

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

8th Semester of B. Pharm. Examination

University Theory Examination May 2017

PH412 Pharmaceutical Technology-II

Date: 10.05.2017, Wednesday Time: 1:30 p.m to 4:30 p.m Maximum Marks: 80

Instructions:

1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

- Q 1** Attempt any TWO of the following
- A** What do you mean by propellants? Discuss in detail about classification and suitability of propellant system in aerosol dosage forms. Differentiate spray and aerosol. 10
- B** Write a detailed note on the following:
- (i) Quality control tests with equipments for pharmaceutical suspension 05
- (ii) Metered Dose Inhaler 05
- C** (i) What is macroemulsion? Discuss the manufacturing of emulsion in detail with flow sheet and formulation components. 05
- (ii) Describe the various tests for pharmaceutical emulsion by which it can be identified and evaluated. 05
- Q 2** Attempt any TWO of the following
- A** (i) Describe the various components of aerosol dosage forms with appropriate diagram. 07
- (ii) Explain in detail that how formulation of flocculated suspensions can improve the stability of the suspension dosage forms? 03
- B** Enlist the various characterization and evaluation tests of aerosol dosage form. Explain in detail 'Particle size analysis' and 'Content per spray' for aerosol formulation. 10
- C** Enlist the various solubility enhancement techniques for the solution dosage form and explain any two methods in detail. 10

SECTION- II

- Q 3** Attempt any TWO of the following
- A** Explain in detail the formulation, formulation components with probable excipients, preparation, packaging and application of following cosmetic products: 10
- (a) Lather Shaving cream (b) Tooth Powder
- B** (i) Illustrate the manufacturing of sterile products through aseptic process in the form of flow plan. 05
- (ii) Explain in brief that how 'Form fill seal Technology' is used to prepare parenteral product. 05

- C Which parameters are used to evaluate the sterile dosage forms? Explain 'LAL Test' and 'Particulate air' in detail. 10
- Q 4** Attempt any TWO of the following
- A Write a detailed note on: Skin care products. 10
- B Describe the various formulation components, methodology, application and evaluation parameters of ophthalmic dosage forms. 10
- C What is 'Pilot Plant'? What is the significance of pilot plant for pharmaceutical product manufacturing? Explain the various stages for scale up of the pilot plant batch. 10
-
