

ACADEMIC REGULATIONS & SYLLABUS 2024 -25

**Faculty of Computer Science & Applications
Smt. Chandaben Mohanbhai Patel Institute
of Computer Applications
Bachelor of Computer Applications (B.C.A.) Programme
(as per NEP-2020)**

Charotar University of Science and Technology (CHARUSAT)
CHARUSAT Campus, At Post: Changa – 388421, Taluka: Petlad, District: Anand
Phone: 02697-247500, Fax: 02697-247100, Email: info@charusat.ac.in
www.charusat.ac.in

ACADEMIC RULES

To ensure uniform system of education, duration of under graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

1. System of Education

The Semester system of education should be followed across the Charotar University of Science and Technology (CHARUSAT) at Bachelor's levels. Each semester will be at least 90 working days' duration. The Curriculum and Credit Framework for Undergraduate Programmes (CCFUP) is based on the University Grants Commission's (UGC) guidelines, with a student-centric focus, flexible choice-based credit system, and a multidisciplinary approach. This framework also provides multiple entry and exit options, facilitating students to align their education with their career aspirations by choosing subjects/fields of their interest. Every enrolled student will be required to take a specified load of course work in the chosen course of specialization and also complete a project/dissertation if any.

2. Certification and Duration of Study with Multiple Entry Multiple Exit (MEME)

The undergraduate degree will have a flexible duration of either three or four years, with multiple exit options during this period. The table below outlines the various certifications a student can earn at different stages of their undergraduate study:

Table-1 Certification and Duration on MEME

Duration of Study	Semesters Completed	Certification Earned
4 Years	Eight Semesters (4 Academic Years)	Bachelor's Degree (Honours)
		Bachelor's Degree (Honours with Research)
3 Years	Six Semesters (3 Academic Years)	Bachelor's Degree
2 Years	Four Semesters (2 Academic Years)	Undergraduate Diploma
1 Year	Two Semesters (1 Academic Year)	Undergraduate Certificate

In consonance with the National Education Policy (NEP) 2020 and the guidelines of the University Grants Commission (UGC), Charotar University of Science and Technology (CHARUSAT) implements the Multiple Entry and Multiple Exit (MEME) scheme in their Bachelor of Computer Applications (BCA) programme. This structure provides students with the flexibility to enter, exit, and re-enter the programme at various stages, each with its corresponding certification mentioned above in Table-1.

Table 2: Multiple Entry Multiple Exit options

NCrF Credit Levels	Qualification Title	Credit Requirement	Programme Exit	Additional Requirement	Re-entry to Degree Programme
4.5	UG Certificate	48	After Year 1	Completion of one 4-credit of summer internship in core specific NSQF defined course during summer	Within three years of exit

				vacation of Year 1	
5	UG Diploma	92	After Year 2	Completion of one 4-credit of summer internship in core specific NSQF defined course during summer vacation of Year 2	Within three years of exit
5.5	Three Year Bachelor Degree	132	After Year 3	Compliance with minimum credit requirements specified in regulations	Within three years of exit
6	Bachelor's Degree with Honors	176	After Year 4	Compliance with minimum credit requirements specified in regulations	NA
6	Bachelor's Degree with Honors with Research	176	After Year 4	Compliance with credit requirements as specified in regulations	NA

Students who are opting for exit at any level, shall re-enter the institution to complete the UG Degree, where they had left off. They can re-enter within three years of exit and complete the degree programme within the stipulated maximum period of seven years from the date of admission to UG programme.

3. CREDIT FRAMEWORK FOR BCA (Bachelor of Computer Applications)

Arrangement of Credit Distribution Framework for three/four years Honors/Honors with Research Degree Programme with Multiple Entry and Exit Options.

(As per GR No: KCG/admin/2023-24/0607/kh.1, Sachivalaya, Gandhinagar, Date-11/07/2023)

Sr.No .	Categories of Courses	Credit Requirement for each Category				
		Certificate (1 Year)	Diploma (2 Years)	3-Year UG	4-Year UG (Honors)	4-Year UG (Honors+Research)

*OJT – On the Job Training Major Core Courses Only					* RP – Research Project With					

2 credit course on Community Service/NSS/NCC/Sports as a compulsory course to be undertaken by students during the initial two years of the study. This course will not affect the overall SGPA/CGPA of the students.

5. Eligibility & Mode of Admissions

Eligibility of a candidate and mode of admission to the programme will be according to the regulations for admission committee decided by Government of Gujarat from time to time.

6. Programme structure and Credits

A student admitted to a program should study the course and earn credits specified in the course structure.

7. Attendance

7.1 All activities prescribed under these regulations and listed by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student from attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few

sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Dean/Principal.

7.2 Student attendance in a course should be 80%.

8. Course Evaluation

8.1 The performance of every student in each course will be evaluated as follows:

8.1.1 Continuous and Comprehensive Evaluation using various components such as Assignments, Unit Tests, Sessional Test, Case Study, Attendance, Practical Test, Viva etc. by the course faculty member(s). The weightage of these components is 50% of the marks for the course; and

8.1.2 Semester-End-Evaluation by the University through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these, for 50% of the marks for the course.

8.2 University Examination

8.2.1 The final examination by the University for 50% of the evaluation for the course will be through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these.

8.2.2 In order to earn the credit in a course a student has to obtain grade other than FF.

8.2.3 Performance of Continuous and Comprehensive Evaluation(CCE) and Semester-End-Examination(SEE) Examination will be done on the grading system.

9. Grading

The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are defined as follows:

Grading Scheme Range of Marks (%)	96.0-100	86.0-95.9	76.0-85.9	66.0-75.9	56.0-65.9	46.0 – 55.9	36.0 – 45.9	Below 36.0	Absent
Letter Grade	O (Outstanding)	A+ (Excellent)	A (Very Good)	B+ (Good)	B (Above Average)	C (Average)	P (Pass)	F (Fail)	Ab (Absent)
Grade Point	10	9	8	7	6	5	4	0	0

$SGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i G_i is the Grade Point for the course i and $i = 1$ to n , n = number of courses in the semester.

$CGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i G_i is the Grade Point for the course i and $i = 1$ to n , n = number of courses of all semesters up to which CGPA is computed.

The minimum passing marks for each pattern of evaluation are 36% .

10. Detention Rule

A student will be promoted to next year only if he/she has cleared all the courses of the year he/she is studying in. Awards of Degree.

10.1 Every student of the programme who fulfils the following criteria will be eligible for the award of the degree:

10.1.1 He should have earned at least minimum required credits as prescribed in course structure; and

10.1.2 He should have cleared all evaluation components in every course;

11. Award of Class

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Distinction:	CGPA ≥ 7.0 & ≤ 10.0
First class:	CGPA ≥ 6.0 & < 7.0
Second Class:	CGPA ≥ 5.0 & < 6.0
Pass Class:	CGPA ≥ 3.60 & < 5.0

12. Transcript

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA, class obtained, etc.

Choice of Courses

Undergraduate students will make course selections from the various lists and that will fall into categories as outlined below:

Major Course:

This is the primary subject area a student wishes to delve into during their undergraduate course. It is the area of study that the student is most passionate about and may wish to pursue as a career.

Minor Course:

This is a secondary area of study that complements the student's chosen Major. Students who complete a sufficient number of courses in a discipline or an interdisciplinary area of study other than their chosen Major will qualify for a Minor in that discipline or interdisciplinary area.

Multidisciplinary Course:

All undergraduate students are required to complete three introductory-level courses relating to any of the broad disciplines. These courses aim to broaden the student's intellectual experience and form part of liberal arts and science education.

Ability Enhancement Course (AEC):

These are Modern Indian Language (MIL) & English language courses focused on enhancing language and communication skills. The courses aim to enable students to acquire and demonstrate core linguistic skills, including critical reading and expository and academic writing skills. The courses also emphasize the development and enhancement of skills such as communication, and the ability to participate in/conduct discussion and debate.

Skill Enhancement Courses (SEC):

These courses aim to impart practical skills, hands-on training, soft skills, etc., to enhance the employability of students. The institution may design courses as per the students' needs and available institutional resources.

Value Added Course (VAC):

These courses are designed to provide extra skills or knowledge beyond the standard curriculum, often tailored towards enhancing employability, promoting entrepreneurship, or developing personal and professional skills.

The choice based credit system provides flexibility in designing curriculum and assigning credits based on the course content and hour of teaching. The choice based credit system provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective and open elective courses. The CBCS provides a cafeteria type approach in which the students can take courses of their choice and adopt an interdisciplinary

approach to learning. The courses shall be evaluated on the grading system, which is considered to be better than the conventional marks system.

Core Courses

A Course which shall compulsorily be studied by a candidate to complete the requirements of a degree / diploma in a said programme of study is defined as a core course. Following core courses are incorporated in CBCS structure:

A. University Core Courses(UC):

University core courses are compulsory courses which are offered across university and must be completed in order to meet the requirements of programme.

B. Programme Core Courses(PC):

Programme core courses are compulsory courses offered by respective programme owners, which must be completed in order to meet the requirements of programme.

Elective Courses

Generally, a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline of study or which provides an extended scope or which enables an exposure to some other discipline / domain or nurtures the candidates

proficiency / skill is called an elective course. Following elective courses are incorporated in CBCS structure:

A. University Elective Courses(UE):

The pool of elective courses offered across all faculties / programmes.

B. Institute Elective Course (IE)

Institute elective courses are those courses which any students of the University/Institute of a Particular Level (PG/UG) will choose as offered or decided by the University/Institute from time-to-time irrespective of their Programme /Specialization.

C. Programme Elective Courses (PE):

The programme specific pool of elective courses offered by respective programme.

Credit Hour Allocation for Different Course Types

Definition and Standardization

The workload associated with a course will be measured in terms of credit hours. One credit hour is equivalent to one hour of instructional time per week over the duration of a semester (minimum 15 weeks).

Types of Course Components

Courses can be comprised of one or more of the following components:

1. Lecture
2. Practicum
3. Seminar/ Internship/ Studio Activities/ Field / Practice /Projects / Community Engagement and Service

Credit Hours per Course Component

The weekly and semester-wise instructional hours associated with each credit for different components are as follows:

Credit Hours per Course Component

Course Component	Weekly Hours per Credit	Total Hours in a 15-week Semester
Lecture	1 Hour	15 Hours
Practicum	2 Hours	30 Hours
Internship, Field Practice/Projects, Community Engagement and Service/NCC/NSS/Sports	2 Hours	30 Hours

Course Categories

Courses in the study program are categorised based on the nature of the learning activities. These include:

Lecture courses: These involve expert-led sessions related to a specific field.

Practicum or Laboratory work: These apply previously learned principles/theories in practical projects or lab activities.

Internship: These involve professional activities or work experiences, typically supervised by experts from the relevant external entities.

Field practice/projects: These involve field-based learning or projects supervised by external experts.

Community engagement and service/NCC/NSS/Sports: These involve activities exposing students to societal socio-economic issues, facilitating the application of theoretical and practical knowledge to real-life problems. It also involves skills and physical fitness among students through indoor & outdoor sports, field & track events.

Vision, Mission, PEOs, POs and PSOs

Vision

To become a leading institution in the field of computer applications and contribute in national efforts of computerizing public systems

Mission

To produce competent computer professionals with the ability to face future challenges.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

The graduates will:

PEO1: Be able to understand the requirement of computing problem and implement an effective solution.

PEO2: Be able to successfully take up various available career options.

PEO3: Be able to continuously learn in their preferred domains.

PEO4: Be able to acquit themselves in ethical and professional manner while demonstrating effective skills.

PROGRAM OUTCOMES (POs)

The Graduate of Computer Science and Applications will be able to:

PO1: Computational Knowledge: Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge to provide effective solution in the area of computing.

PO2: Problem Analysis: Identify, formulate, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

PO3: Design /Development of Solutions: Design and evaluate solutions for computing problems, and design and evaluate systems, components, or processes that meet specified needs by considering several societal aspects.

PO4: Modern Tool Usage: Create, select, adapt and apply appropriate techniques, resources, and modern computing tools for any computing activities, with an understanding of the limitations.

PO5: Professional Ethics: Understand and commit to professional ethics, responsibilities, and norms of professional computing practice.

PO6: Life-long Learning: Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.

PO7: Project management: Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO8: Communication Efficacy: Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

PO9: Societal and Environmental Concern: Understand and assess societal and environmental issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.

P10: Individual and Team Work: Function effectively as an individual and as a member or a leader in diverse teams and in multidisciplinary environments.

P11: Innovation and Entrepreneurship: Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

PROGRAM SPECIFIC OUTCOMES

At the end of the programme, the student should be able to

PSO1: Analyze, evaluate and formulate workable computing solutions to real world problems using computing methods.

PSO2: Apply proficiencies of communication, teamwork and management skills with spirit of entrepreneurship.

SALIENT FEATURES

- Four Years unique programme as per National Education Policy-2020.
- Have a flexible duration of either three or four years, with multiple exit options during this period.
- Provides students with the flexibility to enter, exit, and re-enter the programme at various stages, each with its corresponding certification.
- Award of Degree:
 - **UG Certificate** (Candidate wish to Exit after the First Year with additional requirements of 4 credits summer internship)
 - **UG Diploma** (Candidate wish to Exit after the Second Year additional requirements of 4 credits summer internship)
 - **UG Degree** (Candidate wish to Exit after the Third Year)
 - **UG Honors Degree or UG Honors with Research Degree** (Candidate finishes all Four Years)
- Programme is designed with various categories of courses such as Major, Minor, Multidisciplinary, Ability Enhancement, Skill Enhancement, Value Added, Community engagement and service/NCC/NSS/Sports based on Choice Based Credit System(CBCS).
- Focus on student-centered learning.
- Problem-based learning and industry-relevant curriculum.
- Industry visits, seminars, workshops, and guest lectures by eminent researchers and industry practitioners.
- Active student clubs and bodies.
- The multi-cultural and vibrant teaching environment.

Total Credits of Programme (8 Semesters): 186

CAUC101: Foundation of Programming

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA , certification courses, development of projects etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In theory lectures, students will develop problem-solving skills through algorithms and flowcharts, understanding C programming's structure to create basic programs. The curriculum covers conditional and iterative statements, array manipulation, and user-defined functions, with advanced topics like pointers and structures. Emphasis is placed on hands-on experience, focusing on algorithmic thinking and creating flowcharts. Students will learn to write effective C code, mastering variables, input/output operations, and advanced concepts, promoting independent learning and real-world application.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Programming Basics	08
2	Introduction to C	12
3	Expressions and Control Statements	10
4	Arrays and Strings	10
5	Introduction to Functions	10
6	Pointers & Basic of the structures	10

Total Hours (Theory): 60
Total hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Programming Basics

Hours 08

Introduction to algorithm, Key features of algorithm, Introduction to flow charts, Significance of flow chart, Advantages and limitation of flow chart, Introduction to programming languages, Introduction to editor, compiler, and translator.

Unit II: Introduction to C

Hours 12

Introduction, characteristics of C, Structure of C Program, writing first C program, Files used in C program, Compiling and Executing C program. Basic data types in C, User define data types, Variables in C, Declaring and initializing variables in C, Constants, Input / Output statements in C, Operators - arithmetic, relational, logical, assignment, increment - decrement, conditional, Bitwise, comma operator, size-of operator, operator precedence chart.

Unit III: Expressions and Control Statements

Hours 10

Arithmetic expressions, evaluation of expressions, type conversions in expressions, operator precedence and associativity, mathematical functions. Type conversion and casting; Introduction to decision control statements, Conditional and branching statements, loop, nested loop, Break, continue and go to statement.

Unit IV: Arrays and Strings

Hours 10

Arrays: One-dimensional, two-dimensional, Handling of Character Strings: Declaring and initializing string variables, reading string from terminal, writing string to screen, string handling functions, table of strings.

Unit V: Introduction to Functions

Hours 10

Need for user-defined functions, the form of c function, return values and their types, calling a function, category of functions, handling of non-integer functions, nesting of Functions, recursion, functions with arrays.

Unit VI Pointers & Basic of the structures

Hours 10

Understanding the Computer's Memory, Introduction to Pointers, Declaring Pointer Variables, Pointer Expressions and Pointer Arithmetic, Null Pointers, Generic Pointers, passing arguments to Function using Pointers, Pointers and Arrays, passing an Array to

a Function, Difference between Array name and Pointer, Pointers and Strings, Array of Pointers, defining a structure, declaring structure variables, accessing structure members, structure initialization.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Programming and IDE	Overview of programming languages, algorithms, flowchart, Setting up the development environment, Introduction of development environment.
2-3	Basic of C programming	Structure of C Program, writing first C program, Files used in C program, Compiling and Executing C program; Basic data types in C. Variables in C, Declaring and initializing variables in C, Constants, Input / Output statements in C
4-5	Operators, Expressions evaluation & type conversions.	Operators - arithmetic, relational, logical, assignment, increment - decrement, conditional, Bitwise and special, comma operator, size-of operator, operator precedence chart. Arithmetic expressions, evaluation of expressions, type conversions.
6-7	Decision-making statements and looping statements	Decision-making statements (if, else if, else) and nested decision-making statements, Switch statement, Looping statements (for, while, do-while), nested looping statements Break and continue statements.
8-9	Arrays	Understanding arrays, one-dimensional array, two-dimensional arrays, practical exercises of one-dimensional and two-dimensional array.
10-11	String and String functions	Declaring and initializing string variables, reading string from terminal, writing string to screen, string-handling functions.
12-13	User defined functions	Introduction to functions, Function declaration, definition, and calling, Parameters and return values. Scope and lifetime of variables, Recursion.
14-15	Pointers & Structures	Introduction to pointers, Pointers and arrays, Pointer arithmetic, Defining and declaring structures, Accessing structure members

Total hours (Practical): 60

Core Books:

1. ReemaThareja: Computer Fundamentals and Programming in C, 2nd Edition, Oxford University press, 2017
2. PradipDey and Manas Ghosh. "Programming in C", Second Edition, Oxford University Press.
3. E. Balagurusamy: Programming in C, 7th Edition.

Reference Books:

1. Brian W. Kerighan and Dennis M. Ritchie : The C Programming Language, Prentice Hall.
2. PradipDey, Manas Ghosh: Programming in C, 4th Edition, Oxford University press.
3. Herbert Schildt: The complete reference C, Fourth edition, Tata McGraw Hill
4. YashwantKanetkar: Let us C, 13th Edition, BPB publication.

Web References:

1. <https://cprogrampracticals.blogspot.com/p/basic-concepts.html> [For basic c programming practical]
2. <https://www.programtopia.net/c-programming/docs/operators-expressions> [For operators and expressions in C]
3. <https://www.javatpoint.com/functions-in-c> [For functions]
4. <https://www.programiz.com/c-programming> [For basic c programming practical]
5. <https://www.javatpoint.com/c-pointers> [pointers in c]
6. <https://www.programiz.com/c-programming/c-structures> [structures in c]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Be able to solve problems using algorithms and flowcharts.

CO2 :	Learn about the structure of C program and able to develop simple programs using the C Programming language with data types, variables and constants.
CO3 :	Gain the knowledge of different conditional and iterative statements and expressions.
CO4 :	Explore the utilization and manipulation of numbers and characters arrays both.
CO5 :	Be able to understand user define function. Also, learn Programing-using Array with Pointer and Structure.

CAUC102: Fundamentals of Web Designing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: Basic concepts of web.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for design and develop entire web sites using several web designing tools and HTML scripting language.

Outline of the Course:

Week No	Practical	Description
1	Basic Construction of an HTML & HTML5 Page, HTML Text Editors, HTML Building blocks.	Learn basic concepts of web page design.
2	Basic HTML tags – Text formatting tags, Heading tags, paragraph tags, division tag, Span tags, Break line tag, Binding space in HTML.	Get familiar with different tags and attributes which is used to add the text in a web page.
3	Controlling Font size and color, Adding Table – Table tag.	Learn user interface designing using Table Layout, change font style, color etc.
4	Grouping and merging table rows and columns. Adding List – ordered, unordered and definition list.	Able to display the data in various formats and design different types of list in the table.

5	Adding Image, Adding links - Changing link colors, Email link.	Learn to add images and link in the web page.
6	Embedding audio and video, Adding Field sets.	Able to add multimedia in web page using internal and external methods.
7	Adding Form: Form tag, Action, Method. Basic form controls.	Learn basic form elements and when and where to apply it.
8	Textbox, Password field, Radio Button, Checkbox, Multiple line text area, file upload.	Use various types basic form controls with types of form input elements.
9	Various types of buttons – submit, reset, image, simple button.	Learn various types of buttons to make it more interactive.
10	HTML5 input elements - Color, Number, Date, Month.	Learn new input types in HTML5.
11	Week, Time, date time-local, Email, url, range, search.	Learn to add defining inputs and minimum and maximum range to make the form attractive.
12	Data list, output, progress, meter.	Learn to add list and provide progress horizontal view and range with output.
13	Regular expression, HTML5 new attributes – Placeholder, Required.	Learn HTML 5 form element to provide user side web form validation.
14	Pattern, Autocomplete, Autofocus, novalidate, form novalidate.	Learn HTML 5 new form properties.
15	Form action, form method, spellcheck, content editable.	Learn HTML 5 to user submit the form and redirect the form data to selective method.

Total hours: 60

Text Books:

1. Powel Thomas: HTML - The Complete Reference, 3rd Edition, McGraw-Hill Education – Europe, 2018.
2. DT Editorial Services: HTML 5 Black Book, 2nd Edition, Dreamtech Press, 2016
3. Matt West: HTML 5 Foundations, Wiley publication, 2013
4. Farrar: HTML Example book, BPB, 2007.

Reference Books:

1. David DuRocher : HTML and CSS QuickStart Guide, Paperback, 2021.
2. Laura Lemay, Rafe Colburn, Jennifer Kyrnin : Mastering Html, CSS & JavaScript Web Publishing, Paperback, 2016.
3. Whyte: Basic HTML, 2nd Edition, Payne-Gallway, Oxford, 2003.
4. Shelly Woods: HTML introductory concepts and techniques, 5th Edition, Course Technology, 2009.
5. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.

3. www.htmlgoodies.com/ [For HTML resources]
4. <https://developer.mozilla.org/en-US/learn/html> [For HTML best practices]

Course Outcome: Upon successful completion of the course, student will:

CO1:	Able to understand basic construction of HTML & HTML5 document and started using basic tags.
CO2:	Able to Add content using various tags and format the content in table & list.
CO3:	Able to design links and multimedia elements such as image, audio, video.
CO4:	Able to design a web page form using HTML & HTML5.
CO5:	Able to apply validation using HTML5 attributes.

Course Articulation Matrix:

CAUE101: Computer Essentials and Information Technology

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: Operating System Concepts and Network Technology

Methodology, Pedagogy & Andragogy: During lectures covering these topics, students will: Understand computing's historical evolution and key figures. Grasp computer organization, architecture, and processor functions. Learn storage technologies and memory management for optimization. Acquire basics of input/output devices for computer interaction. Explore Internet and Web fundamentals and emerging trends. Facilitate discussions, integrate real-world examples, and encourage self-directed exploration of advanced computing concepts. Adapt teaching strategies to cater to diverse learning styles and levels of expertise in the rapidly evolving field of computing.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Computers: History and Evolution of Computing	10
2	Understanding of Computer Organization, Architecture and Processor	10
3	Computers Storage and Memory Management	11
4	Fundamentals of Input and Output Devices	11
5	Concepts of Internet and World Wide Web	10
6	Emerging Fundamentals of Computing Environment	08

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to Computers: History and Evolution of Computing **Hours 10**

Introduction to computer, Simple model of a computer, Computer Hardware, Computer Software, Characteristics of computers, Evolution of computers, Generation of computers, Classification of computers, computing concepts, The computer System, Applications of computers.

Unit II: Understanding of Computer organization, Architecture and Processor **Hours 10**

Introduction to computer organization, Central Processing Unit, Introduction to processor, Internal communications, Inter connection of units, Processor to memory communication, I/O Devices to processor communication, The Bus, Instruction set.

Unit III: Computers Storage and Memory Management **Hours 11**

Introduction to computer storage, Memory cell, Memory organization and Memory Representation, Random access memory, Read only memory, Storage system, Magnetic storage system, Optical storage system, Magneto optical system, Solid-state storage system, Storage evaluation criteria, Memory Hierarchy.

Unit IV: Fundamentals of Input and Output Devices **Hours 11**

Introduction to Input device, Traditional computer I/O devices: Keyboard, Computer mouse, Display unit. Other Input devices: Touch pad, Touch Screen, Magnetic Ink Character Recognition (MICR), Optical Mark Reading and Recognition (OMR), Flatbed Scanner, Optical Character Recognizer, Bar Code. Computer Output Devices: Flat Panel Display Technology, E-ink Display, Printers, Inkjet Printers, Laser Printers, Dot Matrix Printers, Line Printers, Plotters. Digital Camera, Voice Recognition System.

Unit V: Concepts of Internet and World Wide Web **Hours 10**

Introduction to Internet, History of Internet, Internet applications, Understanding the World Wide Web, Browsing Internet, Using a Search Engine, Email Service. Web Concepts: Web Browser, HTML, Web Page, Website, Web Server, ISP, Hyperlink, DNS, URL. Internet Protocols: TCP/IP, SMTP, PPP, FTP, SFTP, HTTP and HTTPS, TELNET, POP3, IPV4, IPV6, ICMP, UDP, IMAP, SSH, Gopher.

Unit VI: Emerging Fundamentals of Computing Environment **Hours 08**

Overview of computing environment, Current computing scenario, Types of computing environment: Personal computing environment, Time-sharing computing environment, Client-Server computing environment, Distributed computing environment, Grid

computing environment, Cloud computing environment, Cluster computing environment. Advantages and Disadvantage of various computing environment.

Core Books:

1. E Balagurusamy: Fundamentals of Computers: Tata McGraw Hill Education Private Limited
2. V.Rajaraman, Neeharika Adabala: Fundamentals of Computers: PHI, 2015.
3. Margaret Levine Young: The Complete Reference- Internet: Tata McGraw Hill Education Private Limited

Reference Books:

1. Computer Fundamentals: Pradeep K. Sinha & Priti Sinha" by Pradeep K. Sinha and Priti Sinha
2. Computers Made Easy: From Dummy to Geek" by James Bernstein
3. Computer Organization and Design: The Hardware/Software Interface" by David A. Patterson and John L. Hennessy

Web References:

1. <https://artoftesting.com/computer-fundamentals-tutorial>

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Students will gain an understanding of the historical progression and evolutionary milestones in computing.

CO2 :	Students will comprehend computer organization, architecture, and processor functionalities.
CO3 :	Students will learn about computer storage mechanisms and memory management techniques.
CO4 :	Students will grasp the fundamentals of various input and output devices utilized in computing.
CO5 :	Students will acquire knowledge about the concepts underlying the Internet and the World Wide Web. Explore the Emerging trends and principles shaping the contemporary computing environment.

CAUE102 : Business Organization and Principles of Management

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of business organization and principles of management. Students will be introduced to business ownership, business services, emerging models of business, business ethics and its social responsibilities, and entrepreneurship development. Students will give practical exposure in form of case study and by visit to Entrepreneurship and Innovation Centre.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Forms of Business Ownership	09
2	Business Services	11
3	Emerging Modes of Business	09
4	Principles of Management	11
5	Business Ethics and its Social Responsibilities	09
6	Entrepreneurship Development	11

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Forms of Business Ownership

Hours 09

Sole proprietorship, Joint Hindu Family Business – meaning, features, merits and demerits, Partnership – meaning, types, registration, types of Partners, Co – Operative societies – types, merits and limitations, Company – Private Ltd, Public Ltd – merits, limitations, Starting a business – Basic factors, Choice of forms of business organizations.

Unit II : Business Services

Hours 11

Nature and types of Business services – Banking, Insurance, Transportation, Warehousing, communication. Meaning, role, Functions of Banking, Insurance, Postal and Telecom services, Warehousing, Transport, Hospitality and Tourism Services.

Unit III : Emerging Modes of Business

Hours 09

E – business – Meaning, Scope and benefits, Resource required for successful E – Business implementation, On – line transactions, payment mechanism, Security and safety of business transactions, Outsourcing – Concept, need and scope.

Unit IV : Principles of Management

Hours 11

Definition and nature of management, purpose of management, managerial functions at different levels, management- art or science, planning, planning process & purpose, steps of planning, goal setting, decision making, organizing function, organizing process, formal and informal organizations, centralization and decentralization organization, staffing function, staffing process, recruitment, selection, training, performance appraisal, directing function, concepts of leading, motivating, communicating, qualities of leaders, controlling, control process, control techniques.

Unit V : Business Ethics and its Social Responsibilities

Hours 09

Concept of social responsibility, cases for social responsibility, responsibility towards different interest groups, owners, investors, employees, consumers, government, community, public in general, business ethics – concept and elements, business and environmental protection.

Unit VI : Entrepreneurship Development

Hours 11

The concept and introduction, personality and mindset of an entrepreneur, difference between an entrepreneur, intrapreneur and manager/executive, entrepreneurial ecosystem, types and functions of an entrepreneur- entrepreneurial motivation, entrepreneurship development programs, business idea generation, business plan and detailed project report, funding and support aspects.

Core Books:

1. Harold Koontz & Heinz Weihrich: Essentials of Management, Ninth Edition, Tata McGraw Hill Publishing, 2012.
2. Dr. F. C. Sharma, Dr. D. Chandra, Anju Agarwal: Business Organization, SBPD Publications, 2020.

Reference Books:

1. Tripathy & Reddy: Principles of Management, fifth edition, Tata McGraw Hill Publishing, 2015.
2. Robbins , Decenzo & Coulter: Fundamentals of Management, eighth edition, Pearson Education, 2013.
3. Y.K. Bhushan: Fundamentals of Business Organisation, Sultan Chand Publication, 2018.

2. <https://leverageedu.com/blog/emerging-modes-of-business/> [Emerging Modes of Business]
3. https://www.managementstudyguide.com/management_functions.htm [Functions of Management]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Students will be able to understand different types of business proprietorship.

CO2 :	Students will get the knowledge of functionality of various online business services
CO3 :	Students will learn the important concepts of management.
CO4 :	To be able to understand the ethics and social responsibilities of business towards various entities
CO5 :	Students will learn the concepts required to be a good entrepreneur.

CAME101 : Computer Application in Business

About the course:

The main objective of this course is to familiarize the students with the application of computer in business and how it facilitates in business decision making.

Pre-requisites:

Basic knowledge of computers

Course layout:

Weeks	Video No.	Videos Title	Units
Week-1	Video-1	Introduction to Computers	Unit-1
	Video-2	Application in Computers	Unit-2
	Video-3	Web Application	Unit-3
	Video-4	Basic of Computer Software	Unit-4
Week-2	Video-5	Business Information System-	Unit-5
	Video-6	Database Management System	Unit-5
	Video-7	Business Process & Enterprises Application	Unit-5
	Video-8	GDPR	Unit-5
Week-3	Video-9	IT Securities Measures in Business	Unit-6
	Video-10	Internet Services and Email	Unit-7
	Video-11	Plastic Money, E-Wallet and Online Pay	Unit-8
Week-4	Video-12	Basics of Word Processing	Unit-9 & Unit-10
	Video-13	Tools using Word	Unit-11
	Video-14	Advance Tool using Word Processing	Unit-11
	Video-15	Making Business Documentation using word	Unit-12

Week-5	Video-16	Working with PowerPoint	Unit-13
	Video-17	PPT usages in Business and Corporate	Unit-13
Week-6	Video-18	Meaning of Multimedia	Unit-14
	Video-19	Animation & Presentation	Unit-14
	Video-20	Implementing multimedia tool in business	Unit-14
	Video-21	Meaning and Role of You Tube in Business	Unit-15
	Video-22	Video Impact in Excelling Business	Unit-15
Week-7	Video-23	Curtain raiser to Spreadsheet & its Utility in Business World	Unit-16
	Video-24	Spreadsheet concepts-1	Unit-16
	Video-25	Spreadsheet concepts-II	Unit-16
Week-8	Video-26	Formulas & Functions-I	Unit-17
	Video-27	Formulas & Functions-II	Unit-17
	Video-28	Formulas & Functions-III	Unit-17
	Video-29	Formulas & Functions-IV	Unit-17
	Video-30	Formulas & Functions-V	Unit-17
Week-9	Video-31	Graphical Presentation of Data Meaning and Intro	Unit-18
	Video-32	Graphical Presentation of Data using Spreadsheet	Unit-18
Week-10	Video-33	Advance Option in Spreadsheet-I	Unit-19
	Video-34	Advance Option in Spreadsheet-II	Unit-19
	Video-35	Advance Option in Spreadsheet-III	Unit-19
Week-11	Video-36	Google Workspace and Cloud	All Blocks (Unit 1-20)
	Video-37	Burgeoning & Contemporary Thought In business and Computers	All Blocks (Unit 1-20)
Week-12	Video-38	FAQ-I Computer application	All Blocks (Unit 1-20)
	Video-39	FAQ-II Business Application	All Blocks (Unit 1-20)

	Video-40	Terminology used in Computer Application in Business	All Blocks (Unit 1-20)

Criteria to get a certificate:

Average assignment score = 25% of average of best 8 assignments out of the total 12 assignments given in the course.

Exam score = 75% of the proctored certification exam score out of 100

Final score = Average assignment score + Exam score

YOU WILL BE ELIGIBLE FOR A CERTIFICATE ONLY IF AVERAGE ASSIGNMENT SCORE $\geq 10/25$ AND EXAM SCORE $\geq 30/75$. If one of the 2 criteria is not met, you will not get the certificate even if the Final score $\geq 40/100$.

CAME102 : Basics of Digital Marketing

About the course:

The course familiarize students with an understanding of how the digital media works and develop the critical insights necessary to succeed in e-commerce and digital and social media marketing. Enrich learner with the essential principles and practices of marketing in the digital economy by making this course, an indispensable part of their knowledge base. Companies that were non-existent a few short years ago, including Facebook, Whatsapp, LinkedIn, and Youtube, have dramatically changed how we interact, communicate and get from point A to B. Even Amazon and Google are relatively “young” by any measure. This course is also to serve as basic course for learners who wish to further study in the domain of Digital Media.

Pre-requisites:

Person who wish to study in the domain of Digital Media

Course layout:

Week 1	W1_L1 W1_L2 W1_L3	Introduction to Marketing Consumer Behavior Introduction to Digital Marketing
Week 2	W2_L1 W2_L2 W2_L3	Search Engine Optimization 1 Search Engine Optimization 2 Search Engine Optimization 3
Week 3	W3_L1 W3_L2 W3_L3	Search_Engine_Marketing : Part 1 Search_Engine_Marketing : Part 2 Display Advertising
Week 4	W4_L1 W4_L2 W4_L3 W4_L4	Social Media Marketing Social Media Marketing (Word of Mouth) Social Media Platforms Part 1 Social Media Platforms Part 2
Week 5	W5_L1 W5_L2 W5_L3 W5_L4	Online Reputation Management Mobile Marketing Part 1 Mobile Marketing Part 2 Website Planning & Creation
Week 6	W6_L1 W6_L2 W6_L3 W6_L4	Email Marketing Part 1 Email Marketing Part 2 Introduction to E Commerce Part 1 Introduction to E Commerce Part 2

Week 7	W7_L1 W7_L2 W7_L3 W7_L4 W7_L5	E-COMMERCE Strategy 1 E-COMMERCE Strategy 2 Content Marketing Content Creation Process Influencer Marketing
Week 8	W8_L1 W8_L2 W8_L3 W8_L4 W8_L5	Digital Marketing Strategy Part 1 Digital Marketing Strategy Part 2a Digital Marketing Strategy Part 2b Digital Marketing Strategy Part 3a Digital Marketing Strategy Part 3b
Week 9	W9_L1 W9_L2 W9_L3 W9_L4	Digital Analytics & Measurement Part - 1a Digital Analytics & Measurement Part - 1b Digital Analytics & Measurement Part - 2a Digital Analytics & Measurement Part - 2b
Week 10	W10_L1 W10_L2 W10_L3 W10_L4 W10_L5	Digital Analytics & Measurement Part - 3a Digital Analytics & Measurement Part - 3b Measuring Campaign Effectiveness : ROI – Return on Investment Measuring Campaign Effectiveness : CLV - Customer Lifetime Value Attribution Models
Week 11	W11_L1 W11_L2 W11_L3 W11_L4 W11_L5	Digital Marketing Plan Case Study 1 : Email Marketing Case study 2 : Golf Tripz Case Study 3 : Golkonda Hotels Case Study 4 : Bhalaje Photography
Week 12	W12_L1 W12_L2 W12_L3 W12_L4	New Technologies & Advancement in Digital Marketing Part 1 New Technologies & Advancement in Digital Marketing Part 2 Review of Digital Marketing Course Part 1 Review of Digital Marketing Course Part 2

Books and references

1. Digital Marketing: Cases from India by Rajendra Nargundkar and Romi Sainy, Notion Press, Inc

2. Understanding Digital Marketing: Marketing Strategies for Engaging the Digital Generation by Damian Ryan, Kogan Page Publisher
3. Marketing 4.0: Moving from Traditional to Digital by Philip Kotler, Publisher Wiley
4. Digital Marketing by Seema Gupta, McGraw Hill Education
5. Fundamentals of Digital Marketing by Punit Singh Bhatia, Pearson
6. The Art of Digital Marketing: The Definitive Guide to Creating Strategic, Targeted, and Measurable Online Campaigns by Ian Dodson, Wiley Publisher

Criteria to get a certificate:

If You wish to get certified on this course you must register and write the proctored exam after payment of exam fee.

30 Marks will be allocated for Internal Assessment and 70 Marks will be allocated for end term proctored examination.

Securing 40% in both separately is mandatory to pass the course and get Credit Certificate.

CAUD101 : Digital Electronics

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In order to achieve the course objectives, students will be introduced to digital technologies. Various digital modules used to create digital computer devices like gates, flip flops, decoder, encoder etc. are to be studied. Mathematical base is created to understand the organization of digital computer.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Digital Systems and Binary Numbers	12
2	Boolean Algebra and Logic Gates	12
3	Combinational Circuit Designing	10
4	Sequential Circuit Designing	10
5	Memory Interfaces and Data Representation	08
6	The Arithmetic Logic Unit and Control Unit	08

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Digital Systems and Binary Numbers

Hours 12

Introduction and Evolution of Digital computers, Major components of digital computer, Interfaces and Buses, compiler, interpreter, Assembler, Introduction to various number systems (Decimal, Binary, Octal, Hexadecimal, BCD), Conversion of number system, Binary operations, signed binary numbers, 1's complement and 2's complement.

Unit II: Boolean Algebra and Logic Gates

Hours 12

Fundamental concepts and rules of Boolean algebra, , Boolean Algebra Laws, Boolean expressions and its simplification with and without Truth Tables, Canonical form and standard form, D-Morgan's Theorem, Basic duality laws, Derivation of Boolean expressions, Introduction to logic gates (AND, OR, NOT, NAND, NOR, XOR, XNOR), Implementation of Boolean expressions using logic gates, Sum of product and Product of Sum forms, Universal gates, Implementation of other gates using universal gates, Karnaugh Map method for two, three, four and five variables, K-map with don't care conditions, Tabulation method, determination and selection of prime applicants.

Unit III: Combinational Circuit Designing

Hours 10

Introduction to combinational circuits, Design procedures, Adders, Subtractors, code conversion circuits, Analysis procedures, Multilevel NAND circuits, Multilevel NOR circuits, EX-OR functions, Binary adder and Subtractors, Decimal adder and Subtractors, Magnitude comparator, Decoder and encoders, Multiplexer and de-multiplexer.

Unit IV: Sequential Circuit Designing

Hours 10

Introduction to Sequential circuits, Concepts of Flip-flops, triggering flip-flops, Clock signals, Analysis of clock sequential circuits, State Reduction and assignments, Flip flop excitation table, Design procedure of asynchronous and synchronous counters (Ripple counter, Binary counter, BCD counter), Design of registers, Shift registers, Timing sequences.

Unit V: Memory Interfaces and Data Representation

Hours 08

Memory, Types of ROM, Design of ROM, Types of RAM, Magnetic disc memory, Magnetic tape, Digital recording techniques, Linear-select memory organization, Types of digital codes (Gray code, 8421 code, Alphanumeric codes), Parity checking codes, Floating point representation, Fixed point representation.

Unit VI: The Arithmetic Logic Unit and Control Unit Hours 08

Basic operations of Arithmetic Logic Unit, Construction of the Arithmetic Logic Unit, Representation of Instruction word, Control registers, Instruction and execution cycles of Control registers, Sequence operation of Control Registers.

Core Books:

1. M. Morris Mano: Digital Logic and Computer Design, Third Edition, Pearson Education, 2016.
2. Thomas C. Bartee: Digital Computer Fundamentals, Sixth Edition, Tata McGraw Hill Publishing, 2012.
3. M. Morris Mano: Computer System Architecture, Third Edition, Pearson Education, 2011.

Reference Books:

1. Andrew S. Tanenbaum: Structured Computer Organization, Fourth Edition, Pearson Education, 2005.
2. Albert Paul Malvino and Jerald A. Brown: Digital Computer Electronics, Third Edition, Tata McGraw Hill Publishing, 2008.

4. <https://cupola.gettysburg.edu/oer/1/> [Digital Circuit Projects]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Able to get the idea about digital system and numbering system.

CO2 :	Able to study logic gates for digital circuit designing.
CO3 :	Able to learn to design various combinational circuits.
CO4 :	Able to learn to design various sequential circuits.
CO5 :	Able to learn memory design concepts and to study computer Arithmetic Logic Unit and Control Unit.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUS101 : Mathematics for Computer Science

Credit	Component	Instruction/ Contact Hours(Per Week)	Instruction/ Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Theory	02	30	25	55
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: Basic algebra and geometry, as well as a good understanding of logic and proofs, mathematical statistics.

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of mathematics and statistics. Problem solving: Students will demonstrate the ability to solve problems, including applications outside of mathematics. Mathematical communication: Students will demonstrate the ability to communicate mathematical ideas clearly. They will use correct mathematical terminology and proper mathematical notation.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Sets and functions	04
2	Vectors and Matrices	04
3	Measure of Central Tendency & Dispersion	06
4	Permutation & Combination	05
5	Probability	06
6	Graph Theory	05

Total Hours (Theory): 30
Total Contact Hours:30

Detail Syllabus:

Unit I : Sets and Functions

Hours 04

Introduction to set theory, methods of representation of a set, operations on set, algebra of sets, De Morgan's law, function definition, domain, range, one-to-one function, onto function.

Unit II : Vectors and Matrices

Hours 04

Definition of vector, addition and subtraction of vector, magnitude of a vector, unit vectors, dot product and cross product, definition of matrix, equal matrices, diagonal elements of matrix, row matrix, column matrix, Symmetric matrix, skew symmetric matrix, orthogonal matrix, diagonal matrix, identity matrix, operations on matrix.

Unit III : Measure of central tendency and dispersion Hours 06

Definition, Ungrouped Data, Grouped Data (Discrete and Continuous Grouped data). Mean: Arithmetic Mean, Geometric Mean and Harmonic Mean for ungrouped data, Combined Mean, Weighted Mean. Median, Quartiles, Deciles, Percentiles and Mode. Different measure of dispersion. Quartile Deviation, Mean Deviation, Standard Deviation, Combined Standard Deviation, Coefficient of Variation.

Unit IV : Permutation and Combination

Hours 05

Meaning of permutation, Formula of permutation, Permutation of n different things, Permutation of similar things, Permutation of repeated things, Circular Permutation, Combination: Meaning of Combination, Formula of Combination.

Unit V : Probability

Hours 06

Probability: Random Experiment, Sample Space, Event, Mutually exclusive event, Exhaustive event, Equally likely event, Probability Classical definition. (Simple examples of Probability).

Unit VI : Graph Theory

Hours 05

Introduction to Graph, Graph Definition, Vertices, Edges, Loops, Parallel Edges, Simple Graph, Finite Graph, Adjacent vertices, Incidence between vertex and edge, Degree of a vertex, Isolated Vertex, Pendent Vertex, Null Graph. Isomorphism, Labeled Graph

Core Books:

1. D. C. Sancheti, V. K. Kapoor: Business Mathematics, Sultan Chand & sons.
2. Lipschutz & Marc Lipson: DISCRETE MATHEMATICS, Tata McGraw Hill
3. Narsingh Deo: Graph Theory with application to engineering and computer science, Prentice Hall of India Pvt. Ltd

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Students will learn basics of sets and functions

CO2 :	The students will be familiar with various linear algebra.
CO3 :	Students will be well equipped to measure accurate description of data
CO4 :	Students will be able to define a permutation and explain how to calculate probability
CO5 :	Students will be able to understand and apply the fundamental concepts in graph theory

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUC103: Fundamentals of Object Oriented Programming

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	50	110
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Foundation of Programming

Methodology, Pedagogy & Andragogy: The theory sessions will use real-world examples to demonstrate how object-oriented programming (OOP) enhances problem-solving, covering concepts such as classes, objects, inheritance, polymorphism, and exception handling. Students will engage in self-directed learning through case studies, assignments, and unit tests to assess their progress. During practical sessions, students will apply these OOP concepts through various assignments and case studies, further developing their understanding of how OOP efficiently addresses complex problems. Independent learning will be emphasized to ensure students grasp and progress in their comprehension of OOP principles.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Object Oriented Programming	08
2	Classes and Objects	11
3	Polymorphism	10
4	Inheritance	13
5	Exception Handling and Type cast operators	10
6	Managing I/O formats and operations	08

Total Hours (Theory): 60
Total Contact Hours: 60

Detailed Syllabus:

Unit - I: Introduction to Object Oriented Programming Hours: 08

Structured programming vs. object oriented programming, Introduction to C++: structure of a C++ program Tokens, inline function, pass by reference, default arguments, OOP characteristics.

Unit - II: Classes and Objects Hours: 11

Define class, objects, visibility modes, static members, friend function, Constructors and Destructors, Default Constructor, Copy constructors, Parameterized Constructor, this keyword.

Unit - III: Polymorphism Hours: 10

Introduction of Static Binding, Function Overloading and ambiguity raised in function overloading, Operator overloading through member function and friend functions, type conversions from primitive to class, class to primitive and class to class.

Unit - IV: Inheritance Hours: 13

Objective of Inheritance, types of inheritance, impact of access modes during inheritance, Virtual base classes, Dynamic Binding, Virtual functions, Pure virtual functions, Abstract class, Early vs. Late binding.

Unit - V: Exception Handling and Type Cast Operators Hours: 10

Introduction to Exception handling, catching class types, using multiple catch statements, exception handling options, creating custom exceptions, introduction to cast operators, const cast, static cast, reinterpret cast, dynamic cast.

Unit - VI: Managing I/O Formats and Operations Hours: 08

Understand and apply concepts from various header files like iostream, iomanip, fstream, etc. opening and closing file, reading and writing text files and binary files, performing random access on files, handle command line arguments.

Outline of the Course:

Wee k No	Practical	Description
1	Introduction to Object Oriented Programming and Setting up IDE	Introduction to C++, Setting up a development environment and its introduction, structure of a C++ program Tokens, inline function, pass by reference, default arguments
2	Classes and Objects	Define class, objects, visibility modes, static members
3	Friend Functions	Introduction and hands on friend functions
4	Constructors and Destructors	Constructors and Destructors, Default Constructor, Types of constructs
5	Inheritance	Exposure on Inheritance programs and their types
6	Virtual Function	Programs on Virtual Function, Pure Virtual functions, Abstract Class, Early Binding and Late Binding
7	Function Overloading	Introduction of Static Binding, Function Overloading and ambiguity raised in function overloading
8	Operator Overloading	Operator overloading through member function and friend functions
9	Exception Handling	Introduction to Exception handling, catching class types,
10	Multiple Catch Statements	Using multiple catch statements, exception handling options, creating custom exceptions
11	Type Cast Operators	Introduction to cast operators, const cast, static cast, reinterpret cast, dynamic cast
12	Managing I/O Formats	Understand and apply concepts from various header files like iostream. Iomanip ,fstream, etc
13	File Handling	Opening and closing file, reading and writing text files and binary files
14	File Handling Operations	opening and closing file, reading and writing text files and binary files, performing random access on files
15	Command Line Arguments	handle command line arguments.

Total hours: 60

Core Books:

1. Herbert Schildt: C++: A Beginner's Guide, 2nd Edition Paperback, McGraw-Hill, 2003.
2. E Balagurusamy: Object Oriented Programming with C++ Paperback, McGraw Hill India, 2017.

Reference Books:

1. Yashavant Kanetkar: Let Us C++, Paperback, BPB Publications, 2020.
2. Robert Lafore: Object Oriented Programming in C++, 4th Edition, Sams Publications, 2002.
3. Bruce Eckel: Thinking in C++, Volume 1, 2nd Edition, Pearson Education, 2006.

Web References:

2. <https://google.github.io/styleguide/cppguide.html> [For coding standards and concepts]
3. http://www.tutorialspoint.com/cplusplus/cpp_basic_input_output.htm [For Practicals]

Course Outcomes: Upon successful completion of the course, the students will:

CO1 :	Understand the basic structure of C++ program and understand the concept of object oriented programming characteristics.
CO2 :	Understand the concept of Constructor and Destructor and able to create class and objects.
CO3 :	Understand the need of Polymorphism and implement static polymorphism
CO4:	Understand the purpose of Inheritance, identify relations between classes, implement inheritance and perform dynamic binding.
CO5 :	Able to handle the runtime errors or exceptions in C++ and use type cast operators. Able to read input from device, file, command line arguments and apply formats to input and output.

Course Outcomes Mapping:

CAUC104: Database Fundamentals (Practical)

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA , certification courses, development of projects etc.					

Prerequisites: Basic knowledge of working with computer

Methodology, Pedagogy & Andragogy: Learn about computer data. Understand what data is, learn its meaning, examine the types of data sources, and see the difference between data and information. The database applications used in the real world will be discussed with necessary examples. During the laboratory hours' students' will implement the concepts. Apply SQL commands to mine data from databases and data visualization techniques to address organization information needs.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Database System	Overview of data, information, file, database, database systems, DBMS, Purpose of DBMS over file system.
2-3	Data modelling and architecture	Various data models: ER model and Relational model, Three level architecture, structure of DBMS and database actors and workers
4-5	Database Design Methodology	CODD Rules, Functional Dependency and Normalization for Database Informal Design Guidelines for Relational Schemas, Functional Dependencies, Normal Forms (1NF, 2NF, 3NF, BCNF, 4NF, 5NF)

6-7	Schema Definition, Constraints, Queries – I	Basic Data types, Create Table Command, Modifying the structure of tables, renaming table, truncating table, destroying table, Insert, Delete and Update Statements in SQL
8	Schema Definition, Constraints, Queries – II	Data Constraints and Functions: - Pseudo columns, Null values, TAB table, DUAL table Operators, Data constraints, Type of data constraints, modifying constraints, working with data dictionary and use of USER_CONSTRAINTS Functions introduction
9	Inbuilt functions	Merits and demerits of functions, Types of functions: Numeric functions, Character functions, Date functions, Conversion functions, Aggregate functions
10-11	Querying the data	Different operators: logical range, searching and pattern matching, Viewing Data in the tables, sorting
12-13	Advanced Query Processing-I	Co-related Nested Queries, Group By clause, having clause
14-15	Advanced Query Processing-II	Joins (Inner Join, Outer Join, Self-Join, Equi Join, Cross Join), Creation and manipulation of database objects indexes, views, sequences and synonym.

4. http://docs.oracle.com/cd/A97335_02/apps.102/a81358/05_dev1.htm [For ER Diagram]

Course Outcome: Upon successful completion of the course, student will:

CO1:	Understand basic concepts regarding data, database systems and various data models.
CO2:	Understand various data modeling techniques and entity relationship models.
CO3:	Learn about relational data model and related concepts.
CO4:	Gain insights into database design, SQL and normalization concepts.
CO5:	Advanced query processing

Course Articulation Matrix:

CAUE103: Fundamentals of E-Commerce

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of E-commerce. Students will be introduced to E-Commerce, E-Marketing, E-Security and E-Payment, Mobile Commerce, CRM and ERP, and E-Commerce Applications. Students will give practical exposure in form of case study and by visit to E-commerce / Digital Marketing company and/or supply chain Centre.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to E-Commerce	09
2	E-Marketing	11
3	E-Security and E-Payment	09
4	Mobile Commerce	11
5	CRM and ERP	09
6	E-Commerce Applications	11

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Introduction to E-Commerce

Hours 09

Emergence and use of Internet, origin of web and world wide web, advantages and disadvantages of E-commerce, Features of E-Commerce, Electronic Commerce over the Internet, Types of Ecommerce.

Unit II : E-Marketing

Hours 11

Traditional Marketing, Online Marketing, E- advertising, Internet Marketing Trends and strategies, E-branding.

Unit III : E-Security and E-Payment

Hours 09

Security on the Internet, E-Business risk management issues, Digital token based E-Payment System, Properties of Electronic Cash, Digital Signature.

Unit IV : Mobile Commerce

Hours 11

definition of M-Commerce, Features of M-Commerce, Advantages and Disadvantages of M-Commerce, Areas of M-Commerce Applications, Payment Systems and Models in M-Commerce.

Unit V : CRM and ERP

Hours 09

Customer Relationship Management, CRM capabilities and Customer life cycle, Introduction to ERP, Reasons for the growth of the ERP Market, Advantages and Disadvantages of ERP.

Unit VI : E-Commerce Applications

Hours 11

Retail and Wholesale, Finance, Manufacturing, Online Booking, Online Publishing, Digital Advertising, Digital Shopping, Digital Media, Auctions, A case study need to be discussed for these application. Hands-on experience in setting up and managing an e-commerce store. Developing a business plan for an ecommerce start-up.

Core Books:

1. P.T.Joseph, S.J.: E-Commerce- An Indian Perspective, 3rd Edition, PHI learning Private Limited.
2. Kamlesh K. Bajaj, Debjani Nag: E-Commerce, The Cutting Edge of Business, 2nd Edition, McGraw-Hill Education.

Reference Books:

1. Anita Rosen: The e-commerce Question and Answer Book: A Survival Guide for Business Managers, 2nd Edition, Amacom.
2. Janice Reynolds: The Complete E-Commerce Book: Design, Build & Maintain a Successful Web-based Business, 2nd Edition, CRC Press.
3. By Philippe Humeau&Matthieu Jung : The White Book of Ecommerce Solutions, NBS System.
4. IshitaLahiri and Sujit Kumar Ghose : Principals of Marketing and E-Commerce

Web References:

1. <http://www.ecommercetutorial.net/> [For Tutorial]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : To understand basic of Electronic Commerce and its Application

CO2 :	Getting knowledge of E-marketing and its Strategies.
CO3 :	Learn E-security and E-Payment in Detail and its term. Also, learn Encryption and decryption in basic
CO4 :	To gain understanding of Mobile Commerce and its Application through real life examples.
CO5 :	To learn concepts of Customer Relationship Management and various solutions of E-Commerce (Software and Framework).

CAUE104: Business Economics

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theoretical lessons, real-world examples will be used to discuss economic topics such as demand, supply, production, cost function, market structure, factor pricing, and microeconomics. Students will be offered appropriate case studies in order to provide actual exposure to theoretical economic ideas.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Fundamentals of Economics	09
2	Basic Elements of Demand and Supply	10
3	Theory of Production and Cost	11
4	Analysis of Revenue	11
5	Market Failures and Price Regulation	09
6	Macro-Economic Environment and National Income Accounting	10

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Fundamentals of Economics

Hours 09

Fundamentals of Economics, Needs, wants, nature of economics, scope of economics, business economics, laws of economics, business cycle, difference between Micro and Macro Economics.

Unit II: Basic Elements of Demand and Supply

Hours 10

Demand and supply, types of demand, determinants of demand and supply, law of demand and supply, balance between demand and supply, demand and supply schedule, demand function.

Unit III: Theory of Production and Cost

Hours 11

Theory of Production- Factors of Production, Basic Concepts, Production Function, Producer's Equilibrium Least-Cost Factor Combination and Output Maximization for a given Level of Outlay. Theory of Costs- Basic Concepts, Short-run Total Cost, Short-run Average and Marginal Cost, Relationship between Average and Marginal Cost, Average and Marginal Cost in the Long-run.

Unit IV: Analysis of Revenue

Hours 11

Basic Concepts of Revenue, Revenue, Relationship between Average and Marginal Revenue, Concept of Market and Main Forms of Market; Equilibrium of the Firm-Meaning, Objectives of the Firm, Monopoly and its features, Monopolistic Competition and Oligopoly.

Unit V: Market Failures and Price Regulation

Hours 09

Market failures and need for regulation, Regulations and market structure, Firm behaviour, Price regulation.

Unit VI: Macro-Economic Environment and National Income Accounting

Hours 10

Basic macro- economic concepts –aggregate, demand aggregate supply, money, income employment consumption savings and investment. National Income Accounting-

concepts and methods of national income, different methods of national income accounting.

Core Books:

1. P.L Mehta: Managerial Economics, Sultan Chand and Sons Publication, 2014
2. Keat Paul, K Young Philip, Erfle Steve, Banerjee Sreejata: Managerial Economics, seventh edition, Pearson Education, 2017.
3. N. Gregory Mankiw: Principles of Economics, sixth edition, South-Western, Cengage Learning, 2012.

Reference Books:

1. Geetika, Ghosh & Choudhury: Managerial Economics, third edition, Mc Graw Hill Education, 2005.
2. Mote V.L., Samuel Paul and G.S. Gupta: Managerial Economics Concepts and Cases, Tata McGraw Hill Publishing Company Ltd., New Delhi, 2001.
3. G. S. Gupta: Macro Economics Theory and Applications, Second Edition, Tata McGraw Hill, 2006.

CAME103 : E-Business

Description:

Credit and Week:

Teaching Scheme	Week	Marks	Credit
	12	100	4

About the course:

The Internet has changed the way companies carry out their businesses. The primary objective of this course is to introduce concepts, tools and approaches to electronic business to the post- graduate and undergraduate students. Further, the subject will help the students to develop skills to manage businesses in the digital world. The course will cover following aspects of E-Business Systems.

- Part 1: Foundations of E-Business systems
- Part 2: Infrastructure
- Part 3: Functional Areas
- Part 4: Decision Support for E-Business Systems

The course provides a balance approach including concepts from technology and management.

Pre-requisites: None

Industry support: All the companies

Course layout

Week 1: Introduction to E-Business

Week 2: Making Functional Areas E-Business Enabled : Value chain and supply chain, inter and intra organizational business processes, ERP

Week 3: Making Functional Areas E-Business Enabled : E-Procurement

Week 4: Making Functional Areas E-Business Enabled : E-marketing, E-Selling, E-Supply Chain Management

Week 5: Technologies for E-Business: Internet and Web based system

Week 6: Technologies for E-Business: Security and payment systems

Week 7: Technologies for E-Business: Supply chain integration technologies (EDI, RFID, Sensors, IoT, GPS, GIS)

Week 8: Technologies for E-Business: Supply chain integration technologies (Web services and cloud)

Week 9: Decision Support in E-Business: Web analytics

Week 10: Decision Support in E-Business: Customer behavior modeling

Week 11: Decision Support in E-Business: Auctions

Week 12: Decision Support in E-Business: Recommender systems

Books and references

1. Management Information Systems: Managing the Digital Firm, Laudon and Laudon, Pearson
2. Scaling for E-Business, Menasce & Almeida, PHI
3. eBusiness & eCommerce – Managing the Digital Value Chain, Meier & Stormer, Springer
4. eBook is available in springerlink.com
5. Some reference books, Internet Resources, and Research Papers

Criteria to get a certificate:

If You wish to get certified on this course you must register and write the proctored exam after payment of exam fee.

30 Marks will be allocated for Internal Assessment and 70 Marks will be allocated for end term proctored examination.

Securing 40% in both separately is mandatory to pass the course and get Credit Certificate.

CAME104: Business Development: From Start to Scale

Description:

Credit and Week:

Teaching Scheme	Week	Marks	Credit
	12	100	4

About the course:

This 12-week, 60 lecture course titled ""Business Development: From Start to Scale"" equips the learners with various concepts and frameworks for establishing and growing businesses. Focusing on customers and markets, the course covers the foundational as well as advanced constructs of business development. Multiple practical examples and case studies are provided. This versatile course will be useful for students and working professionals, and relevant for startups and entrepreneurial firms as well as established small, medium, and large companies for crafting and executing their growth journey. This course, in addition, will be an ideal next-step course for those who would complete the Entrepreneurship course.

Pre-requisites: Graduation of any discipline; No requirement to do any other course as a pre-requisite to taking this course

Industry support: Likely to be recognized by all types of industries and all types of firms as starting up and scaling up of business is a universal and perpetual need.

Course layout

Week 1: Business Fundamentals

- Understanding Business Development
- Marketing and Business Development
- Markets and Marketing
- Strategy Formulation
- Business Development Cases

Week 2: Business Development Strategies

- Successful Businesses
- Industry and Market
- Vision, Mission and Strategy

- Goals
- Case Studies of Business Development Excellence

Week 3: Industry Structure and Company Analysis

- Industry and Business
- Porter's Five Forces Theory
- Industrial Transformations
- Competitive Strategies
- Company Analysis

Week 4: Market and Competitor Analysis

- Industry, Market and Business
- Industry and Market Analysis
- Market Structures
- Demand Forecasting
- Competitor Analysis

Week 5: Connecting with Customers

- Customer Characteristics
- Customer Typologies
- Market Research and Design Thinking
- Customer bonding
- Customer Relationship Management

Week 6: Business and Market Segments

- Market and Market Descriptors
- Market and Product Segmentation
- Product-Market Segmentation
- Segmentation Deep Dive
- Market Attractiveness and Competitive Positioning

Week 7: Branding and Pricing

- Branding
- Brand Organisation
- Advertising and Communication
- Servitization
- Pricing

Week 8: Corporate Development

- A New IT Start-up
- An FMCG Start-up
- A Logistics Start-up
- A Nutraceuticals Start-up
- A Telecom Fightback

Week 9: Business Development Structures

- Collaborations
- Strategic Alliances
- Joint Ventures
- Subsidiaries
- Mergers and Acquisitions

Week 10: Business Development Competencies

- Value Chain Competencies
- Functional Competencies
- Negotiation Skills
- Cultural Skills
- Leadership Attributes

Week 11: Strategies for Markets and Industries

- Growth Strategies
- Growth Examples
- Fragmented Industries and Emerging Industries
- Mature Industries and Declining Industries
- Global Industries and New Businesses

Week 12: Business Development Case Studies

- Business Transformation
- Strategic Alliances for Growth
- Business Turbulence
- Creating Value
- From Start to Scale
- In Closing

If You wish to get certified on this course you must register and write the proctored exam after payment of exam fee.

30 Marks will be allocated for Internal Assessment and 70 Marks will be allocated for end term proctored examination.

Securing 40% in both separately is mandatory to pass the course and get Credit Certificate.

CAUD102 : Data Communications and Networking

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study, Certification courses, etc.					

Pre-requisite: Basic knowledge of computers and their working.

Methodology, Pedagogy & Andragogy: During the lecture sessions, the students will learn about role of computer network in modern communication systems, underlying principles of network communication, need for standardization through network reference model. The teacher will also discuss communication issues at different layers and concepts related to network security. The students will adopt the latest certification courses from reputed and recognized platforms. Furthermore, the students will be engaged in problem-solving, emphasizing real-world applications and relevance.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Computer Networks	10
2	Basics of network communication	08
3	Network reference model	11
4	Data Link Layer Functions and Protocol	12
5	Network Layer Functions and Protocol	10
6	Network security	09

Total Hours (Theory):60

Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to computer network

Hours 10

Definition of computer network, aim and objective of computer network: applications of computer network, merits & demerits of computer network, examples of computer

network, components of computer network, types of networks, network topologies, network devices: hub, switch, repeater, router, gateway, bridge.

Unit II: Basics of network communication

Hours 08

Parallel & serial communication, synchronous & asynchronous communication, modes of communication: simple, half-duplex, full-duplex, multiplexing, de-multiplexing: frequency division multiplexing (FDM), time division multiplexing (TDM), communication media: guided media, unguided media, switching techniques: circuit switching, message switching, packet switching.

Unit III: Network reference model

Hours 11

Need for network reference model, history of TCP/IP and OSI model, layers of OSI and TCP/IP model, comparison between TCP/IP and OSI model, Protocol Hierarchy, Network Protocols: Simple Mail Transfer Protocol (SMTP), File Transfer Protocol (FTP), Multiple Internet Mail Extension (MIME), Post Office Protocol (POP), Telnet, Domain Name Service (DNS), Dynamic Host Configuration Protocol (DHCP), Address Resolution Protocol (ARP), Reverse Address Resolution Protocol (RARP).

Unit IV: Data Link Layer Functions and Protocol

Hours 12

Definition of Framing, framing methods, Error detection techniques, Error correction techniques, Flow control mechanisms- Simplex protocol, Stop and Wait ARQ, Go-Back-N ARQ, Point to Point protocol.

Unit V: Network Layer Functions and Protocol

Hours 10

Connection oriented vs Connectionless services, Definition of Routing, Routing algorithms, IP protocol, IP addresses, ARP, RARP

Unit VI: Network security

Hours 09

Introduction to cryptography, symmetric key and public key encryption systems, digital signature and key management concepts, communication security.

Core Books:

1. Andrew S. Tanenbaum: Computer Networks, 6th edition, Pearson Publication: 2021.
2. Behrouz Forouzan: Data communications and networking, 4th Edition, McGraw Hill, 2018.
3. William Stallings: Data and computer communication: 5th Edition, Pearson Publication, 2019.

Reference Books:

1. James F. Kurose, Keith W. Ross: Computer networking – A top-down approach: 3rd Edition: Pearson Publication: 2017

2. Narsimha Karumanchi: Elements of computer networking: An Integrated Approach: 1st Edition: Careermonk Publication: 2014
3. Ed Tittel: Computer networking: 1st Edition, Schum's Publication: 2020

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Student will be able to understand role of computer network in digital communication

CO2 :	Student will grasp underlying concepts related with network communication
CO3 :	Student will understand role of reference models in standardizing communication
CO4 :	Students will learn about intra and inter network communication and technology behind it.
CO5 :	Students will learn about different aspects of network security.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUV101: Fundamentals of Accounting

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Theory	02	30	20	50
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During the classroom sessions, the emphasis will be given on the fundamentals of accounting. Students will be introduced to book keeping systems in modern accounting, financial accounting, and cost accounting. Students will prepare financial statements such as journal, ledger, trail balance, trading and profit and loss account, and balance sheet. Students will also get hands on exposure in make or buy decisions in cost accounting. Same concepts will be made concrete through assignments, case studies, and unit tests.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Accounting	05
2	Book Keeping System	05
3	Financial Accounting - I	05
4	Financial Accounting - II	07
5	Cost Accounting - I	04
6	Cost Accounting - II	04

Total Hours (Theory): 30
Total Contact Hours:30

Detail Syllabus:

Unit I : Introduction to Accounting

Hours 05

Introduction and users of Accounting, Branches of Accounting, Objectives, Accounting Concepts and Conventions, Accounting Terms.

Unit II : Book Keeping System

Hours 05

Single and Double Entry Book Keeping Systems, Advantages of Double Entry Book Keeping System, Limitations of Double Entry Book Keeping System, Types of Accounts: Personal, Real, and Nominal, Terms of Book Keeping Systems.

Unit III : Financial Accounting – I

Hours 05

Stages of Accounting Cycle, Types of Transactions, Forms of Economic Transactions, Cash and Credit Transactions, Introduction to Journal, Journal Entries.

Unit IV : Financial Accounting – II

Hours 07

Introduction to Ledger, Relationship Between Journal and Ledger, Rules of Ledger Posting, Balancing of the Accounts in Ledger, Trial Balance, Objectives of Preparing Trial Balance, Trading and Profit and Loss Account, Balance Sheet, Difference between Trial Balance and Balance Sheet.

Unit V : Cost Accounting – I

Hours 04

Introduction to Cost Accounting: Cost, Costing, and Cost Accounting, Limitations of Financial Accounting, Difference Between Cost Accounting and Financial Accounting, Objectives of Cost Accounting.

Unit VI : Cost Accounting – II

Hours 04

Elements of Cost: Material Cost, Labor Cost, and Expenses, Techniques of Costing, Marginal Costing, Make or Buy Decision, Breakeven Analysis

Core Books:

1. Dr. S. N. Maheshwari: Principles of Management Accounting, Sultan Chand Publication.

CAUA101: PRESENTATION SKILLS

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	50	110
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: Basic computer skills and knowledge of English.

Methodology, Pedagogy & Andragogy: The aim of this course is to develop effective presentation skills in students. Students will be taken systematically through the key stages of giving presentations, from planning and introducing to concluding and handling questions. The topics for the presentation will range from academic presentations to research presentations.

Outline of the Course:

Week No	Practical	Description
1	Introduction	Knowing the Purpose, Knowing the Audience, Internal and External Presentation, Presentation to Heterogenic Group, Greetings, Introducing self and peers, Asking and sharing information
2	ICT tools for presentation – Brief introduction	Microsoft PowerPoint, Canva, Prezi, AI-powered presentation tools
3	Presentation using Canva	Introduction to Canva, Creating, presenting, sharing and downloading presentation
4	Presentation design in Canva	Templates, layouts, Presenter Notes, Duration, Timer
5	Basic design elements in Canva	Shapes, Graphics, Charts, Tables
6	Advanced design elements in Canva	Photos, Videos, Audio, Frames, Grids, Stickers

7	Intermediate features of PowerPoint	Using Screenshot, Inserting objects, video and audio in presentation, Screen recording
8	Advanced features of PowerPoint	Using Hyperlink and Action, Slide Show Set-up, Presenter View, Master views
9	Cloud-based presentation using Google Slides	Creating a new presentation, importing slides, Sharing, Printing, Downloading in different formats, Version History
10	Basic features of Google Slides	Slideshow, Motion, Theme Builder, Inserting image, audio, video, shape
11	Advanced features of Google Slides	Spell-check, Linked objects, Q-A History, Notification Settings, Accessibility, Activity Dashboard
12	Engaging audience using feedback-gathering tools	Use of menitimeter for Word Clouds, Live Polls, Scales, Ranking and Pin It
13	Ethical practices	Using Citations/References for texts, images and other type of information, Plagiarism check
14	AI and Presentation	Use of Generative AI tools such as ChatGPT, CoPilot etc. in presentations
15	Select case-study	Examples of best presentations.
Total hours: 60

Course Outcome: Upon successful completion of the course, student will be able to:

CO1:	understand key elements of an effective presentation and ICT tools for presentation.
CO2:	acquire in-depth knowledge of one of the popular presentation tools.
CO3:	develop intermediate and advanced skills in alternative presentation tool.
CO4:	familiarize with cloud-based presentation tool.
CO5:	create effective presentation with ethical practices and enhance it with AI tools.

CAUI101 : Summer Internship and Viva – I

Objective and Scope:

Students who choose to exit the programme after the completion of the first two semesters must undertake internships, community engagement programmes and field based learning/minor projects during the summer term. This internship, worth 04 credits, is a requirement for the award of the Undergraduate Certificate. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. This provision ensures that students gain valuable practical experience and industry exposure, complementing their academic learning and enhancing their career prospects. Following are the intended objectives of internship training:

- **Practical Experience:** Provide hands-on experience with real-world projects to apply theoretical knowledge gained during the course.
- **Skill Development:** Enhance technical skills, such as programming, software development, database management, and other relevant IT skills.
- **Industry Exposure:** Familiarize students with the working environment of the IT industry, including understanding company culture, workflows, and professional practices.
- **Professionalism:** Instil a sense of professionalism and work ethic, including adhering to deadlines, following instructions, and working collaboratively.
- **Transition to Employment:** Facilitate a smoother transition from academic life to professional careers by bridging the gap between theory and practice.

Guidelines of Internship:

The Summer Internship shall be of 15 (Minimum 60 hours) duration and will be undertaken during the Summer Vacation. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. It is mandatory for the students to seek written approval from the coordinator about the topic and the organization before commencing the Summer Internship. During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone. Students must maintain regular reports detailing the work completed, challenges faced, and learning experiences. Students must submit a final report and presentation summarizing the internship experience, project outcomes, and key learnings to guide. The technical specifications for report preparation is as under:

Technical details:

1. The report shall be printed on A-4 size white paper.
2. 12 pt. Times New Roman font shall be used with 1.5-line spacing for typing the report.
3. 1" margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be spiral bound as per the standard format of the cover page given by the Institute.
6. The report should include a Certificate (on company's letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Principal of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.

Evaluation:

The evaluation of Internship will be done as per the following criteria:

Sr. No.	Evaluation Criteria	Marks
1	Summer Internship Report	50
2	Presentation and Viva-voce examination	50
TOTAL MARKS		100

Students must secure 36% passing marks in both components to qualify for the Certificate.

Internship and Exit:

Any student intending to exit the course must complete the summer internship (Including scoring at least 36% marks in the evaluation) before exit. A student intending to exit shall have to submit an application to Principal through Counsellor before even semester university theory examination. However, any such student desiring to withdraw the exit option may do that before the last paper of theoretical examinations of even semester.

TEACHING SCHEME & DETAILED SYLLABUS

FOR

**BCA PROGRAMME
(3rd SEMESTER)
AS PER NEP 2020**

**EFFECTIVE FROM
ACADEMIC YEAR 2024-25**

CAUC201: Fundamentals of Data Structures and Algorithms

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction /Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Foundation of C and C++ Programming, Fundamentals of Object Oriented Programming.

Methodology, Pedagogy & Andragogy: Theory lectures focus on fundamental concepts of data structures and algorithms, emphasizing the selection of the most efficient structures for various applications. Andragogical principles are integrated to promote self-directed and practical learning for learners. For practical teaching of Data Structures and Algorithms, the approach combines hands-on programming exercises with real-world case studies to reinforce the selection of efficient structures for various applications. This blended method enhances both theoretical understanding and practical skills, ensuring learners can effectively apply concepts in real-world scenarios.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1.	Fundamentals of Data Structures and Algorithms	06
2.	Arrays and Linear Data Structures	10
3.	Advanced Dynamic Data Structures	12
4.	Tree-Based Data Structures	11
5.	Graph Theory and Applications	11
6.	Sorting and Searching Techniques	10

Total Hours (Theory) : 60
Total hours (Practical) : 60
Total Contact Hours : 120

Detail Syllabus:

Unit I: Fundamentals of Data Structures and Algorithms Hours 06

Atomic and composite data, Data type, Data object, Data Structure, Abstract Data type, Types of Data Structures, Introduction to Algorithms, Relationship among Data, Data Structures and Algorithms, Analysis of Algorithms, space and time complexity algorithm

Unit II: Arrays and Linear Data Structures Hours 10

Linear Data Structures using sequential organization, Representation of Stacks using sequential organization, Applications of Stack, Application of Recursion, Concepts of Queues, Realization of Queues using sequential organization, circular queue, Multiqueue, Deque, Priority Queue, Applications of Queue.

Unit III: Advanced Dynamic Data Structures Hours 12

Linked list, Comparison of sequential and linked organizations, Dynamic Memory Management, types of link list , Applications of linked list, operation on link list.

Unit IV: Tree-Based Data Structures Hours 11

Basic Terminologies, Definition and concepts, Representation of Binary Tree, Operations on Binary Tree and algorithms, Types of Binary Trees , AVL trees,

Unit V: Graph Theory and Applications Hours 11

Graph Terminology, Representation of Graph, Operations on Graph, Applications of Graph Structure, minimum spanning tree.

Unit VI: Sorting and Searching Techniques Hours 10

Sorting Notations and Concepts, Sorting Techniques, Sequential Searching, Binary Searching, Search Trees.

Outline of the Course (Practical):

Week No	Practical	Description
1	Basic of C and C++	foundational concepts in C and C++.
2	Two dimension array	Understand and utilize arrays effectively.
3	Stack	Implement stack operations including push, pop, and peek.
4	Stack and its application	Cover infix, prefix, and postfix notations.
5	Queue and Circular queue	Implement queue operations such as insert, delete, and display.
6	Linear and Binary Search	Apply various searching techniques on arrays.
7	Merge sort, Bubble Sort	Implement and compare different sorting techniques to sort data.
8	Selection sort , Insertion Sort,	
9	Quick sort	
10	Single Link List	Perform insert and delete operations at the beginning, end, and middle of link list data structures.
11		
12	Double Link List	
13		
14	Circular Single Link List	
15	Circular Double Link List	

Total hours (Practical) : 60

Core Books:

1. Jean-Paul Tremblay, Paul G. Sorenson: An introduction to data structures with applications, 2nd Edition, Tata McGraw Hill Publications, 1991.
2. D. Samanta: Classic Data Structures, 2 Edition, PHI Publications, 2002.

Course Outcomes: Upon successful completion of the course, students will be,

CO1 Understand and explain the basic concepts and importance of data structures and algorithms.

CO2	Implement and utilize array-based and linear data structures effectively.
CO3	Analyze and apply advanced dynamic data structures such as linked lists.
CO4	Construct and manipulate various tree data structures including binary trees and AVL trees.
CO5	Apply graph theory concepts to solve complex problems and understand real-world applications.
CO6	Implement and compare different sorting and searching algorithms for optimal performance.

Course Outcomes Mapping:

CAUC202 : Fundamentals of Operating Systems

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Component (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In order to achieve the course objectives, students will be introduced to the basic operating system concepts and basic functions. Students will be offered appropriate case studies in order to provide actual exposure to theoretical operating system ideas. During the practical session, student will commence the learning from MS-DOS commands in windows environment. The student will also get hands on working with basic Linux commands. Finally using base of Linux commands, shell scripts would be written to demonstrate operating system programming.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Operating System Fundamentals	09
2	Memory Management	11
3	Processor Management	11
4	Device Management	10
5	File Management	10
6	Introduction to Shell Script	09

Total Hours (Theory): 60
Total hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Operating System Fundamentals

Hours 09

What is an operating system, Brief history of an operating system, Pyramid structure of an operating system, Operating system hardware and software, Evolution of an operating system, types of operating system, Batch system, Interactive system, Real time system, Hybrid system, Shell, compiler, assembler, interpreter.

Unit II: Memory Management

Hours 11

Memory management of early system, Fixed partition, Dynamic partition, Re-locatable dynamic partition, Best fit and first fit allocation method, De-allocation, Paged memory allocation, Demand paging allocation, segmented memory allocation, Virtual memory, cache memory, Associative memory, Page replacement policies.

Unit III: Processor Management

Hours 11

What is job and Process, Multiprogramming concept, Process scheduler, Job scheduler, various process states, Thread control, Process Control Block (PCB), Processor scheduling policies, FCFS, SJN, SRT, RR, EDF, Multiple level queues.

Unit IV: Device Management

Hours 10

Types of devices, dedicated device, Virtual device, shared device, I/O devices in cloud, Sequential Access Storage Media, Direct access storage media, Device handler seek strategies, FCFS, SSTF, SCAN and LOOK strategies, disk storage.

Unit V: File Management

Hours 10

Fundamentals of File management, File naming conventions, Fixed length and variable length records, Physical file organization, Physical storage allocation, File access methods, File control matrix, File compression.

Unit VI: Introduction to Shell Script

Hours 09

Shell Script, Shell environment, Making Script interactive, Command Line Argument, Evaluating Expression, Operator, Control Statement, Looping statement.

Outline of the Course:

Week No	Practical	Description
1	Disk operating system -Commands	Introduction to MS DOS environment with basic commands
2	Introduction to Linux Editor	Introduction to Cygwin as Linux Editor along with its usage
3	Linux Operating System-Commands	Using basic commands of Linux
4	Linux Operating System-Advanced Commands	Implementation of advanced Linux commands used in industry
5	Vi editor-Create Text file	Practice of writing and modifying various files in Vi editor
6	Introduction of Shell Programming-Create .sh file and Execute file	Creating simple shell script to get introduced with operating system programming
7	Variable and Rules for variable	Creating and using variables, and constants in shell scripts
8	Interactive Shell Script, Working with Command Line Arguments	Practicing shell scripts which are responsive to the user input
9	Working with expression	Arithmetic expressions in shell script
10-11	Conditional statement-IF, Working with Operator	Learning conditional statements such as if, elif, case. Using arithmetic, relational, and logical operators.
12-13	Looping Statement-While	Writing shell scripts with while loops with real life examples
14-15	Looping Statement-Until, For	Writing shell scripts with until and for loops with real life examples

Total hours (Practical) : 60

CAUS201: Computer Oriented Management System

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The theory sessions will emphasize real-time systems. To enhance comprehension, we will provide illustrations using actual data across various systems. The sessions will meticulously explain the system's functionality through detailed flow descriptions. To bridge the gap between theoretical knowledge and practical application, we have to schedule industrial visits. These visits are designed to offer students a tangible correlation between their studies and real-world practices. Students should be assigned case studies to facilitate the practical application of their acquired knowledge. These case studies aim to deepen understanding and foster the ability to apply theoretical concepts to real-world scenario.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Basics of Information System	09
2	Architecture and Design of Information System	08
3	Transaction Processing System	09
4	Management Information System	06
5	Decision Support System & Executive Support System	18
6	Introduction to ERP and trending technologies	10

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Basics of Information System

Hours 09

Role of data and information, Types of Systems, Types of information, Quality of Information, what is an Information System, Functions of Information System, classification of an Information System, Major Types of Information Systems, Interrelationship of Information Systems

Unit II : Architecture and Design of Information System

Hours 08

Meaning of Architecture, development and maintenance of information system, centralized and decentralized systems, factors of success and failure in information system and risk involved with information system

Unit III : Transaction Processing System

Hours 09

Introduction of Transaction Processing System (TPS), Transaction Processing System (TPS) Architecture, Transaction Processing System (TPS) Life cycle, Methods of Transaction Processing System (TPS), Information System Availability Control, Illustrations and live demonstration of TPS such as Banking System, Railway reservation system etc.

Unit IV : Management Information System

Hours 06

Introduction to Management: Approaches of Management, Function of Management, System from Functional Perspective, Reports of Management Information System, A business perspective of MIS, Dimensions of MIS, contemporary Approaches to Information System.

Unit V : Decision Support System and Executive Support System

Hours 18

Business value of Improved Decision making, Types of Decision, Decision making Process, The difference between MIS and DSS, Components of DSS, System for Decision Support Group Decision Support System, Business value of GDSS. Important Dimensions of knowledge, Organizational learning and Knowledge Management, The Knowledge Management value chain, Overview of different types of Knowledge Management Systems, Characteristics of ESS, The Role of ESS in the Firm, Business value of ESS, Monitoring Corporate Performance, Working Examples of ESS.

Unit VI : Introduction to ERP and trending technologies

Hours 10

An overview of ERP, Basic ERP Concepts, Risk and Benefits of ERP, ERP and Related Technologies, Business Intelligence, Some case studies on ERP or Information system

Core Books:

1. K. C. Laudon and J. P. Laudon: Management Information Systems, 12th Edition, Pearson Education.
2. Alexis Leon: ERP Demystified, Second Edition, Tata McGraw-Hill.

Reference Books:

1. W.S. Jawadekar: Management Information Systems, 2nd Edition, Tata McGraw-Hill.

Course Outcomes: Upon successful completion of the course, students will be,

CO1 To understand basic of data & information, types of information system, function of information system and its quality.

CO2 :	To understand designing and architecture of information system
CO3 :	To understand transaction processing concepts and its working.
CO4 :	Learning Management Information system, its types and its implementation. To gain understanding of Decision Support Systems.
CO5 :	To learn Knowledge Management, Executive Support Systems, ERP and its technology.

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The course covers key topics like finding roots of equations, solving linear equations, interpolation, and solving differential equations. Teaching includes lectures, interactive problem-solving, and project-based assessments with continuous feedback. The focus is on practical applications and real-world problems, using flexible and engaging teaching methods. The aim is to make the content relevant and useful for students' careers and interests.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Numerical Methods	08
2	Interpolation	09
3	Numerical Integration and Differentiation	10
4	Solution of Linear Equation	12
5	Solution of Differential Equations	11
6	Solution of Partial Differential Equations	10

Total Hours (Theory): 60
Total Contact Hours: 60

Detailed Syllabus:

Unit - I: Numerical Methods

Hours: 08

Introduction to Numerical Methods, Various methods such as Bisection, False-Position and Newton Raphson methods

Unit - II: Interpolation

Hours: 09

What is an interpolation, Difference tables, Newton forward and backward Interpolation formula, Lagrange's formula, Newton's Divided Difference Formula?

Unit - III: Numerical Integration and Differentiation

Hours: 10

Numerical Integration, Trapezoidal rule, Differentiating Continuous function (Two point and Three-point formula), Tabulated function and its maxima and minima.

Unit - IV: Solution of Linear Equation

Hours: 12

Solution of Linear Equation, Gauss-Jordan Elimination methods, Gauss - Seidal and Gauss Jacobi Interactive methods

Unit - V: D Solution of Ordinary Differential Equations

Hours: 11

Solution of Ordinary Differential Equations, Taylor Series and Euler Methods, Runge-Kutta Methods.

Unit - VI: Solution of Partial Differential Equations:

Hours: 10

Review and examples of partial differential equations, classification of partial differential equations, Difference equation, Laplace's equation and Poisson's equation

Core Books:

1. D. N. Datta: Computer Oriented Numerical Methods, Vikas Pub. House, 2012.
2. S.S. Sastry : Introductory methods of Numerical Analysis, Prentice Hall of India, 4th edition 2006

Reference Books:

1. V. Rajaraman Computer Oriented Numerical Methods, 3rd Edition, Prentice-Hall of India Pvt.Ltd, 3rd edition, 2016
2. M. Ray, Har Swarup Sharma, Sanjay Chaudhary: Mathematical Statistics, Ram Prasad and sons, 11th edition

3. B S Grewal: Numerical Methods In Engineering & Science (With Programs In C, C++ And MATLAB), Khanna Publishers, 10th edition, 2014

Course Outcomes: Upon successful completion of the course, students will be,

CO1 Able to use Numerical methods in computer technology

:

CO2 :	To learn Interpolation
CO3 :	To Learn the concepts of Numerical Integration and Numerical Differentiation
CO4 :	To understand linear equations
CO5 :	To learn techniques to solve ordinary differential and partial differential equations

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes				
		CO1	CO2	CO3	CO4	CO5
1	Introduction to Numerical Methods	√				
2	Interpolation		√			
3	Numerical Integration and Differentiation			√		
4	Solution of Linear Equation				√	
5	Solution of Differential Equations					√
6	Solution of Partial Differential Equations					√

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2

CAUA201: Life Management

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Theory	02	30	25	55
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of life management. Students will be introduced life styles and its basic, time management, work efficiency, yoga, physical health management, stress and mental health management, and personality skills. Students will give experimental learning exposure in form of assignment and case study.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Life Style and its Basics	06
2	Work Efficiency	04
3	Personality Skills	06
4	Time Management for students	05
5	Physical health management	04
6	Stress and mental health management	05

Total Hours (Theory):30
Total Contact Hours:30

Detail Syllabus:

Unit I : Life Style and its Basics

Hours 06

Purpose of life and its dimensions, Importance of Self-Evaluation; (Daily routine, Food habits, Dressing Sense, Habit formation, Company, Etiquettes), Duties and Commitment of Self, Family and Society, Adjustment with Self and Environment

Unit II : Work Efficiency

Hours 04

Positive way of thinking, Tools & techniques for Positive thinking, Karma and Karma Phal Sidhanta, Behavioral Skill

Unit III : Personality Skills

Hours 06

Self-Assessment Techniques, Adjustment Skills, Art of Positive Thinking, Developing Self Confidence,

Unit IV : Time Management for students

Hours 05

Importance, Steps, Barriers and solutions of Time Management, Reading and Writing Skill, Making Notes and Conceptual Clarity of Subject topic.

Unit V : Physical health management

Hours 04

Importance of physical health and exercise, importance of yoga, physical problems, exercise for health improvements

Unit VI : Stress and mental health management

Hours 05

Importance of mental health, spirituality, improving concentration, importance of Dhyan, Memory problem and Memory Boosting techniques, causes and effects of stress, importance of Prathana, Upasna, Sadhna, and Aradhna

Core Books:

1. Time Management, McGraw-Hill, 2003
2. How To Manage Your Life, Vishal Tatwaved, 2012.

Reference Books:

1. Living Stress Free - The Secret of How to Manage Stress and Live Life Fully, Sonali Perera, SP MEDIA MARKETING.
2. TIME MANAGEMENT, BRIAN TRACY, American Management Association, 2013.

Web References:

1. Life management: a holistic approach to make the most of your life, Dr. Hannah Rose <https://nesslabs.com/life-management>
2. Life Management, <https://www.sciencedirect.com/topics/computer-science/life-management>
3. <https://edynamiclearning.com/course/health-1-life-management-skills/>

Course Outcomes: Upon successful completion of the course, students will be,

CO1 Students will learn basics of life managements

:

CO2 :	The students will be familiar with various styles
CO3 :	Students will get the knowledge of time management and stress management
CO4 :	Students will get various aspects of physical and mental health
CO5 :	They will be able to develop personality and good habits

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes				
		CO1	CO2	CO3	CO4	CO5
1	Life Style and its Basics	√				
2	Work Efficiency		√			
3	Personality Skills					√

CAUD201: Introduction to Web Designing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	40	100

Experiential Learning Components: Lab Assignments, Practical Test, VIVA

Prerequisites: Basic concepts of web.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for design and develop entire web sites using several web designing tools and HTML scripting language.

B. Outline of the Course:

Week No	Practical	Description
1	Basic Construction of an HTML & HTML5 Page, HTML Text Editors, HTML Building blocks.	Learn basic concepts of web page design.
2	Basic HTML tags – Text formatting tags, Heading tags, paragraph tags, division tag, Span tags, Break line tag, Binding space in HTML	Get familiar with different tags and attributes which is used to add the text in a web page.
3	Controlling Font size and color, Adding Table – Table tag.	Learn user interface designing using Table Layout, change font style, color etc.
4	Grouping and merging table rows and columns. Adding List – ordered, unordered and definition list.	Able to display the data in various formats and design different types of list in the table.

5	Adding Image, Adding links - Changing link colors, Email link.	Learn to add images and link in the web page.
6	Embedding audio and video, Adding Field sets.	Able to add multimedia in web page using internal and external methods.
7	Adding Form: Form tag, Action, Method. Basic form controls.	Learn basic form elements and when and where to apply it.
8	Textbox, Password field, Radio Button, Checkbox, Multiple line text area, file upload.	Use various types basic form controls with types of form input elements.
9	Various types of buttons – submit, reset, image, simple button.	Learn various types of buttons to make it more interactive.
10	HTML5 input elements - Color, Number, Date, Month.	Learn new input types in HTML5.
11	Week, Time, date time-local, Email, url, range, search.	Learn to add defining inputs and minimum and maximum range to make the form attractive.
12	Data list, output, progress, meter.	Learn to add list and provide progress horizontal view and range with output.
13	Regular expression, HTML5 new attributes – Placeholder, Required.	Learn HTML 5 form element to provide user side web form validation.
14	Pattern, Autocomplete, Autofocus, novalidate, formnovalidate.	Learn HTML 5 new form properties.
15	formaction, formmethod, spellcheck, contenteditable.	Learn HTML 5 to user submit the form and redirect the form data to selective method.

Total hours: 60

Text Books:

1. Powel Thomas: HTML - The Complete Reference, 3rd Edition, McGraw-Hill Education – Europe, 2018.
2. DT Editorial Services: HTML 5 Black Book, 2nd Edition, Dreamtech Press, 2016
3. Matt West: HTML 5 Foundations, Wiley publication, 2013
4. Farrar: HTML Example book, BPB, 2007.

Reference Books:

1. David DuRocher : HTML and CSS QuickStart Guide, Paperback, 2021
2. Laura Lemay, Rafe Colburn, Jennifer Kyrnin : Mastering Html, CSS & JavaScript Web Publishing, Paperback, 2016.
3. Whyte: Basic HTML, 2nd Edition, Payne-Gallway, Oxford, 2003.
4. Shelly Woods: HTML introductory concepts and techniques, 5th Edition, Course Technology, 2009.
5. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.

Web References:

1. www.w3schools.com/html [For HTML tutorials]
2. html.net/tutorials/html/ [For HTML tutorials]
3. www.htmlgoodies.com/ [For HTML resources]
4. <https://developer.mozilla.org/en-US/learn/html> [For HTML best practices]

Course Outcome: Upon successful completion of the course, student will:

CO1:	Able to understand basic construction of HTML & HTML5 document and started using basic tags.
CO2:	Able to Add content using various tags and format the content in table & list.
CO3:	Able to design links and multimedia elements such as image, audio, video.
CO4:	Able to design a web page form using HTML & HTML5.
CO5:	Able to apply validation using HTML5 attributes.

Course Articulation Matrix:

CAUC203 : System Analysis and Design

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None.

Methodology & Pedagogy: During theory lectures emphasis will be given on understanding how Information Systems are designed and constructed and how major modifications are made to existing systems, analyze business needs for information and develop an appropriate strategy to solve a particular business problem, understand the issues associated with physical design, utilize some of the tools used by systems analysts in the design of Information Systems, a significant portion of the course will deal with computer aided system engineering (CASE) tools and techniques in the context of a case study.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to System Development	08
2	Classical Systems Development Methodology	11
3	Structured Systems Development Methodology	11
4	Prototype Development Methodology and Tools	11
5	Systems Design	10
6	Systems Implementation & Maintenance	09

Total Hours (Theory): 60
Total Contact Hours:60

Detailed Syllabus:

Unit I: Introduction to System Development

Hours: 08

Concept of system, Basic components, Information systems categories, Business Information Systems, Examples of real-life systems, System analyst – meaning, role and need, Users, Need of information system development, Application development portfolio, Integration of portfolio, Controlling and monitoring committees.

Unit II: Classical Systems Development Methodology

Hours: 11

Classical Systems Development Life Cycle (SDLC) method, Requirement determination, Fact finding techniques, Modern methods for determining systems requirements, Joint Application Development Program, Tools for documenting procedures and decisions, Tools for systems development, understanding the format of system requirement specification.

Unit III: Structured Systems Development Methodology

Hours: 11

Structured Analysis Development Strategy, Data Flow Diagrams (DFDs) for analysis and design, Physical and logical DFDs, Data Dictionary.

Unit IV: Prototype Development Methodology and Tools

Hours: 11

Purpose of Application Prototyping, steps in prototype method, Use of prototypes, Tools for prototyping, Strategies for prototype development, misconceptions about prototyping, Role of tools, Categories and use of automated tools, using a CASE tool

Unit V: Systems Design

Hours: 10

Analysis to design transition, Design of output system, Design of input system, Design of security and control, Design of user interface and Design of Database Interaction.

Unit VI: Systems Implementation & Maintenance

Hours: 09

Designing reliable and maintainable systems, design of software, software design and documentation tools, managing quality assurance, user training, training methods and conversion.

Core Books:

1. James A Senn : Analysis and Design of Information System, McGraw Hill International, 2003.
2. Kendall and Kendall: Systems analysis and Design, 5th Edition, Prentice-Hall of India Private Limited, 2003.

Reference Books:

1. V. Rajaraman: Analysis and Design of Information Systems, Prentice-Hall of India Private Limited, 2003.
2. Jeffrey L. Whitten, Lonnie D. Bentely and Kevin C. Dittman : Systems Analysis and Design Methods, Tata McGraw Hill Publishing Co. Ltd., 2001.
3. Tuthill and Leavy: Knowledge Based Systems: Mangers Perspectives: Tab professional and Reference Books, 1991.

Web references:

2. <http://www.slideshare.net/aroravinay/1-introduction-to-ado-infosys>
3. <http://bcastuff.blogspot.in/p/sad-notes.html#.U6uW-ZzWIeo>
4. <http://www.eis.mdx.ac.uk/staffpages/geetha/bis2030/DFD.html>
5. <http://faculty.washington.edu/ytan/is460/notes/LN11.pdf>

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Understand the basics of system, type of information systems, system analyst- meaning, role and need, portfolio development of the system, the methods or ways to review and select the project.
CO2	Understand the concept of SDLC, the fact finding techniques, detailed study of modern methods for collecting the requirements of system to be developed, Decision and procedure documentation and a brief introduction to the SRS document.
CO3	Learn the concept of structured analysis, detail study of DFD and its types and the study of data dictionary.
CO4	Gain understanding of prototypes, its uses and tools for development, clarification of the misconception about the prototype and categories of tools including the use of automated tools like case tools.
CO5	Be able to learn objective of collecting data, methods to collect data for designing the input and output interface, the concept and objective of database design as well as designing of reliable and maintainable systems with quality assurance

CAUC204: Programming the Internet

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, Case Study					

Prerequisites: CAUC103 – Fundamentals of Web Designing

Methodology, Pedagogy & Andragogy: This subject focuses on hands-on experiments to create dynamic and interactive web sites using HTML5, CSS3 and JavaScript.

Outline of the Course:

Week No	Practical	Description
1	CSS Styling the web - Applying CSS Building blocks –CSS Selectors, Cascade & inheritance, CSS Properties, CSS Box model.	Student can apply various types of CSS with its basic properties.
2	Creating Layout - Header, footer, navigation menu, and sub-navigation. Floats.	Student can create different layout using semantic elements of HTML5 & CSS classification properties.
3	Creating Layout - Flexbox, Introduction to Flexbox, Flex Container and Flex Items, Flexbox Properties and Layout Techniques.	Student can create flexible and responsive web layouts. Its ability to distribute space and align items effectively makes it a vital part of modern web design.
4	Creating Layout - Introduction to CSS Grid Layout- Grid Container and Grid Items, multi column layout	Student can Understand its properties and axes can significantly improve the adaptability and aesthetics of your web pages.
5	Creating Image Gallery and Animation - 2D/3D Transformation, Transitions and Animation,	Student can create layout image gallery & animation.

6	CSS Media Query	<i>Student can create different layouts depending on the size of the viewport.</i>
7	JavaScript – Adding Internal & External JavaScript	Student can write script for basic Programs.
8	,Working with variables, datatype – Number, String, Boolean.	Student can write script for basic programs using different datatypes.
9	datatype –Array, Object, Operators, Conditional statements, Looping statements	Student can write script for basic programs using array and object, condition, Loop.
10	Adding Dialog boxes in HTML page – Alert, Confirm and Prompt.	Student can able to use dialog boxes to make website alive.
11	Creating user defined function.	Student can able to use in-build and user defined functions of JavaScript.
12	Adding Mouse and Keyboard Event in HTML page, Manipulating String and Date.	Students can make user interaction using various Events.
13	JavaScript Document Object Model hierarchy – Create find and manipulate HTML Element using Objects and methods	Student can explore the DOM Hierarchy.
14	Form validation, Applying Style using JavaScript.	Student can able to use form validations.
15	Creating New window, Accessing & manipulating History of HTML Pages.	Student can apply various objects to make web page dynamic with user interactions.

Total hours: 60

Text Books:

1. Julie C. Meloni, Jennifer Kyrnin : HTML, CSS, and JavaScript All in One, 3rd Edition, Pearson, 2018.
2. Joseph R. Lewis, Meitar Moscovitz : AdvancED CSS, W3C CSS Working Group, Apress, 2020.
3. Peter Gasston: The Book of CSS3: A Developer's Guide to the Future of Web Design, No Starch Press, April 2011.
4. MArjijn Haverbeke : Eloquent Javascript – A modern Introduction to JavaScript, 3rd Edition, 2018

5. Michael Morrison: Head First JavaScript, O'Reilly, 2014

Reference Books:

1. Andy Budd, Emil Björklund: CSS Mastery 3rd Edition, Apress - Advance Web Standard Solutions.
2. Karl Barksdale, Shane Turner: HTML and Java Scripts Basics, 4th Edition, Course Technology, 2006.
3. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.
4. Richard York: Beginning CSS: Cascading Style sheets for Web Design, Wrox Press (Wiley Publishing), 2005.

CAUC205 : Open Source Technology

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc.					
Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Working knowledge of HTML and basic knowledge of MYSQL.

Methodology, Pedagogy & Andragogy: During theory and practical sessions, students able to install & configure PHP and prerequisite software(s). Also, students will be emphasized to develop dynamic web applications.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Web Development and Open Source Technology	08
2	PHP Basics	10
3	Array and Functions	10
4	Handling Form Data	10
5	Database Connectivity with MYSQL	12
6	PHP Utilities	10

Total Hours (Theory): 60

Total hours (Practical): 60

Total Contact Hours:120

Detail Syllabus:

Unit I: Introduction to Web Development and Open Source Technology

Hours 8

Introduction of open source software, Development philosophy of open source software, pros and cons of open source software, open source vs. close source software, Community support in open source, Version Control, Introduction to Webpage and Website, Static and Dynamic Website, Client & Server Side Scripting, Web Hosting: Shared / Cloud / VPS / Dedicated.

Unit II: PHP Basics

Hours 10

Introduction to PHP, Installation of Apache, MySQL and PHP (OOP approach), How PHP code is parsed, Embedding PHP and HTML, Executing PHP and viewing in Browser, Comments in PHP, PHP variables: static and global variables, Data types, Operators, Conditional Statements, Looping Structure.

Unit III: Array and Functions

Hours 10

Array, Types of Array, Array Functions, Miscellaneous Functions: define, constant, include, require, header, die, exit, Overview of built in functions of PHP: String functions, Date and Time, Math functions, File handling functions, User Defined Functions.

Unit IV: Handling Form Data

Hours 10

HTML Form element & its attributes, Send Form data using GET Method & POST Method, Receive Form data using \$_GET, \$_POST & \$_REQUEST variables, Super Global Variables, PHP form validations.

Unit V: Database Connectivity with MYSQL

Hours 12

OOPs Concepts, PHP Data Objects (PDO), Introduction to MYSQL DB, CRUD operations, Handling Errors, State Management Techniques: PHP Sessions, starting session, modifying session variables, Un-registering and deleting session variable, PHP Cookies, Types of Cookies.

Unit VI: PHP Utilities

Hours 10

File Uploading: Upload Single and Multiple file using PHP script, Understanding HTTP requests, Exploring and modifying HTTP responses, getting information from web server, Sending mails.

Outline of the Course:

Week No	Practical	Description
1	Student registration page using HTML and CSS	Revised the concepts of HTML and CSS.
2	Installation of XAMPP & generating basic PHP scripts	Get familiar with echo() and print(). Able to create basic business logic.
3	Variables, Data Types and Casting	Able to work with variables, data types and able perform type casting.
4	User Inputs and Conditional Statements	Deal with user inputs. Use of conditional statements.
5	Looping Structures	Able to work with Looping structures like: for, while, do..while and foreach
6	Inbuilt Functions: string, math and date & time	Use various built-in functions available in PHP.
7	PHP Forms	Creating Forms using GET and POST methods. Also use the super global variables \$_GET, \$_POST and \$_REQUEST.
8	PHP Forms & Validations	Creating Forms with server side validations
9	PHP Array	How to create an array? Array Functions
10	Database Connectivity	Understand MYSQL Dashboard. Implement Database connectivity using PDO (PHP Data Object).
11	Database Connectivity	Implement Database connectivity using PDO (PHP Data Object).
12	File Upload and Download	Able to upload, download and view various kind of files and store path into database using \$_FILES.
13	State Management: Session	Creating Session, modifying session variables, Un-registering and deleting session variable.
14	State Management: Cookies. Super Global Variables	Creating Cookies and learning various super global variables like \$_SERVER, \$GLOBALS and \$_ENV
15	PHP Mail	Sending mail using PHP mail() & PHPMailer

Total hours (Practical) : 60

Core Books:

1. Josh Lockhart, Modern PHP, O’Rielly, 2015.
2. Kevin Tatroe, Peter Macintyre, Programming PHP, 4e: Creating Dynamic Web Pages, 4th Edition, O’Rielly, 2020.

Reference Books:

3. <https://www.w3schools.com/php/default.asp> [Lecture notes of PHP]
4. <https://github.com/PHPMailer/PHPMailer> [PHPMailer Code]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 Gain the skills and knowledge for Open Source and Web Hosting.

:

CO2 :	To utilize knowledge and skills for basics of PHP and configuration of MYSQL Server.
CO3 :	Learn the array and built-In functions in PHP.
CO4 :	Gain understanding of Form handing and utilities in PHP.
CO5 :	Be able to develop dynamic web based application using PHP and MySQL with state management techniques.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes				
		CO1	CO2	CO3	CO4	CO5
1	Introduction to Web Development and Open Source Technology	√				
2	PHP Basics		√			
3	Array and Functions			√		
4	Handling Form Data				√	
5	Database Connectivity with MYSQL					√
6	PHP Utilities				√

CAUE201 Advanced Networking

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study, Certification courses, etc.					

Pre-requisite: Basics of Computer Networks, Topologies.

Methodology, Pedagogy & Andragogy: The methodology for teaching Advanced Networking integrates a blend of theoretical instruction and practical application, employing both pedagogy and andragogy to cater to diverse learning needs. Pedagogically, the course leverages structured lectures, and formative assessments to provide foundational knowledge and skills to less experienced learners. Concurrently, andragogical techniques are employed to engage adult learners, emphasizing experiential learning, problem-solving, and critical thinking. This includes case studies, real-world simulations, collaborative projects, and research-based assignments that draw on the students' existing knowledge and professional experiences. The dual approach ensures a comprehensive understanding of advanced networking concepts, fostering both technical proficiency and strategic thinking necessary for complex network management and innovation.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Basic Network Concepts	07
2	Networking Device, media connection and network model	11
3	Network Virtualization	12
4	Adhoc Networking	11
5	Wireless Sensor networks	10
6	Fundamental of Network Security	09

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Basic Network Concepts

Hours 07

Introduction to Computer Networks, Element of Network, Type of Network: LAN, MAN, WAN, Network Topologies: Bus, Star, Mesh, Ring, etc, Data communication & Representation, Network Operating System.

Unit II: Networking Device, media connection and Network Model

Hours 11

Common LAN Media: STP, UTP, Coaxial Cable, Optical Fiber, Making and Testing Cable, straight thru cable, Cross over Cable, Connector, Jack, Patch Panels, NIC, Repeater and Hub & its type, Bridges and its Types, Switch and Router. Description of Seven Layers of OSI Model, TCP/IP Model, Comparison of OSI & TCP/IP Model, Physical and Data link Layer, Network and Transport Layer, Presentation and Session Layer, Application Layer

Unit III: Network Virtualization

Hours 12

Need for Virtualization, The Virtual Enterprise, Transport Virtualization- VNs, Central Services Access: Virtual Network Perimeter, A Virtualization Technologies primer: theory, Network Device Virtualization, Data-Path Virtualization, Control-Plane Virtualization, Routing Protocols.

Unit IV: Adhoc Networking

Hours 11

Introduction, application of MANET, challenges, Routing in Ad hoc networks, topology & position-based approaches, Routing protocols: topology based, position based, Broadcasting, Multicasting, & Geocasting, Wireless LAN, Transmission techniques, MAC protocol issues, Wireless PANs, The Bluetooth technology

Unit IV: Wireless Sensor networks

Hours 10

Need and application of sensor networks, sensor networks design considerations, empirical energy consumption, sensing and communication range, design issues, localization scheme, clustering of SNs, Routing layer, Sensor networks in controlled environment and actuators, regularly placed sensors, network issues, RFID as passive sensors.

Unit VI: Market Failures and Price Regulations

Hours 09

Market failures and need for regulation, Regulations and market structure, Firm behavior, Price regulation. More on Externalities, and role of government, importance of competition in market failure and price regulations.

Core Books:

1. Computer Networking: A Top-Down Approach 6th edition, James F. Kurose, Keith W. Ross, Pearson (2012).
2. Network Virtualization, Victor Moreno, Kumar Reddy, Cisco Press (2006).
3. Ad Hoc and Sensor Networks: Theory and Applications 2nd edition; Carlos de Moraes Cordeiro, Dharma Prakash Agrawal, World Scientific Publishing Company; 2 edition (2011)

Reference Books:

1. TCP/IP Protocol Suite 4 edition, Behrouz Forouzan, McGraw-Hill Science (2009)
2. Mobile Ad Hoc Networks: Current Status and Future Trends, Jonathan Loo, Jaime Lloret Mauri, Jesús Hamilton Ortiz, CRC Press(2011)
3. Fundamentals of Sensor Network Programming: Applications and Technology, S. Sitharama Iyengar, Nandan Parameshwaran, Vir V. Phoha, N. Balakrishnan, Chuka D. Okoye, Wiley-IEEE Press (2010).

2. <https://www.edynamiclearning.com/course/advanced-networking-1a-introduction/>
3. <https://aws.amazon.com/training/learn-about/advanced-networking/>

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Demonstrate comprehensive understanding of basic network concepts, including networking devices, media connections, and network models, and their roles in network architecture.
CO2 :	Analyze and implement network virtualization techniques, assessing their benefits and challenges in various networking environments.
CO3 :	Design and manage ad hoc networking solutions, addressing the unique requirements and challenges of decentralized network configurations.
CO4:	Develop and optimize wireless sensor networks, leveraging their capabilities for data collection and transmission in diverse applications.
CO5 :	Evaluate and apply fundamental network security principles to protect network infrastructures from potential threats and vulnerabilities, ensuring robust and secure communication channels.

CAUE202 : Artificial Intelligence (AI) Fundamentals

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The theory sessions will be focused on basics of Artificial Intelligence, problem solving paradigms, and search strategies. Areas of application such as Expert Systems, Software Agents, knowledge representation, natural language processing, expert systems, robotics will be explored.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Artificial Intelligence	08
2	Problem-solving by Search and constraint satisfaction	11
3	Knowledge representation and reasoning	11
4	Expert Systems	11
5	Agents	10
6	Introduction to AI Techniques and Application Areas	09

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to Artificial Intelligence **Hours 08**

Concepts and definitions of Artificial Intelligence (AI) – Brief history of AI – AI and related fields – The AI problems and underlying assumptions, AI approaches: Cognitive Science, Turing Test.

Unit II: Problem solving by Search and constraint satisfaction **Hours 11**

Problem spaces; brute-force search; best-first search; two-player games; constraint satisfaction

Unit III: Knowledge representation and reasoning **Hours 11**

Review of propositional and predicate logic; resolution and theorem proving; non-monotonic inference; probabilistic reasoning; Bayes theorem, reasoning under uncertainty.

Unit IV: Expert Systems **Hours 11**

Introduction – Representing and using domain knowledge – Knowledge acquisition and representation – General structure of Expert Systems – Expert System Shell – Advantages and disadvantages of Expert Systems, Applications of Expert Systems

Unit V: Agents **Hours 10**

Definition of agents; successful applications and state-of-the-art agent-based systems; software agents, personal assistants, and information access; multi-agent systems.

Unit VI: Introduction to AI Techniques and Application Areas **Hours 09**

Introduction to fuzzy logic – Introduction to various application areas of AI like Natural Language Processing (NLP), Learning, Speech Recognition, Computer Vision, Game Playing, Robotics.

Core Books:

1. Norvig, Peter, Paradigms of AI Programming, Morgan Kauffman, 1992.
2. S. Russell and P. Norvig, Modern Approach to Artificial Intelligence, Prentice Hall of India Ltd., 2006.
3. Rich & Knight, Artificial Intelligence, 2nd edition, TMH, 1991.

Reference Books:

1. R.Akerker and P. S. Sajja, Knowledge-Based Systems, Jones and Bartlett, MIT, 2010.
2. George Luger, Artificial Intelligence, 5th Edition, Addison Wesley, 2004.

2. <http://intelligence.worldofcomputing.net/ai-branches/expert-systems.html> [Expert Systems]
3. <http://pages.cs.wisc.edu/~bolo/shipyard/neural/local.html> [Neural Network]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	To understand basic problems of AI and history of AI.
CO2 :	Getting deep knowledge of searching algorithms and its applications in AI.
CO3 :	Learning Knowledge Representation and reasoning techniques.
CO4 :	To gain understanding Expert System and Agent Based Systems.
CO5 :	To explore various application areas of AI.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes				
		CO1	CO2	CO3	CO4	CO5

CAUA202: Social Media and BLOG Writing

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components : Lab Assignments, Practical Test, VIVA					

Prerequisites: None.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for understanding social media marketing strategies and BLOG writing skills.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Social Media - Platforms for social media marketing - Roles of social media in digital marketing	Learn basics of Social Media
2	Optimizing for Social Media Platforms - Facebook - Instagram - X (formerly Twitter)	Learn about various social media platforms and optimizing for them.
3	Content Calendar for Social Media Creating content calendar with different focus	
4	Content creation and Management in Meta Business Suite Understanding and Managing Meta Business Suite	Understanding Search Engine Result Page, and learn about On-the-Page and Off-the-Page Optimization
5	Understanding audience and insights in Meta Business	-
6	Boosting posts from Meta Business	-
7	Introduction to BLOG - What is BLOG? - Importance of BLOG	-
8	Popular Blogging Platforms	-

	- WordPress - Blogger	
9	Using SEO in Blogging - Using AI in Blogging - Understanding SEO in Blogging	-
10	Using Blogger for Blogging	-
11	Using WordPress for Blogging – I - Installation of WordPress - Dashboard management	-
12	Using WordPress for Blogging – II - Creating and Publishing posts - Managing comments and subscription	
13	Using WordPress for Blogging – III - Exploration of themes for blogging - Exploration of plugins for blogging	
14	Case Study – I (Social Media)	
15	Case Study – II (Blogging)	

Total hours: 60

Text Books:

1. Damian Ryan and Calvin Jones: Understanding Digital Marketing, Kogan Page, 2014
2. Stephanie Diamond: Digital Marketing All-in-One for Dummies, Wiley Publication, 2019
3. Amy Lupold Bair, Blogging for Dummies, 7th Edition, Wiley Publication, 2020

Reference Books:

1. Philip Kotler, Hermawan Kartajaya, and Iwan Setiawan: Marketing 4.0: Moving from Traditional to Digital, Wiley Publication, 2016
2. Jan Zimmerman and Deborah Ng: Social Media Marketing All-in-One for Dummies, Wiley Publication, 2017

4. <https://www.javatpoint.com/digital-marketing>
5. <https://www.javatpoint.com/blog>

Course Outcome: Upon successful completion of the course, student will:

CO1:	Able to understand digital marketing and its importance.
CO2:	Able to create and manage content using social media platforms
CO3:	Able to optimize social media platforms
CO4:	Able to blogging and its importance in digital marketing.
CO5:	Able to use generative AI in Digital Marketing.

Course Articulation Matrix:

CAUD202: Programming the Internet

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, Case Study					

Prerequisites: CAUD201 – Introduction to Web Designing

Methodology, Pedagogy & Andragogy: This subject focuses on hands-on experiments to create dynamic and interactive web sites using HTML5, CSS3 and JavaScript.

Outline of the Course:

Week No	Practical	Description
1	CSS Styling the web - Applying CSS Building blocks –CSS Selectors, Cascade & inheritance, CSS Properties, CSS Box model.	Student can apply various types of CSS with its basic properties.
2	Creating Layout - Header, footer, navigation menu, and sub-navigation. Floats.	Student can create different layout using semantic elements of HTML5 & CSS classification properties.
3	Creating Layout - Flexbox, Introduction to Flexbox, Flex Container and Flex Items, Flexbox Properties and Layout Techniques.	Student can create flexible and responsive web layouts. Its ability to distribute space and align items effectively makes it a vital part of modern web design.
4	Creating Layout - Introduction to CSS Grid Layout- Grid Container and Grid Items, multi column layout.	Student can Understand its properties and axes can significantly improve the adaptability and aesthetics of your web pages.
5	Creating Image Gallery and Animation - 2D/3D Transformation, Transitions and Animation.	Student can create layout image gallery & animation.

6	CSS Media Query.	<i>Student can create different layouts depending on the size of the viewport.</i>
7	JavaScript – Adding Internal & External JavaScript	Student can write script for basic Programs.
8	Working with variables, datatype – Number, String, Boolean.	Student can write script for basic programs using different datatypes.
9	datatype – Array, Object, Operators, Conditional statements, Looping statements.	Student can write script for basic programs using array and object, condition, Loop.
10	Adding Dialog boxes in HTML page – Alert, Confirm and Prompt.	Student can able to use dialog boxes to make website alive.
11	Creating user defined function.	Student can able to use in-build and user defined functions of JavaScript.
12	Adding Mouse and Keyboard Event in HTML page, Manipulating String and Date.	Students can make user interaction using various Events.
13	JavaScript Document Object Model hierarchy – Create find and manipulate HTML Element using Objects and methods	Student can explore the DOM Hierarchy.
14	Form validation, Applying Style using JavaScript.	Student can able to use form validations.
15	Creating New window, Accessing & manipulating History of HTML Pages.	Student can apply various objects to make web page dynamic with user interactions.

Total hours: 60

Text Books:

1. Julie C. Meloni, Jennifer Kyrnin : HTML, CSS, and JavaScript All in One, 3rd Edition, Pearson, 2018.
2. Joseph R. Lewis, Meitar Moscovitz : AdvancED CSS, W3C CSS Working Group, Apress, 2020.
3. Peter Gasston: The Book of CSS3: A Developer's Guide to the Future of Web Design, No Starch Press, April 2011.
4. MARIJIN Haverbeke : Eloquent Javascript – A modern Introduction to JavaScript, 3rd Edition, 2018
5. Michael Morrison: Head First JavaScript, O'Reilly, 2014

Reference Books:

1. Andy Budd, Emil Björklund: CSS Mastery 3rd Edition, Apress - Advance Web Standard Solutions.
2. Karl Barksdale, Shane Turner: HTML and Java Scripts Basics, 4th Edition, Course Technology, 2006.

CAUI201 : Summer Internship and Viva – II

Objective and Scope:

Students who choose to exit the programme after the completion of the first two semesters must undertake internships, community engagement programmes and field based learning/minor projects during the summer term. This internship, worth 04 credits, is a requirement for the award of the Diploma. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. This provision ensures that students gain valuable practical experience and industry exposure, complementing their academic learning and enhancing their career prospects. Following are the intended objectives of internship training:

- **Practical Experience:** Provide hands-on experience with real-world projects to apply theoretical knowledge gained during the course.
- **Skill Development:** Enhance technical skills, such as programming, software development, database management, and other relevant IT skills.
- **Industry Exposure:** Familiarize students with the working environment of the IT industry, including understanding company culture, workflows, and professional practices.
- **Professionalism:** Instil a sense of professionalism and work ethic, including adhering to deadlines, following instructions, and working collaboratively.
- **Transition to Employment:** Facilitate a smoother transition from academic life to professional careers by bridging the gap between theory and practice.

Guidelines of Internship:

The Summer Internship shall be of 15 (Minimum 60 hours) duration and will be undertaken during the Summer Vacation. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. It is mandatory for the students to seek written approval from the coordinator about the topic and the organization before commencing the Summer Internship. During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone. Students must maintain regular reports detailing the work completed, challenges faced, and learning experiences. Students must submit a final report and presentation summarizing the internship experience, project outcomes, and key learnings to guide. The technical specifications for report preparation is as under:

Technical details:

1. The report shall be printed on A-4 size white paper.
2. 12 pt. Times New Roman font shall be used with 1.5-line spacing for typing the report.
3. 1" margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be spiral bound as per the standard format of the cover page given by the Institute.
6. The report should include a Certificate (on company's letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Principal of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.

Evaluation:

The evaluation of Internship will be done as per the following criteria:

Sr. No.	Evaluation Criteria	Marks
1	Summer Internship Report	50
2	Presentation and Viva-voce examination	50
TOTAL MARKS		100

Students must secure 36% passing marks in both components to qualify for the Diploma.

Internship and Exit:

Any student intending to exit the course must complete the summer internship (Including scoring at least 36% marks in the evaluation) before exit. A student intending to exit shall have to submit an application to Principal through Counsellor before even semester university theory examination. However, any such student desiring to withdraw the exit option may do that before the last paper of theoretical examinations of even semester.

CAUC301: Object Oriented Programming Using JAVA

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction /Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: CAUC101 - Basic Knowledge of Introduction to Programming

Methodology, Pedagogy & Andragogy: Upon successful completion of the syllabus, students will get basic knowledge of object oriented programming. Concretely, students should be able to create appropriate classes using the Java Programming Language to solve problems using Object Oriented Approach. They should be able to write console based and multithreaded applications using the Java Programming Language. Students should be able to implement the interface and classed of collection framework.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1.	Introduction to Object Oriented Programming in Java	10
2.	Fundamental programming structures in java	09
3.	Inheritance, Abstract class, and Interface	09
4.	Packages and Wrapper class	09
5.	Exception handling and Multithreading	11
6.	Basics of Collections Framework	12

Total Hours (Theory) :60
Total hours (Practical) : 60
Total Contact Hours: 120

Outline of the Course (Practical):

Week No	Practical	Description
1	Basic of Java	Fundamental concepts in Java, Class & Objects , Structure of java program.
2	Data Types & Variables	Understand and utilize arrays effectively, keywords, Identifiers.
3	Defining classes, variables and methods	Implement this keyword, static keyword, method overloading, final keyword, creating objects, accessing rules of java
4	Constructors, Basics of Inheritance & Runtime Polymorphism	Implement Default constructors, Parameterized constructors, passing object as a parameter, constructor overloading. Implement inheritance types and runtime polymorphism
5	Exception handling	Able to implements exception handling: types of exceptions, Throwable class, keywords – try, catch, throw, throws and finally, nested try statement, java built in exceptions, user defined exceptions.
6	Creating packages	Able to apply the predefined packages and the use defines package and access protection.
7	Multithreading	Implementing methods of Thread class.
8	Creating Multiple Threads	Creating Multiple Threads, Thread class and the Runnable Interface.
9	Thread Priority	Implementing Thread priority
10	Synchronization & Inter-thread communication	Implementing thread synchronization and inter-thread communication.
11	Collections Framework	Implementation of Collections Framework, Collection,.
12	Iterator interface	Accessing a collection using an Iterator, ListIterator.
13	Interfaces of Collections	List, Set, Sorted Set
14	Collection classes	Array List, Linked List, Vector, Hash Set, Tree Set, Priority Queue
15	Map interface	Map, Map Entry, SortedMap, HashMap, LinkedHashMap, TreeMap.
		Total Hours: 60

Core Books:

1. Pravin M. Jain: The class of JAVA, Pearson Education, 2011.
2. Herbert Schildt: The Complete Reference Java J2SE, 5th Edition, TMH Publishing Company Ltd, New Delhi.

Reference Books:

1. Ivor Horton: Beginning Java JDK, 5th Edition, Wiley Press, 2008.
2. Cay Horstmann and Gary Cornell: Core Java Volume 1, 8th Edition or later, Pearson Education, 2008.
3. Ken Arnold, James Gosling and David Holmes: The Java Programming Language, 4th Edition, Addison Wesley.

Web References:

2. <http://www.javatpoint.com/java-tutorial> [Notes]

Course Outcomes: Upon successful completion of the course, students will be able

CO1

- : To understand basic of Object Oriented Concepts, execution environment in NetBeans

CO2 :	To understand basic syntax and semantics of Java, structure of java.
CO3 :	Learning Inheritance, Abstract class and Interface to understand how the java works ethically.
CO4 :	To introduce the implementation of Exception and Packages.
CO5 :	To introduce the concepts of multithreading & Collections framework.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes				
		CO1	CO2	CO3	CO4	CO5
1	Basic Introduction of Java	√	√			
2	Variable & Data Types		√			
3	Class Objects and Methods			√		
4	Exception Handling & Packages			√	√	
5	Multithreading					√
6	Basics of Collections Framework					√

CAUC302 Fundamentals of Visual Programming

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Component (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: CAUC101 - Basic knowledge of programming language.

Methodology, Pedagogy & Andragogy: During theory lectures, illustrations will be provided to emphasize the importance of advanced features of the .Net framework and their application in developing Windows and desktop-based solutions using the C#.Net. Practical sessions will focus on hands-on learning, where students will be tasked with creating desktop applications by applying the concepts discussed during the lectures. This approach ensures a comprehensive understanding of both theoretical aspects and their practical implementation, equipping students with the skills to develop robust Windows-based applications.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction of .NET Framework	07
2	Object-Oriented Programming with C#.NET	12
3	Introduction To Windows Forms	12
4	Introduction To ADO.NET	11
5	WPF and Advanced Features of .NET	08
6	Web Applications	10

Total Hours (Theory): 60
Total Hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Introduction of .NET Framework

Hours 07

Introducing .NET Framework, .NET Framework Component, .NET Framework Version Compatibility, Core of .NET Framework: Application Services, Base Class Library and CLR, Types of Applications which can be developed using MS.NET, MS.NET Base Class Library, MS.NET Namespaces, Common Language Runtime (CLR), Managed Code, MS.NET Memory Management/Garbage Collection, Common Type System (CTS), Common Language Specification (CLS), Types of JIT Compilers

Unit II: Object-Oriented Programming with C#.NET

Hours 12

Overview of Object-Oriented Programming, Principles of Object Orientation programming: Encapsulation, inheritance, polymorphism, Object, Defining Properties, Using Auto- Implemented Properties, Defining Methods, Understanding Constructors, Defining and Implementing Interfaces, Understanding the Role of Interfaces in .NET. C# Datatypes & Variables Declaration, Implicit and Explicit Casting, Checked and Unchecked Blocks – Overflow Checks, Boxing and Unboxing, Operators, Control Statements, Working with Arrays, C# Application Basics: Command line and VS.NET compilation.

Unit III: Introduction To Windows Forms

Hours 12

Building Windows Forms Applications, Setting Form Properties, Understanding the Life-cycle of a Form, Using the Windows Forms Designer, MessageBox Class and .config File, Working with Windows Forms Controls: TextBox, Button, Selection, List, DateTimePicker, Container, Image, Timer, ErrorProvider, TooltipProvider, Dialog box (ColorDialog, FolderBrowserDialog, OpenFileDialog, SaveFileDialog, FontDialog), MenuStrip, Handling Events: Understanding the Event-Driven Programming Model, Writing Event Handlers, Sharing Event Handlers, MDI, SDI.

Unit IV: Introduction To ADO.NET

Hours 11

Evolution of ADO.NET, Understanding the ADO.NET Object Model, Connected vs. Disconnected Access, Use of Connection, Command, DataReader, DataAdapter and Dataset class, Exceptional Handling.

Unit V: WPF and Advanced Features of .NET

Hours 08

Overview of WPF, Features of WPF, Windows Forms vs WPF, Introduction to XAML, WPF Layout: Grid Panel, Stack Panel, Dock Panel, Wrap Panel and Canvas Panel, WPF Controls: TextBlock, PasswordBox, ListBox, Slider, Popup, Menus and Expander,

Animation using WPF, Introduction to MVC, Custom Controls, Introduction to Multithreading.

Unit VI: Web Applications

Hours 10

Basic of Http Request and Http Response. o Understand form Tag and Comparison between Get and Post. ASP.NET Page Life Cycle. Structure of an ASP.NET Page: ASPX Page, Code behind File, Web config and Machine config, Rich Web Control, Validation Controls. State Management Techniques o Client side: ViewState, Hidden Field, Cookie , Server Side: ApplicationState, Session.

Outline of the Course (Practical) :

Week No	Practical	Description
1	Console Environment without IDE	To set the path and environment variable to execute a console-based program without any IDE
2	Introduction to Visual Studio IDE and .NET	Familiarize with the Visual Studio IDE and the basic programming structure of C#.NET.
3	Developing Console Applications	Creating console-based applications using input and output statements, and understanding the role of the Main method.
4		
5	Object-Oriented Programming Concepts	Implementing encapsulation, inheritance, and polymorphism in C#.
6	Control Statements and Arrays	Using operators, control statements, and working with arrays in C#.
7	Building Windows Forms Applications and Events Handling	Working with TextBox, Button, and other common controls in Windows Forms. Understanding event-driven programming and writing event handlers.
8		
9		
10	Database Connectivity with ADO.NET	Connecting to a database, executing commands, and retrieving data using ADO.NET.
11		
12	A Complete Windows Forms Application	Designing and implementing a complete Windows Forms application, integrating various controls, handling events, and database connectivity.
13	Building a WPF Application	Creating a basic WPF application.

14	Basics of ASP.NET	Understanding HTTP requests and responses, and creating a simple ASP.NET page.
15		

Total hours (Practical) : 60

Core Books:

1. Christian Nagel : Professionals C# and .NET 2021 Edition , Wiley – India, WROX
2. Albahani Josheph: C# 4.0 Pocket Reference, Shroff publication,2010.

5. <https://www.javatpoint.com/c-sharp-tutorial> [to learn basic fundamentals of C#]

Course Outcomes: Upon successful completion of the course, the students will:

CO1 :	Understand .NET Framework core features and Components.
CO2 :	Develop modular and user-friendly desktop applications using object-oriented programming concepts in C# and Windows Forms.
CO3 :	Perform database operations using ADO.NET for seamless data integration.
CO4 :	Create rich, graphical desktop applications using WPF.
CO5:	Design and develop dynamic web applications in the .NET framework.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUE 301 Software Engineering

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study, Certification courses, etc.					

Pre-requisite: CAUC203 - Fundamentals of System Analysis and Design.

Methodology, Pedagogy & Andragogy: Software engineering is an art and while learning this the students will also get familiar with the concept of project management and development of SRS document. Students will get used to entire software development process by incorporating the latest tools for designing and documenting the process.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to software and Software Engineering	08
2	Software Process Models	10
3	Managing Software Projects	12
4	Software Requirement analysis and specification	12
5	Software Maintenance and Risk Management	10
6	Modern methods in Software Engineering	08

Total Hours (Theory): 60
Total Contact Hours: 60

Detail Syllabus:

Unit I: Introduction to software and Software Engineering Hours 08

Definition of Software, Types of Software, Nature of Software, Software Applications, Definition of Software Engineering, Software Engineering-A Layered Technology, A process framework.

Unit II: Software Process Models Hours 10

Definition of Software Process, Software Process Model - The Waterfall model, Incremental Process Models: The Incremental model, The RAD model Evolutionary Process models:

Prototyping, The Spiral model, The Concurrent Development model, A final comment on evolutionary Processes, Component based development, Concept of Product and Process.

Unit III: Managing Software Projects

Hours 12

The Management Spectrum, W5HH principles, Concepts of measures, metrics and indicators. Process Metrics and Project Metrics: An overview, Software Measurements: Size oriented and function oriented metrics.

Unit IV: Software Requirement analysis and specification

Hours 12

Introduction to system and software requirements, types of software requirements: Functional and non- functional requirements. Requirement Specification (SRS), Requirement Analysis and Requirement Elicitation, Requirement Engineering.

Unit V: Software Maintenance and Risk Management

Hours 10

Software risks, risk identification, risk projection, risk mitigation, monitoring and management. Introduction to software maintenance, types of maintenance. Concept of software reengineering, Business Process Reengineering(BPR), BPR life cycle, reverse engineering, Applications of Software Engineering.

Unit VI: Modern methods in Software Engineering

Hours 08

Introduction to Agile development: What is Agility? principles and values of Agile development, concept of Extreme Programming, values of XP.

Core Books:

1. Roger S.Pressman, Software Engineering- A practitioner's Approach, McGraw-Hill International Editions
2. Grady Booch, James Rumbaugh, Ivar Jacobson: The Unified Modeling Language User
3. Rajib Mall, Fundamentals of software Engineering, Prentice Hall of India.

Reference Books:

1. Ian Sommerville, Software engineering, Pearson education Asia
2. Pankaj Jalote, Software Engineering – A Precise Approach Wiley
3. Merlin Dorfman (Editor), Richard H. Thayer (Editor), Software Engineering
4. Robert C. "Uncle Bob" Martin, Clean Architecture: A Craftsman's Guide to Software Structure and Design
5. Deepak Gaikwad, Viral Thakkar, DevOps Tools from Practitioner's ViewPoint, Wiley

Web References:

3. <https://nptel.ac.in/courses/106/101/106101061/> [Agile Software Development and Extreme Programming and Overview of DevOps]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Able to understand concept of Software and its types.
CO2 :	Get familiarize with software processes and related models.
CO3 :	Able to analyze requirements and manage project
CO4 :	Able to understand concepts of creating Software Requirement Specification
CO5 :	Able to understand risk management, software maintenance and modern Software engineering methods.

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUE302: Python Programming

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, Case Study					

Prerequisites: CAUC103-Fundamentals of Object Oriented Programming

Methodology, Pedagogy & Andragogy: The practical sessions will cover the Python Programming concepts and practices that support application development using Python Programming. The practical sessions will cover Object Oriented programming using Python Programming .

Outline of the Course:

Wee k No	Practical	Description
1	Downloading and Installation: Installation of Python and Python documentation.	Student will be familiarizing with downloading and installing Python.
2	Primary and secondary prompts, basic statements and expressions, Datatypes and Operators	Students will understand executing programs using Python. They also learn various data types supported by Python.
3	Conditional statements and Iterative statements	Students will to learn conditional and looping statements in Python.
4	Introduction to sequence types supported by Python: String, List, Tuple	Students will learn how to implement String, List, and Tuple types supported by Python.
5	Mapping and other types: Dictionary, set	Students will learn how to implement Dictionary and Set types supported by Python.

6	Exposure of python built-in Functions	Student will be familiarize with built-in functions in Python.
7	Python User-Define Functions	Students will to learn to create own function for reusability of the code.
8	Python Comprehension and filter() and map()	Students will learn to optimize the conditional and looping statements.
9	Introduction to Object Oriented Programming	Student will be familiarize with the concept of Object Oriented Programming using Python.
10	Introduction to Inheritance and concept of method overriding.	Student will be familiarize with the concept of Inheritance, method overriding using Python
11	Introduction to Polymorphism, Encapsulation, Abstraction and magic methods	Student will be familiarize with the concept of Polymorphism, Encapsulation, Abstraction and magic methods.
12	Exception Handling in python	Student will be able to understand exception handling using Python.
13	Python Module and Libraries	Student can able to learn python module and libraries to use.
14	Introduction to Web Framework: Django.	Students understand MVT based web application development using Django.
15	Creating web application based on MVT and database.	Student can apply concept of MVT and develop applications for CRUD operations.

Total Hours (Practical): 60

Total Contact Hours:60

CAUE303: Introduction to Datawarehouse (50 Marks)

(CCE-25 Marks, SEE-25 Marks)

CCE- Continuous and Comprehensive Evaluation (Theory Assignments, Unit Tests, Sessional Examination, Attendance etc.)

SEE- Semester –End- Evaluation

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Theory	02	30	20	50
Experiential Learning Components : Unit Tests, Assignments, Case Study etc.					

Pre-requisite: CAUC104 - Basic concepts of DBMS

Methodology, Pedagogy & Andragogy: During the classroom sessions, the emphasis will be given on the fundamentals of data warehouse and its architectures along with the different applications. Also, the emphasizes given on using OLAP and OLTP tools for understanding the real time applications of data warehouse technologies and the broad concept of data mining techniques. Same concepts will be made concrete through assignments, case studies, and unit tests.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction Data Warehouse	5
2	Data Warehouse Architecture	6
3	Fundamentals of OLTP and OLAP	5
4	Concepts of ETL and ELT	5
5	Applications of Data Warehouse and Business Intelligence	4
6	Overview of Data Mining	5

Total Hours (Theory): 30
Total Contact Hours:30

Detail Syllabus:

Unit I: Introduction to Data Warehouse

Hours 05

Overview of data warehousing, Types of data warehouses, Comparison of databases and data warehouses. Importance and defining characteristics of data warehousing, Classifications and key components of a data warehouse, Advantages, limitations, and future trends in data warehousing.

Unit II: Data Warehouse Architecture

Hours 06

Concepts of Data Warehouse Design and Dimensional modelling, Evolution of Data Warehouse Architecture, Understanding Data Warehouse Architecture: Explore Architecture, Concepts, and Components, Exploring Components of Data Warehouses, Data Warehouse Design Methodologies: Creating Star Schema and Snowflake Schema.

Unit III: Fundamentals of OLTP and OLAP

Hours 05

Understanding Data Integration: Concepts, Processes, and Techniques, Exploring OLAP Types: ROLAP, MOLAP, and HOLAP, and Their Distinctions, Introduction to Different OLAP Tools, Executing OLAP Operations on Multi-Dimensional Data Models through SQL Queries.

Unit IV: Concepts of ETL and ELT

Hours 05

Fundamental concepts of ETL and ELT terminologies, including extraction methods, transformation techniques, key differences between ETL and ELT, tools used in ETL.

Unit V: Applications of Data Warehouse and Business Intelligence

Hours 04

Overview of applications such as Financial Services, Banking services, Consumer Goods, Retail Sector; Importance of Data Warehouse in Business Intelligence.

Unit VI: Overview of Data Mining

Hours 05

Differentiate between database, data warehouse, data mining and text mining. Core data mining tasks and the process of knowledge discovery in databases, Understanding the concepts of supervised learning and unsupervised learning.

Core Books:

1. William H. Inmon: Building the Data Warehouse, 4th edition,, wiley publication, 2005
2. Paulraj Ponniah: Data Warehousing: Fundamentals for IT Professionals, 2nd edition, 2010
3. Han J, Kamber M, Pei J. Data mining concepts and techniques third edition. University of Illinois at Urbana-Champaign Micheline Kamber Jian Pei Simon Fraser University. 2012.

Reference Books:

1. Nenad Jukic: Database Systems: Introduction to Databases and Data Warehouses 1st Edition, Prospect Press, 2017

Web References:

1. <https://www.guru99.com/>

3. <https://aws.amazon.com/compare/the-difference-between-olap-and-oltp/>
4. <https://panoply.io/data-warehouse-guide/>

Course Outcomes: Upon successful completion of the course, students will,

CO1 : Have a deeper understanding of database systems and their underlying theory to be able to improve the decision-making process.

CO2 :	Be Understand the technology of data warehousing.
CO3 :	Be able to develop applications of higher order database systems.
CO4 :	Have Clear understanding of implementation of huge amount of static data.
CO5 :	Understand Data Mining concept and techniques.

Course Outcomes Mapping:

CAUE304: Geographical Information System (50 Marks)

(CCE-25 Marks, SEE-25 Marks)

CCE- Continuous and Comprehensive Evaluation (Theory Assignments, Unit Tests, Sessional Examination, Attendance etc.)

SEE- Semester –End- Evaluation

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Total Notional Hours
02	Theory	02	30	30

Pre-requisite: CAOS101: Mathematics for Computer Science

Methodology, Pedagogy & Andragogy: Geographical Information System integrates theoretical approaches to provide a comprehensive understanding of GIS. It includes lecture-based learning to explain core concepts such as GIS fundamentals, data models, spatial analysis, and geostatistical techniques. Case studies and examples are incorporated to help students understand the real-world implications and applications of GIS in various fields. Assessments are designed to evaluate the depth of theoretical knowledge and conceptual understanding.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to GIS	06
2	Types and Data Models	04
3	Spatial Data Editing	06
4	Attribute Data and Data Exploration	05
5	Spatial Analysis	04
6	Geo Statistical Analysis Techniques	05

Total Hours (Theory): 30
Total Contact Hours: 30

Detail Syllabus:

Unit I : Introduction to GIS

Hours 06

Basic concepts: Definition and history, Components of GIS, Recent trends and applications of GIS; Data structure and formats, Spatial data models – Raster and vector, Data base design- editing and topology creation in GIS, Linkage between spatial and non-spatial data, Data inputting in GIS. Rectification, Transformation Methods; Root Mean Square (RMS) Error

Unit II : Data Types and Data Models

Hours 04

Data Types; Spatial Data; Non-Spatial Data, Data Input; Existing GIS Data, Metadata; Conversion of Existing Data, Creating New Data, Data Models; Vector Data Model; Raster Data Model; Integration and Comparison of Vector and Raster Data Models

Unit III : Spatial Data Editing

Hours 06

Types of Digitizing Errors, Causes for Digitizing Errors; Topological Editing and Non-topological Editing; Other Editing Operations; Editing Using Topological Rules

Unit IV : Attribute Data and Data Exploration

Hours 05

Attribute Data in GIS, Attribute Data Entry, Manipulation of Fields and Attribute Data, Data Exploration; Attribute Data Query, Raster Data Query, Map- Based Data Manipulation.

Unit V : Spatial Analysis

Hours 04

Spatial Data: Definition, Analysis, Processes & Steps, Software and Tools, Geodatabase Model, Role of Databases in GIS, Creating, Editing and Managing, Classification scheme of Vector- Based and Raster- Based GIS Operation Raster- Based Techniques: Methods of reclassification, overlay analysis, Digital Terrain Analysis and Modeling- TIN and DEM, Surface representation and analysis, Slope and Aspect, Geographic Visualization Data Classification, Map Comparison.

Unit VI : Geo Statistical Analysis Techniques

Hours 05

Introduction to Spatial Interpolation: Control Points, Global Method- Trend surface analysis, regression model, local methods- Thiessen polygons, density estimation, Inverse Distance weighted Interpolation, Kriging- Ordinary Kriging and Universal Kriging, GIS and decision support system, Introduction to AHP, basic principal of AHP. Principal and components of multiple criteria decision Making.

Core Books:

1. kang-tsung Chang, 'Introduction to Geographic Information Systems' Tata McGraw Hill, 2007, New Delhi
2. C.P.Lo and Albert K.W. Yeung, "Concepts and Techniques of Geographic information Systems" Prentice Hall of India, 2006, New Delhi.

Reference Books:

1. Burrough, Peter A. and Rachael McDonnell,'Principles of Geographical Information Systems' Oxford University press, 1998, New York.

Web References:

1. <https://www.usgs.gov/faqs/what-a-geographic-information-system-gis>
2. <https://education.nationalgeographic.org/resource/geographic-information-system-gis/>

Course Outcomes: Upon successful completion of the course, students will be,

CO1 Understand the fundamental concepts of GIS, including its definition, history, components, data structures, and formats, as well as recent trends and applications

CO2	Analyze different spatial and non-spatial data types and models, including raster and vector data models, and demonstrate integration and conversion techniques.
CO3	Identify and rectify digitizing errors in spatial data and perform topological and non-topological editing to enhance the quality of GIS data.
CO4	Manipulate attribute data within GIS, perform data exploration and queries, and use map-based techniques for data analysis.
CO5	Apply spatial and geostatistical analysis techniques, including interpolation, reclassification, overlay analysis, and terrain modeling, to support decision-making in GIS.

CAUC303 : Project Work

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
12	VIVA	12	180	50	230
Experiential Learning Components (Practical): VIVA					

Pre-requisite: None

Introduction:

The Project work constitutes a major component in most Professional Programmes. It needs to be carried out with due care, and should be executed with seriousness by the students. The project work is not only a partial fulfilment of the course requirements, but also provides a mechanism to demonstrate your skills, abilities and specialization. The Project work is one that involves practical work for understanding and solving problems in the field of computing. The objective of the project is to help the student develop the ability to apply theoretical and practical tools/techniques to solve real life problems related to industry, academic institutions and research laboratories.

Methodology, Pedagogy & Andragogy: The core objective of the course is to provide project and practical based on deep learning, concept understanding, its analysis, deriving inferences and documenting it towards productive outcome of the subject. The main objective of this mini project is to let the students apply the programming knowledge to a real-world situation/problem and exposed the students with specific programming skills and help in developing a working model in terms of application.

Objective:

Student should be able to:

- demonstrate a systematic understanding of project contents;
- understand methodologies and professional way of documentation;
- know the meaning of different project contents, and
- understand established techniques of project report development.

Importance of the project

The Project is not only a part of the coursework, but also a mechanism to demonstrate student's abilities and specialization. It provides the opportunity for them to demonstrate originality, teamwork, inspiration, planning and organization in a

software project, and to put into practice some of the techniques they have been taught throughout the previous courses. The Project is important for a number of reasons. It provides students with:

- Opportunity to specialize in specific areas of computer science;
- Future employers will most likely ask about project at interview;
- Opportunity to demonstrate a wide range of skills and knowledge learned,
- Encourages integration of knowledge gained in the previous course units.

Course Outcomes: Upon successful completion of the course, students will be,

CO1

- : Student will understand the implementation of concepts of SDLC and Software Engineering.

CO2 :	The programming concepts they learn during their academics, it will be converted in to the actual implementations.
CO3 :	Students will be exposed to understand the requirement of proposed software and implement these requirements in terms of programming logic and methods.
CO4 :	Students must understand the difference between a program and professional application/product/software.
CO5 :	Students will learn different categories of applications like Desktop application, Web applications, etc.

Guidelines:

Mini Project is in house project development. Every student is required to carry out Mini Project work under the supervision of a guide provided by the placement Coordinator. The guide shall monitor progress of the student continuously. A candidate is required to present the progress of the Mini Project work during the semester as per the schedule provided by the placement Coordinator.

Mini Project proposal should be prepared in consultation with project guide. It should clearly state the objectives and environment of proposed Mini Project to be undertaken. Project documentation must be with the respect to the project only. Project report should strictly follow the points suggested in format of project report. Placement coordinator will provide the format of project report. Student has to submit one copy of Mini Project to the institute. Each Student is required to make a copy of Mini Project and submit along with Mini Project report.

Evaluation:

The project must be evaluated in two aspects:

- a. Internal (100 Marks):
 - i. Reporting to internal project guide
 - ii. Incorporation of suggestions by project guide
 - iii. Internal Project viva examination
- b. External (200 Marks):
 - i. Project Report Preparation & Evaluation
 - ii. External Project Viva Examination

CAUE305 : Introduction to Data Science

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: CAUC101-Foundation of Programming, CAUC104-Database Fundamentals

Methodology, Pedagogy & Andragogy: During theory sessions topics related to Data Science will be covered with suitable examples. Students will get exposure of model building using machine learning algorithms. Student will get in-depth knowledge of Data Science based real applications using case study approach.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Fundamentals of Data Science	08
2	Statistics and Linear Algebra for Data Science	10
3	Data Preprocessing	12
4	Data Visualization	10
5	Machine Learning for Data Science	10
6	Data Science Applications and future trends	10

Total Hours (Theory):60
Total Contact Hours:60

Detailed Syllabus:

Unit I : Fundamentals of Data Science

Hours 08

Introduction to Data Science, Definition and description of Data Science, Need of Data Science, Pre-requisites of Data Scientists, Tools and Skills for Data Science, Data Science Process Life-cycle - Data Discovery, Preparation, Model Planning, Model Building, Communicate Results, Types of Data Analysis- Descriptive, Diagnostic, Predictive, Prescriptive.

Unit II : Statistics and Linear Algebra for Data Science

Hours 10

Descriptive Statistics- Measure of frequency, Measure of Central Tendency, Measure of Dispersion, Measure of Position. Overview of Inferential Statistics, Linear Algebra for Data Science using Vectors and Matrices- Basic Vector operations, Common Matrix operations.

Unit III : Data Preprocessing

Hours 12

Reading data using different functions, Introduction to Data Pre-processing, Data types and forms, Possible data error types, Consistent Data, Data Cleaning- Filling Missing Values, smoothing noisy data, Detecting and removing outliers, Data Integration, Data transformation- Rescaling, Normalizing data, Standardizing data Implementation Using Python.

Unit IV : Data Visualization

Hours 10

Introduction to Data Visualization, Visual encoding, Basic plots using Python, Data Visualization libraries in Python.

Unit V : Machine Learning for Data Science

Hours 10

Overview of Machine Learning- Supervised, Unsupervised, Semi-Supervised and Reinforcement Learning, Regression Methods – Simple Linear Regression, Multiple Linear Regression, Classification Methods- KNN, Logistic Regression, Naïve Bayes, SVM, Clustering Method- k-means clustering, Fuzzy c-means, Introduction of Reinforcement Learning.

Unit VI : Data Science Applications and future trends

Hours 10

Applications- Manufacturing, Personalization, Medical Image Analysis, Internet Search, Genomics, Speech Recognition, Advertising, Financial Fraud Detection, Airline Route Planning, Cyber-threats, transportation, gaming, recommendation system.

Course Outcomes: Upon successful completion of the course, students will be,

CO1 : Able to understand fundamentals of Data Science.

CO2 :	Able to use statistical data analysis techniques for Data Science Applications
CO3 :	Able to apply data cleaning, visualization and exploratory data analysis techniques on data.
CO4 :	Able to build model using machine learning techniques.
CO5 :	Able to understand applications and future trends of Data Science.

CAUE306: Fundamentals of Digital Image Processing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The theory sessions will emphasize fundamentals and applications of digital image processing. The classroom sessions will make students aware of various operations such as colour image processing, image enhancement, segmentation, representation, recognition, and compression, which are performed on digital images. To enhance comprehension, we will provide illustrations of digital image processing operations using a programming language. To bridge the gap between theoretical knowledge and practical application, we have to schedule industrial visits. These visits are designed to offer students a tangible correlation between their studies and real-world practices. Students shall be assigned case studies to facilitate the practical application of their acquired knowledge. These case studies aim to deepen understanding and foster the ability to apply theoretical concepts to real-world scenario of digital image processing and analysis.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Digital Image Fundamentals	18
2	Colour Image Processing	10
3	Image Enhancement	09
4	Image Segmentation	06
5	Image Representations and Recognition	09
6	Image Compression	08

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Digital Image Fundamentals

Hours 18

Introduction, History, Components of image processing system, Applications of Digital Image Processing, Human visual system, Image as a 2D data, Image representation, Gray scale and Colour images, image sampling and quantization, Basic Relationships between Pixels.

Unit II : Colour Image Processing

Hours 10

Colour fundamentals, Colour models, Colour transformation, Smoothing and Sharpening, Colour segmentation, Noise Models, Noise Reduction, Inverse Filtering.

Unit III : Image Enhancement

Hours 09

Basic gray level Transformations, Histogram Processing, Spatial Filtering, Extension to functions of two variables, Image Smoothing, Image Sharpening, Frequency domain filtering, Homomorphic filtering

Unit IV : Image Segmentation

Hours 06

Edge based segmentation, Region based segmentation, Region split and merge techniques, Region growing by pixel aggregation, optimal thresholding, Hough Transform, boundary detection.

Unit V : Image Representations and Recognition

Hours 09

Boundary representation, Chain code, Polygonal Approximation, Signature, Boundary segments, Boundary description, Regional Descriptors, Topological Feature, Texture, Pattern and Patterns classes, Recognition Based on matching

Unit VI : Image Compression

Hours 08

Introduction, Image compression model, Error free compression, Variable length coding, Bit plan coding, Lossless predictive coding, Lossy compression, Compression standards.

Core Books:

Course Outcomes: Upon successful completion of the course, students will,

CO1 Understand the concept of various types of images and analyze various techniques for intensity transformation and spatial filtering with applications.

CO2 :	Understand the concepts of color image processing and noise models.
CO3 :	Understand the concepts of image enhancement and its techniques.
CO4 :	Learn various image segmentation techniques.
CO5 :	Be able to represent and recognize images using various pattern recognition methods its compression techniques.

CAUS301: Mobile Application Development

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction /Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Theory	02	30	30	60
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Quizzes, Assignments, Case Studies etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: CTUC103-Object Oriented Programming Concepts.

Methodology, Pedagogy & Andragogy: The teaching methodology integrates theoretical and practical approaches to provide a comprehensive understanding for mobile application development subject for android application development using Kotlin language. Pedagogy involves interactive lectures, real-world examples, and guided coding sessions to build foundational knowledge and problem-solving skills. Andragogic strategies focus on self-directed learning through projects, case studies, and hands-on lab sessions, enabling students to apply theoretical concepts in developing functional mobile applications. Regular assessments, collaborative group tasks, and instructor feedback ensure an engaging and practice-oriented learning environment.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1.	Introduction Android and Android Development tools	05
2.	User Interface – I	07
3.	User Interface - II	05
4.	Material Design	04
5.	Application Data Handling	06
6.	Web Services	03

Total Hours (Theory): 30

Total hours (Practical): 60
Total Contact Hours: 90

Detail Syllabus:

Unit I: Introduction Android and Android

Hours 05

Development tools

Introduction to Mobile Applications and Android, Basics of Kotlin, setting up development environment, Dalvik Virtual Machine, Android Application Structure, DDMS, Android Manifest File, Gradle, Android permissions, APK, Basic Building blocks – Activities, Services, Broadcast Receivers & Content providers.

Unit II: User Interface – I

Hours 07

Working with Containers: LinearLayout, RelativeLayout, TableLayout, ScrollView, and FrameLayout, Fragment, Views: Toast, TextView, EditText, Button, ImageButton, CheckBox, ToggleButton, RadioButton, RadioGroup, ProgressBar, AutoComplete TextView, Components for communication Intents & Intent Filters Intents: Explicit Intents, Implicit Intents, switching between activities and passing data between activities using Intents, Logging.

Unit III: User Interface - II

Hours 05

Calendar: Manage Date and Time, Adapters: ArrayAdapter, BaseAdapter ListView and ListActivity, GridView, Gallery Menus: Option menu, Context menu, Sub menu Tabs and TabActivity Alert Dialogs, Android Toolbar.

Unit IV: Material Design

Hours 04

Android Design Support Library, Vector Drawables, Basics of material design components and principles, Android styles and themes, Animations and Transitions.

Unit V: Application Data Handling

Hours 06

Basics of Storage in Android, Shared Preference: Save key-value data, Store Data in SQLite Database, store data in a firebase, save files on Device, Sharing of data.

Unit VI: Web Services

Hours 03

Working with Web Service in Android, Deploying Web Service.

Outline of the Course (Practical):

Week No	Practical	Description
1	Kotlin, Toast	Kotlin Code Programs, Toast Messages “Hello World”
2	TextView, EditText, Activity, Intent	Use of Textview, EditText and Toast with Operations. Use of Activity and Intent for values.
3	Views, EditText, ViewBinding, findViewById, layouts	Create the calculator app and use proper controls, Handle the views without using findViewById
4	Implicit, Explicit Intent, Activity Life Cycle	Manage Student Information using Intent and also create the App to learn the activity life cycle.
5	Different Activities, UI, toggle button, progress bar	Splash Screen, Login and user creation as well as create the application for addition operation of two variables.
6	EditText, Button	Create an app to perform the arithmetic operations using 4 buttons.
7	Implicate Intent, Explicit Intent, UI with functions	Open CHARUSAT website using Implicit Intent. Create an application to share data with native mobile apps for browser, calling app with optimized code.
8	Shared Preference and UI with complete application, Material design	Use shared Preferences for the session management and also create application for one college event using radio button, check boxes and spinners.
9	Images, Alert Dialog box	Display Toast message by clicking on Image Button and open CHARUSAT website. Use alert dialog for the messages in the application
10	AutoCompleteTextView	Create the application using AutocompleteTextView for Countries list.
11	Adapters, Array Adapter, Base Adapter, ListView	Use the Spinner using Array Adapter. Create the app with student photos using base adapter
12	Alert Dialog, Back Press	Manage the back press event using alert dialog.
13	Menu	Create an application with different types of menus. Context Menu Popup Menu Option Menu
14	Recyclerview, SQLite	Create app with Photos and names using recyclerview. Also create the app for CRUD operations using SQLite.
15	Firebase	Create the app for authentication using firebase. Also create the app for data management in Firestore.

	Total hours (Practical) : 60
