

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

7th Semester of B. Pharm. Examination

University Theory Examination November 2017

PH415 Clinical pharmacy and Pharmacotherapeutics-I

Date: 20.11.2017, Monday

Time: 10a.m. to 1 p.m.

Maximum Marks: 80

Instructions:

1. There are three sections in this question paper.
2. SECTION – I comprises of Question 1. Total marks for Section 1 are 20. There are 20 sub-questions (MCQ type). Answers to SECTION – I are to be given in Answer Sheet for MCQ type questions provided to you. Maximum time allotted for SECTION – I is 30 minutes. Answers to SECTION – I must be written during the first 30 minutes of the examination.
3. Answers to SECTION – II and SECTION – III are to be provided in separate Main Answer Books provided to you.
4. Figures to right indicate marks.
5. Draw neat labeled sketches wherever necessary.

SECTION - I

Q 1 Attempt all questions. Each question is of one mark.

20

1. A 87-year-old woman has been taking digoxin for atrial fibrillation for 15 years, but now complains of nausea and reduced mobility. Her current dose of digoxin is 187.5 micrograms orally daily. Her digoxin level is 3.0 nmol/L (therapeutic range 1.0-2.6 nmol/L). Which of the following is the most appropriate course of action?

- [A] Continue the current dose
- [B] Reduce the dose
- [C] Stop digoxin and restart at a lower dose once the level is therapeutic
- [D] Stop digoxin and restart at a same dose once the level is therapeutic

2. The inability of the left ventricle to pump blood adequately to the body's cells is indicative of _____.

- [A] An embolus
- [B] Heart Attack
- [C] Congestive Heart Failure
- [D] Asystole

3. This is example of Pharmacodynamic drug interaction

- [A] Digoxin + Metoclopramide
- [B] Tetracycline + Antacid
- [C] Warfarin + Vitamine K
- [D] Penicillin + Probenecid

4. One of the following is important laboratory marker for cardiac disorders.

- [A] Rheumatoid factor
- [B] Alkaline phosphatase
- [C] c-reactive protein
- [D] CK-MB

5. Measurement of following is an indicator of chronic glycemic control in patient with diabetes.
 - [A] Fasting glucose
 - [B] Nonfasting glucose
 - [C] HbA_{1c}
 - [D] None
6. Hypersensitivity reaction belong to following type in Rawlin-Thompson classification of adverse drug reaction
 - [A] Type A
 - [B] Type B
 - [C] Type C
 - [D] Type D
7. Extinsic pathway for clotting process can be evaluated int the laboratory by the
 - [A] Activated partial thromboplastin time (APTT)
 - [B] Prothrombin time (PT)
 - [C] Clotting time (CT)
 - [D] Bleeding time (BT)
8. What are Adverse drug reaction?
 - [A] The synergistic effects that are seen when some drugs are administered concurrently.
 - [B] Responses to increased drug doses required to achieve the same physiological outcome.
 - [C] Unintended alternative physiological responses caused by the drug that cause harm to the patient.
 - [D] Harmful chemical interactions between two drugs that are used to treat the same clinical symptoms.
9. Pharmacovigilance is done for monitoring
 - [A] Drug price
 - [B] Unethical practices
 - [C] Drug safety
 - [D] Pharmacology students
10. How are prescription medicines different from OTC ones?
 - [A] They contain higher amounts of active ingredients
 - [B] They don't contain dyes or preservatives
 - [C] They can be toxic
 - [D] They're unsafe for use without medical supervision
11. Uncontrolled hypertension can lead to which of the following:
 - [A] Lung cancer.
 - [B] Kidney failure
 - [C] High cholesterol
 - [D] Diabetes.
12. Concerning the treatment of hypertension, which of the following statement is false ?
 - [A] Sodium nitroprusside is a good topical drug
 - [B] Angiotensin II antagonists tend to cause a cough
 - [C] An angiotensin converting enzyme inhibitor would be a good choice in a

- diabetic patient
[D] An alpha 1 adrenergic antagonist would be a bad choice in a patient with prostatic hypertrophy
13. Following are the Red blood cell related markers
- [A] MGC, MCH
[B] MCV, MCHC
[C] MHVC, MBC
[D] NCV, NCHC
14. What is the reference range of Blood urea nitrogen?
- [A] 8-20 mg/dl
[B] 26-35 mg/dl
[C] 3-8 mg/dl
[D] 18-28 mg/dl
15. The kidneys control blood pressure by
- [A] controlling blood volume, and producing substances that all act as vasopressors.
[B] producing natriuretic factors
[C] removing angiotensin converting enzyme (ACE) from the circulation
[D] by producing renin which converts angiotensinogen to angiotensin I
16. Under which class of anti-arrhythmic agents is Flecainide categorised?
- [A] Class I
[B] Class II
[C] Class III
[D] Class IV
17. Which of the following is NOT a non modifiable risk factor for Stroke?
- [A] Increased age
[B] Male gender
[C] Heridity
[D] Dyslipidemia
18. What is an arrhythmia?
- [A] Accelerated heart beat.
[B] Slow heart beat
[C] Irregular heart beat.
[D] A type of heart cancer
19. What does the QRS wave indicate in electrocardiogram (ECG)?
- [A] The atria are depolarizing.
[B] The ventricles are depolarizing while the atria repolarize
[C] The ventricles are repolarizing.
[D] The heart is at rest.
20. The most common systemic disease causing end-stage renal failure in the Western countries is:
- [A] Amyloidosis
[B] Hypertensive nephrosclerosis
[C] Diabetes Mellitus
[D] Polycystic kidney disease

SECTION – II

- Q 2** Attempt any **TWO** of the following
- A** Explain types and complications of Hypertension. 05
 - B** Describe clinical presentation and diagnosis of Angina. 05
 - C** Write treatment and management of Congestive heart failure. 05
- Q 3** Attempt any **TWO** of the following
- A** Describe risk factors of Atherosclerosis and give diagnostic test for breast cancer. 05
 - B** Write types of leukemia and give treatment of Acute renal failure. 05
 - C** Write a short note on Dialysis. 05

SECTION – III

- Q 4** Attempt any **FOUR** of the following
- A** Describe Haematological laboratory data. 05
 - B** Define: Pharmacoepidemiology. Discuss about descriptive epidemiological studies. 05
 - C** Discuss pharmacokinetic interactions with suitable examples. 05
 - D** Write a note on Medication History. 05
 - E** Define Therapeutic drug monitoring and explain its significance. 05
 - F** Write about general principle of clinical toxicology. 05
- Q 5** Attempt any **FOUR** of the following
- A** Define: Clinical Pharmacy. Describe scope of clinical Pharmacy. 05
 - B** Give difference between case control study and Cohort study. 05
 - C** Describe various communication skills required by clinical pharmacist for effective patient counselling. 05
 - D** Define and write the methods of Pharmacovigilance and what is the role of pharmacist. 05
 - E** Write a note on laboratory Renal Function Tests. 05
 - F** Write symptoms and types of stroke. 05
-
