

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
7th Semester of B. Pharm. Examination
University Theory Examination April-May 2018
PH419 Pharmaceutical Technology-II
Date: 02.04.18, Friday Time:1:30p.m. to 4:30p.m. Max Marks: 80

Instructions:

1. There are three sections in this question paper.
 2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
 3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
 4. Figures to right indicate marks.
 5. Draw neat sketches wherever necessary.
-

SECTION – I

- | | | |
|------------|---|-----------|
| Q 1 | Attempt all questions. Each question is of one mark. | 20 |
| 1. | Which of the sweetening agent is sensitive towards moisture?
[A] Saccharin
[B] Aspartame
[C] Cyclamate
[D] Mannitol | |
| 2. | Base absorption in SGC is mainly calculated for
[A] Emulsions
[B] Suspensions
[C] aqueous solutions
[D] Powders | |
| 3. | The limit of total solid content in WFI is ____ppm.
[A]10
[B]100
[C]40
[D]20 | |
| 4. | The limit of total solid content in sterile WFI is ____ppm.
[A]10
[B]0-10
[C]100
[D]20-40 | |
| 5. | _____ does not require sterilization.
[A]Ophthalmics
[B]Injectables
[C]Infusion bags
[D]Oral syrup | |
| 6. | _____has Less blurred vision than ointment.
[A] Gel
[B] Eye cream
[C] Eye disc
[D] All of the above | |
| 7. | Water for injection should not have conductivity of_____
[A] More than 0.5 micromho | |

- [B] More than 1 micromho
[C] More than 1 ohm
[D] More than 0.5 ohm
8. Pyrogen can be destroyed by heating at _____
[A] 121°C at 15 lb Pressure for 15 min
[B] 180 °C for 5 mins
[C] 210 °C for 15 mins
[D] 650°C for 60 seconds
9. The following material is most widely used for ophthalmic formulation containers.
[A] polyethylene
[B] polystyrene
[C] poly vinyl chloride
[D] aluminium
10. The efficiency of HEPA filter to remove particles of diameter greater than _____
[A] 0.10 µm
[B] 0.3µm
[C] 0.5 µm
[D] 1 µm
11. The air velocity of HEPA filter should be _____
[A] 100±20 cm/min
[B] 200±20 ft/min
[C] 100±20 ft/min
[D] 200±20 ft/min
12. Non sterile preparations are manufactured in __ grade environment.
[A] A
[B] B
[C] C
[D] D
13. Water for irrigation is a type of _____
[A] Non sterile preparation
[B] Sterile preparation
[C] Both A and B
[D] None of the above
14. Which of the following filter is used for the preparation of particulate free solutions for parenteral and ophthalmic uses?
[A] Drum filter
[B] Meta filter
[C] Cartridge filter
[D] Meta filter
15. Procain Penicillin G is the preparation of _____
[A] Suspension
[B] Emulsion
[C] Micro emulsion
[D] None of the above
16. Suspensions having particle sizes of suspended solid less than about ____ in size are called as colloidal suspensions
[A] 1 micron
[B] 10 micron
[C] 10 – 20 micron
[D] 20 – 50 micron
17. In nano suspension, Size of the drug particles is less than ____mm
[A] 10
[B] 100
[C] 1
[D] 1000
18. Drug in suspension has higher bioavailability than _____
[A] Semi solid

- [B] Capsule
[C] Solution
[D] Tablet
19. In lip stick preparation, due to high oil content or inferior oil binding_____occurs.
[A] streaking
[B] bleeding
[C] blooming
[D] sweating
20. Sun screen is also known as _____
[A] sunblock
[B] sunburn
[C] sunclose
[D] none of the above

SECTION – II

- Q 2 Attempt any FOUR of the following**
- | | | |
|----------|--|-----------|
| A | Write a brief not on HEPA filter used for sterile preparation. | 05 |
| B | What is terminal sterilization? What should be the layout of this facility in LVP and SVP? | 05 |
| C | Write a brief note on form fill seal (FFS) technology. | 05 |
| D | Explain at least 2 evaluation tests' procedures for sterile dosage forms. | 05 |
| E | Write the brief note on sterile ocular drug delivery system including classification and examples. | 05 |
| F | Give the advantages, disadvantages and definition of aerosol. | 05 |

SECTION – III

- Q 3 Attempt any FOUR of the following**
- | | | |
|----------|--|-----------|
| A | Write a shortnote on Propellant used in aerosol preparation. | 05 |
| B | Define suspension. List out the evaluation tests for it.Give 2 examples of suspension with their therapeutical uses. | 05 |
| C | Mention the working of meter dose inhaler with its neat and clean diagram. | 05 |
| D | List out the quality control tests of pharmaceutical aerosols and explain any 2 in detail. | 05 |
| E | Write the structure and fuction of skin with proper labeled diagram. | 05 |
| F | List out the steps for the preparation of lipstick. | 05 |
- Q 4 Attempt any FOUR of the following**
- | | | |
|----------|---|-----------|
| A | How can we prepare sun screen lotion 200ml using all necessary ingredients? | 05 |
| B | What is the role of pilot batch in scale up process? | 05 |
| C | Write the property/function for which the following excipients are used in liquid dosage form : Antioxidants, Sweeteners, Preservatives, Colourant, Flavors | 05 |
| D | Write the difference between flocculating and deflocculating agents. | 05 |
| E | Write a shortnote on manufacturing suspension including all the instruments. | 05 |
| F | In evaluation of emulsion, which test is used for checking the stability? How? | 05 |
