

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

First Semester of M. Pharm (Clinical Pharmacy)

University Theory Examination January 2018

PHCP003 – Advance Pharmacokinetics & Clinical Applications

Date: 09/01/2018, Tuesday

Time: 10.00 a.m to 1.00 p.m

Maximum Marks: 70

Instructions:

1. Q.1 and Q.4 are compulsory.
2. Figures to right indicate marks.
3. Section wise separate answer book to be used.
4. Draw neat sketches wherever necessary.

SECTION-I

- Q.1** **A)** Discuss pharmacokinetic drug interactions due to alterations in protein binding. **05**
- B)** Explain how inhibition of biliary excretion produces drug interactions with examples. **05**
- Q.2** **A)** Describe the role of various transporters in producing pharmacogenetic variations in response to drug treatments. **05**
- B)** Write a detail note on gene therapy **05**

OR

- Q.2** **A)** Explain in brief about Inhibition and Induction of Drug metabolism. **05**
- B)** Discuss the concept of Pharmacokinetic/Pharmacodynamic Correlation in drug therapy **05**
- Q.3** **Answer the following: (Any three)** **15**
- A)** Explain in brief about Protocols for Therapeutic drug monitoring
- B)** Discuss the Pharmacovigilance concepts along with national pharmacovigilance program of India in short
- C)** Study the Therapeutic drug monitoring of drugs used in cardiovascular diseases.
- D)** Study the Therapeutic drug monitoring of drugs used in Psychiatric conditions.

SECTION-II

- Q.4 A) Specify General approach for dosage adjustment in Renal disease. 05
B) Discuss the regulatory aspects of bio availability and bioequivalence studies 05
- Q.5 A) Discuss the dosage adjustment for uremic patients. 05
B) How the Hepatic disease affect the pharmacokinetics of drugs, explain with examples? 05

OR

- Q.5 Discuss the Drug dosing in the elderly and pediatric patients. How to convert from intravenous to oral dosing? (with examples) 10
- Q.6 Answer the following: (Any three) 15
- A) Discuss the concept of Drug dosing in the Pregnancy & Lactation condition.
 - B) Illustrate with examples about the dose and dosing intervals?
 - C) Explain about measurements of bio-availability with concept of Bioequivalence
 - D) Explain in brief about experimental Designs in Bioequivalence study
-
