

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

First Semester of M. Pharm (Pharmacology and Toxicology)

University Theory Examination January 2018

PHCT001 – Biological Evaluation of Drugs

Date: 05/01/2018, Friday

Time: 10.00 a.m to 1.00 p.m

Maximum Marks: 70

Instructions:

1. Q.1 and Q.4 are compulsory.
2. Figures to right indicate marks.
3. Section wise separate answer book to be used.
4. Draw neat sketches wherever necessary.

SECTION-I

- Q.1 A) Enumerate General Principles of screening for laboratory animals along with Breeding of lab animals 05
- B) Write a brief note on High throughput screening 05
- Q.2 A) Differentiate Biological standardization of Hepatitis A & B vaccines 05
- B) Study on Combinatorial chemistry and Correlation between invitro and invivo screens. 05

OR

- Q.2 Provide a detail note on Animal strains and their applications, knock out and transgenic animals 10
- Q.3 Write a note on: (Any three) 15
- A) Enlist the different experimental models used for screening of Antibiotics and Antiviral drugs
- B) Explain invivo models for respiratory disorders (for guinea pigs and rats).
- C) Compare and contrast experimental models for Parasympathomimetic and Sympathomimetic drugs.
- D) Give a short note on Proteomics and Array technology

SECTION-II

Q.4 A) Enlist the different methods of screening for Antiepileptics and explain Kindled rat seizure model. **05**

B) Provide pathogenesis of Inflammation and Describe any two screening methods for Antiinflammatory drugs. **05**

Q.5 A) Differentiate between screening models for Anti Parkinson's and Anti Alzheimer drugs **05**

B) Enlist behavioural tests screening methods for Antipsychotic drugs and explain any one method in detail. **05**

OR

Q.5 Explain the following screening method or model in detail: **10**

I. Experimental induced Insomnia in rats

II. Genetic hypertension in rats

III. Randall – Selitto test for Analgesic drugs

IV. How to differentiate peripheral and central effects of Analgesic drugs?

Q.6 Answer the following (Any three) **15**

A) Classify experimental cardiac arrhythmic models and discuss any one in brief.

B) How Antiatherosclerosis drugs are evaluated?

C) Discuss screening models of Cancer in short.

D) Enlist different experimental models for Antifertility agents and Antiglaucoma.
