

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

8th Semester of B. Pharm Examination

October-2015

PH410 Medical Chemistry – IV

Date: 12.10.2015, Monday

Time: 01:30 p.m to 04:30 p.m

Maximum Marks: 80

Instructions:

1. Figures to right indicate marks.
2. Section wise separate answer book to be used.
3. Draw neat sketches wherever necessary.

SECTION- I

Q 1 Attempt any TWO of the following

- A Give the classification of Anti-neoplastic agents with structures. Explain chemistry of anti-metabolites. Give the synthetic pathway of methotrexate. 10
- B i. Write a chemistry & mechanism of action of quinoline alkaloids as an anti-malarial agents 05
- ii. Write a chemistry of anti-amoebic agents 05
- C Give the classification of sulphonamides with their structures. Explain Structural Activity Relationship (SAR) & Mechanism of action of Sulphonamides. 10

Q 2 Attempt any TWO of the following

- A Give the classification of antimycobacterium agents with their structure. Explain 1st line agents with their mechanism of action. 10
- B i. Explain SAR of Quinolones. 05
- ii. Enlist the drug used as antifungal agents with their structure. 05
- C i. Write a shortnote on anti HIV agents. 05
- ii. Write a short note on Immunosuppressive agents. 05

SECTION- II

Q 3 Attempt any TWO of the following

- A Write a mechanism of action, SAR and synthesis of Chloramphenicol. 10
- B i. Write a chemistry of macrolide antibiotics. 05
- ii. Explain deconvolution in combinatorial synthesis. 05
- C Explain SAR, Mechanism & Toxicities of Tetracyclin. 10

Q 4 Attempt any TWO of the following

- A What is Combinatorial Chemistry ? Explain principle and methodology of combinatorial chemistry. 10
- B i. Write a brief note on bioinformatics. 05
- ii. Write a detail note on Quantitative Structure Pharmacokinetic Relationship (QSPR). 05
- C What is β -lactam Antibiotics? Give the Classification, Mechanism of action & SAR of penicillin derivatives. 10
