

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

7th Semester of B. Pharm Examination

University Theory Examination October 2017

PH403 Medicinal Chemistry–III

Date: 02.10.2017, Monday Time: 01:30 a.m to 04:30 p.m Maximum Marks: 80

Instructions:

1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

- Q 1** Attempt any TWO of the following
- A Give the chemical classification of antihypertensive agents with atleast one structures from each class. **10**
- B Write a brief note on molecular docking with its application in drug discovery. **10**
- C I. What is anti coagulants. Enlist drugs with their uses. **05**
II. Explain SAR of calcium channel blockers. **05**
- Q 2** Attempt any TWO of the following
- A I. Explain SAR of thiazide diuretics. **05**
II. Explain SAR of ACE inhibitors. **05**
- B Give chemical classification of antihyperlipidemic agents with atleast one structures from each class, and explain SAR of HMG Co-A Reductase inhibitors. **10**
- C Differentiate 2D QSAR & 3D QSAR. Explain CoMFA in details. **10**

SECTION- II

- Q 3** Attempt any TWO of the following
- A Enlist various strategies in a new lead identification. Explain analogue approach in details. **10**
- B Explain in details: SOSA approach & Screening approach. **10**
- C I. Explain free wilson analysis in details. **05**
II. Give the synthesis of Propranolol and Furosamide. **05**
- Q 4** Attempt any TWO of the following
- A Enlist the physicochemical parameters used in QSAR studies. Explain taft's steric constant and hammett constant in brief. **10**
- B Enlist different model used for QSAR studies. Explain Hans Analysis in details **10**
- C I. Write a short note on Topliss scheme for aromatic and aliphatic substitutions. **05**
II. Explain Craig Plot in details. **05**
