by
- [A] controlling blood volume, and producing substances that all act as vasopressors.
[B] producing natriuretic factors
[C] removing angiotensin converting enzyme (ACE) from the circulation
[D] by producing renin which converts angiotensinogen to angiotensin I
16. Under which class of anti-arrhythmic agents is Flecainide catagorised?
- [A] Class I
[B] Class II
[C] Class III
[D] Class IV
17. Which of the following is NOT a non modifiable risk factor for Stroke?
- [A] Increased age
[B] Male gender
[C] Heridity
[D] Dyslipidemia
18. What is an arrhythmia?
- [A] Accelerated heart beat.
[B] Slow heart beat
[C] Irregular heart beat.
[D] A type of heart cancer
19. What does the QRS wave indicate in electrocardiogram (ECG)?
- [A] The atria are depolarizing.
[B] The ventricles are depolarizing while the atria repolarize
[C] The ventricles are repolarizing.
[D] The heart is at rest.
20. The most common systemic disease causing end-stage renal failure in the Western countries is:
- [A] Amyloidosis
[B] Hypertensive nephrosclerosis
[C] Diabetes Mellitus
[D] Polycystic kidney disease

SECTION – II

- Q 2** Attempt any **TWO** of the following
- A** Explain types and drugs used in treatment of Hypertension. **05**
 - B** Describe clinical presentation and diagnosis of unstable Angina. **05**
 - C** Write types & treatment of Congestive heart failure. **05**
- Q 3** Attempt any **TWO** of the following
- A** Describe risk factors and management of Atherosclerosis. **05**
 - B** Write investigations and treatment for breast cancer. **05**
 - C** Write treatment management of Acute renal failure. **05**

SECTION – III

- Q 4** Attempt any **FOUR** of the following
- A** Describe liver function tests. **05**
 - B** Define: Pharmacoepidemiology. Explain case control epidemiological studies. **05**
 - C** Discuss Drug drug interactions with suitable examples. **05**
 - D** Write a note on self prescribing and OTC use of drugs. **05**
 - E** Define Therapeutic drug monitoring and explain its interpretation. **05**
 - F** Write a note on Clinical toxicology. **05**
- Q 5** Attempt any **FOUR** of the following
- A** Define: Clinical Pharmacy. Describe scope of clinical Pharmacy. **05**
 - B** Write treatment and management for Lymphoma. **05**
 - C** Describe process for effective patient counselling. **05**
 - D** Define Pharmacovigilance and write the methods of causality assessment. **05**
 - E** Write a note on laboratory Renal Function Tests. **05**
 - F** Write down management of hemorrhagic Stroke. **05**
-
