

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

8th Semester of B. Pharm. Examination

University Theory Examination May 2016

PH413 Novel Drug Delivery System

Date: 11.05.16 , Wednesday

Time: 10 a.m to 1 p.m

Maximum Marks: 80

Instructions:

1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

Q 1 Attempt any TWO of the following

- A i) Explain the structure and composition of Liposomes and importance of all components. 05
- ii) Give classification of types of liposomes based on structure and application. 05
- B i) Explain in detail various approaches of drug targeting. 05
- ii) Differentiate active and passive targeting with diagram and example. 05
- C Classify methods of preparation of nanoparticles. Explain various methods in detail. 10

Q 2 Attempt any TWO of the following

- A Explain major factors affecting the designing of controlled release dosage form. 10
- B What are the fundamentals and rational of controlled release drug delivery. Explain their classification. 10
- C Write a note on: Monoclonal Antibodies 10

SECTION- II

Q 3 Attempt any TWO of the following

- A Discuss advantages and disadvantages of osmotic pressure controlled drug delivery systems. Explain the factors that affects drug release rate from this delivery system. 10
- B Write advantages of gastro-retentive drug delivery system (GRDDS). Discuss in detail about evaluation methods of GRDDS. 10
- C Discuss formulation consideration and challenges involve in formulation of fast dispersible tablets. 10

Q 4 Attempt any TWO of the following

- A Discuss various approaches used in development of transdermal drug delivery systems. 10
- B Discuss design and application of iontophoretic drug delivery system. Differentiate between sonophoresis and iontophoresis. 10
- C Discuss various advantages and limitation of Immediate release drug delivery systems 10
