PREAMBLE

The Handbook (Student's Information Booklet) for Students, printed in two volumes contain General Information Respectively about the CHARUSAT University and detailed information about Smt. Chandaben Mohanbhai Patel Institute of Computer Applications.

Handbook Volume-I contains information about general rules to be followed by the students on campus. It gives information about the general facilities and support available for the students on campus. It gives insight about the discipline and conduct rules of the University.

This Handbook (Student's Information Booklet) is for the purpose of providing information to the students about the University and its programmes and is not a Regulation book of the University. Hence, no claim can be made based on the information given in the book.

The University / Institute reserves the right to amend the rules and regulations mentioned in the Handbook without any prior notice. The decision of the University shall be final on all matters. For any clarification, the Student Section may be contacted. Handbook Volume-II (Student's Information Booklet) contains academic information about the Institute, which includes the Academic Rules and Regulations regarding academic requirements and academic conduct of the students at the University including different policies and forms. Besides, it includes important information on registration, grading system, academic standards, attendance norms, discipline and the like. The students shall abide by these rules and shall, at all times, conduct in a manner so as to bring credit to the University and enhance its prestige in the society.

It is prime responsibility of the students to get familiar (themselves) with the rules and regulations.

ABOUT INSTITUTE

Smt. Chandaben Mohanbhai Patel Institute of Computer Applications (CMPICA) is a constituent institute of CHARUSAT. It is offering a MCA, M.Sc. (IT), BCA, B.Sc.(IT), Online BCA, Online MCA and Ph. D. programmes. The vision of the institute is to become one of the leading institutions in the country by imparting state-of-the-art education to the students in the field of computer applications and by contributing in the nation's efforts of computerizing public systems for the benefit of the masses. It is committed to excel in both teaching and research. Institute is reacting rapidly to the changing technological landscape by adapting quickly. The Institute is also committed to adapt industry practices.

The institute has received numerous prestigious awards from various organizations, including AICTE, the Government of India, and the Government of Gujarat. Additionally, it has been awarded a five-star rating in the Gujarat State Institutional Rating Framework (GSIRF) by the Government of Gujarat.

ACADEMIC REGULATIONS & SYLLABUS 2024 -25

Faculty of Computer Science & Applications
Smt. Chandaben Mohanbhai Patel Institute of
Computer Applications
Bachelor of Computer Applications (B.C.A.) Programme
(as per NEP-2020)

Charotar University of Science and Technology (CHARUSAT)

ACADEMIC RULES

To ensure uniform system of education, duration of under graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

1. System of Education

The Semester system of education should be followed across the Charotar University of Science and Technology (CHARUSAT) at Bachelor's levels. Each semester will be at least 90 working days' duration. The Curriculum and Credit Framework for Undergraduate Programmes (CCFUP) is based on the University Grants Commission's (UGC) guidelines, with a student-centric focus, flexible choice-based credit system, and a multidisciplinary approach. This framework also provides multiple entry and exit options, facilitating students to align their education with their career aspirations by choosing subjects/fields of their interest. Every enrolled student will be required to take a specified load of course work in the chosen course of specialization and also complete a project/dissertation if any.

2. Certification and Duration of Study with Multiple Entry Multiple Exit (MEME)

The undergraduate degree will have a flexible duration of either three or four years, with multiple exit options during this period. The table below outlines the various certifications a student can earn at different stages of their undergraduate study:

Table-1 Certification and Duration on MEME

Duration of Study	Semesters Completed	Certification Earned
4 Years	Eight Semesters(4 Academic Years)	Bachelor's Degree (Honours)
		Bachelor's Degree (Honours with Research)
3 Years	Six Semesters(3 Academic Years)	Bachelor's Degree
2 Years	Four Semesters(2 Academic Years)	Undergraduate Diploma
1 Year	Two Semesters(1 Academic Year)	Undergraduate Certificate

In consonance with the National Education Policy (NEP) 2020 and the guidelines of the University Grants Commission (UGC), Charotar University of Science and Technology (CHARUSAT) implements the Multiple Entry and Multiple Exit (MEME) scheme in their Bachelor of Computer Applications (BCA) programme. This structure provides students with the flexibility to enter, exit, and re-enter the programme at various stages, each with its corresponding certification mentioned above in Table-1.

Table 2: Multiple Entry Multiple Exit options

NCrF Credit Levels	Qualification Title	Credit Requirement	Programme Exit	Additional Requirement	Re-entry to Degree Programme
4.5	UG Certificate	48	After Year 1	Completion of one 4- credit of summer internship in core specific NSQF defined course during summer vacation of Year 1	Within three years of exit
5	UG Diploma	92	After Year 2	Completion of one 4- credit	Within three years of exit

				of summer internship in core specific NSQF defined course during summer vacation of Year 2	
5.5	Three Year Bachelor Degree	132	After Year 3	Compliance with minimum credit requirements specified in regulations	Within three years of exit
6	Bachelor's Degree with Honors	176	After Year 4	Compliance with minimum credit requirements specified in regulations	NA
6	Bachelor's Degree with Honors with Research	176	After Year 4	Compliance with credit requirements as specified in regulations	NA

Students who are opting for exit at any level, shall re-enter the institution to complete the UG Degree, where they had left off. They can re-enter within three years of exit and complete the degree programme within the stipulated maximum period of seven years from the date of admission to UG programme.

3. CREDIT FRAMEWORK FOR BCA (Bachelor of Computer Applications)

Arrangement of Credit Distribution Framework for three/four years Honors/Honors with Research Degree Programme with Multiple Entry and Exit Options.

(As per GR No: KCG/admin/2023-24/0607/kh.1, Sachivalaya, Gandhinagar, Date-11/07/2023)

	Credit Requirement for each Category

Grand Total 1 st to 3 rd Year Credit		64	24	12	08	16	8	-	132	
Exit 3: Award of UG Degree in Major course with 132 credits.										
NCrF Credit Level	Semester	Major Core	Minor	Mul ti/I nte r Dis cipl in ary	Ability Enhanc emen ts Cours es(AE C)	Skill Enhance ment Courses(SEC)	Value Added Courses(VA C)/IKS	Research Project/Diss ertation	Total	Qualification/ Certificate
6 Fourth Year	VII	12	4	-	-	-	-	6(OJT)	22	UG Honors Degree
	VIII	12	4	-	-	-	-	6(OJT)	22	
4 th Year Credit Total		24	8	-	-	-	-	12	44	
Award of UG Honors Degree in Major course with 176 credits.										
6 Fourth Year	VII	12	4	-	-	-	-	6(RP)	22	UG Honors With Research Degree
	VIII	12	4	-	-	-	-	6(RP)	22	
4 th Year Credit Total		24	8	-	-	-	-	12	44	
Grand Total 1 st to 4 th Year Credit		88	32	12	08	16	8	12	176	
Award of UG Honors with Research Degree in Major course with 176 credits.										

2 credit course on Community Service/NSS/NCC/Sports as a compulsory course to be undertaken by students during the initial two years of the study. This course will not affect the overall SGPA/CGPA of the students.

5. Eligibility & Mode of Admissions

Eligibility of a candidate and mode of admission to the programme will be according to the regulations for admission committee decided by Government of Gujarat from time to time.

6. Programme structure and Credits

A student admitted to a program should study the course and earn credits specified in the course structure.

7. Attendance

7.1 All activities prescribed under these regulations and listed by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student from attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Dean/Principal.

7.2 Student attendance in a course should be 80%.

8. Course Evaluation

8.1 The performance of every student in each course will be evaluated as follows:

8.1.1 Continuous and Comprehensive Evaluation using various components such as Assignments, Unit Tests, Sessional Test, Case Study, Attendance, Practical Test, Viva etc. by the course faculty member(s). The weightage of these components is 50% of the marks for the course; and

8.1.2 Semester-End-Evaluation by the University through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these, for 50% of the marks for the course.

8.2 University Examination

8.2.1 The final examination by the University for 50% of the evaluation for the course will be through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these.

8.2.2 In order to earn the credit in a course a student has to obtain grade other than FF.

8.2.3 Performance of Continuous and Comprehensive Evaluation(CCE) and Semester-End-Examination(SEE) Examination will be done on the grading system.

9. Grading

The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are defined as follows:

Grading Scheme Range of Marks (%)	96.0-100	86.0-95.9	76.0-85.9	66.0-75.9	56.0-65.9	46.0 – 55.9	36.0 – 45.9	Below 36.0	Absent
Letter Grade	O (Outstanding)	A+ (Excellent)	A (Very Good)	B+ (Good)	B (Above Average)	C (Average)	P (Pass)	F (Fail)	Ab (Absent)
Grade Point	10	9	8	7	6	5	4	0	0

SGPA = $\sum CiGi / \sum Ci$ where Ci is the number of credits of course i Gi is the Grade Point for the course i and $i = 1$ to n , n = number of courses in the semester.

CGPA = $\sum CiGi / \sum Ci$ where Ci is the number of credits of course i Gi is the Grade Point for the course i and $i = 1$ to n , n = number of courses of all semesters up to which CGPA is computed.

The minimum passing marks for each pattern of evaluation are 36% .

10. Detention Rule

A student will be promoted to next year only if he/she has cleared all the courses of the year he/she is studying in. Awards of Degree.

10.1 Every student of the programme who fulfils the following criteria will be eligible for the award of the degree:

10.1.1 He should have earned at least minimum required credits as prescribed in course structure; and

10.1.2 He should have cleared all evaluation components in every course;

11. Award of Class

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Distinction:	CGPA ≥ 7 & ≤ 10
First class:	CGPA ≥ 6.0 & < 7
Second Class:	CGPA ≥ 5.0 & < 6.0
Pass Class:	CGPA < 5.0

12. Transcript

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA, class obtained, etc.

Choice of Courses

Undergraduate students will make course selections from the various lists and that will fall into categories as outlined below:

Major Course:

This is the primary subject area a student wishes to delve into during their undergraduate course. It is the area of study that the student is most passionate about and may wish to pursue as a career.

Minor Course:

This is a secondary area of study that complements the student's chosen Major. Students who complete a sufficient number of courses in a discipline or an interdisciplinary area of study other than their chosen Major will qualify for a Minor in that discipline or interdisciplinary area.

Multidisciplinary Course:

All undergraduate students are required to complete three introductory-level courses relating to any of the broad disciplines. These courses aim to broaden the student's intellectual experience and form part of liberal arts and science education.

Ability Enhancement Course (AEC):

These are Modern Indian Language (MIL) & English language courses focused on enhancing language and communication skills. The courses aim to enable students to acquire and demonstrate core linguistic skills, including critical reading and expository and academic writing skills. The courses also emphasize the development and enhancement of skills such as communication, and the ability to participate in/conduct discussion and debate.

Skill Enhancement Courses (SEC):

These courses aim to impart practical skills, hands-on training, soft skills, etc., to enhance the employability of students. The institution may design courses as per the students' needs and available institutional resources.

Value Added Course (VAC):

These courses are designed to provide extra skills or knowledge beyond the standard curriculum, often tailored towards enhancing employability, promoting entrepreneurship, or developing personal and professional skills.

The choice based credit system provides flexibility in designing curriculum and assigning credits based on the course content and hour of teaching. The choice based credit system provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective and open elective courses. The CBCS provides a cafeteria type approach in which the students can take courses of their choice and adopt an interdisciplinary approach to learning. The courses shall be evaluated on the grading system, which is considered to be better than the conventional marks system.

Core Courses

A Course which shall compulsorily be studied by a candidate to complete the requirements of a degree / diploma in a said programme of study is defined as a core course. Following core courses are incorporated in CBCS structure:

A. University Core Courses(UC):

University core courses are compulsory courses which are offered across university and must be completed in order to meet the requirements of programme.

B. Programme Core Courses(PC):

Programme core courses are compulsory courses offered by respective programme owners, which must be completed in order to meet the requirements of programme.

Elective Courses

Generally, a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline of study or which provides an extended scope or which enables an exposure to some other discipline / domain or nurtures the candidates

proficiency / skill is called an elective course. Following elective courses are incorporated in CBCS structure:

A. University Elective Courses(UE):

The pool of elective courses offered across all faculties / programmes.

B. Institute Elective Course (IE)

Institute elective courses are those courses which any students of the University/Institute of a Particular Level (PG/UG) will choose as offered or decided by the University/Institute from time-to-time irrespective of their Programme /Specialization.

C. Programme Elective Courses (PE):

The programme specific pool of elective courses offered by respective programme.

Credit Hour Allocation for Different Course Types

Definition and Standardization

The workload associated with a course will be measured in terms of credit hours. One credit hour is equivalent to one hour of instructional time per week over the duration of a semester (minimum 15 weeks).

Types of Course Components

Courses can be comprised of one or more of the following components:

1. Lecture
2. Practicum
3. Seminar/ Internship/ Studio Activities/ Field / Practice /Projects / Community Engagement and Service

Credit Hours per Course Component

The weekly and semester-wise instructional hours associated with each credit for different components are as follows:

Credit Hours per Course Component

Course Component	Weekly Hours per Credit	Total Hours in a 15-week Semester
Lecture	1 Hour	15 Hours
Practicum	2 Hours	30 Hours
Internship, Field Practice/Projects, Community Engagement and Service/NCC/NSS/Sports	2 Hours	30 Hours

Course Categories

Courses in the study program are categorised based on the nature of the learning activities. These include:

Lecture courses: These involve expert-led sessions related to a specific field.

Practicum or Laboratory work: These apply previously learned principles/theories in practical projects or lab activities.

Internship: These involve professional activities or work experiences, typically supervised by experts from the relevant external entities.

Field practice/projects: These involve field-based learning or projects supervised by external experts.

Community engagement and service/NCC/NSS/Sports: These involve activities exposing students to societal socio-economic issues, facilitating the application of theoretical and practical knowledge to real-life problems. It also involves skills and physical fitness among students through indoor & outdoor sports, field & track events.

Vision, Mission, PEOs, POs and PSOs

Vision

To become a leading institution in the field of computer applications and contribute in national efforts of computerizing public systems

Mission

To produce competent computer professionals with the ability to face future challenges.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

The graduates will:

PEO1: Be able to understand the requirement of computing problem and implement an effective solution.

PEO2: Be able to successfully take up various available career options.

PEO3: Be able to continuously learn in their preferred domains.

PEO4: Be able to acquit themselves in ethical and professional manner while demonstrating effective skills.

PROGRAM OUTCOMES (POs)

The Graduate of Computer Science and Applications will be able to:

PO1: Computational Knowledge: Apply knowledge of computing fundamentals, computing specialization, mathematics, and domain knowledge to provide effective solution in the area of computing.

PO2: Problem Analysis: Identify, formulate, and solve complex computing problems reaching substantiated conclusions using fundamental principles of mathematics, computing sciences, and relevant domain disciplines.

PO3: Design /Development of Solutions: Design and evaluate solutions for computing problems, and design and evaluate systems, components, or processes that meet specified needs by considering several societal aspects.

P04: Modern Tool Usage: Create, select, adapt and apply appropriate techniques, resources, and modern computing tools for any computing activities, with an understanding of the limitations.

P05: Professional Ethics: Understand and commit to professional ethics, responsibilities, and norms of professional computing practice.

P06: Life-long Learning: Recognize the need, and have the ability, to engage in independent learning for continual development as a computing professional.

P07: Project management: Demonstrate knowledge and understanding of the computing and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

P08: Communication Efficacy: Communicate effectively with the computing community, and with society at large, about complex computing activities by being able to comprehend and write effective reports, design documentation, make effective presentations, and give and understand clear instructions.

P09: Societal and Environmental Concern: Understand and assess societal and environmental issues within local and global contexts, and the consequential responsibilities relevant to professional computing practice.

P10: Individual and Team Work: Function effectively as an individual and as a member or a leader in diverse teams and in multidisciplinary environments.

P11: Innovation and Entrepreneurship: Identify a timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

PROGRAM SPECIFIC OUTCOMES

At the end of the programme, the student should be able to

PSO1: Analyze, evaluate and formulate workable computing solutions to real world problems using computing methods.

PSO2: Apply proficiencies of communication, teamwork and management skills with spirit of entrepreneurship.

SALIENT FEATURES

- Four Years unique programme as per National Education Policy-2020.
- Have a flexible duration of either three or four years, with multiple exit options during this period.
- Provides students with the flexibility to enter, exit, and re-enter the programme at various stages, each with its corresponding certification.
- Award of Degree:
 - **UG Certificate** (Candidate wish to Exit after the First Year with additional requirements of 4 credits summer internship)
 - **UG Diploma** (Candidate wish to Exit after the Second Year additional requirements of 4 credits summer internship)
 - **UG Degree** (Candidate wish to Exit after the Third Year)
 - **UG Honors Degree or UG Honors with Research Degree** (Candidate finishes all Four Years)
- Programme is designed with various categories of courses such as Major, Minor, Multidisciplinary, Ability Enhancement, Skill Enhancement, Value Added, Community engagement and service/NCC/NSS/Sports based on Choice Based Credit System(CBCS).
- Focus on student-centered learning.
- Problem-based learning and industry-relevant curriculum.
- Industry visits, seminars, workshops, and guest lectures by eminent researchers and industry practitioners.
- Active student clubs and bodies.
- The multi-cultural and vibrant teaching environment.

Total Credits of Programme (8 Semesters): 176

CAUC101: Foundation of Programming

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA , certification courses, development of projects etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In theory lectures, students will develop problem-solving skills through algorithms and flowcharts, understanding C programming's structure to create basic programs. The curriculum covers conditional and iterative statements, array manipulation, and user-defined functions, with advanced topics like pointers and structures. Emphasis is placed on hands-on experience, focusing on algorithmic thinking and creating flowcharts. Students will learn to write effective C code, mastering variables, input/output operations, and advanced concepts, promoting independent learning and real-world application.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Programming Basics	08
2	Introduction to C	12
3	Expressions and Control Statements	10
4	Arrays and Strings	10
5	Introduction to Functions	10
6	Pointers & Basic of the structures	10

Total Hours (Theory): 60
Total hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Programming Basics

Hours 08

Introduction to algorithm, Key features of algorithm, Introduction to flow charts, Significance of flow chart, Advantages and limitation of flow chart, Introduction to programming languages, Introduction to editor, compiler, and translator.

Unit II: Introduction to C

Hours 12

Introduction, characteristics of C, Structure of C Program, writing first C program, Files used in C program, Compiling and Executing C program. Basic data types in C, User define data types, Variables in C, Declaring and initializing variables in C, Constants, Input / Output statements in C, Operators - arithmetic, relational, logical, assignment, increment - decrement, conditional, Bitwise, comma operator, size-of operator, operator precedence chart.

Unit III: Expressions and Control Statements

Hours 10

Arithmetic expressions, evaluation of expressions, type conversions in expressions, operator precedence and associativity, mathematical functions. Type conversion and casting; Introduction to decision control statements, Conditional and branching statements, loop, nested loop, Break, continue and go to statement.

Unit IV: Arrays and Strings

Hours 10

Arrays: One-dimensional, two-dimensional, Handling of Character Strings: Declaring and initializing string variables, reading string from terminal, writing string to screen, string handling functions, table of strings.

Unit V: Introduction to Functions

Hours 10

Need for user-defined functions, the form of c function, return values and their types, calling a function, category of functions, handling of non-integer functions, nesting of Functions, recursion, functions with arrays.

Unit VI Pointers & Basic of the structures

Hours 10

Understanding the Computer's Memory, Introduction to Pointers, Declaring Pointer Variables, Pointer Expressions and Pointer Arithmetic, Null Pointers, Generic Pointers, passing arguments to Function using Pointers, Pointers and Arrays, passing an Array to a Function, Difference between Array name and Pointer, Pointers and Strings, Array of Pointers, defining a structure, declaring structure variables, accessing structure members, structure initialization.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Programming and IDE	Overview of programming languages, algorithms, flowchart, Setting up the development environment, Introduction of development environment.
2-3	Basic of C programming	Structure of C Program, writing first C program, Files used in C program, Compiling and Executing C program; Basic data types in C. Variables in C, Declaring and initializing variables in C, Constants, Input / Output statements in C
4-5	Operators, Expressions evaluation & type conversions.	Operators - arithmetic, relational, logical, assignment, increment - decrement, conditional, Bitwise and special, comma operator, size-of operator, operator precedence chart. Arithmetic expressions, evaluation of expressions, type conversions.
6-7	Decision-making statements and looping statements	Decision-making statements (if, else if, else) and nested decision-making statements, Switch statement, Looping statements (for, while, do-while), nested looping statements Break and continue statements.
8-9	Arrays	Understanding arrays, one-dimensional array, two-dimensional arrays, practical exercises of one-dimensional and two-dimensional array.
10-11	String and String functions	Declaring and initializing string variables, reading string from terminal, writing string to screen, string-handling functions.
12-13	User defined functions	Introduction to functions, Function declaration, definition, and calling, Parameters and return values. Scope and lifetime of variables, Recursion.
14-15	Pointers & Structures	Introduction to pointers, Pointers and arrays, Pointer arithmetic, Defining and declaring structures, Accessing structure members

Core Books:

1. ReemaThareja: Computer Fundamentals and Programming in C, 2nd Edition, Oxford University press, 2017
2. PradipDey and Manas Ghosh. "Programming in C", Second Edition, Oxford University Press.
3. E. Balagurusamy: Programming in C, 7th Edition.

Reference Books:

1. Brian W. Kerighan and Dennis M. Ritchie : The C Programming Language, Prentice Hall.
2. PradipDey, Manas Ghosh: Programming in C, 4th Edition, Oxford University press.
3. Herbert Schildt: The complete reference C, Fourth edition, Tata McGraw Hill
4. YashwantKanetkar: Let us C, 13th Edition, BPB publication.

Web References:

1. <https://cprogrampracticals.blogspot.com/p/basic-concepts.html> [For basic c programming practical]
2. <https://www.programtopia.net/c-programming/docs/operators-expressions> [For operators and expressions in C]
3. <https://www.javatpoint.com/functions-in-c> [For functions]
4. <https://www.programiz.com/c-programming> [For basic c programming practical]
5. <https://www.javatpoint.com/c-pointers> [pointers in c]
6. <https://www.programiz.com/c-programming/c-structures> [structures in c]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Be able to solve problems using algorithms and flowcharts.
CO2 :	Learn about the structure of C program and able to develop simple programs using the C Programming language with data types, variables and constants.
CO3 :	Gain the knowledge of different conditional and iterative statements and expressions.
CO4 :	Explore the utilization and manipulation of numbers and characters arrays both.
CO5 :	Be able to understand user define function. Also, learn Programing-using Array with Pointer and Structure.

CAUC102: Fundamentals of Web Designing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: Basic concepts of web.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for design and develop entire web sites using several web designing tools and HTML scripting language.

Outline of the Course:

Week No	Practical	Description
1	Basic Construction of an HTML & HTML5 Page, HTML Text Editors, HTML Building blocks.	Learn basic concepts of web page design.
2	Basic HTML tags – Text formatting tags, Heading tags, paragraph tags, division tag, Span tags, Break line tag, Binding space in HTML.	Get familiar with different tags and attributes which is used to add the text in a web page.
3	Controlling Font size and color, Adding Table – Table tag.	Learn user interface designing using Table Layout, change font style, color etc.
4	Grouping and merging table rows and columns. Adding List – ordered, unordered and definition list.	Able to display the data in various formats and design different types of list in the table.
5	Adding Image, Adding links - Changing link colors, Email link.	Learn to add images and link in the web page.

6	Embedding audio and video, Adding Field sets.	Able to add multimedia in web page using internal and external methods.
7	Adding Form: Form tag, Action, Method. Basic form controls.	Learn basic form elements and when and where to apply it.
8	Textbox, Password field, Radio Button, Checkbox, Multiple line text area, file upload.	Use various types basic form controls with types of form input elements.
9	Various types of buttons – submit, reset, image, simple button.	Learn various types of buttons to make it more interactive.
10	HTML5 input elements - Color, Number, Date, Month.	Learn new input types in HTML5.
11	Week, Time, date time-local, Email, url, range, search.	Learn to add defining inputs and minimum and maximum range to make the form attractive.
12	Data list, output, progress, meter.	Learn to add list and provide progress horizontal view and range with output.
13	Regular expression, HTML5 new attributes – Placeholder, Required.	Learn HTML 5 form element to provide user side web form validation.
14	Pattern, Autocomplete, Autofocus, novalidate, form novalidate.	Learn HTML 5 new form properties.
15	Form action, form method, spellcheck, content editable.	Learn HTML 5 to user submit the form and redirect the form data to selective method.

Total hours: 60

Text Books:

1. Powel Thomas: HTML - The Complete Reference, 3rd Edition, McGraw-Hill Education – Europe, 2018.
2. DT Editorial Services: HTML 5 Black Book, 2nd Edition, Dreamtech Press, 2016
3. Matt West: HTML 5 Foundations, Wiley publication, 2013
4. Farrar: HTML Example book, BPB, 2007.

Reference Books:

1. David DuRocher : HTML and CSS QuickStart Guide, Paperback, 2021.
2. Laura Lemay, Rafe Colburn, Jennifer Kyrnin : Mastering Html, CSS & JavaScript Web Publishing, Paperback, 2016.
3. Whyte: Basic HTML, 2nd Edition, Payne-Gallway, Oxford, 2003.
4. Shelly Woods: HTML introductory concepts and techniques, 5th Edition, Course Technology, 2009.
5. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.

3. www.htmlgoodies.com/ [For HTML resources]
4. <https://developer.mozilla.org/en-US/learn/html> [For HTML best practices]

Course Outcome: Upon successful completion of the course, student will:

C01:	Able to understand basic construction of HTML & HTML5 document and started using basic tags.
C02:	Able to Add content using various tags and format the content in table & list.
C03:	Able to design links and multimedia elements such as image, audio, video.
C04:	Able to design a web page form using HTML & HTML5.
C05:	Able to apply validation using HTML5 attributes.

Course Articulation Matrix:

CAUE101: Computer Essentials and Information Technology

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: Operating System Concepts and Network Technology

Methodology, Pedagogy & Andragogy: During lectures covering these topics, students will: Understand computing's historical evolution and key figures. Grasp computer organization, architecture, and processor functions. Learn storage technologies and memory management for optimization. Acquire basics of input/output devices for computer interaction. Explore Internet and Web fundamentals and emerging trends. Facilitate discussions, integrate real-world examples, and encourage self-directed exploration of advanced computing concepts. Adapt teaching strategies to cater to diverse learning styles and levels of expertise in the rapidly evolving field of computing.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Computers: History and Evolution of Computing	10
2	Understanding of Computer Organization, Architecture and Processor	10
3	Computers Storage and Memory Management	11
4	Fundamentals of Input and Output Devices	11
5	Concepts of Internet and World Wide Web	10
6	Emerging Fundamentals of Computing Environment	08

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to Computers: History and Evolution of Computing

Hours 10

Introduction to computer, Simple model of a computer, Computer Hardware, Computer Software, Characteristics of computers, Evolution of computers, Generation of computers, Classification of computers, computing concepts, The computer System, Applications of computers.

Unit II: Understanding of Computer organization, Architecture and Processor

Hours 10

Introduction to computer organization, Central Processing Unit, Introduction to processor, Internal communications, Inter connection of units, Processor to memory communication, I/O Devices to processor communication, The Bus, Instruction set.

Unit III: Computers Storage and Memory Management

Hours 11

Introduction to computer storage, Memory cell, Memory organization and Memory Representation, Random access memory, Read only memory, Storage system, Magnetic storage system, Optical storage system, Magneto optical system, Solid-state storage system, Storage evaluation criteria, Memory Hierarchy.

Unit IV: Fundamentals of Input and Output Devices

Hours 11

Introduction to Input device, Traditional computer I/O devices: Keyboard, Computer mouse, Display unit. Other Input devices: Touch pad, Touch Screen, Magnetic Ink Character Recognition (MICR), Optical Mark Reading and Recognition (OMR), Flatbed Scanner, Optical Character Recognizer, Bar Code. Computer Output Devices: Flat Panel Display Technology, E-ink Display, Printers, Inkjet Printers, Laser Printers, Dot Matrix Printers, Line Printers, Plotters. Digital Camera, Voice Recognition System.

Unit V: Concepts of Internet and World Wide Web

Hours 10

Introduction to Internet, History of Internet, Internet applications, Understanding the World Wide Web, Browsing Internet, Using a Search Engine, Email Service. Web Concepts: Web Browser, HTML, Web Page, Website, Web Server, ISP, Hyperlink, DNS, URL. Internet Protocols: TCP/IP, SMTP, PPP, FTP, SFTP, HTTP and HTTPS, TELNET, POP3, IPV4, IPV6, ICMP, UDP, IMAP, SSH, Gopher.

Unit VI: Emerging Fundamentals of Computing Environment

Hours 08

Overview of computing environment, Current computing scenario, Types of computing environment: Personal computing environment, Time-sharing computing environment, Client-Server computing environment, Distributed computing environment, Grid computing environment, Cloud computing environment, Cluster computing environment. Advantages and Disadvantage of various computing environment.

Core Books:

1. E Balagurusamy: Fundamentals of Computers: Tata McGraw Hill Education Private Limited
2. V.Rajaraman, Neeharika Adabala: Fundamentals of Computers: PHI, 2015.
3. Margaret Levine Young: The Complete Reference- Internet: Tata McGraw Hill Education Private Limited

Reference Books:

1. Computer Fundamentals: Pradeep K. Sinha & Priti Sinha" by Pradeep K. Sinha and Priti Sinha
2. Computers Made Easy: From Dummy to Geek" by James Bernstein
3. Computer Organization and Design: The Hardware/Software Interface" by David A. Patterson and John L. Hennessy

Web References:

1. <https://artoftesting.com/computer-fundamentals-tutorial>

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Students will gain an understanding of the historical progression and evolutionary milestones in computing.
C02 :	Students will comprehend computer organization, architecture, and processor functionalities.
C03 :	Students will learn about computer storage mechanisms and memory management techniques.
C04 :	Students will grasp the fundamentals of various input and output devices utilized in computing.
C05 :	Students will acquire knowledge about the concepts underlying the Internet and the World Wide Web.
C06:	Students will explore the emerging trends and principles shaping the contemporary computing environment.

CAUE102 : Business Organization and Principles of Management

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of business organization and principles of management. Students will be introduced to business ownership, business services, emerging models of business, business ethics and its social responsibilities, and entrepreneurship development. Students will give practical exposure in form of case study and by visit to Entrepreneurship and Innovation Centre.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Forms of Business Ownership	09
2	Business Services	11
3	Emerging Modes of Business	09
4	Principles of Management	11
5	Business Ethics and its Social Responsibilities	09
6	Entrepreneurship Development	11

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Forms of Business Ownership

Hours 09

Sole proprietorship, Joint Hindu Family Business – meaning, features, merits and demerits, Partnership – meaning, types, registration, types of Partners, Co – Operative societies – types, merits and limitations, Company – Private Ltd, Public Ltd –merits, limitations, Starting a business – Basic factors, Choice of forms of business organizations.

Unit II : Business Services

Hours 11

Nature and types of Business services – Banking, Insurance, Transportation, Warehousing, communication. Meaning, role, Functions of Banking, Insurance, Postal and Telecom services, Warehousing, Transport, Hospitality and Tourism Services.

Unit III : Emerging Modes of Business

Hours 09

E – business – Meaning, Scope and benefits, Resource required for successful E –Business implementation, On – line transactions, payment mechanism, Security and safety of business transactions, Outsourcing – Concept, need and scope.

Unit IV : Principles of Management

Hours 11

Definition and nature of management, purpose of management, managerial functions at different levels, management- art or science, planning, planning process & purpose, steps of planning, goal setting, decision making, organizing function, organizing process, formal and informal organizations, centralization and decentralization organization, staffing function, staffing process, recruitment, selection, training, performance appraisal, directing function, concepts of leading, motivating, communicating, qualities of leaders, controlling, control process, control techniques.

Unit V : Business Ethics and its Social Responsibilities

Hours 09

Concept of social responsibility, cases for social responsibility, responsibility towards different interest groups, owners, investors, employees, consumers, government, community, public in general, business ethics – concept and elements, business and environmental protection.

Unit VI : Entrepreneurship Development

Hours 11

The concept and introduction, personality and mindset of an entrepreneur, difference between an entrepreneur, intrapreneur and manager/executive, entrepreneurial eco-system, types and functions of an entrepreneur- entrepreneurial motivation, entrepreneurship development programs, business idea generation, business plan and detailed project report, funding and support aspects.

Core Books:

1. Harold Koontz & Heinz Weihrich: Essentials of Management, Ninth Edition, Tata McGraw Hill Publishing, 2012.
2. Dr. F. C. Sharma, Dr. D. Chandra, Anju Agarwal: Business Organization, SBPD Publications, 2020.

Reference Books:

1. Tripathy & Reddy: Principles of Management, fifth edition, Tata McGraw Hill Publishing, 2015.
2. Robbins , Decenzo & Coulter: Fundamentals of Management, eighth edition, Pearson Education, 2013.
3. Y.K. Bhushan: Fundamentals of Business Organisation, Sultan Chand Publicatio, 2018.

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Students will be able to understand different types of business proprietorship.
CO2 :	Students will get the knowledge of functionality of various online business services
CO3 :	Students will learn the important concepts of management.
CO4 :	To be able to understand the ethics and social responsibilities of business towards various entities
CO5 :	Students will learn the concepts required to be a good entrepreneur.

Course Outcomes Mapping:

CAME101 : Computer Application in Business

Description:

Credit and Week:

Teaching Scheme	Week	Marks	Credit
	12	100	3

About the course:

The main objective of this course is to familiarize the students with the application of computer in business and how it facilitates in business decision making.

Pre-requisites:

Basic knowledge of computers

Course layout:

Weeks	Video No.	Videos Title	Units
Week-1	Video-1	Introduction to Computers	Unit-1
	Video-2	Application in Computers	Unit-2
	Video-3	Web Application	Unit-3
	Video-4	Basic of Computer Software	Unit-4
Week-2	Video-5	Business Information System-	Unit-5
	Video-6	Database Management System	Unit-5
	Video-7	Business Process & Enterprises Application	Unit-5
	Video-8	GDPR	Unit-5
Week-3	Video-9	IT Securities Measures in Business	Unit-6
	Video-10	Internet Services and Email	Unit-7
	Video-11	Plastic Money, E-Wallet and Online Pay	Unit-8

Week-4	Video-12	Basics of Word Processing	Unit-9 & Unit-10
	Video-13	Tools using Word	Unit-11
	Video-14	Advance Tool using Word Processing	Unit-11
	Video-15	Making Business Documentation using word	Unit-12
Week-5	Video-16	Working with PowerPoint	Unit-13
	Video-17	PPT usages in Business and Corporate	Unit-13
Week-6	Video-18	Meaning of Multimedia	Unit-14
	Video-19	Animation & Presentation	Unit-14
	Video-20	Implementing multimedia tool in business	Unit-14
	Video-21	Meaning and Role of You Tube in Business	Unit-15
	Video-22	Video Impact in Excelling Business	Unit-15
Week-7	Video-23	Curtain raiser to Spreadsheet & its Utility in Business World	Unit-16
	Video-24	Spreadsheet concepts-1	Unit-16
	Video-25	Spreadsheet concepts-II	Unit-16
Week-8	Video-26	Formulas & Functions-I	Unit-17
	Video-27	Formulas & Functions-II	Unit-17
	Video-28	Formulas & Functions-III	Unit-17
	Video-29	Formulas & Functions-IV	Unit-17
	Video-30	Formulas & Functions-V	Unit-17
Week-9	Video-31	Graphical Presentation of Data Meaning and Intro	Unit-18
	Video-32	Graphical Presentation of Data using Spreadsheet	Unit-18
Week-10	Video-33	Advance Option in Spreadsheet-I	Unit-19
	Video-34	Advance Option in Spreadsheet-II	Unit-19
	Video-35	Advance Option in Spreadsheet-III	Unit-19
Week-11	Video-36	Google Workspace and Cloud	All Blocks (Unit 1-20)

	Video-37	Burgeoning & Contemporary Thought In business and Computers	All Blocks (Unit 1-20)
Week-12	Video-38	FAQ-I Computer application	All Blocks (Unit 1-20)
	Video-39	FAQ-II Business Application	All Blocks (Unit 1-20)
	Video-40	Terminology used in Computer Application in Business	All Blocks (Unit 1-20)

Criteria to get a certificate:

Average assignment score = 25% of average of best 8 assignments out of the total 12 assignments given in the course.

Exam score = 75% of the proctored certification exam score out of 100

Final score = Average assignment score + Exam score

YOU WILL BE ELIGIBLE FOR A CERTIFICATE ONLY IF AVERAGE ASSIGNMENT SCORE $\geq 10/25$ AND EXAM SCORE $\geq 30/75$. If one of the 2 criteria is not met, you will not get the certificate even if the Final score $\geq 40/100$.

CAME102 : Basics of Digital Marketing

Description:

Credit and Week:

Teaching Scheme	Week	Marks	Credit
	12	100	3

About the course:

The course familiarize students with an understanding of how the digital media works and develop the critical insights necessary to succeed in e-commerce and digital and social media marketing. Enrich learner with the essential principles and practices of marketing in the digital economy by making this course, an indispensable part of their knowledge base. Companies that were non-existent a few short years ago, including Facebook, Whatsapp, LinkedIn, and Youtube, have dramatically changed how we interact, communicate and get from point A to B. Even Amazon and Google are relatively “young” by any measure. This course is also to serve as basic course for learners who wish to further study in the domain of Digital Media.

Pre-requisites:

Person who wish to study in the domain of Digital Media

Course layout:

Week 1	W1_L1 Introduction to Marketing W1_L2 Consumer Behavior W1_L3 Introduction to Digital Marketing
Week 2	W2_L1 Search Engine Optimization 1 W2_L2 Search Engine Optimization 2 W2_L3 Search Engine Optimization 3
Week 3	W3_L1 Search_Engine_Marketing : Part 1 W3_L2 Search_Engine_Marketing : Part 2 W3_L3 Display Advertising
Week 4	W4_L1 Social Media Marketing W4_L2 Social Media Marketing (Word of Mouth) W4_L3 Social Media Platforms Part 1 W4_L4 Social Media Platforms Part 2
Week 5	W5_L1 Online Reputation Management W5_L2 Mobile Marketing Part 1 W5_L3 Mobile Marketing Part 2 W5_L4 Website Planning & Creation
Week 6	W6_L1 Email Marketing Part 1 W6_L2 Email Marketing Part 2 W6_L3 Introduction to E Commerce Part 1

	W6_L4 Introduction to E Commerce Part 2
Week 7	W7_L1 E-COMMERCE Strategy 1 W7_L2 E-COMMERCE Strategy 2 W7_L3 Content Marketing W7_L4 Content Creation Process W7_L5 Influencer Marketing
Week 8	W8_L1 Digital Marketing Strategy Part 1 W8_L2 Digital Marketing Strategy Part 2a W8_L3 Digital Marketing Strategy Part 2b W8_L4 Digital Marketing Strategy Part 3a W8_L5 Digital Marketing Strategy Part 3b
Week 9	W9_L1 Digital Analytics & Measurement Part - 1a W9_L2 Digital Analytics & Measurement Part - 1b W9_L3 Digital Analytics & Measurement Part - 2a W9_L4 Digital Analytics & Measurement Part - 2b
Week 10	W10_L1 Digital Analytics & Measurement Part - 3a W10_L2 Digital Analytics & Measurement Part - 3b W10_L3 Measuring Campaign Effectiveness : ROI – Return on Investment W10_L4 Measuring Campaign Effectiveness : CLV - Customer Lifetime Value W10_L5 Attribution Models
Week 11	W11_L1 Digital Marketing Plan W11_L2 Case Study 1 : Email Marketing W11_L3 Case study 2 : Golf Tripz W11_L4 Case Study 3 : Golkonda Hotels W11_L5 Case Study 4 : Bhalaje Photography
Week 12	W12_L1 New Technologies & Advancement in Digital Marketing Part 1 W12_L2 New Technologies & Advancement in Digital Marketing Part 2 W12_L3 Review of Digital Marketing Course Part 1 W12_L4 Review of Digital Marketing Course Part 2

Books and references

1. Digital Marketing: Cases from India by Rajendra Nargundkar and Romi Sainy, Notion Press, Inc

2. Understanding Digital Marketing: Marketing Strategies for Engaging the Digital Generation by Damian Ryan, Kogan Page Publisher
3. Marketing 4.0: Moving from Traditional to Digital by Philip Kotler, Publisher Wiley
4. Digital Marketing by Seema Gupta, McGraw Hill Education
5. Fundamentals of Digital Marketing by Punit Singh Bhatia, Pearson
6. The Art of Digital Marketing: The Definitive Guide to Creating Strategic, Targeted, and Measurable Online Campaigns by Ian Dodson, Wiley Publisher

Criteria to get a certificate:

If You wish to get certified on this course you must register and write the proctored exam after payment of exam fee.

30 Marks will be allocated for Internal Assessment and 70 Marks will be allocated for end term proctored examination.

Securing 40% in both separately is mandatory to pass the course and get Credit Certificate.

CAUD101 : Digital Electronics

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In order to achieve the course objectives, students will be introduced to digital technologies. Various digital modules used to create digital computer devices like gates, flip flops, decoder, encoder etc. are to be studied. Mathematical base is created to understand the organization of digital computer.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Digital Systems and Binary Numbers	12
2	Boolean Algebra and Logic Gates	12
3	Combinational Circuit Designing	10
4	Sequential Circuit Designing	10
5	Memory Interfaces and Data Representation	08
6	The Arithmetic Logic Unit and Control Unit	08

Total Hours (Theory): 60

Total Contact Hours:60

Detail Syllabus:

Unit I: Digital Systems and Binary Numbers

Hours 12

Introduction and Evolution of Digital computers, Major components of digital computer, Interfaces and Buses, compiler, interpreter, Assembler, Introduction to various number systems (Decimal, Binary, Octal, Hexadecimal, BCD), Conversion of number system, Binary operations, signed binary numbers, 1's complement and 2's complement.

Unit II: Boolean Algebra and Logic Gates

Hours 12

Fundamental concepts and rules of Boolean algebra, , Boolean Algebra Laws, Boolean expressions and its simplification with and without Truth Tables, Canonical form and standard form, D-Morgan's Theorem, Basic duality laws, Derivation of Boolean expressions, Introduction to logic gates (AND, OR, NOT, NAND, NOR, XOR, XNOR), Implementation of Boolean expressions using logic gates, Sum of product and Product of Sum forms, Universal gates, Implementation of other gates using universal gates, Karnaugh Map method for two, three, four and five variables, K-map with don't care conditions, Tabulation method, determination and selection of prime applicants.

Unit III: Combinational Circuit Designing

Hours 10

Introduction to combinational circuits, Design procedures, Adders, Subtractors, code conversion circuits, Analysis procedures, Multilevel NAND circuits, Multilevel NOR circuits, EX-OR functions, Binary adder and Subtractors, Decimal adder and Subtractors, Magnitude comparator, Decoder and encoders, Multiplexer and de-multiplexer.

Unit IV: Sequential Circuit Designing

Hours 10

Introduction to Sequential circuits, Concepts of Flip-flops, triggering flip-flops, Clock signals, Analysis of clock sequential circuits, State Reduction and assignments, Flip flop excitation table, Design procedure of asynchronous and synchronous counters (Ripple counter, Binary counter, BCD counter), Design of registers, Shift registers, Timing sequences.

Unit V: Memory Interfaces and Data Representation

Hours 08

Memory, Types of ROM, Design of ROM, Types of RAM, Magnetic disc memory, Magnetic tape, Digital recording techniques, Linear-select memory organization, Types of digital codes (Gray code, 8421 code, Alphanumeric codes), Parity checking codes, Floating point representation, Fixed point representation.

Unit VI: The Arithmetic Logic Unit and Control Unit

Hours 08

Basic operations of Arithmetic Logic Unit, Construction of the Arithmetic Logic Unit, Representation of Instruction word, Control registers, Instruction and execution cycles of Control registers, Sequence operation of Control Registers.

Core Books:

1. M. Morris Mano: Digital Logic and Computer Design, Third Edition, Pearson Education, 2016.
2. Thomas C. Bartee: Digital Computer Fundamentals, Sixth Edition, Tata McGraw Hill Publishing, 2012.
3. M. Morris Mano: Computer System Architecture, Third Edition, Pearson Education, 2011.

Reference Books:

1. Andrew S. Tanenbaum: Structured Computer Organization, Fourth Edition, Pearson Education, 2005.
2. Albert Paul Malvino and Jerald A. Brown: Digital Computer Electronics, Third Edition, Tata McGraw Hill Publishing, 2008.

Web References:

4. <https://cupola.gettysburg.edu/oer/1/> [Digital Circuit Projects]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Able to get the idea about digital system and numbering system.
CO2 :	Able to study logic gates for digital circuit designing.
CO3 :	Able to learn to design various combinational circuits.
CO4 :	Able to learn to design various sequential circuits.
CO5 :	Able to learn memory design concepts and to study computer Arithmetic Logic Unit and Control Unit.

Course Outcomes Mapping:

CAUS101 : Mathematics for Computer Science

Credit	Component	Instruction/ Contact Hours(Per Week)	Instruction/ Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Theory	02	30	25	55
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: Basic algebra and geometry, as well as a good understanding of logic and proofs, mathematical statistics.

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of mathematics and statistics. Problem solving: Students will demonstrate the ability to solve problems, including applications outside of mathematics. Mathematical communication: Students will demonstrate the ability to communicate mathematical ideas clearly. They will use correct mathematical terminology and proper mathematical notation.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Sets and functions	04
2	Vectors and Matrices	04
3	Measure of Central Tendency & Dispersion	06
4	Permutation & Combination	05
5	Probability	06
6	Graph Theory	05

Total Hours (Theory): 30
Total Contact Hours:30

Detail Syllabus:

Unit I : Sets and Functions

Hours 04

Introduction to set theory, methods of representation of a set, operations on set, algebra of sets, De 'Morgan's law, function definition, domain, range, one-to-one function, onto function.

Unit II : Vectors and Matrices

Hours 04

Definition of vector, addition and subtraction of vector, magnitude of a vector, unit vectors, dot product and cross product, definition of matrix, equal matrices, diagonal elements of matrix, row matrix, column matrix, Symmetric matrix, skew symmetric matrix, orthogonal matrix, diagonal matrix, identity matrix, operations on matrix.

Unit III : Measure of central tendency and dispersion

Hours 06

Definition, Ungrouped Data, Grouped Data (Discrete and Continuous Grouped data). Mean: Arithmetic Mean, Geometric Mean and Harmonic Mean for ungrouped data, Combined Mean, Weighted Mean. Median, Quartiles, Deciles, Percentiles and Mode. Different measure of dispersion. Quartile Deviation, Mean Deviation, Standard Deviation, Combined Standard Deviation, Coefficient of Variation.

Unit IV : Permutation and Combination

Hours 05

Meaning of permutation, Formula of permutation, Permutation of n different things, Permutation of similar things, Permutation of repeated things, Circular Permutation, Combination: Meaning of Combination, Formula of Combination.

Unit V : Probability

Hours 06

Probability: Random Experiment, Sample Space, Event, Mutually exclusive event, Exhaustive event, Equally likely event, Probability Classical definition. (Simple examples of Probability).

Unit VI : Graph Theory

Hours 05

Introduction to Graph, Graph Definition, Vertices, Edges, Loops, Parallel Edges, Simple Graph, Finite Graph, Adjacent vertices, Incidence between vertex and edge, Degree of a vertex, Isolated Vertex, Pendent Vertex, Null Graph. Isomorphism, Labeled Graph

Core Books:

1. D. C. Sancheti, V. K. Kapoor: Business Mathematics, Sultan Chand & sons.
2. Lipschutz & Marc Lipson: DISCRETE MATHEMATICS, Tata McGraw Hill
3. Narsingh Deo: Graph Theory with application to engineering and computer science, Prentice Hall of India Pvt. Ltd

Reference Books:

3. <https://www.khanacademy.org/math/statistics-probability/probability-library/basic-theoretical-probability/a/probability-the-basics>

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	Students will learn basics of sets and functions
CO2 :	The students will be familiar with various linear algebra.
CO3 :	Students will be well equipped to measure accurate description of data
CO4 :	Students will be able to define a permutation and explain how to calculate probability
CO5 :	Students will be able to understand and apply the fundamental concepts in graph theory

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUC103: Fundamentals of Object Oriented Programming

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	50	110
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Foundation of Programming

Methodology, Pedagogy & Andragogy: The theory sessions will use real-world examples to demonstrate how object-oriented programming (OOP) enhances problem-solving, covering concepts such as classes, objects, inheritance, polymorphism, and exception handling. Students will engage in self-directed learning through case studies, assignments, and unit tests to assess their progress. During practical sessions, students will apply these OOP concepts through various assignments and case studies, further developing their understanding of how OOP efficiently addresses complex problems. Independent learning will be emphasized to ensure students grasp and progress in their comprehension of OOP principles.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Object Oriented Programming	08
2	Classes and Objects	11
3	Polymorphism	10
4	Inheritance	13
5	Exception Handling and Type cast operators	10
6	Managing I/O formats and operations	08

Total Hours (Theory): 60
Total Contact Hours:60

Detailed Syllabus:

Unit - I: Introduction to Object Oriented Programming

Hours: 08

Structured programming vs. object oriented programming, Introduction to C++: structure of a C++ program Tokens, inline function, pass by reference, default arguments, OOP characteristics.

Unit - II: Classes and Objects

Hours: 11

Define class, objects, visibility modes, static members, friend function, Constructors and Destructors, Default Constructor, Copy constructors, Parameterized Constructor, this keyword.

Unit - III: Polymorphism

Hours: 10

Introduction of Static Binding, Function Overloading and ambiguity raised in function overloading, Operator overloading through member function and friend functions, type conversions from primitive to class, class to primitive and class to class.

Unit - IV: Inheritance

Hours: 13

Objective of Inheritance, types of inheritance, impact of access modes during inheritance, Virtual base classes, Dynamic Binding, Virtual functions, Pure virtual functions, Abstract class, Early vs. Late binding.

Unit - V: Exception Handling and Type Cast Operators

Hours: 10

Introduction to Exception handling, catching class types, using multiple catch statements, exception handling options, creating custom exceptions, introduction to cast operators, const cast, static cast, reinterpret cast, dynamic cast.

Unit - VI: Managing I/O Formats and Operations

Hours: 08

Understand and apply concepts from various header files like iostream, iomanip, fstream, etc. opening and closing file, reading and writing text files and binary files, performing random access on files, handle command line arguments.

Core Books:

1. Herbert Schildt: C++: A Beginner's Guide, 2nd Edition Paperback, McGraw-Hill, 2003.
2. E Balagurusamy: Object Oriented Programming with C++ Paperback, McGraw Hill India, 2017.

Reference Books:

1. Yashavant Kanetkar: Let Us C++, Paperback, BPB Publications, 2020.

2. Robert Lafore: Object Oriented Programming in C++, 4th Edition, Sams Publications,2002.
3. Bruce Eckel:Thinking in C++, Volume 1, 2nd Edition, Pearson Education,2006.

Web References:

1. <https://www.geeksforgeeks.org/c-plus-plus/> [For Entire Syllabus]
2. <https://google.github.io/styleguide/cppguide.html> [For coding standards and concepts]
3. http://www.tutorialspoint.com/cplusplus/cpp_basic_input_output.htm [For Practicals]

Course Outcomes: Upon successful completion of the course, the students will:

C01 :	Understand the basic structure of C++ program and understand the concept of object oriented programming characteristics.
C02 :	Understand the concept of Constructor and Destructor and able to create class and objects.
C03 :	Understand the need of Polymorphism and implement static polymorphism
C04:	Understand the purpose of Inheritance, identify relations between classes, implement inheritance and perform dynamic binding.
C05 :	Able to handle the runtime errors or exceptions in C++ and use type cast operators. Able to read input from device, file, command line arguments and apply formats to input and output.

Course Outcomes Mapping:

CAUC104: Database Fundamentals (Practical)

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA , certification courses, development of projects etc.					

Prerequisites: Basic knowledge of working with computer

Methodology, Pedagogy & Andragogy: Learn about computer data. Understand what data is, learn its meaning, examine the types of data sources, and see the difference between data and information. The database applications used in the real world will be discussed with necessary examples. During the laboratory hours' students' will implement the concepts. Apply SQL commands to mine data from databases and data visualization techniques to address organization information needs.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Database System	Overview of data, information, file, database, database systems, DBMS, Purpose of DBMS over file system.
2-3	Data modelling and architecture	Various data models: ER model and Relational model, Three level architecture, structure of DBMS and database actors and workers
4-5	Database Design Methodology	CODD Rules, Functional Dependency and Normalization for Database Informal Design Guidelines for Relational Schemas, Functional Dependencies, Normal Forms (1NF, 2NF, 3NF, BCNF, 4NF, 5NF)
6-7	Schema Definition, Constraints, Queries – I	Basic Data types, Create Table Command, Modifying the structure of tables, renaming table, truncating table, destroying table, Insert, Delete and Update Statements in SQL

8	Schema Definition, Constraints, Queries – II	Data Constraints and Functions: - Pseudo columns, Null values, TAB table, DUAL table Operators, Data constraints, Type of data constraints, modifying constraints, working with data dictionary and use of USER_CONSTRAINTS Functions introduction
9	Inbuilt functions	Merits and demerits of functions, Types of functions: Numeric functions, Character functions, Date functions, Conversion functions, Aggregate functions
10-11	Querying the data	Different operators: logical range, searching and pattern matching, Viewing Data in the tables, sorting
12-13	Advanced Query Processing-I	Co-related Nested Queries, Group By clause, having clause
14-15	Advanced Query Processing-II	Joins (Inner Join, Outer Join, Self-Join, Equi Join, Cross Join), Creation and manipulation of database objects indexes, views, sequences and synonym.

Total hours: 60

Text Books:

1. Ivan Bayross : SQL, PL/SQL The programming Language Oracle.
2. Ramkrishnan, Gehrke : Database Management Systems, 3 rd Edition, McGrawHill Publication.
3. RamezElmasri, Shamkant B. Navathe : Fundamentals of Database Systems , 5th Edition, , Pearson Publication.

Reference Books:

1. Silberschatz, Korth, Sudarshan : Database System Concepts, 5th Edition, McGraw Hill.
2. C.J.Date, a Kannan, S Swaminathan : An Introduction to Database Systems, 8th Edition, Pearson Education,(Equivalent Reading).
3. Scoot Urban : Oracle 9i, PL/SQL Programming, Oracle Press.
4. S. K. Singh : Database Systems: Concepts, Design and Applications, Pearson Education
5. Peter Rob, Carlos Coronel: Database Systems: Design, Implementation and Management, 7th Edition, Cengage Learning, 2007.
6. Leon and Leon : Database management Systems, Vikas Publication.

1. <https://www.javatpoint.com/er-model-vs-relational-model> [For difference of ER and Relational model]
2. http://www.microsoftvirtualacademy.com/trainingcourses/databasefundamentals#?fbid=tbZ92pOp_Tt [For overall subject]
3. http://www.ntu.edu.sg/home/ehchua/programming/sql/Relational_Database_Design.html [for relational database design]
4. http://docs.oracle.com/cd/A97335_02/apps.102/a81358/05_dev1.htm [For ER Diagram]

Course Outcome: Upon successful completion of the course, student will:

C01:	Understand basic concepts regarding data, database systems and various data models.
C02:	Understand various data modeling techniques and entity relationship models.
C03:	Learn about relational data model and related concepts.
C04:	Gain insights into database design, SQL and normalization concepts.
C05:	Advanced query processing

Course Articulation Matrix:

CAUE103: Fundamentals of E-Commerce

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
--------	-----------	---	---	--	----------------------------

04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of E-commerce. Students will be introduced to E-Commerce, E-Marketing, E-Security and E-Payment, Mobile Commerce, CRM and ERP, and E-Commerce Applications. Students will give practical exposure in form of case study and by visit to E-commerce / Digital Marketing company and/or supply chain Centre.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to E-Commerce	09
2	E-Marketing	11
3	E-Security and E-Payment	09
4	Mobile Commerce	11
5	CRM and ERP	09
6	E-Commerce Applications	11

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I : Introduction to E-Commerce

Hours 09

Emergence and use of Internet, origin of web and world wide web, advantages and disadvantages of E-commerce, Features of E-Commerce, Electronic Commerce over the Internet, Types of Ecommerce.

Unit II : E-Marketing

Hours 11

Traditional Marketing, Online Marketing, E- advertising, Internet Marketing Trends and strategies, E-branding.

Unit III : E-Security and E-Payment

Hours 09

Security on the Internet, E-Business risk management issues, Digital token based E-Payment System, Properties of Electronic Cash, Digital Signature.

Unit IV : Mobile Commerce

Hours 11

definition of M-Commerce, Features of M-Commerce, Advantages and Disadvantages of M-Commerce, Areas of M-Commerce Applications, Payment Systems and Models in M-Commerce.

Unit V : CRM and ERP

Hours 09

Customer Relationship Management, CRM capabilities and Customer life cycle, Introduction to ERP, Reasons for the growth of the ERP Market, Advantages and Disadvantages of ERP.

Unit VI : E-Commerce Applications

Hours 11

Retail and Wholesale, Finance, Manufacturing, Online Booking, Online Publishing, Digital Advertising, Digital Shopping, Digital Media, Auctions, A case study need to be discussed for these application. Hands-on experience in setting up and managing an e-commerce store. Developing a business plan for an ecommerce start-up.

Core Books:

1. P.T.Joseph, S.J.: E-Commerce- An Indian Perspective, 3rd Edition, PHI learning Private Limited.
2. Kamlesh K. Bajaj, Debjani Nag: E-Commerce, The Cutting Edge of Business, 2nd Edition, McGraw-Hill Education.

Reference Books:

1. Anita Rosen: The e-commerce Question and Answer Book: A Survival Guide for Business Managers, 2nd Edition, Amacom.
2. Janice Reynolds: The Complete E-Commerce Book: Design, Build & Maintain a Successful Web-based Business, 2nd Edition, CRC Press.
3. By Philippe Humeau&Matthieu Jung : The White Book of Ecommerce Solutions, NBS System.
4. IshitaLahiri and Sujit Kumar Ghose : Principals of Marketing and E-Commerce

Web References:

1. <http://www.ecommercetutorial.net/> [For Tutorial]

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	To understand basic of Electronic Commerce and its Application
C02 :	Getting knowledge of E-marketing and its Strategies.
C03 :	Learn E-security and E-Payment in Detail and its term. Also, learn Encryption and decryption in basic
C04 :	To gain understanding of Mobile Commerce and its Application through real life examples.
C05 :	To learn concepts of Customer Relationship Management and various solutions of E-Commerce (Software and Framework).

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUE104: Business Economics

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theoretical lessons, real-world examples will be used to discuss economic topics such as demand, supply, production, cost function, market structure, factor pricing, and microeconomics. Students will be offered appropriate case studies in order to provide actual exposure to theoretical economic ideas.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Fundamentals of Economics	09
2	Basic Elements of Demand and Supply	10
3	Theory of Production and Cost	11
4	Analysis of Revenue	11
5	Market Failures and Price Regulation	09
6	Macro-Economic Environment and National Income Accounting	10

Total Hours (Theory): 60
Total Contact Hours: 60

Detail Syllabus:

Unit I: Fundamentals of Economics

Hours 09

Fundamentals of Economics, Needs, wants, nature of economics, scope of economics, business economics, laws of economics, business cycle, difference between Micro and Macro Economics.

Unit II: Basic Elements of Demand and Supply

Hours 10

Demand and supply, types of demand, determinants of demand and supply, law of demand and supply, balance between demand and supply, demand and supply schedule, demand function.

Unit III: Theory of Production and Cost

Hours 11

Theory of Production- Factors of Production, Basic Concepts, Production Function, Producer's Equilibrium Least-Cost Factor Combination and Output Maximization for a given Level of Outlay. Theory of Costs- Basic Concepts, Short-run Total Cost, Short-run Average and Marginal Cost, Relationship between Average and Marginal Cost, Average and Marginal Cost in the Long-run.

Unit IV: Analysis of Revenue

Hours 11

Basic Concepts of Revenue, Revenue, Relationship between Average and Marginal Revenue, Concept of Market and Main Forms of Market; Equilibrium of the Firm-Meaning, Objectives of the Firm, Monopoly and its features, Monopolistic Competition and Oligopoly.

Unit V: Market Failures and Price Regulation

Hours 09

Market failures and need for regulation, Regulations and market structure, Firm behaviour, Price regulation.

Unit VI: Macro-Economic Environment and National Income Accounting

Hours 10

Basic macro- economic concepts –aggregate, demand aggregate supply, money, income employment consumption savings and investment. National Income Accounting- concepts and methods of national income, different methods of national income accounting.

Core Books:

1. P.L Mehta: Managerial Economics, Sultan Chand and Sons Publication, 2014
2. Keat Paul, K Young Philip , Erfle Steve, Banerjee Sreejata: Managerial Economics, seventh edition, Pearson Education, 2017.
3. N. Gregory Mankiw: Principles of Economics, sixth edition, South-Western, Cengage Learning, 2012.

Reference Books:

1. Geetika, Ghosh & Choudhury: Managerial Economics, third edition, Mc Graw Hill Education, 2005.
2. Mote V.L., Samuel Paul and G.S. Gupta: Managerial Economics Concepts and Cases, Tata McGraw Hill Publishing Company Ltd., New Delhi, 2001.
3. G. S. Gupta: Macro Economics Theory and Applications, Second Edition, Tata McGraw Hill, 2006.

3. <https://corporatefinanceinstitute.com/resources/knowledge/economics/national-incomeaccounting/> [National Income Accounting]

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Able to Interpret the various basic economic principles.
C02 :	Able to understand theory of demand and supply.
C03 :	Able to deal with balancing between cost and revenue.
C04 :	Able to learn the causes and solution of market failures.
C05 :	Able to understand the basics of macroeconomics and accounting.

CAUD102 : Data Communications and Networking

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study, Certification courses, etc.					

Pre-requisite: Basic knowledge of computers and their working.

Methodology, Pedagogy & Andragogy: During the lecture sessions, the students will learn about role of computer network in modern communication systems, underlying principles of network communication, need for standardization through network reference model. The teacher will also discuss communication issues at different layers and concepts related to network security. The students will adopt the latest certification courses from reputed and recognized platforms. Furthermore, the students will be engaged in problem-solving, emphasizing real-world applications and relevance.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Computer Networks	10
2	Basics of network communication	08
3	Network reference model	11
4	Data Link Layer Functions and Protocol	12
5	Network Layer Functions and Protocol	10
6	Network security	09

Total Hours (Theory):60

Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to computer network

Hours 10

Definition of computer network, aim and objective of computer network: applications of computer network, merits & demerits of computer network, examples of computer network, components of computer network, types of networks, network topologies, network devices: hub, switch, repeater, router, gateway, bridge.

Unit II: Basics of network communication**Hours 08**

Parallel & serial communication, synchronous & asynchronous communication, modes of communication: simple, half-duplex, full-duplex, multiplexing, de-multiplexing: frequency division multiplexing (FDM), time division multiplexing (TDM), communication media: guided media, unguided media, switching techniques: circuit switching, message switching, packet switching.

Unit III: Network reference model**Hours 11**

Need for network reference model, history of TCP/IP and OSI model, layers of OSI and TCP/IP model, comparison between TCP/IP and OSI model, Protocol Hierarchy, Network Protocols: Simple Mail Transfer Protocol (SMTP), File Transfer Protocol (FTP), Multiple Internet Mail Extension (MIME), Post Office Protocol (POP), Telnet, Domain Name Service (DNS), Dynamic Host Configuration Protocol (DHCP), Address Resolution Protocol (ARP), Reverse Address Resolution Protocol (RARP).

Unit IV: Data Link Layer Functions and Protocol**Hours 12**

Definition of Framing, framing methods, Error detection techniques, Error correction techniques, Flow control mechanisms- Simplex protocol, Stop and Wait ARQ, Go-Back-N ARQ, Point to Point protocol.

Unit V: Network Layer Functions and Protocol**Hours 10**

Connection oriented vs Connectionless services, Definition of Routing, Routing algorithms, IP protocol, IP addresses, ARP, RARP

Unit VI: Network security**Hours 09**

Introduction to cryptography, symmetric key and public key encryption systems, digital signature and key management concepts, communication security.

Core Books:

1. Andrew S. Tanenbaum: Computer Networks, 6th edition, Pearson Publication: 2021.
2. Behrouz Forouzan: Data communications and networking, 4th Edition, McGraw Hill, 2018.
3. William Stallings: Data and computer communication: 5th Edition, Pearson Publication, 2019.

Reference Books:

1. James F. Kurose, Keith W. Ross: Computer networking – A top-down approach: 3rd Edition: Pearson Publication: 2017
2. Narsimha Karumanchi: Elements of computer networking: An Integrated Approach: 1st Edition: Careermonk Publication: 2014
3. Ed Tittel: Computer networking: 1st Edition, Schum's Publication: 2020

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Student will be able to understand role of computer network in digital communication
C02 :	Student will grasp underlying concepts related with network communication
C03 :	Student will understand role of reference models in standardizing communication
C04 :	Students will learn about intra and inter network communication and technology behind it.
C05 :	Students will learn about different aspects of network security.

Course Outcomes Mapping:

CAUV101: Fundamentals of Accounting

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Theory	02	30	20	50
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During the classroom sessions, the emphasis will be given on the fundamentals of accounting. Students will be introduced to book keeping systems in modern accounting, financial accounting, and cost accounting. Students will prepare financial statements such as journal, ledger, trail balance, trading and profit and loss account, and balance sheet. Students will also get hands on exposure in make or buy decisions in cost accounting. Same concepts will be made concrete through assignments, case studies, and unit tests.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Accounting	05
2	Book Keeping System	05
3	Financial Accounting - I	05
4	Financial Accounting - II	07
5	Cost Accounting - I	04
6	Cost Accounting - II	04

Total Hours (Theory): 30
Total Contact Hours:30

Detail Syllabus:

Unit I : Introduction to Accounting

Hours 05

Introduction and users of Accounting, Branches of Accounting, Objectives, Accounting Concepts and Conventions, Accounting Terms.

Unit II : Book Keeping System

Hours 05

Single and Double Entry Book Keeping Systems, Advantages of Double Entry Book Keeping System, Limitations of Double Entry Book Keeping System, Types of Accounts: Personal, Real, and Nominal, Terms of Book Keeping Systems.

Unit III : Financial Accounting – I

Hours 05

Stages of Accounting Cycle, Types of Transactions, Forms of Economic Transactions, Cash and Credit Transactions, Introduction to Journal, Journal Entries.

Unit IV : Financial Accounting – II

Hours 07

Introduction to Ledger, Relationship Between Journal and Ledger, Rules of Ledger Posting, Balancing of the Accounts in Ledger, Trial Balance, Objectives of Preparing Trial Balance, Trading and Profit and Loss Account, Balance Sheet, Difference between Trial Balance and Balance Sheet.

Unit V : Cost Accounting – I

Hours 04

Introduction to Cost Accounting: Cost, Costing, and Cost Accounting, Limitations of Financial Accounting, Difference Between Cost Accounting and Financial Accounting, Objectives of Cost Accounting.

Unit VI : Cost Accounting – II

Hours 04

Elements of Cost: Material Cost, Labor Cost, and Expenses, Techniques of Costing, Marginal Costing, Make or Buy Decision, Breakeven Analysis

Core Books:

1. Dr. S. N. Maheshwari: Principles of Management Accounting, Sultan Chand Publication.

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Students will get basic understanding of the field of Accounting
C02 :	Students will be familiar with Accounting Book Keeping Systems
C03 :	Students will learn concepts of financial accounting and different types of accounts with rules of debit and credit
C04 :	Students will be able to generate Journal, Ledger, Trial Balance, and Final Accounts
C05 :	Students will get basic understanding of the field of Cost Accounting

CAUA101: PRESENTATION SKILLS

Credit	Component	Instruction/ Contact Hours (Per Week)	Instruction/ Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	02	30	20	50
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: Basic computer skills and knowledge of English.

Methodology, Pedagogy & Andragogy: The aim of this course is to develop effective presentation skills in students. Students will be taken systematically through the key stages of giving presentations, from planning and introducing to concluding and handling questions. The topics for the presentation will range from academic presentations to research presentations.

Outline of the Course:

Week No	Practical	Description
1	Introduction	Knowing the Purpose, Knowing the Audience, Internal and External Presentation, Presentation to Heterogenic Group, Greetings, Introducing self and peers, Asking and sharing information
2	ICT tools for presentation – Brief introduction	Microsoft PowerPoint, Canva, Prezi, AI-powered presentation tools
3	Presentation using Canva	Introduction to Canva, Creating, presenting, sharing and downloading presentation
4	Presentation design in Canva	Templates, layouts, Presenter Notes, Duration, Timer
5	Basic design elements in Canva	Shapes, Graphics, Charts, Tables
6	Advanced design elements in Canva	Photos, Videos, Audio, Frames, Grids, Stickers

7	Intermediate features of PowerPoint	Using Screenshot, Inserting objects, video and audio in presentation, Screen recording
8	Advanced features of PowerPoint	Using Hyperlink and Action, Slide Show Set-up, Presenter View, Master views
9	Cloud-based presentation using Google Slides	Creating a new presentation, importing slides, Sharing, Printing, Downloading in different formats, Version History
10	Basic features of Google Slides	Slideshow, Motion, Theme Builder, Inserting image, audio, video, shape
11	Advanced features of Google Slides	Spell-check, Linked objects, Q-A History, Notification Settings, Accessibility, Activity Dashboard
12	Engaging audience using feedback-gathering tools	Use of menitimeter for Word Clouds, Live Polls, Scales, Ranking and Pin It
13	Ethical practices	Using Citations/References for texts, images and other type of information, Plagiarism check
14	AI and Presentation	Use of Generative AI tools such as ChatGPT, CoPilot etc. in presentations
15	Select case-study	Examples of best presentations.
Total hours: 30		

Text Books:

1. The Presentation Book : How to Create It, Shape It and Deliver It! Improve Your Presentation Skills Now, 2nd Edition, Pearson Education.
2. Beginners Guide for Canva 2024, by Karla J Kane. ISBN: 979-8875801853

Reference Books:

4. <https://www.mentimeter.com/features>

Course Outcome: Upon successful completion of the course, student will be able to:

C01:	understand key elements of an effective presentation and ICT tools for presentation.
C02:	acquire in-depth knowledge of one of the popular presentation tools.
C03:	develop intermediate and advanced skills in alternative presentation tool.
C04:	familiarize with cloud-based presentation tool.
C05:	create effective presentation with ethical practices and enhance it with AI tools.

CAUI101 : Summer Internship and Viva – I

Objective and Scope:

Students who choose to exit the programme after the completion of the first two semesters must undertake internships, community engagement programmes and field based learning/minor projects during the summer term. This internship, worth 4 credits, is a requirement for the award of the Undergraduate Certificate. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. This provision ensures that students gain valuable practical experience and industry exposure, complementing their academic learning and enhancing their career prospects. Following are the intended objectives of internship training:

- **Practical Experience:** Provide hands-on experience with real-world projects to apply theoretical knowledge gained during the course.
- **Skill Development:** Enhance technical skills, such as programming, software development, database management, and other relevant IT skills.
- **Industry Exposure:** Familiarize students with the working environment of the IT industry, including understanding company culture, workflows, and professional practices.
- **Professionalism:** Instil a sense of professionalism and work ethic, including adhering to deadlines, following instructions, and working collaboratively.
- **Transition to Employment:** Facilitate a smoother transition from academic life to professional careers by bridging the gap between theory and practice.

Guidelines of Internship:

The Summer Internship shall be of 15 (Minimum 60 hours) duration and will be undertaken during the Summer Vacation. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. It is mandatory for the students to seek written approval from the coordinator about the topic and the organization before commencing the Summer Internship. During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone. Students must maintain regular reports detailing the work completed, challenges faced, and learning experiences. Students must submit a final report and presentation summarizing the internship experience, project outcomes, and key learnings to guide. The technical specifications for report preparation is as under:

Technical details:

1. The report shall be printed on A-4 size white paper.
2. 12 pt. Times New Roman font shall be used with 1.5-line spacing for typing the report.
3. 1" margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.
5. The report shall be spiral bound as per the standard format of the cover page given by the Institute.
6. The report should include a Certificate (on company's letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Principal of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.

Evaluation:

The evaluation of Internship will be done as per the following criteria:

Sr. No.	Evaluation Criteria	Marks
1	Summer Internship Report	50
2	Presentation and Viva-voce examination	50
TOTAL MARKS		100

Students must secure 36% passing marks in both components to qualify for the Certificate.

Internship and Exit:

Any student intending to exit the course must complete the summer internship (Including scoring at least 36% marks in the evaluation) before exit. A student intending to exit shall have to submit an application to Principal through Counsellor before even semester university theory examination. However, any such student desiring to withdraw the exit option may do that before the last paper of theoretical examinations of even semester.

TEACHING SCHEME & DETAILED SYLLABUS

FOR

**BCA PROGRAMME
(3rd SEMESTER)
AS PER NEP 2020**

**EFFECTIVE FROM
ACADEMIC YEAR 2024-25**

BCA Semester-III

Course Code	Course Name	Theory/ Practical/ Others	Marks (Theory)		Marks (Practical)		Credit	NEP -2020 Classification

CAUC201: Fundamentals of Data Structures and Algorithms

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc. Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Foundation of C and C++ Programming, Fundamentals of Object Oriented Programming.

Methodology, Pedagogy & Andragogy: Theory lectures focus on fundamental concepts of data structures and algorithms, emphasizing the selection of the most efficient structures for various applications. Andragogical principles are integrated to promote self-directed and practical learning for learners. For practical teaching of Data Structures and Algorithms, the approach combines hands-on programming exercises with real-world case studies to reinforce the selection of efficient structures for various applications. This blended method enhances both theoretical understanding and practical skills, ensuring learners can effectively apply concepts in real-world scenarios.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1.	Fundamentals of Data Structures and Algorithms	06
2.	Arrays and Linear Data Structures	10
3.	Advanced Dynamic Data Structures	12
4.	Tree-Based Data Structures	11
5.	Graph Theory and Applications	11
6.	Sorting and Searching Techniques	10

Total Hours (Theory) : 60
Total hours (Practical) : 60
Total Contact Hours : 120

Detail Syllabus:

Unit I: Fundamentals of Data Structures and Algorithms

Hours 06

Atomic and composite data, Data type, Data object, Data Structure, Abstract Data type, Types of Data Structures, Introduction to Algorithms, Relationship among Data, Data Structures and Algorithms, Analysis of Algorithms, space and time complexity algorithm

Unit II: Arrays and Linear Data Structures

Hours 10

Linear Data Structures using sequential organization, Representation of Stacks using sequential organization, Applications of Stack, Application of Recursion, Concepts of Queues, Realization of Queues using sequential organization, circular queue, Multiqueue, Deque, Priority Queue, Applications of Queue.

Unit III: Advanced Dynamic Data Structures

Hours 12

Linked list, Comparison of sequential and linked organizations, Dynamic Memory Management, types of link list , Applications of linked list, operation on link list.

Unit IV: Tree-Based Data Structures

Hours 11

Basic Terminologies, Definition and concepts, Representation of Binary Tree, Operations on Binary Tree and algorithms, Types of Binary Trees , AVL trees,

Unit V: Graph Theory and Applications

Hours 11

Graph Terminology, Representation of Graph, Operations on Graph, Applications of Graph Structure, minimum spanning tree.

Unit VI: Sorting and Searching Techniques

Hours 10

Sorting Notations and Concepts, Sorting Techniques, Sequential Searching, Binary Searching, Search Trees.

Outline of the Course (Practical):

Week No	Practical	Description
1	Basic of C and C++	foundational concepts in C and C++.
2	Two dimension array	Understand and utilize arrays effectively.
3	Stack	Implement stack operations including push, pop, and peek.
4	Stack and its application	Cover infix, prefix, and postfix notations.
5	Queue and Circular queue	Implement queue operations such as insert, delete, and display.
6	Linear and Binary Search	Apply various searching techniques on arrays.
7	Merge sort, Bubble Sort	Implement and compare different sorting techniques to sort data.
8	Selection sort , Insertion Sort,	
9	Quick sort	
10	Single Link List	Perform insert and delete operations at the beginning, end, and middle of link list data structures.
11		
12	Double Link List	
13		
14	Circular Single Link List	
15	Circular Double Link List	

Core Books:

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Understand and explain the basic concepts and importance of data structures and algorithms.
C02 :	Implement and utilize array-based and linear data structures effectively.
C03 :	Analyze and apply advanced dynamic data structures such as linked lists.
C04 :	Construct and manipulate various tree data structures including binary trees and AVL trees.
C05 :	Apply graph theory concepts to solve complex problems and understand real-world applications.
C06 :	Implement and compare different sorting and searching algorithms for optimal performance.

CAUC202 : Fundamentals of Operating Systems

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/C ontact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Component (Theory): Unit Tests, Assignments, Case Study etc.					
Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: In order to achieve the course objectives, students will be introduced to the basic operating system concepts and basic functions. Students will be offered appropriate case studies in order to provide actual exposure to theoretical operating system ideas. During the practical session, student will commence the learning from MS-DOS commands in windows environment. The student will also get hands on working with basic Linux commands. Finally using base of Linux commands, shell scripts would be written to demonstrate operating system programming.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Operating System Fundamentals	09
2	Memory Management	11
3	Processor Management	11
4	Device Management	10
5	File Management	10
6	Introduction to Shell Script	09

Total Hours (Theory): 60
Total hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Operating System Fundamentals

Hours 09

What is an operating system, Brief history of an operating system, Pyramid structure of an operating system, Operating system hardware and software, Evolution of an operating system, types of operating system, Batch system, Interactive system, Real time system, Hybrid system, Shell, compiler, assembler, interpreter.

Unit II: Memory Management

Hours 11

Memory management of early system, Fixed partition, Dynamic partition, Re-locatable dynamic partition, Best fit and first fit allocation method, De-allocation, Paged memory allocation, Demand paging allocation, segmented memory allocation, Virtual memory, cache memory, Associative memory, Page replacement policies.

Unit III: Processor Management

Hours 11

What is job and Process, Multiprogramming concept, Process scheduler, Job scheduler, various process states, Thread control, Process Control Block (PCB), Processor scheduling policies, FCFS, SJN, SRT, RR, EDF, Multiple level queues.

Unit IV: Device Management

Hours 10

Types of devices, dedicated device, Virtual device, shared device, I/O devices in cloud, Sequential Access Storage Media, Direct access storage media, Device handler seek strategies, FCFS, SSTF, SCAN and LOOK strategies, disk storage.

Unit V: File Management

Hours 10

Fundamentals of File management, File naming conventions, Fixed length and variable length records, Physical file organization, Physical storage allocation, File access methods, File control matrix, File compression.

Unit VI: Introduction to Shell Script

Hours 09

Shell Script, Shell environment, Making Script interactive, Command Line Argument, Evaluating Expression, Operator, Control Statement, Looping statement.

Outline of the Course:

Week No	Practical	Description
1	Disk operating system -Commands	Introduction to MS DOS environment with basic commands
2	Introduction to Linux Editor	Introduction to Cygwin as Linux Editor along with its usage
3	Linux Operating System-Commands	Using basic commands of Linux
4	Linux Operating System-Advanced Commands	Implementation of advanced Linux commands used in industry
5	Vi editor-Create Text file	Practice of writing and modifying various files in Vi editor
6	Introduction of Shell Programming-Create .sh file and Execute file	Creating simple shell script to get introduced with operating system programming
7	Variable and Rules for variable	Creating and using variables, and constants in shell scripts
8	Interactive Shell Script, Working with Command Line Arguments	Practicing shell scripts which are responsive to the user input
9	Working with expression	Arithmetic expressions in shell script
10	Conditional statement-IF, Working with Operator	Learning conditional statements such as if, elif, case. Using arithmetic, relational, and logical operators.
11	Looping Statement-While	Writing shell scripts with while loops with real life examples
12	Looping Statement-Until, For	Writing shell scripts with until and for loops with real life examples

Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The theory sessions will emphasize real-time systems. To enhance comprehension, we will provide illustrations using actual data across various systems. The sessions will meticulously explain the system's functionality through detailed flow descriptions. To bridge the gap between theoretical knowledge and practical application, we have to schedule industrial visits. These visits are designed to offer students a tangible correlation between their studies and real-world practices. Students should be assigned case studies to facilitate the practical application of their acquired knowledge. These case studies aim to deepen understanding and foster the ability to apply theoretical concepts to real-world scenario.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Basics of Information System	09
2	Architecture and Design of Information System	08
3	Transaction Processing System	09
4	Management Information System	06
5	Decision Support System & Executive Support System	18
6	Introduction to ERP and trending technologies	10

Total Hours (Theory): 60

Total Contact Hours:60

Detail Syllabus:

Unit I : Basics of Information System

Hours 09

Role of data and information, Types of Systems, Types of information, Quality of Information, what is an Information System, Functions of Information System, classification of an Information System, Major Types of Information Systems, Interrelationship of Information Systems

Unit II : Architecture and Design of Information System

Hours 08

Meaning of Architecture, development and maintenance of information system, centralized and decentralized systems, factors of success and failure in information system and risk involved with information system

Unit III : Transaction Processing System

Hours 09

Introduction of Transaction Processing System (TPS), Transaction Processing System (TPS) Architecture, Transaction Processing System (TPS) Life cycle, Methods of Transaction Processing System (TPS), Information System Availability Control, Illustrations and live demonstration of TPS such as Banking System, Railway reservation system etc.

Unit IV : Management Information System

Hours 06

Introduction to Management: Approaches of Management, Function of Management, System from Functional Perspective, Reports of Management Information System, A business perspective of MIS, Dimensions of MIS, contemporary Approaches to Information System.

Unit V : Decision Support System and Executive Support System

Hours 18

Business value of Improved Decision making, Types of Decision, Decision making Process, The difference between MIS and DSS, Components of DSS, System for Decision Support Group Decision Support System, Business value of GDSS. Important Dimensions of knowledge, Organizational learning and Knowledge Management, The Knowledge Management value chain, Overview of different types of Knowledge Management Systems, Characteristics of ESS, The Role of ESS in the Firm, Business value of ESS, Monitoring Corporate Performance, Working Examples of ESS.

Unit VI : Introduction to ERP and trending technologies

Hours 10

An overview of ERP, Basic ERP Concepts, Risk and Benefits of ERP, ERP and Related Technologies, Business Intelligence, Some case studies on ERP or Information system

Core Books:

1. K. C. Laudon and J. P. Laudon: Management Information Systems, 12th Edition, Pearson Education.
2. Alexis Leon: ERP Demystified, Second Edition, Tata McGraw-Hill.

Reference Books:

1. W.S. Jawadekar: Management Information Systems, 2nd Edition, Tata McGraw-Hill.

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	To understand basic of data & information, types of information system, function of information system and its quality.
C02 :	To understand designing and architecture of information system
C03 :	To understand transaction processing concepts and its working.
C04 :	Learning Management Information system, its types and its implementation. To gain understanding of Decision Support Systems.
C05 :	To learn Knowledge Management, Executive Support Systems, ERP and its technology.

04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The course covers key topics like finding roots of equations, solving linear equations, interpolation, and solving differential equations. Teaching includes lectures, interactive problem-solving, and project-based assessments with continuous feedback. The focus is on practical applications and real-world problems, using flexible and engaging teaching methods. The aim is to make the content relevant and useful for students' careers and interests.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Numerical Methods	08
2	Interpolation	09
3	Numerical Integration and Differentiation	10
4	Solution of Linear Equation	12
5	Solution of Differential Equations	11
6	Solution of Partial Differential Equations	10

Total Hours (Theory): 60
Total Contact Hours: 60

Detailed Syllabus:

Unit - I: Numerical Methods

Hours: 08

Introduction to Numerical Methods, Various methods such as Bisection, False-Position and Newton Raphson methods

Unit - II: Interpolation

Hours:09

What is an interpolation, Difference tables, Newton forward and backward Interpolation formula, Lagrange's formula, Newton's Divided Difference Formula?

Unit - III: Numerical Integration and Differentiation

Hours:10

Numerical Integration, Trapezoidal rule, Differentiating Continuous function (Two point and Three-point formula), Tabulated function and its maxima and minima.

Unit - IV: Solution of Linear Equation

Hours:12

Solution of Linear Equation, Gauss-Jordan Elimination methods, Gauss - Seidal and Gauss Jacobi Interactive methods

Unit - V: D Solution of Ordinary Differential Equations

Hours:11

Solution of Ordinary Differential Equations, Taylor Series and Euler Methods, Runge-Kutta Methods.

Unit - VI: Solution of Partial Differential Equations:

Hours:10

Review and examples of partial differential equations, classification of partial differential equations, Difference equation, Laplace's equation and Poisson's equation

Core Books:

1. D. N. Datta: Computer Oriented Numerical Methods, Vikas Pub. House, 2012.
2. S.S. Sastry : Introductory methods of Numerical Analysis, Prentice Hall of India, 4th edition 2006

Reference Books:

1. V. Rajaraman Computer Oriented Numerical Methods, 3rd Edition, Prentice-Hall of India Pvt.Ltd, 3rd edition, 2016

3. B S Grewal: Numerical Methods In Engineering & Science (With Programs In C, C++ And MATLAB), Khanna Publishers, 10th edition, 2014

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Able to use Numerical methods in computer technology
C02 :	To learn Interpolation
C03 :	To Learn the concepts of Numerical Integration and Numerical Differentiation
C04 :	To understand linear equations
C05 :	To learn techniques to solve ordinary differential and partial differential equations

Course Outcomes Mapping:

Unit No.	Unit Name	Course Outcomes

CAUA201: Life Management

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	02	30	25	55
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: During theory lectures the emphasis will be given on the fundamentals of life management. Students will be introduced life styles and its basic, time management, work efficiency, yoga, physical health management, stress and mental health management, and personality skills. Students will give experimental learning exposure in form of assignment and case study.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Life Style and its Basics	06
2	Work Efficiency	04
3	Personality Skills	06
4	Time Management for students	05
5	Physical health management	04
6	Stress and mental health management	05

Total Hours (Theory):30

Total Contact Hours:30

Detail Syllabus:

Unit I : Life Style and its Basics

Hours 06

Purpose of life and its dimensions, Importance of Self-Evaluation; (Daily routine, Food habits, Dressing Sense, Habit formation, Company, Etiquettes), Duties and Commitment of Self, Family and Society, Adjustment with Self and Environment

Unit II : Work Efficiency

Hours 04

Positive way of thinking, Tools & techniques for Positive thinking, Karma and Karma Phal Sidhanta, Behavioral Skill

Unit III : Personality Skills

Hours 06

Self-Assessment Techniques, Adjustment Skills, Art of Positive Thinking, Developing Self Confidence,

Unit IV : Time Management for students

Hours 05

Importance, Steps, Barriers and solutions of Time Management, Reading and Writing Skill, Making Notes and Conceptual Clarity of Subject topic.

Unit V : Physical health management

Hours 04

Importance of physical health and exercise, importance of yoga, physical problems, exercise for health improvements

Unit VI : Stress and mental health management

Hours 05

Importance of mental health, spirituality, improving concentration, importance of Dhyan, Memory problem and Memory Boosting techniques, causes and effects of stress, importance of Prathana, Upasna, Sadhna, and Aradhna

Core Books:

1. Time Management, McGraw-Hill, 2003
2. How To Manage Your Life, Vishal Tatwaved, 2012.

Reference Books:

1. Living Stress Free - The Secret of How to Manage Stress and Live Life Fully, Sonali Perera, SP MEDIA MARKETING.
2. TIME MANAGEMENT, BRIAN TRACY, American Management Association, 2013.

Web References:

8. Life management: a holistic approach to make the most of your life, Dr. Hannah Rose <https://nesslabs.com/life-management>
9. Life Management, <https://www.sciencedirect.com/topics/computer-science/life-management>
10. <https://edynamiclearning.com/course/health-1-life-management-skills/>

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Students will learn basics of life managements
C02 :	The students will be familiar with various styles
C03 :	Students will get the knowledge of time management and stress management
C04 :	Students will get various aspects of physical and mental health
C05 :	They will be able to develop personality and good habits

Course Outcomes Mapping:

CAUD201: Introduction to Web Designing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: Basic concepts of web.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for design and develop entire web sites using several web designing tools and HTML scripting language.

B. Outline of the Course:

Week No	Practical	Description
1	Basic Construction of an HTML & HTML5 Page, HTML Text Editors, HTML Building blocks.	Learn basic concepts of web page design.
2	Basic HTML tags – Text formatting tags, Heading tags, paragraph tags, division tag, Span tags, Break line tag, Binding space in HTML .	Get familiar with different tags and attributes which is used to add the text in a web page.
3	Controlling Font size and color, Adding Table – Table tag.	Learn user interface designing using Table Layout, change font style, color etc.
4	Grouping and merging table rows and columns. Adding List – ordered, unordered and definition list.	Able to display the data in various formats and design different types of list in the table.
5	Adding Image, Adding links - Changing link colors, Email link.	Learn to add images and link in the web page.

6	Embedding audio and video, Adding Field sets.	Able to add multimedia in web page using internal and external methods.
7	Adding Form: Form tag, Action, Method. Basic form controls.	Learn basic form elements and when and where to apply it.
8	Textbox, Password field, Radio Button, Checkbox, Multiple line text area, file upload.	Use various types basic form controls with types of form input elements.
9	Various types of buttons – submit, reset, image, simple button.	Learn various types of buttons to make it more interactive.
10	HTML5 input elements - Color, Number, Date, Month.	Learn new input types in HTML5.
11	Week, Time, date time-local, Email, url, range, search.	Learn to add defining inputs and minimum and maximum range to make the form attractive.
12	Data list, output, progress, meter.	Learn to add list and provide progress horizontal view and range with output.
13	Regular expression, HTML5 new attributes – Placeholder, Required.	Learn HTML 5 form element to provide user side web form validation.
14	Pattern, Autocomplete, Autofocus, novalidate, formnovalidate.	Learn HTML 5 new form properties.
15	formaction, formmethod, spellcheck, contenteditable.	Learn HTML 5 to user submit the form and redirect the form data to selective method.

Total hours: 60

Text Books:

1. Powel Thomas: HTML - The Complete Reference, 3rd Edition, McGraw-Hill Education – Europe,2018.
2. DT Editorial Services: HTML 5 Black Book,2nd Edition, Dreamtech Press, 2016
3. Matt West: HTML 5 Foundations, Wiley publication, 2013
4. Farrar: HTML Example book, BPB,2007.

Reference Books:

1. David DuRocher : HTML and CSS QuickStart Guide, Paperback,2021

2. Laura Lemay, Rafe Colburn, Jennifer Kyrnin : Mastering Html, CSS & JavaScript WebPublishing, Paperback, 2016.
3. Whyte: Basic HTML, 2nd Edition, Payne-Gallway, Oxford, 2003.
4. Shelly Woods: HTML introductory concepts and techniques, 5th Edition, CourseTechnology, 2009.
5. Jon Duckett: Beginning Web Programming with HTML, XHTML and CSS, WroxPublication.

3. www.htmlgoodies.com/ [For HTML resources]
4. <https://developer.mozilla.org/en-US/learn/html> [For HTML best practices]

Course Outcome: Upon successful completion of the course, student will:

C01:	Able to understand basic construction of HTML & HTML5 document and started using basic tags.
C02:	Able to Add content using various tags and format the content in table & list.
C03:	Able to design links and multimedia elements such as image, audio, video.
C04:	Able to design a web page form using HTML & HTML5.
C05:	Able to apply validation using HTML5 attributes.

CAUC203 : System Analysis and Design

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None.

Methodology & Pedagogy: During theory lectures emphasis will be given on understanding how Information Systems are designed and constructed and how major modifications are made to existing systems, analyze business needs for information and develop an appropriate strategy to solve a particular business problem, understand the issues associated with physical design, utilize some of the tools used by systems analysts in the design of Information Systems, a significant portion of the course will deal with computer aided system engineering (CASE) tools and techniques in the context of a case study.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to System Development	08
2	Classical Systems Development Methodology	11
3	Structured Systems Development Methodology	11
4	Prototype Development Methodology and Tools	11
5	Systems Design	10
6	Systems Implementation & Maintenance	09

Total Hours (Theory): 60
Total Contact Hours: 60

Detailed Syllabus:

Unit I: Introduction to System Development

Hours: 08

Concept of system, Basic components, Information systems categories, Business Information Systems, Examples of real-life systems, System analyst – meaning, role and need, Users, Need of information system development, Application development portfolio, Integration of portfolio, Controlling and monitoring committees.

Unit II: Classical Systems Development Methodology

Hours: 11

Classical Systems Development Life Cycle (SDLC) method, Requirement determination, Fact finding techniques, Modern methods for determining systems requirements, Joint Application Development Program, Tools for documenting procedures and decisions, Tools for systems development, understanding the format of system requirement specification.

Unit III: Structured Systems Development Methodology

Hours: 11

Structured Analysis Development Strategy, Data Flow Diagrams (DFDs) for analysis and design, Physical and logical DFDs, Data Dictionary.

Unit IV: Prototype Development Methodology and Tools

Hours: 11

Purpose of Application Prototyping, steps in prototype method, Use of prototypes, Tools for prototyping, Strategies for prototype development, misconceptions about prototyping, Role of tools, Categories and use of automated tools, using a CASE tool

Unit V: Systems Design

Hours: 10

Analysis to design transition, Design of output system, Design of input system, Design of security and control, Design of user interface and Design of Database Interaction.

Unit VI: Systems Implementation & Maintenance

Hours: 09

Designing reliable and maintainable systems, design of software, software design and documentation tools, managing quality assurance, user training, training methods and conversion.

Core Books:

1. James A Senn : Analysis and Design of Information System, McGraw Hill International, 2003.
2. Kendall and Kendall: Systems analysis and Design, 5th Edition, Prentice-Hall of India Private Limited, 2003.

Reference Books:

1. V. Rajaraman: Analysis and Design of Information Systems, Prentice-Hall of India Private Limited, 2003.
2. Jeffrey L. Whitten, Lonnie D. Bentely and Kevin C. Dittman : Systems Analysis and Design Methods, Tata McGraw Hill Publishing Co. Ltd., 2001.
3. Tuthill and Leavy: Knowledge Based Systems: Mangers Perspectives: Tab professional and Reference Books, 1991.

Web references:

1. <http://lecture-notes-forstudents.blogspot.in/2010/04/system-analysis-and-design-sad.html>
2. <http://www.slideshare.net/aroravinay/1-introduction-to-ado-infosys>
3. <http://bcastuff.blogspot.in/p/sad-notes.html#.U6uW-ZzWleo>
4. <http://www.eis.mdx.ac.uk/staffpages/geetha/bis2030/DFD.html>
5. <http://faculty.washington.edu/ytan/is460/notes/LN11.pdf>

Course Outcomes: Upon successful completion of the course, students will be,

C01	Understand the basics of system, type of information systems, system analyst-meaning, role and need, portfolio development of the system, the methods or ways to review and select the project.
C02	Understand the concept of SDLC, the fact finding techniques, detailed study of modern methods for collecting the requirements of system to be developed, Decision and procedure documentation and a brief introduction to the SRS document.
C03	Learn the concept of structured analysis, detail study of DFD and its types and the study of data dictionary.
C04	Gain understanding of prototypes, its uses and tools for development, clarification of the misconception about the prototype and categories of tools including the use of automated tools like case tools.
C05	Be able to learn objective of collecting data, methods to collect data for designing the input and output interface, the concept and objective of database design
C06	Study the designing of reliable and maintainable systems, documentation tool, quality assurance management and need for user training.

CAUC204: Programming the Internet

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, Case Study					

Prerequisites: CAUC103 – Fundamentals of Web Designing

Methodology, Pedagogy & Andragogy: This subject focuses on hands-on experiments to create dynamic and interactive web sites using HTML5, CSS3 and JavaScript.

Outline of the Course:

Week No	Practical	Description
1	CSS Styling the web - Applying CSS Building blocks –CSS Selectors, Cascade & inheritance, CSS Properties, CSS Box model.	Student can apply various types of CSS with its basic properties.
2	Creating Layout - Header, footer, navigation menu, and sub-navigation. Floats.	Student can create different layout using semantic elements of HTML5 & CSS classification properties.
3	Creating Layout - Flexbox, Introduction to Flexbox, Flex Container and Flex Items, Flexbox Properties and Layout Techniques.	Student can create flexible and responsive web layouts. Its ability to distribute space and align items effectively makes it a vital part of modern web design.
4	Creating Layout - Introduction to CSS Grid Layout- Grid Container and Grid Items, multi column layout	Student can Understand its properties and axes can significantly improve the adaptability and aesthetics of your web pages.
5	Creating Image Gallery and Animation - 2D/3D Transformation, Transitions and Animation,	Student can create layout image gallery & animation.

6	CSS Media Query	<i>Student can create different layouts depending on the size of the viewport.</i>
7	JavaScript – Adding Internal & External JavaScript	Student can write script for basic Programs.
8	,Working with variables, datatype – Number, String, Boolean.	Student can write script for basic programs using different datatypes.
9	datatype –Array, Object, Operators, Conditional statements, Looping statements	Student can write script for basic programs using array and object, condition, Loop.
10	Adding Dialog boxes in HTML page – Alert, Confirm and Prompt.	Student can able to use dialog boxes to make website alive.
11	Creating user defined function.	Student can able to use in-build and user defined functions of JavaScript.
12	Adding Mouse and Keyboard Event in HTML page, Manipulating String and Date.	Students can make user interaction using various Events.
13	JavaScript Document Object Model hierarchy – Create find and manipulate HTML Element using Objects and methods	Student can explore the DOM Hierarchy.
14	Form validation, Applying Style using JavaScript.	Student can able to use form validations.
15	Creating New window, Accessing & manipulating History of HTML Pages.	Student can apply various objects to make web page dynamic with user interactions.

Total hours: 60

Text Books:

1. Julie C. Meloni, Jennifer Kyrnin : HTML, CSS, and JavaScript All in One, 3rd Edition, Pearson, 2018.
2. Joseph R. Lewis, Meitar Moscovitz : AdvancED CSS, W3C CSS Working Group, Apress, 2020.
3. Peter Gasston: The Book of CSS3: A Developer's Guide to the Future of Web Design, No Starch Press, April 2011.
4. MArijin Haverbeke : Eloquent Javascript – A modern Introduction to JavaScript, 3rd Edition, 2018
5. Michael Morrison: Head First JavaScript, O'Reilly, 2014

Reference Books:

1. Andy Budd, Emil Björklund: CSS Mastery 3rd Edition, Apress - Advance Web Standard Solutions.
2. Karl Barksdale, Shane Turner: HTML and Java Scripts Basics, 4th Edition, Course Technology, 2006.
3. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.
4. Richard York: Beginning CSS: Cascading Style sheets for Web Design, Wrox Press (Wiley Publishing), 2005.

CAUC205 : Open Source Technology

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction /Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
02	Practical	04	60	40	100
Experiential Learning Components (Theory): Unit Tests, Assignments, Case Study etc.					
Experiential Learning Components (Practical): Lab Assignments, Practical Test, VIVA					

Pre-requisite: Working knowledge of HTML and basic knowledge of MYSQL.

Methodology, Pedagogy & Andragogy: During theory and practical sessions, students able to install & configure PHP and prerequisite software(s). Also, students will be emphasized to develop dynamic web applications.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Web Development and Open Source Technology	08
2	PHP Basics	10
3	Array and Functions	10
4	Handling Form Data	10
5	Database Connectivity with MYSQL	12
6	PHP Utilities	10

Total Hours (Theory): 60
Total hours (Practical): 60
Total Contact Hours:120

Detail Syllabus:

Unit I: Introduction to Web Development and Open Source Technology

Hours 8

Introduction of open source software, Development philosophy of open source software, pros and cons of open source software, open source vs. close source software, Community support in open source, Version Control, Introduction to Webpage and Website, Static and Dynamic Website, Client & Server Side Scripting, Web Hosting: Shared / Cloud / VPS / Dedicated.

Unit II: PHP Basics

Hours 10

Introduction to PHP, Installation of Apache, MySQL and PHP (OOP approach), How PHP code is parsed, Embedding PHP and HTML, Executing PHP and viewing in Browser, Comments in PHP, PHP variables: static and global variables, Data types, Operators, Conditional Statements, Looping Structure.

Unit III: Array and Functions

Hours 10

Array, Types of Array, Array Functions, Miscellaneous Functions: define, constant, include, require, header, die, exit, Overview of built in functions of PHP: String functions, Date and Time, Math functions, File handling functions, User Defined Functions.

Unit IV: Handling Form Data

Hours 10

HTML Form element & its attributes, Send Form data using GET Method & POST Method, Receive Form data using \$_GET, \$_POST & \$_REQUEST variables, Super Global Variables, PHP form validations.

Unit V: Database Connectivity with MYSQL

Hours 12

OOPs Concepts, PHP Data Objects (PDO), Introduction to MYSQL DB, CRUD operations, Handling Errors, State Management Techniques: PHP Sessions, starting session, modifying session variables, Un-registering and deleting session variable, PHP Cookies, Types of Cookies.

Unit VI: PHP Utilities

Hours 10

File Uploading: Upload Single and Multiple file using PHP script, Understanding HTTP requests, Exploring and modifying HTTP responses, getting information from web server, Sending mails.

Outline of the Course:

Week No	Practical	Description
1	Student registration page using HTML and CSS	Revised the concepts of HTML and CSS.
2	Installation of XAMPP & generating basic PHP scripts	Get familiar with echo() and print(). Able to create basic business logic.
3	Variables, Data Types and Casting	Able to work with variables, data types and able perform type casting.
4	User Inputs and Conditional Statements	Deal with user inputs. Use of conditional statements.
5	Looping Structures	Able to work with Looping structures like: for, while, do..while and foreach
6	Inbuilt Functions: string, math and date & time	Use various built-in functions available in PHP.
7	PHP Forms	Creating Forms using GET and POST methods. Also use the super global variables \$_GET, \$_POST and \$_REQUEST.
8	PHP Forms & Validations	Creating Forms with server side validations
9	PHP Array	How to create an array? Array Functions
10	Database Connectivity	Understand MYSQL Dashboard. Implement Database connectivity using PDO (PHP Data Object).
11	Database Connectivity	Implement Database connectivity using PDO (PHP Data Object).
12	File Upload and Download	Able to upload, download and view various kind of files and store path into database using \$_FILES.
13	State Management: Session	Creating Session, modifying session variables, Un-registering and deleting session variable.
14	State Management: Cookies. Super Global Variables	Creating Cookies and learning various super global variables like \$_SERVER, \$GLOBALS and \$_ENV
15	PHP Mail	Sending mail using PHP mail() & PHPMailer

Core Books:

1. Josh Lockhart, Modern PHP, O'Reilly, 2015.

2. Kevin Tatroe, Peter Macintyre, Programming PHP, 4e: Creating Dynamic Web Pages, 4th Edition, O’Rielly, 2020.

Reference Books:

1. Urva Patel, Kaushal Gor, Sanskruti Patel, PHP Hand Book: Crafting Dynamic Web Application, Notion Press Publication, 2024.
2. Matt Zandstra, PHP 8 Objects, Patterns, and Practice: Mastering OO Enhancements, Design Patterns, and Essential Development Tools, Apress, 2021.
3. Luke Welling, Laura Thomson, PHP and MYSQL Web Development, 5th Edition, Pearson Education, 2016.

4. <https://github.com/PHPMailer/PHPMailer> [PHPMailer Code]

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Gain the skills and knowledge for Open Source and Web Hosting.
C02 :	To utilize knowledge and skills for basics of PHP and configuration of MYSQL Server.
C03 :	Learn the array and built-In functions in PHP.
C04 :	Gain understanding of Form handing and utilities in PHP.
C05 :	Be able to develop dynamic web based application using PHP and MySQL with state management techniques.

CAUE201 Advanced Networking

Credit	Component	Instruction/Contact Hours (Per Week)	Instruction/Contact Hours (Per Course)	Experiential Learning Hours (Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study, Certification courses, etc.					

Pre-requisite: Basics of Computer Networks, Topologies.

Methodology, Pedagogy & Andragogy: The methodology for teaching Advanced Networking integrates a blend of theoretical instruction and practical application, employing both pedagogy and andragogy to cater to diverse learning needs. Pedagogically, the course leverages structured lectures, and formative assessments to provide foundational knowledge and skills to less experienced learners. Concurrently, andragogical techniques are employed to engage adult learners, emphasizing experiential learning, problem-solving, and critical thinking. This includes case studies, real-world simulations, collaborative projects, and research-based assignments that draw on the students' existing knowledge and professional experiences. The dual approach ensures a comprehensive understanding of advanced networking concepts, fostering both technical proficiency and strategic thinking necessary for complex network management and innovation.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Basic Network Concepts	07
2	Networking Device, media connection and network model	11
3	Network Virtualization	12
4	Adhoc Networking	11
5	Wireless Sensor networks	10
6	Fundamental of Network Security	09

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Basic Network Concepts

Hours 07

Introduction to Computer Networks, Element of Network, Type of Network: LAN, MAN, WAN, Network Topologies: Bus, Star, Mesh, Ring, etc, Data communication & Representation, Network Operating System.

Unit II: Networking Device, media connection and Network Model

Hours 11

Common LAN Media: STP, UTP, Coaxial Cable, Optical Fiber, Making and Testing Cable, straight thru cable, Cross over Cable, Connector, Jack, Patch Panels, NIC, Repeater and Hub & its type, Bridges and its Types, Switch and Router. Description of Seven Layers of OSI Model, TCP/IP Model, Comparison of OSI & TCP/IP Model, Physical and Data link Layer, Network and Transport Layer, Presentation and Session Layer, Application Layer

Unit III: Network Virtualization

Hours 12

Need for Virtualization, The Virtual Enterprise, Transport Virtualization- VNs, Central Services Access: Virtual Network Perimeter, A Virtualization Technologies primer: theory, Network Device Virtualization, Data-Path Virtualization, Control-Plane Virtualization, Routing Protocols.

Unit IV: Adhoc Networking

Hours 11

Introduction, application of MANET, challenges, Routing in Ad hoc networks, topology & position-based approaches, Routing protocols: topology based, position based, Broadcasting, Multicasting, & Geocasting, Wireless LAN, Transmission techniques, MAC protocol issues, Wireless PANs, The Bluetooth technology

Unit IV: Wireless Sensor networks

Hours 10

Need and application of sensor networks, sensor networks design considerations, empirical energy consumption, sensing and communication range, design issues, localization scheme, clustering of SNs, Routing layer, Sensor networks in controlled environment and actuators, regularly placed sensors, network issues, RFID as passive sensors.

Unit VI: Market Failures and Price Regulations

Hours 09

Market failures and need for regulation, Regulations and market structure, Firm behavior, Price regulation. More on Externalities, and role of government, importance of competition in market failure and price regulations.

Core Books:

1. Computer Networking: A Top-Down Approach 6th edition, James F. Kurose, Keith W. Ross, Pearson (2012).
2. Network Virtualization, Victor Moreno, Kumar Reddy, Cisco Press (2006).
3. Ad Hoc and Sensor Networks: Theory and Applications 2nd edition; Carlos de Moraes Cordeiro, Dharma Prakash Agrawal, World Scientific Publishing Company; 2 edition (2011)

Reference Books:

1. TCP/IP Protocol Suite 4 edition, Behrouz Forouzan, McGraw-Hill Science (2009)
2. Mobile Ad Hoc Networks: Current Status and Future Trends, Jonathan Loo, Jaime Lloret Mauri, Jesús Hamilton Ortiz, CRC Press(2011)
3. Fundamentals of Sensor Network Programming: Applications and Technology, S. Sitharama Iyengar, Nandan Parameshwaran, Vir V. Phoha, N. Balakrishnan, Chuka D. Okoye, Wiley-IEEE Press (2010).

Web References:

1. <https://www.ping.fm/ip/>
2. <https://www.edynamiclearning.com/course/advanced-networking-1a-introduction/>
3. <https://aws.amazon.com/training/learn-about/advanced-networking/>

Course Outcomes: Upon successful completion of the course, students will be,

C01 :	Demonstrate comprehensive understanding of basic network concepts, including networking devices, media connections, and network models, and their roles in network architecture.
C02 :	Analyze and implement network virtualization techniques, assessing their benefits and challenges in various networking environments.
C03 :	Design and manage ad hoc networking solutions, addressing the unique requirements and challenges of decentralized network configurations.
C04:	Develop and optimize wireless sensor networks, leveraging their capabilities for data collection and transmission in diverse applications.
C05 :	Evaluate and apply fundamental network security principles to protect network infrastructures from potential threats and vulnerabilities, ensuring robust and secure communication channels.

CAUE202 : Artificial Intelligence (AI) Fundamentals

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
04	Theory	04	60	50	110
Experiential Learning Components: Unit Tests, Assignments, Case Study etc.					

Pre-requisite: None

Methodology, Pedagogy & Andragogy: The theory sessions will be focused on basics of Artificial Intelligence, problem solving paradigms, and search strategies. Areas of application such as Expert Systems, Software Agents, knowledge representation, natural language processing, expert systems, robotics will be explored.

Outline of the course:

Unit Number	Title of the Unit	Minimum Number of Theory Hours
1	Introduction to Artificial Intelligence	08
2	Problem-solving by Search and constraint satisfaction	11
3	Knowledge representation and reasoning	11
4	Expert Systems	11
5	Agents	10
6	Introduction to AI Techniques and Application Areas	09

Total Hours (Theory): 60
Total Contact Hours:60

Detail Syllabus:

Unit I: Introduction to Artificial Intelligence

Hours 08

Concepts and definitions of Artificial Intelligence (AI) – Brief history of AI – AI and related fields – The AI problems and underlying assumptions, AI approaches: Cognitive Science, Turing Test.

Unit II: Problem solving by Search and constraint satisfaction

Hours 11

Problem spaces; brute-force search; best-first search; two-player games; constraint satisfaction

Unit III: Knowledge representation and reasoning

Hours 11

Review of propositional and predicate logic; resolution and theorem proving; non-monotonic inference; probabilistic reasoning; Bayes theorem, reasoning under uncertainty.

Unit IV: Expert Systems

Hours 11

Introduction – Representing and using domain knowledge – Knowledge acquisition and representation – General structure of Expert Systems – Expert System Shell – Advantages and disadvantages of Expert Systems, Applications of Expert Systems

Unit V: Agents

Hours 10

Definition of agents; successful applications and state-of-the-art agent-based systems; software agents, personal assistants, and information access; multi-agent systems.

Unit VI: Introduction to AI Techniques and Application Areas

Hours 09

Introduction to fuzzy logic – Introduction to various application areas of AI like Natural Language Processing (NLP), Learning, Speech Recognition, Computer Vision, Game Playing, Robotics.

Core Books:

1. Norvig, Peter, Paradigms of AI Programming, Morgan Kauffman, 1992.
2. S. Russell and P. Norvig, Modern Approach to Artificial Intelligence, Prentice Hall of India Ltd., 2006.
3. Rich & Knight, Artificial Intelligence, 2nd edition, TMH, 1991.

Reference Books:

1. R.Akerker and P. S. Sajja, Knowledge-Based Systems, Jones and Bartlett, MIT, 2010.
2. George Luger, Artificial Intelligence, 5th Edition, Addison Wesley, 2004.

Web References:

2. <http://intelligence.worldofcomputing.net/ai-branches/expert-systems.html> [Expert Systems]
3. <http://pages.cs.wisc.edu/~bolo/shipyard/neural/local.html> [Neural Network]

Course Outcomes: Upon successful completion of the course, students will be,

CO1 :	To understand basic problems of AI and history of AI.
CO2 :	Getting deep knowledge of searching algorithms and its applications in AI.
CO3 :	Learning Knowledge Representation and reasoning techniques.
CO4 :	To gain understanding Expert System and Agent Based Systems.
CO5 :	To explore various application areas of AI.

CAUA202: Social Media and BLOG Writing

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/C ontact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, VIVA					

Prerequisites: None.

Methodology, Pedagogy & Andragogy: This course focuses on providing hands-on experience to students for understanding social media marketing strategies and BLOG writing skills.

Outline of the Course:

Week No	Practical	Description
1	Introduction to Social Media - Platforms for social media marketing - Roles of social media in digital marketing	Learn basics of Social Media
2	Optimizing for Social Media Platforms - Facebook - Instagram - X (formerly Twitter)	Learn about various social media platforms and optimizing for them.
3	Content Calendar for Social Media Creating content calendar with different focus	
4	Content creation and Management in Meta Business Suite Understanding and Managing Meta Business Suite	Understanding Search Engine Result Page, and learn about On-the-Page and Off-the-Page Optimization
5	Paid Marketing in Meta Platforms – I - Understanding Ads Manager - Understanding Billing	Understanding paid marketing in Meta platforms
6	Paid Marketing in Meta Platforms – II - Brand awareness campaign - Traffic campaign - Engagement campaign	Understanding paid marketing in Meta platforms with different objectives

7	Paid Marketing in Meta Platforms – III • Lead generation campaign • Conversion campaign	Understand to embed Social Media with website
8	Getting data from Social Media Paid Advertisement using Meta Pixel	For custom audiences and lookalike audiences
9	Introduction to BLOG • What is BLOG? • Importance of BLOG	-
10	Popular Blogging Platforms • WordPress • Blogger	-
11	Using SEO in Blogging • Using AI in Blogging • Understanding SEO in Blogging	-
12	Using Blogger for Blogging	-
13	Using WordPress for Blogging	-
14	Case Study – I (Social Media)	-
15	Case Study – II (Blogging)	-
Total hours: 60		

Text Books:

1. Damian Ryan and Calvin Jones: Understanding Digital Marketing, Kogan Page, 2014
2. Stephanie Diamond: Digital Marketing All-in-One for Dummies, Wiley Publication, 2019
3. Amy Lupold Bair, Blogging for Dummies, 7th Edition, Wiley Publication, 2020

Reference Books:

1. Philip Kotler, Hermawan Kartajaya, and Iwan Setiawan: Marketing 4.0: Moving from Traditional to Digital, Wiley Publication, 2016
2. Jan Zimmerman and Deborah Ng: Social Media Marketing All-in-One for Dummies, Wiley Publication, 2017

4. <https://www.javatpoint.com/digital-marketing>

5. <https://www.javatpoint.com/blog>

Course Outcome: Upon successful completion of the course, student will:

C01:	Able to understand digital marketing and its importance.
C02:	Able to create and manage content using social media platforms
C03:	Able to understand paid advertisements on social media platforms
C04:	Able to blogging and its importance in digital marketing.
C05:	Able to use generative AI in Digital Marketing.

CAUD202: Programming the Internet

Credit	Component	Instruction/Contact Hours(Per Week)	Instruction/Contact Hours(Per Course)	Experiential Learning Hours(Per Course)	Total Notional Hours
02	Practical	04	60	40	100
Experiential Learning Components: Lab Assignments, Practical Test, Case Study					

Prerequisites: CAUD201 – Introduction to Web Designing

Methodology, Pedagogy & Andragogy: This subject focuses on hands-on experiments to create dynamic and interactive web sites using HTML5, CSS3 and JavaScript.

Outline of the Course:

Week No	Practical	Description
1	CSS Styling the web - Applying CSS Building blocks –CSS Selectors, Cascade & inheritance, CSS Properties, CSS Box model.	Student can apply various types of CSS with its basic properties.
2	Creating Layout - Header, footer, navigation menu, and sub-navigation. Floats.	Student can create different layout using semantic elements of HTML5 & CSS classification properties.
3	Creating Layout - Flexbox, Introduction to Flexbox, Flex Container and Flex Items, Flexbox Properties and Layout Techniques.	Student can create flexible and responsive web layouts. Its ability to distribute space and align items effectively makes it a vital part of modern web design.
4	Creating Layout - Introduction to CSS Grid Layout- Grid Container and Grid Items, multi column layout.	Student can Understand its properties and axes can significantly improve the adaptability and aesthetics of your web pages.
5	Creating Image Gallery and Animation - 2D/3D Transformation, Transitions and Animation.	Student can create layout image gallery & animation.

6	CSS Media Query.	<i>Student can create different layouts depending on the size of the viewport.</i>
7	JavaScript – Adding Internal & External JavaScript	Student can write script for basic Programs.
8	Working with variables, datatype – Number, String, Boolean.	Student can write script for basic programs using different datatypes.
9	datatype –Array, Object, Operators, Conditional statements, Looping statements.	Student can write script for basic programs using array and object, condition, Loop.
10	Adding Dialog boxes in HTML page – Alert, Confirm and Prompt.	Student can able to use dialog boxes to make website alive.
11	Creating user defined function.	Student can able to use in-build and user defined functions of JavaScript.
12	Adding Mouse and Keyboard Event in HTML page, Manipulating String and Date.	Students can make user interaction using various Events.
13	JavaScript Document Object Model hierarchy – Create find and manipulate HTML Element using Objects and methods	Student can explore the DOM Hierarchy.
14	Form validation, Applying Style using JavaScript.	Student can able to use form validations.
15	Creating New window, Accessing & manipulating History of HTML Pages.	Student can apply various objects to make web page dynamic with user interactions.

Total hours: 60

Text Books:

1. Julie C. Meloni, Jennifer Kyrnin : HTML, CSS, and JavaScript All in One, 3rd Edition, Pearson, 2018.
2. Joseph R. Lewis, Meitar Moscovitz : AdvancED CSS, W3C CSS Working Group, Apress, 2020.
3. Peter Gasston: The Book of CSS3: A Developer's Guide to the Future of Web Design, No Starch Press, April 2011.
4. M. Arijin Haverbeke : Eloquent Javascript – A modern Introduction to JavaScript, 3rd Edition, 2018
5. Michael Morrison: Head First JavaScript, O'Reilly, 2014

Reference Books:

1. Andy Budd, Emil Björklund: CSS Mastery 3rd Edition, Apress - Advance Web Standard Solutions.
2. Karl Barksdale, Shane Turner: HTML and Java Scripts Basics, 4th Edition, Course Technology, 2006.
3. Jon Duket: Beginning Web Programming with HTML, XHTML and CSS, Wrox Publication.
4. Richard York: Beginning CSS: Cascading Style sheets for Web Design, Wrox Press (Wiley Publishing), 2005.

CAUI201 : Summer Internship and Viva – II

Objective and Scope:

Students who choose to exit the programme after the completion of the first two semesters must undertake internships, community engagement programmes and field based learning/minor projects during the summer term. This internship, worth 4 credits, is a requirement for the award of the Diploma. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. This provision ensures that students gain valuable practical experience and industry exposure, complementing their academic learning and enhancing their career prospects. Following are the intended objectives of internship training:

- **Practical Experience:** Provide hands-on experience with real-world projects to apply theoretical knowledge gained during the course.
- **Skill Development:** Enhance technical skills, such as programming, software development, database management, and other relevant IT skills.
- **Industry Exposure:** Familiarize students with the working environment of the IT industry, including understanding company culture, workflows, and professional practices.
- **Professionalism:** Instil a sense of professionalism and work ethic, including adhering to deadlines, following instructions, and working collaboratively.
- **Transition to Employment:** Facilitate a smoother transition from academic life to professional careers by bridging the gap between theory and practice.

Guidelines of Internship:

The Summer Internship shall be of 15 (Minimum 60 hours) duration and will be undertaken during the Summer Vacation. Students have to undergo internship in reputed Tech Companies, Software Development Firm, IT services companies, Research Institutions and Lab etc. It is mandatory for the students to seek written approval from the coordinator about the topic and the organization before commencing the Summer Internship. During Summer Internship students are expected to take necessary guidance from the faculty guide allotted by the Institute. To do it effectively they should be in touch with their guide through e-mail or phone. Students must maintain regular reports detailing the work completed, challenges faced, and learning experiences. Students must submit a final report and presentation summarizing the internship experience, project outcomes, and key learnings to guide. The technical specifications for report preparation is as under:

Technical details:

1. The report shall be printed on A-4 size white paper.
2. 12 pt. Times New Roman font shall be used with 1.5-line spacing for typing the report.
3. 1" margin shall be left from all the sides.
4. Considering the environmental issues, students are encouraged to print on both sides of the paper.

5. The report shall be spiral bound as per the standard format of the cover page given by the Institute.
6. The report should include a Certificate (on company's letter head) from the company duly signed by the competent authority with the stamp.
7. The report shall be signed by the respective guide(s) & the Principal of the Institute 10 (Ten) days before the viva-voce examinations.
8. Student should prepare two hard bound copies of the Summer Internship Project Report and submit one copy in the institute. The other copy of the report is to be kept by the student for their record and future references.

Evaluation:

The evaluation of Internship will be done as per the following criteria:

Sr. No.	Evaluation Criteria	Marks
1	Summer Internship Report	50
2	Presentation and Viva-voce examination	50
TOTAL MARKS		100

Students must secure 36% passing marks in both components to qualify for the Diploma.

Internship and Exit:

Any student intending to exit the course must complete the summer internship (Including scoring at least 36% marks in the evaluation) before exit. A student intending to exit shall have to submit an application to Principal through Counsellor before even semester university theory examination. However, any such student desiring to withdraw the exit option may do that before the last paper of theoretical examinations of even semester.

SECTION - 2

VARIOUS ADMINISTRATIVE PROCESS

Payment of tuition fees or other charges

Step : 1

- Visit University web-portal click on Pay Fees :
<https://www.charusat.ac.in/student-corner> or visit
<https://charusat.edu.in:912/FeesPaymentApp/>

Step : 2

- Enter your Student ID and Pay your Fees

Step : 3

- After Successfull payment download your fees receipt

Process of Acquiring WIFI Access

To access the Wi-Fi on the Charotar University of Science and Technology (CHARUSAT) campus, students can use the following:

- **Wi-Fi enabled campus:** The entire CHARUSAT campus is Wi-Fi enabled.
- **Computers with internet:** All computers on campus have internet access.
- **Dedicated bandwidth:** Students are given a large bandwidth for internet surfing.
- **Ring connectivity:** The campus has ring connectivity to provide uninterruptable network access.

Process to obtain required Certificate from the institute

Process to obtain required Certificate from the University

In order to obtain the required certificate at the University Level, students need to visit the Student Corner of the CHARUSAT University website. They can choose to apply online or offline and should ensure to include all necessary enclosures with their application. The application must be submitted to the Student Section of the University and should be duly attested by the relevant institute's HoD/ Principal/ Dean. Once all the necessary procedures are completed, the certificate will be issued at the University office.

Process to obtain Duplicate Grade Card/ Name correction in Grade Card/ Migration certificate
