

CHARUSAT
CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

SYLLABUS 2019-20

Faculty of Medical Sciences (FMD)
Manikaka Topawala Institute of Nursing
Department of Nursing

Bachelor of Science Programme
(Nursing)

CHARUSAT
FACULTY OF MEDICAL SCIENCES
ACADEMIC REGULATIONS
Bachelor of Science (Nursing) Programme

To ensure uniform system of education, duration of undergraduate programme, eligibility criteria for and mode of admission, requirement of the course and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

1. System of examination

The semester system of education should be followed across the Charotar University of Science and technology (**CHARUSAT**) at both undergraduate and Master's levels. Each semester will be at least 90 working day duration. Every enrolled student will be required to take a specified load of course work in the subject and also complete a project/dissertation if any.

2. Duration of Programme *(as per INC)

Undergraduate programme

Minimum 8 semesters (4 academic years including internship)

Maximum 8 academic year

3. Eligibility for admissions *(as per INC)

The minimum age for admission shall be 17 years on or before 31st December of the year of admission.

1. Have passed 12th standard (10+2) / Higher Secondary School Certificate Examination of Gujarat State Board or any other examinations by the university, consisting of physics, chemistry, biology and English.
2. Be physically and mentally fit for admission.
3. Have obtained not less than 45% of the total marks at the qualifying examination in physics, chemistry, biology and English taken together, however the applicant belonging to back ward classes must have secured not less than 40% of minimum at the qualifying examination in the said subjects taken together.
4. Have passed qualifying examinations at one and the same attempt i.e. an applicant who passes the examination in parts will not be held eligible.

4. Mode of admissions

Admission to undergraduate programme is based on merit of joint commission in Gujarat government.

5. Programme structure*(Faculty wise)

A student shall follow the prescribed courses as given in the programme of study. This course completes in 8 semesters including internship.

6. Attendance

- 6.1 All activities prescribed under these regulations and listed by Indian nursing council and CHARUSAT in their respective course outline are compulsory for all students pursuing the course.
- 6.2 A candidate must have minimum of 80% attendance (irrespective of the kind of absence) in theory and practical in each subject for appearing the examination.
- 6.3 A candidate must have 100% attendance in each of the practical areas before award of degree.
- 6.4 Any student whose attendance in a course falls short of 80% will not be permitted appearing the university exam.

7. Course evaluation

- 7.1 The performance of every student in each course will be evaluated as follows:
 - 7.1.1 Internal evaluation by the course faculty member(s) based on Continuous assessment, for 25 % of the marks for the course
 - 7.1.2 Final examination by the university through written paper or practical test or oral test or presentation by student or a combination of any two or more of these, for 75% of the marks for the course.
- 7.2 Internal Evaluation.(Faculty wise)
 - 7.2.1 If candidate fails in internal assessment in any subject (Theory & Practical) will not be eligible for appearing the University examination.
- 7.3 University Examination
 - 7.3.1 The final examination by the University for 75% of the evaluation for the course will be through written paper.

8. Grading

Choice Based Credit System (CBCS)

These Regulations shall be called Charotar University of Science and Technology Regulations governing Academic Programmes under the Choice Based Credit System (CBCS). These Regulations shall be effective from the Academic Year 2016 – 2017.

The Choice Based Credit System is offered to all the regular students admitted to Charotar University of Science and Technology from the Academic Year 2016 – 2017.

Choice Based Credit System (CBCS)

UGC Directives

The UGC has directed that the universities in the country should implement recommendations which are aimed at focusing on the following aspects:

- Semester System

- Choice Based Credit System
- Curriculum Development
- Examination Reforms
- Administrative Reforms

The Semester System encourages students to study round the year and get the benefit of continuous evaluation and end-semester university examinations rather than examinations conducted annually.

The Charotar University of Science & Technology has opted for a bi-semester system wherein an academic year is divided into two semesters, with Odd Semester (I, III ... Semesters) scheduled from mid-June to mid-December, and Even Semester (II, IV ... Semesters) from mid-December to mid-June every year.

The Choice Based Credit System is a flexible system of acquisition and imparting of knowledge based on the choices. It provides opportunities to students and teachers to have more space for choosing courses suiting their academic preferences and interest. These preferences ensure freedom as value in education. The essential ingredients of good education process, include freedom, quality, excellence and relevance. More explicitly, the CBCS has the following advantages:

- Enhancing learning opportunities.
- Abilities to match students' scholastic needs and aspirations.
- Inter / Intra institutional transferability of students.
- Part completion of an academic programme in the institution of enrolment and part in a specialised institution.
- Improvement of educational quality towards excellence.
- Standardisation and compatibility across the country.

Just as the students need to study round the year with more responsibility for their own learning, so do the teachers need to update themselves constantly and shift their teaching-learning paradigms vis-à-vis classroom practices. The focus now is on learning, rather than teaching. So, teachers will be required to evolve and adapt such patterns of interaction that lead to real learning on the part of the learners.

1. Need and Justification for CBCS:

The introduction of the CBCS is in response to the UGC directive contained in DO letter No.F.1-2/2008 (XI Plan) dated 31 January 2008 addressed to the Vice Chancellors of all the Universities in the country on "New Initiatives under the XI Plan – Academic Reform in the Universities", asking them to implement academic reform; and DO letter No.F.1-2/2008 (XI Plan) of March 2009 from the Chairman, UGC reminding them of the "Action Plan for Academic and Administrative Reform". Universities, Colleges and other Institutions in India were required to „draw a road map with action plan in time bound manner, subject to maximum of two years" or by March 2011.

The Government of Gujarat realised the need for initiating reforms in various sectors and thus took the UGC mandated reforms in higher education quite seriously to come out with the Gujarat Initiatives for Academic Reform. After these initiatives, the Government of Gujarat Education Department issued a circular No.CBC-262011-918-KH dated April 11, 2011.

2. Choice Based Credit System (CBCS) in Degree and Diploma Programmes:

2.1 Definitions

- **University** means Charotar University of Science and Technology, Changa, Dist. Anand Gujarat.
- **Academic Programmes** means Degree / Diploma (Undergraduates and Post graduates) in the Faculties of
 - Technology & Engineering
 - Pharmacy
 - Applied Science
 - Management Studies
 - Computer Sciences and Applications
 - Medical Sciences
- **Student** means student admitted to an Academic Programme under these Regulations.
- **Degree** means Undergraduate and/or Postgraduate Degree.
- **Diploma** means Diploma offered by the University.
- **Board of Studies** means Board of Studies of the University in a discipline / subject concerned as per the Charotar University of Science & Technology Act and Statutes.
- **Academic Council** means Academic Council of the Charotar University of Science & Technology.
- **Fee** means the Fee prescribed by the University for the Academic Programme from time to time.
- **Course** is a subject in a given semester of a particular programme with given credits and teaching plan leading to an examination.
- **Credit** means a unit by which the coursework is measured. As a general guideline, one credit means one hour of class room teaching or minimum one and half to two hours of practical work per week.
- **Semester** shall constitute of 26 weeks. Each semester shall have minimum 90 days of direct class room teaching, tutorials, counselling, project work and self learning.
- **Letter Grade** is a parameter to indicate the performance of a student in a particular course.
- **Grade Point** is the weight allotted to each letter grade.
- **Credit Point** refers to the “credits assigned to the course”.
- **Semester Grade Point Average (SGPA)** refers to the performance of a student in a given semester. SGPA is ratio of the „sum of all the products of credit points and grade point earned by the student in all courses of the semester“ and the „total number of credits of all subjects offered in that semester“.
- **Cumulative Grade Pont Average (CGPA)** refers to the performance of the student in all completed semesters and is equal to Cumulative Grade Point Weighted Average.

2.2 Main features of the Choice Based Credit System:

- 2.2.1 All the PG Departments / Colleges / Institutes in the relevant faculty of the University shall participate in this Choice Based Credit System (CBCS). A student has the choice of selecting courses offered by the same Department / College / Institute or any other Department / College / Institute of the same faculty or of any

other faculty, depending on his / her interest, needs and long terms goals and also feasibility in terms of available expertise and infrastructure.

2.2.2 Each Board of Studies shall design and offer courses after the due consideration and approval of the respective academic authorities of the university.

2.2.3 A student shall be evaluated through Continuous Assessment and Semester End Examination.

2.2.4 Each course is assigned a specific number of credits.

2.2.5 The student shall be graded by adopting relative grading system. The performance of a student in a semester shall be expressed as Semester Grade Point Average (SGPA) and the combined performances of the student in all the completed semesters of the academic programme shall be expressed as Cumulative Grade Pont Average (CGPA).

2.3 CBCS Course Structure

2.3.1 All the courses in the CBCS shall be offered within the Semester pattern.

2.3.2 An Academic year shall consist of two semesters, each of 26 weeks, having a minimum of 90 days for the direct class room teaching.

2.4 Course Structure in context of Credit

The Credit structure related issues of different courses of the faculty shall be considered and decided by the respective Boards of Studies, and other relevant academic bodies.

2.5 Types of Courses

The Programme Structure should consist of 4 types of courses, University Core, University Elective, Programme Core and Programme Elective broadly classified in to two categories based on their levels & significance (Core and Elective).

2.5.1 Core Courses

A Course which shall compulsorily be studied by a candidate to complete the requirements of a degree / diploma in a said programme of study is defined as a core course. Following core courses are incorporated in CBCS structure:

2.5.1.1 University Core courses: University core courses are compulsory courses which are offered across university and must be completed in order to meet the requirements of programme. Environmental science will be a compulsory University core for all Undergraduate Programmes.

2.5.1.2 Programme Core courses: Programme core courses are compulsory courses offered by respective programme owners, which must be completed in order to meet the requirements of programme.

2.5.2 Elective Courses

Generally, a course which can be chosen from a pool of courses and which may be very specific or specialised or advanced or supportive to the discipline of study or which provides an extended scope or which enables an exposure to some other discipline / domain or nurtures the candidates proficiency / skill is called an elective course. Following elective courses are incorporated in CBCS structure:

2.5.2.1 University Elective Courses: The pool of elective courses offered across all faculties / programmes. As a general guideline, Programme should incorporate 2 University Electives of 2 credits each (total 4 credits).

2.5.2.2 Programme Elective Courses: The programme specific pool of elective courses offered by respective programme.

2.6 Naming of Courses

Naming of the course shall be as per prevailing university rules.

2.7 Medium of Instruction

The Medium of Instruction will be English.

3. Other Provisions

3.1 Admissions: Admission in each faculty will be granted as per the existing rules and regulations of the University from time to time.

3.2 Attendance: All activities prescribed under these regulations and enlisted by the course faculty members in their respective course outlines are compulsory for all students perusing the courses. No exemption will be given to any student regarding attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Principal.

Student's attendance in a course should be 80%.

3.3 Unique Identity Number: Each student will be assigned a Unique Identity Number at the time of enrolment.

4. Evaluation System

4.1 Evaluation Components and Scheme

4.1.1 A student shall be evaluated through Continuous Evaluation and Semester End Examination.

4.1.2 The weight of continuous assessment and End-semester examination shall be varying from UG to PG and from Faculty to Faculty as approved by Academic Council.

4.1.3 During the semester, a student shall be going through continuous assessment. The continuous assessment will be conducted by the respective Department / Institute. At the end of semester a student shall be evaluated through semester end

examination comprising of theory and/or practical, viva-voce, term work components as decided by Academic Council.

- 4.1.4 The performance of candidate in continuous assessment and in end-semester examination together shall be considered for deciding the final grade in a course.
- 4.1.5 External examiners shall be involved for the evaluation of at least 50% of the total credits in the end semester university examination.
- 4.1.6 All other provisions, not covered here in these regulations, shall be as per the exiting norms.
- 4.1.7 A candidate who has cleared all the courses under different components meeting the minimum number of credits required will be considered as passed and eligible for the award of respective degree in the relevant class
- 4.1.8 Student should have passed all internal evaluation components by securing at least 50% marks in every subjects and 50% in external in every subjects except English for which it is 40%.

4.2 Grading Methodology and Results

- 4.2.1 Performance of the student in all the components shall be graded using relative grading system
- 4.2.2 At the end of a semester, a histogram shall be prepared for results of each course. A committee mentioned hereunder shall finalize the histogram based on which results will be prepared.
- 4.2.3 Result Preparation committee
A committee chaired by Provost and comprising of Dean of Faculty, One Dean other than the faculty and one teacher having expertise of relative grading shall deliberate upon different scenarios of results based on histograms of all the courses. Thereafter, the committee shall finalize the results.

The histogram shall be prepared for each course. After the finalization by the committee, the results shall be declared within 3 weeks duration.
- 4.2.4 Post Result Mechanism
The Dean shall discuss the result of each course with the convener and the teacher who has taught the course along with the statistical distribution evident from histogram so as to bring out any anomalies, skewness, left-out topics etc. Its only after this discussion is over the results shall be declared.

4.3 Grade Point System

Grades

A grade point system, as given in the following table, shall be followed for evaluating a candidate in every course.

Grade Points

Grade	AA	AB	BB	BC	CC	CD	FF
Grade Point	10	09	08	07	06	05	00

As a general guideline, a class average of around 6.50 for theory component & around 8.00 for practical component may be maintained while applying relative grading.

In case, a student, of undergraduate programme or diploma, gets less than 50% marks in end-semester examination and less than 50% marks overall (combining continuous evaluation and end-semester examination) in a particular course, he / she will not be graded in that course till he / she reappears in said course and obtains specified minimum marks .

In case, a student, of postgraduate programme or postgraduate diploma, gets less than 50% marks in end-semester examination and less than 50% marks overall (combining continuous evaluation and end-semester examination) in a particular course, he / she will not be graded in that course till he / she reappears in said course and obtains specified minimum marks.

4.4 Requirements for the Award of a Degree

To be eligible for award of the degree, a student must complete all courses with requisite credits as prescribed under his / her programme of studies without “FF” grade in any course in any of the semesters of the entire programme.

4.5 Semester Grade Point Average (SGPA):

The following mechanism may be used in order to arrive at a grade point for the candidate:

SGPA obtained by a student in any degree programme is a weighted average of the grade points in various courses taken by the student.

For example:

If student has taken following courses, then the SGPA is computed as explained below:

Courses	Course – 1	Course – 2		Course – j		Course – n
Credit	C ₁	C ₂		C _j		C _n
Grade Points	G ₁	G ₂		G _j		G _n

SGPA = Semester Grade Point Average = $\sum \{ \text{Credits X Grade Point} \} / \text{Total Credits}$; for the courses offered in particular semester.

4.6 Award of Class

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Award of Class	CGPA Range
Distinction	CGPA ≥ 7.5 & ≤ 10.0
First class	CGPA ≥ 6.0 & < 7.5
Second Class	CGPA ≥ 5.0 & < 6.0
Pass Class	CGPA < 5.0

Where Cumulative Grade Point Average (CGPA) is computed as:

$$CGPA = \sum_{k=1}^n \{ \text{Credits x Grade Point} \} / \text{Total Semester Credits}$$

Here the sum is taken over from 1st Semester to nth Semester of the Programme.

Grade sheets of only the final semester shall indicate the class. In case of all the other semesters, it will simply indicate as Pass / Fail.

Indicative percentage of marks equivalent to Cumulative Grade Point Average (CGPA) shall be calculated as $(CGPA - 0.5) \times 10$.

4.7 Gracing Criteria / Detention Criteria

As relative grading is being adopted gracing of marks shall be redundant. Detention of a student shall be as per prevailing university norms.

5 Maximum Time allowed for Completion of a programme

Maximum time allowed for completion of a particular programme shall not be more than twice the normal duration of the respective programme. For example, a 6-Semester programme should be completed within not more than 12 semesters.

6 Transcript

A transcript issued to the student at the time of leaving the university will contain a consolidated record of all the courses taken by him / her, grades obtained and the final CGPA.

MANIKAKA TOPAWALA INSTITUTUTE OF NURSING

Vision

To become a premier institute in the field of nursing Education, Practice & Research

Mission

To prepare competent, knowledgeable and compassionate nurses having leadership quality and inclination to serve the society.

Program Outcome

By the end of this program, the Nursing graduates will be able to:

- PO1. Demonstrate skills in providing competent and sensitive Nursing care.
- PO2. Apply organizational, leadership skills when coordinating with healthcare team.
- PO3. Enhance continuous and self-directed learning.
- PO4. Analyze governmental, institutional and professional policies influencing the healthcare system.
- PO5. Acquire skills in conducting research.
- PO6. Integrate evidence, theories, and knowledge from other disciplines to guide nursing practice.
- PO7. Participate in promotion of nursing service, education and administration.
- PO8. Demonstrate communication skills and creative thinking abilities
- PO9. Exhibit self-reliant and independent skills.

PROGRAMME EDUCATIONAL OBJECTIVES

The programme will prepare under-graduates who are:

- PEO1. Efficient in providing care that is based on compassion and scientific principles.
- PEO2. Enthusiastic for future education and specialization.
- PEO3. Possessing knowledge of physical, biological, behavioural sciences and medicine in providing nursing care.
- PEO4. Able to function effectively as a member of health team.
- PEO5. Able to exhibit a scientific attitude and independent enquiry to improve health care outcomes.
- PEO6. Efficient to demonstrate skills in teaching in clinical and community setting.
- PEO7. Able to use communication techniques to enhance relationships.
- PEO8. Able to take up research studies and implement the research findings.

CHARUSAT

FACULTY OF MEDICAL SCIENCES

ACADEMIC REGULATIONS

Bachelor of Science (Nursing) Programme

Programme of study:

A student shall follow the prescribed courses as given in the programme of study. In this course 8 semesters including internship.

Distribution:

Course duration = 8 semester (4 year) Including Internship.

Semester –I

Duration	=	26 weeks
Available weeks	=	21weeks
Theory Hours per weeks	=	40 hours
Gazette holidays	=	1 weeks
Vacation	=	2 weeks (Diwali)

Hours available per academic semester = 840 hours (21weeks x 40hours)

Semester –II

Duration	=	26 weeks
Available weeks	=	17weeks
Theory Hours per weeks	=	14 hours
Practical hours per weeks	=	26 hours
Gazette holidays	=	1 weeks
Examination		
(Including preparatory leave)	=	2weeks
Vacation	=	6 weeks (summer Duration)
Hours available per academic semester =		680 hours (17weeksx 40hours)

Semester -III

Duration	=	26 weeks	
Available weeks	=	21weeks	
Theory Hours per week	=	17 hours	
Practical hours per weeks	=	23 hours	
Gazette holidays	=	1 week	
Examination (Including preparatory Period)	=	2weeks	
Vacation	=	2 weeks	(Diwali)

Hours available per academic semester = 840 hours (21weeks x 40hours)

Semester -IV

Duration	=	26 weeks	
Available weeks	=	17weeks	
Theory Hours per week	=	16 hours	
Practical hours per weeks	=	24 hours	
Gazette holidays	=	1 week	
Examination (Including preparatory Period)	=	2 weeks	
Vacation	=	6 weeks	(summer)

Hours available per academic semester = 680hours (17weeksx 40hours)

Semester -V

Duration	=	26 weeks	
Available weeks	=	21weeks	
Theory Hours per weeks	=	14 hours	
Practical hours per weeks	=	26 hours	
Gazette holidays	=	1 week	
Examination (Including preparatory Period)	=	2weeks	
Vacation	=	2 weeks (Diwali)	

Hours available per academic semester = 840 hours (21 weeks × 40 hours)

Semester -VI

Duration	=	26 weeks	
Available weeks	=	21weeks	
Theory Hours per week	=	10 hours	
Practical hours per weeks	=	30 hours	
Gazette holidays	=	1 week	
Examination (Including preparatory Period)	=	2 week	
Vacation	=	2 weeks (summer)	

Hours available per academic semester = 840 hours (21 weeks × 40 hours)

Semester – VII

Duration	=	19 weeks
Available weeks	=	14 weeks
Theory Hours per weeks	=	29 hours
Practical hours per weeks	=	11 hours per week
Gazette holidays	=	1 week
Examination (Including preparatory Period)	=	2 weeks
Vacation	=	2 weeks
Hours available per academic semester	=	560 hours (14 weeks × 40 hours)

Semester – VIII

Duration	=	33 weeks
Available weeks	=	25 weeks
Practical hours per weeks	=	48 hours per week
Gazette holidays	=	1 week
Examination (Including preparatory Period)	=	2 weeks
Vacation	=	5 weeks
Hours available per academic semester	=	1200 hours (25 weeks × 48 hours)

Scheme of Examination:**Semester-I**

Total		-	48	48	24	-	-	350	350	800

Note: (As per INC)

1. Nutrition and Biochemistry Question paper will consist of section A Nutrition of 45 marks and section B of Biochemistry of 30 marks.
2. Pharmacology, genetics, pathology: Section A of Pharmacology with 38 marks, section B of Pathology of 25 and genetics with 12 marks.
3. Nursing Research & statistics – Nursing research should be of 50 marks and Statistics of 25marks.
4. Minimum pass marks shall be 40% for English only.
5. Minimum pass marks shall be 50% in each of the Theory and Practical papers separately.
6. A candidate must have minimum of 80% attendance (irrespective of the kind of absence) in theory and practical in each subject for appearing for examination.
7. A candidate must have 100% attendance in each of the practical (clinical) areas before award of degree.
8. A candidate has to pass in theory and practical exam separately in each of the paper.
9. The number of attempts for examination has been waived off. However to appear for final year examination, the candidate shall have cleared all the previous examination.
To appear for final year examination, the candidate shall have cleared all the previous examination
10. All practical examination must be held in the respective clinical areas. (Clinical area of the hospital).
11. One internal and one external examiner should jointly conduct practical examination for each student.
12. If candidate fails in internal assessment or university examination in any subject (Theory or Practical) will be allow to next semester university examination.
13. The Internal assessment mark should be send prior to university examination.
14. The examination paper should allot 30% weight age to objective type questions, short answers and 70% to long questions, short notes.
15. Maximum number of students to be examined in the practical should not be more than 20 per day.
16. Internship means 8 hour of integrated clinical duties in which 2 weeks of evening and night shift duties are included.
17. Internship should be carried out as 8 hours per day or 48 hour per week.
18. Students during internship will be supervised by nursing teachers.
19. 8th Semester finished after project submission.
20. Project evaluation is clubbing with other 8th semester subjects. (Depends on which subject choose for research project)

B. Sc. (Nursing) Programme

SYLLABI

(Semester – I)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

Semester I

**FACULTY OF MEDICAL SCIENCES
MANIKAKA TOPAWALA INSTITUTE OF NURSING
NR101.01 Anatomy**

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	0	0	4	4
Marks	100	0	0	100	

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction to anatomical terms: organization of the human Body.	5
2	The skeletal system	10
3	The muscular system	10
4	The nervous system	10
5	The sensory organs	8
6	Circulatory and Lymphatic System	12
7	The respiratory System	10
8	The digestive system	8
9	The excretory system	4
10	The endocrine system	4
11	The reproductive system	4

Total hours (Theory): 85 Hrs.

Practical Hours: 00 Hrs.

Total hours: 85 Hrs.

B. Detailed Syllabus:

1	Introduction to anatomical terms organization of the human body. • Human Cell structure • Tissues-Definition, Types, characteristics, classification, location, functions and formation • Membranes and glands-classification and structure • Alterations in disease Applications and implications in nursing	05 Hours	6%
2	The skeletal system • Bones-types, structure, Axial & Appendicular skeleton • Bone formation and growth • Description of bones • Joints-classification and structure • Alterations in disease Applications and implications in nursing	10 Hours	11%
3	The muscular system • Types and structure of muscles • Muscle groups • Alterations in disease Applications and implications in nursing	10 Hours	11%
4	The nervous system • Structure of neurologia & neurons • Somatic Nervous system • Structure of brain, spinal cord, cranial nerves, spinal nerves, peripheral nerves • Autonomic nervous system-sympathetic, parasympathetic- Structure, location • Alteration in disease Applications and implications in nursing.	10 Hours	12%
5	The sensory organs • Structure of skin, eye, ear, nose, tongue (auditory and	08 Hours	10%

	olfactory apparatus) • Alterations in disease Applications and implications in nursing		
6	Circulatory and Lymphatic System The Circulatory System • Blood-Microscopic structure • Structure of Heart • Structure of blood vessels- Arterial and Venous System, • Circulation: systemic, pulmonary, coronary Lymphatic System • Lymphatic tissues vessels and lymph • Lymphatic tissues – • Thymus gland • Lymph nodes • Spleen • Lymphatic nodules Alterations in disease Applications and implications in nursing	12 Hours	14%
7	The respiratory system • Structure of the organs of respiration • Muscles of respiration: Intercostals and Diaphragm • Alterations in disease Applications and implications in nursing	10 Hours	11%
8	The digestive system • Structure of Alimentary tract and accessory organs of digestion • Alterations in disease Applications and implications in nursing	8 Hours	10%
9	The excretory system • Structure of organs of urinary • System: Kidney, ureters, urinary bladder, urethra, structure of skin	4 Hours	6%

	Alterations in diseases Applications and implications in nursing		
1	The endocrine system - Structure of Pituitary, Pancreas, Thyroid, Parathyroid, Thymus and Adrenal gland - Alterations in disease Applications and implications in nursing	4 Hours	5%
1	The reproductive system - Structure of female reproductive organs - Structure of breast - Structure of male reproductive organs - Alterations in disease Applications and implications in nursing	4 Hours	4%

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe the anatomical and biochemical structures of human body.
C02	Describe in detail the structure of the various organs and systems in the human body.
C03	Describe alteration in normal anatomical structure of human body.
C04	Apply the anatomical principles in the practice of nursing.

Course Articulation Matrix:

MANIKAKA TOPAWALA INSTITUTE OF NURSING
NR101.01 Physiology

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	0	0	4	4
Marks	100	0	0	100	

C. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Cell physiology	6
2	Skeletal system	6
3	Muscular system	8
4	Nervous system	12
5	Circulatory system	12
6	The respiratory system	10
7	The digestive system	8
8	The excretory system	5
9	The sensory organs	6
10	The endocrine system	5
11	The reproductive system	5
12	Lymphatic and immunological system	2

Total hours (Theory): 85 Hrs.

Practical Hours: 00 Hrs.

Total hours: 85 Hrs.

D. Detailed Syllabus:

1.	Cell physiology • Tissue- formation, repair • Membranes & glands – functions Alterations in disease Applications and implications in nursing.	6 Hours	7%
2.	Skeletal system • Bone formation & growth • Bones –functions and movements of bones of axial and appendicular skeleton, bone healing • Joints and joint movement Alterations in disease Applications and implications in nursing.	6 Hours	7%
3.	Muscular system • Muscle movements, muscle tone physiology of muscle contraction, levels and maintenance of posture Alteration in disease Applications and implications in nursing.	8 Hours	9%
4.	Nervous system • Functions of neuralgia & neurons • Stimulus & nerve-impulse definitions and mechanism • Function of brain, spinal cord, cranial and spinal nerves • Cerebrospinal fluid-composition, circulation and function • Reflex arc, reflex action and reflexes • Autonomic functions: Pain: somatic, visceral, and referred • Autonomic learning and biofeedback Alterations in disease Applications and implications in nursing.	12 Hours	14%
5.	Circulatory system • Blood formation, composition, blood groups, blood	12 Hours	14%

	coagulation • Haemoglobin: Structure, Synthesis and breakdown, Variation of molecules, estimation. • Functions of Heart, Conduction, Cardiac cycle, circulation- Principles, Control, factors influencing BP and pulse Alteration in disease Applications and implications in nursing.		
6.	The respiratory system Functions of respiratory organs • Physiology of respiration • Pulmonary ventilation, Volume • Mechanics of respiration • Gaseous exchange in lungs • Carriage of oxygen & carbon-dioxide • Exchange of gases in tissues • Regulation of respiration. Alteration in disease Application and implications in nursing.	10 Hours	12%
7.	The digestive system • Functions of organs of digestive tract. Movements of alimentary tract, Digestion in mouth, stomach, small intestines, Large intestines, Absorption of food. • Functions of liver, gall bladder and pancreas. Metabolism of carbohydrates, protein and fat.	8 Hours	9%
8.	The excretory system • Functions of kidneys, ureters, urinary bladder & urethra • Compositions of urine • Mechanism of urine formation • Functions of skin • Regulation of body temperature	5 Hours	6%

	Fluid & electrolyte balance. Alterations in disease Applications & implications in nursing		
9.	The sensory organs Functions of skin, eye, ear, nose, tongue, Alterations in disease Applications & implications in nursing	6 Hours	7%
10.	The endocrine system Functions of Pituitary, pineal body, thymus, Thyroid, parathyroid, pancreas, suprarenal, placenta and ovaries & testes. Alterations in disease Applications and implications in nursing	5 Hours	5%
11.	The reproductive system - Reproduction of cells – DNA, Mitosis, Meiosis, Spermatogenesis, oogenesis. - Functions of female reproductive organs; Functions of breast, Female sexual cycle. - Introduction to embryology - Functions of male reproductive organs, Male function in reproduction, Male fertility system, Alterations in disease Applications and implications in nursing	5 Hours	5%
12.	Lymphatic and immunological system Circulation of lymph Immunity, - Formation of T cells & B cells, - Types of immune response, - Antigens, - Cytokines, - Antibodies	2 Hours	5%

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe the physiological functions of human body and factors, which may disturb these, and mechanism of such disturbances of human body.
C02	Apply the physiological principles in the practice of nursing.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

i.	Introduction	4
ii.	Carbohydrate	2
iii.	Fats	2
iv.	Proteins	2
v.	Energy	3
vi.	Vitamins	4
vii.	Minerals	4
viii.	Water & electrolytes	3
ix.	Cookery rules and preservation of nutrients	5
x.	Balanced diet	7
xi.	Role of nurse in nutritional programme	4
Total Hours		

Total Hours (Theory) : 40 Hrs

Practical Hours : 20 Hrs

Total Hours : 60 Hrs

B. Detailed Syllabus:

Unit No.	Unit Content	Prescribed Hours	Weightage
I.	Unit – 1: Introduction • Nutrition: history, concepts, role of nutrition in maintaining health • nutritional problems in India, national nutritional policy, • factors affecting food and nutrition: socio-economic, cultural, tradition, production, system of distribution, life style and food habits etc, • role of food and its medicinal value. • classification of foods, food standards, elements of nutrition :macro and micro, calories, BMR	4	6%
II.	Unit – 2: Carbohydrate: • Classification, caloric value, recommended daily allowances, dietary sources, functions, digestion, absorption and storage, metabolism of carbohydrates, • Malnutrition: deficiencies and over consumption.	2	4%
III.	Unit – 3: Fats: • Classification, calories value, recommended daily allowances, dietary sources, functions, digestion, absorption and storage, metabolism. • Malnutrition: deficiencies and over consumption.	2	4%
IV.	Unit – 4: Proteins • Classification, calories value, recommended daily allowances, dietary sources, functions, digestion, absorption, metabolism and storage. • Malnutrition: deficiencies and over consumption.	2	4%
V.	Unit – 5: Energy • Unit of energy- Kcal , energy requirement of different categories of people, measurements of energy, Body mass Index(BMI) and basic metabolism. • Basal Metabolic rate (BMR) - determination and	3	5%

	factors affecting.		
VI.	Unit-6: Vitamins - Classification, recommended daily allowances, dietary sources, functions, absorption, synthesis, metabolism storage and excretion. - Deficiencies: hyper- vitaminosis	4	6%
VII.	Unit-7: Minerals Classification, recommended daily allowances, dietary sources, functions, absorption, synthesis, metabolism storage and excretion, deficiencies, over consumption and toxicity.	4	6%
VIII.	Unit-8: Water & electrolytes (5 %) Water: daily requirement, regulation of water metabolism, distribution of body water, Electrolytes: types, sources, composition of body fluids, maintenance of fluid and electrolyte balance, over hydration, dehydration and water intoxication, electrolyte imbalance	3	5%
IX.	Unit-9: Cookery rules and preservation of nutrients- Principals, methods of cooking and serving, preservation of nutrients. Safe food handling – toxicity, storage of food, food preservation of food adulteration act(PFA), food standards, preparation of simple beverage and different types of food’.	5+15	34%
X.	Unit-10: Balanced diet Elements, food groups, recommended daily, allowance, nutritive value of foods, calculation of balanced diet for different categories of people, planning menu, budgeting of food, introduction of therapeutic diets: Naturopathy- Diet.	7+5	20%
XI.	Unit-11: Role of nurse in nutritional programme National programme related to nutrition, vitamin-A deficiency programme, National iodine (IDD) programme, mid-day meal programme, midday	4	6%

	meal programme, integrated child development scheme(ICDS). National and international agencies working towards food/nutrition, NIPCCD, CARE,FAO,NIN,CFTRI (central food technology and research institute) etc, assessment of nutritional status, nutritional education and role of nurse		
--	--	--	--

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Identify the importance of nutrition in health and wellness.
CO2	Explain the principles and practices of Nutrition and Dietetics
CO3	Identify nutritional needs of different age groups, different diseases & plan therapeutic diet for clients.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

vii.	Immunochemistry	3
Total Hours		30

Total Hours (Theory) : 30 Hrs

Practical Hours : 00 Hrs

Total Hours : 30 Hrs

C. Detailed Syllabus:

Unit No.	Unit Content	Prescribed Hours (30)	Weightage
I	Unit – 1: Introduction Definition and significance in nursing. Review of structure, Composition and functions of cell. Prokaryote and Eukaryote cell organization.,Microscopy.	3	10%
II	Unit – 2: Structure and functions of cell membrane Fluid mosaic model tight junction, Cytoskeleton. Transport mechanism; diffusion, osmosis, filtration, active channel,	6	20%

	sodium pump. • Acid base balance- maintenance & diagnostic tests. PH buffers.		
III	Unit – 3: Composition and metabolism of Carbohydrates • Types, structure, composition and uses Monosaccharide. Polysaccharides, Oligosaccharides Disaccharides. • Metabolism - Pathways of glucose: - Glycolysis, Gluconeogenesis: Cori's cycle Tricarboxylic acid (TCA) cycle, Glycogenolysis - Pentose Phosphate pathways (Hexose mono phosphate) –Regulation of blood glucose level Investigation and their interpretations.	6	20%
IV	Unit – 4:Composition and metabolism of lipids • Types, structure, composition and uses of fatty acids Nomenclature, Roles anprostaglandins. • Metabolism of fatty acid breakdown –synthesis, Metabolism of triacylglycerols, cholesterol metabolism - Biosynthesis and its Regulati Bile salts and bilirubin - Vitamin D-Steroid hormones . • Lipoproteins and their function : VLDLs- IDLs, LDLs, and HDLs -Transport of lipids- Atherosclerosis investigations and their interpretation.	4	13%
V	Unit – 5: Composition and metabolism of Amino acidsand Proteins. • Types, structure, composition and uses of Amino acids and Proteins, Metabolism of Amino acids and proteins, Protein synthesis, targeting and glycosylation- Chromatography-Electrophoresis-Sequencing, Metabolism of nitrogen -Fixation and Assimilation -Urea Cycle • Hemes and chlorophylls. • Enzymes and co-enzymes- Classification –Properties- Kinetics and inhibition Control Investigations and their interpretations.	6	20%
VI	Unit – 6: Composition of Vitamins and minerals • Vitamins and minerals: - Structure - Classification - Properties, Absorption - Storage and transportation -	2	7%

	Normal concentration , Investigations and their interpretations. Free radical and antioxidant. Specialized protein : Collage		
VII	Unit – 7: Immunochemistry - Immune response. Structure and classification of immunoglobins, - Mechanism of antibody production. Antigens : HLA typing Elastin, Keratin, Myosin, Lens, Protein Electrophoretic and Quantitative determination of immunoglobins- ELISA etc. Investigations and their interpretations.	3	10%

Course Outcomes (COs):

At the end of the course, the students will be able to

C04	Describe the metabolism of carbohydrates, lipids, proteins and amino acids and its alterations
C05	Illustrate immuno chemistry & clinical enzymeology in various disease conditions.
C06	Explain acid base balance, imbalance and its clinical significance.

MANIKAKA TOPAWALA INSTITUTE OF NURSING
NR: 104.02 Nursing Foundations I

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	20	-	-	20	20
Marks	100	-	-	100	

D. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction	10
2	Nursing as a profession	16
3	Hospital admission and discharge	4
4	Nursing Process	15
5	Documentation and Reporting	4
6	Vital signs	15
7	Health Assessment	30
8	First Aids	20
9	Machinery, equipment and linen	5
10	Meeting needs of patient	60
11	Administration of medications	40

Total hours (Theory): 219 Hrs.

Lab Hours: 186 Hrs.

Total hours: 405 Hrs.

E. Detailed Syllabus:

1.	Introduction	10 Hours	5%
	• Concept of health: Health illness continuum. • Factors influencing health. • Causes and risk factors for developing illness. • Body defences: immunity and immunization. • Illness and illness Behavior • Impact of illness on patient and family. • Health Care Services: • Health promotion and prevention, primary Care, Diagnosis, • Treatment, Rehabilitation and Continuing Care. • Health care teams • Types of health care agencies • Hospital: Types, Organization and Functions • Health promotion and Level of Disease prevention • Primary health care and its delivery: Role of Nurse		
2.	Nursing as a profession	16 Hours	8%
	• Definition and characteristics of a profession, • Nursing: • Definition, Concepts philosophy, objectives • Characteristics, nature and scope of nursing practice • Function of nurse • Qualities of a nurse, • Categories of nursing personnel, • Nursing as a profession • History of Nursing in India, • Values: Definition, Types, values Clarification and values in professional Nursing, Caring and Advocacy.		

	• Ethics: Definition and Ethical Principles, Code of ethics and professional conduct for nurses.		
3.	Hospital admission and discharge	4 Hours	2%
	• Admission to the Hospital: • Unit and its preparation admission bed, • Admission procedure, • Special considerations, • Medico-legal issues. • Role & responsibilities of the Nurse. • Discharge from the hospital: • Types: Planned discharge, LAMA and abscond referrals and transfers, • Discharge planning, • Discharge Procedures, • Special considerations, • Medico-legal issues, • Role & responsibilities of nurse • Care of the unit after discharge		
4.	Nursing Process	15 Hours	7%
	• Critical Thinking and Nursing Judgment: • Critical Thinking: Thinking and Learning, • Competencies, Attitudes for critical thinking, levels of critical thinking in nursing. • Nursing Process Overview: Application in Practice, • Nursing Process format INC, current format, • Assessment: ○ Collection of Data: Types, Sources, Methods, ○ Formulating Nursing judgment Data interpretation, • Nursing diagnosis: ○ Identification of client problem.		

	○ Nursing diagnosis statement, ○ Difference between medical and nursing diagnosis. • Planning: ○ Establishing Priorities ○ Establishing Goals and Expected Outcomes, ○ Selection of interventions: Protocol and standing orders, ○ Writing the nursing careplan. • Implementation: ○ Implementation the plan of care. • Evaluation: ○ Outcome of care, Review and Modify,		
5.	Documentation and Reporting	4 Hours	2%
	• Documentation: Purposes of Recording and reporting, • Communication within the Health careteam, • Types of records: Ward records, medical /nursingrecords, • Common record - keeping forms. Computerizeddocumentation, • Guideline for reporting: Factual basis, accuracy, completeness, correctness, organization,confidentiality. • Method ofrecording, • Reporting: Change of shift reports: Transfer reports, Incidentreports, • Minimizing legal Liability through effective recordkeeping.		
6.	Vital signs	15 Hours	7%
	• Guidelines for taking vitalsigns:		

	• Bodytemperature: • Physiology Regulation, factors affecting bodytemperature, • Assessment of body temperature sites, equipments and technique, special considerations. • Temperature alterations: Hyperthermia, Heatstroke,Hypothermia, • Hot and coldapplications. • Pulse : • Physiology and regulation, Characteristics of the pulse, Factors affecting pulse , • Assessment of pulse sites, location, equipments and technique, special considerations, • Alteration inpulse. • Respiration: • Physiology and regulation, mechanics of breathing, characteristics of the respiration, factors affectingrespiration, • Assessment of respiration: technique, special consideration, • Alteration inrespiration. • BloodPressure: • Physiology and Regulation, Characteristics of the blood pressure, factors affecting bloodpressure, • Assessment of blood pressure: sites, equipments and technique, special considerations, • Alterations in blood pressure. • Recording of vitalsigns.		
7.	Health Assessment	30 Hours	14 %
	• Purpose, • Process of healthassessment,		

	• Health history. • Physical examination: • Methods- Inspection, palpation, percussion, Auscultation, Olfaction • Preparation for examination; patient and unit • General assessment, • Assessment of each body system, • Recording of health assessment.		
8.	First Aids	20 Hours	9%
	• Promoting safety consciousness • Bandages- types, binders, splints & slings. • First aid in emergencies such as RTA, cardiac arrest, respiratory failure, burns, electric shock, drowning, spinal cord, animal bite, shock, snake/Scorpion bite and poisoning. • First aid kit. • Drugs and equipments used in first aid.		
9.	Machinery, equipment and linen	5 Hours	2%
	• Type; Disposable and reusable - linen, rubber goods, glass ware, metal, plastics, furniture, machinery • Introduction: ○ Indent ○ Maintenance ○ Inventory		
10.	Meeting needs of patient	60 Hours	26%
	• Providing safe and clean environment:- • Physical environment: Temperature, Humidity, noise, ventilation, light, odor, Pests control, • Reduction of physical hazards: Fire, accidents • Safety Devices: Restraints, side rails, airways,		

	trapezetc. • Role of nursing in providing safe and clean environment. • Hygiene: • Factors Influencing Hygienic practice • Hygienic care: care of the skin- Bath and pressure points, feet and nail, oral cavity, Hair care, Eyes, Ears and Nose, • Assessment, Principles, Types Equipment, Procedure, Special Considerations, • Patient Environment: Room equipment's and linen, making patient beds. • Types of beds and bedmaking, • Comforts: • Factors Influencing comfort, • Comfort devices, • Physiological needs: • Sleep and Rest:, • Physiology of sleep, • Factors affecting sleep, • Promoting rest and sleep • Sleep disorders, • Nutrition: • Importance, • Factors affecting nutritional needs, • Assessment of nutritional needs, Variables • Meeting nutritional needs: Principles, equipment, procedure and special consideration. • Oral, • Enteral: Naso/ Orogastric, Gastrostomy • Parenteral. • Urinary elimination:		
--	---	--	--

	• Review of physiology of urine elimination, Composition and characteristics of urine, • Factors influencing urination, • Alteration in urinary elimination, • Types and collection of urine specimen: Observation, urine testing, • Facilitating urine elimination: assessment, types, equipment's, procedures and special considerations: • Providing urinal /bedpan, • Condom drainage, • Perineal care, • Catheterization, • Care of urinary drainage, • Care of urinary diversions • Bladder irrigation • Bowel Elimination: • Review of Physiology of bowel elimination, Composition and characteristics of feces. • Factors affecting Bowel elimination • Alteration in Bowel elimination • Types and collection of specimen of feces: Observation • Facilitating bowel elimination: assessment, equipment's, procedures and special considerations: • Passing of flat tube • Enemas • Suppository • Sitz Bath • Bowel wash • Care of Ostomies.		
--	---	--	--

	• Mobility andimmobility: • Principles of bodyMechanics • Maintenance of normal Body Alignment andMobility • Factors affecting body alignment andmobility • Hazards associated withimmobility • Alteration in body Alignment andmobility • Nursing intervention for impaired Body Alignment and mobility: assessment, types, devices used, method and special considerations, rehabilitationaspects. • Range of motionexercises • Maintaining body alignment:positions • Moving • Lifting • Transferring • Walking • Restraints • Oxygenation: • Review of Cardiovascular and respiratoryPhysiology • Factors affecting Oxygenation • Alterations inoxygenation • Nursing interventions in oxygenation: assessment, types equipment used, procedure and specialconsiderations • Maintenance of patent airway • Oxygenadministration • Suction • Inhalations: dry andmoist • Chest physiotherapy and posturaldrainage • Care of Chestdrainage		
--	--	--	--

	• Pulse oximetry • CPR-Basic lifesupport • Fluid, Electrolyte, and Acid-BaseBalances • Review of physiological regulation of Fluid and Electrolyte, Acid-Base Balances • Factors affecting Fluid, Electrolyte and Acid-BaseBalances. • Alterations in Fluid, Electrolyte and Acid-Base Balances • Nursing interventions in Fluid, Electrolyte and Acid-Base Imbalances Assessment, types, equipment, procedures And specialconsiderations • Measuring fluid intake andoutput • Correcting fluid, electrolyteimbalance: • Replacement of fluid: Oral and Parenteral Venipuncture, regulating IV flow rates, changing IV solutions and Tubing, changing IVdressing • Administering bloodtransfusion • Restriction offluids. • Psychosocialneeds • Concepts of cultural diversity, stress and adaptation, self-concept sexuality, spiritual health, Coping with loss, death andgrieving • Assessment of psychosocialneeds • Nursing intervention for psychosocialneeds • Assist with coping andadaptation • Creating therapeuticenvironment • Recreational and diversionalthérapies.		
11	Administration of medications	40 Hours	18%
	• General,Principles/considerations: • Purposes ofmedication		

	• Principles: 10 rights, special considerations, prescriptions, safety in administering medications and medication errors • Drug forms • Routes of administration • Storage and maintenance of drugs and Nurses Responsibility • Broad classification of drug • Therapeutic effect, side effects, toxic effects, idiosyncratic reactions, allergic reactions, drug tolerance, drug interactions. • Factors influencing drug actions. • Systems of drug Measurement: metric system, apothecary system, household measurements, solutions. • Converting measurements Units: conversion within one system, conversion between systems, dosage calculation. • Terminologies and abbreviations used in prescription of medications. • Oral drugs administration: oral, sublingual and buccal: equipment, procedure • Parenteral: • General principles: Decontamination and disposal of syringes and needles • Types of parenteral therapies • Types of syringes, needles, cannula and infusion sets. • Protection from needle stick injuries: giving medication with a safety syringes. • Routes of parenteral therapies– • Intradermal: purpose, site, equipment, Procedure,		
--	---	--	--

	specialconsideration • subcutaneous: purpose, site equipment, Procedure, specialconsideration • intramuscular: purpose, site, equipment, Procedure, specialconsideration • intravenous: purpose, site, equipment, Procedure, specialconsideration • Advanced techniques: epidural, intrathecal, intraosseo, inratraperitoneal, intraplural, intraarterial, -Role ofnurse. • Topical administration: purpose, site, equipment, Procedure, special considerationfor • Application to skin • Application to mucusmembrane • Direct application of liquids gargle and swabbing thethroat • Insertion of drug into body cavity: Suppository/medicated packing in rectum/vaginal • Instillation: ear, eye, nasal, bladder andrectal • Irrigations: eye, ear, bladder, vaginal andrectal • Spraying: nose and throat • Inhalation: nasal, oral, endotracheal/ tracheal (steam,oxygenand medications)purposes, • Site, equipment, Procedure, special considerations • Recording and reporting of medicationsadministered		
--	---	--	--

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Contrasting the concept of health, illness and health care agencies.
C02	Implementing the task as a nursing professionals
C03	Communicate effectively with patient, families and team members and maintain effective human relations in order to boost nursing Process
C04	Executing effective maintenance of documentation
C05	Articulate proper health assessment to find out the abnormalities.
C06	Re-enact the various type of procedures for patient's wellbeing

Course Articulation Matrix:

			02	02	--	--	30	70	100

II. Course Outline

Module No.	Title/Topic	Classroom Contact Sessions
1	An Introduction to Painting <i>An Introduction to Painting</i> <i>Principles of Composition</i> <i>Medium and Techniques of Painting</i> <i>History of Painting: Folk Indian Painting / Western Painting</i> <i>2D and 3D Painting</i>	2
2	Drawing from Nature and Object <i>Objects of Drawing: Nature and Manmade / Artificial Objects</i> <i>Drawing Still / Live Objects</i> <i>Drawing from Memory</i> <i>Drawing from Life</i>	4
3	Colour Design and Colour Value Color Theory: <i>Color wheel (primary/secondary, complementary), transparency/opacity, hue, value (intensity, brightness), chroma (saturation, purity) & temperature (warm/cold)</i> Color Contrast & Attributes: <i>Interaction, harmony, psychology/mood, culture & expression</i>	6

	• Media Characteristics & Surfaces: <i>Acrylic, oil, paper, wood & canvas (primed/unprimed)</i>	
4	Composition and Perspective • Composition: <i>Space, movement, balance, asymmetry, rhythm, shapes, proportion & lighting</i> • Perspective: <i>An approximate reproduction</i> • Types of Perspectives: <i>Linear Perspective, One-point Perspective, Two-point Perspective, Three-point Perspective, Four-Point Perspective</i>	6
5	Figure Drawing and Proportion • <i>Proportions of the Human Body</i> • <i>Three views – Anterior (front), Lateral (side) and Posterior (back)</i> • <i>Fundamental Proportion – The Big Three</i>	4
6	Sketching • <i>Sketching and Freehand</i> • <i>Sketching Techniques</i> • <i>Sketch and Drawing Medium</i>	4
7	Contemporary Issues in Painting • <i>Contemporary Indian Art</i> • <i>Pioneers of Contemporary Indian Art</i> • <i>Contemporary Issues in Painting</i>	4
Total Hours		30

III. Instruction Method and Pedagogy

Teaching will be practical based on the hands on experiences, live and interactive sessions. It will run in the workshop mode. Four Workshops (each of a day) will be organised during the semester.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

Students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Participation	-	05	05
2	Performance/ Activities	-	05	05
3	Project	-	15	15
4	Attendance	-	05	05
Total				30

External Evaluation

University Practical examination will be for 70 marks and will test the performance, activities and creative presentations of the students with reference to the course selected:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical	-	70	70
Total				70

Course Outcome (COs):

After the completion of the course, the student would:

C01	Have cultivated a sense of creativity.
C02	Be appreciative of art history, art criticism and aesthetics.
C03	Be able to recognize the elements of arts in painting.
C04	Have better cognizance and association of meaning of colors, shapes, and composition.
C05	Be able to acknowledge the principles of painting as in design and colors, concept, medium and formats.
C06	Have instantaneous painting experience about designing, lights, shades and colors and such other important aspects.

H. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction	5
2	General characteristics of the microbes	15
3	Infection control	12
4	Pathogenic organisms	16
5	Immunity	12

Total hours (Theory): 45 Hrs.

Practical Hours: 15 Hrs.

Total hours: 60 Hrs.

Detailed Syllabus:

1	Introduction • Importance and relevance to nursing • Historical perspective • Concepts and terminology Principles of microbiology	05 Hours	8%
2	General characteristics of microbes • Structure and classification of microbes • Morphological types, • Size and form of bacteria, • Motility, • Colonization, • Growth and nutrition of microbes: Temperature, Moisture, Blood and body fluids • Laboratory methods of identification of microorganisms, • Staining techniques, gram staining, acid fast staining, hanging drop preparation, • Culture; various Medias	15 Hours	26%
3	Infection control • Infection: sources, portals of entry and exit, Transmission, • Asepsis • Disinfection: types and methods, • Sterilization: types and methods • Chemotherapy and antibiotics, • Standard safety measures • Biomedical waste management, • Role of nurse. • Hospital acquired infection • Hospital infection control programme, Protocols, collection of samples, preparation of report and	12Hours	20%

	status of rate of infection in the unit/hospital, nurses accountability, continuing education etc.		
4	Pathogenic organisms • Micro-organisms • Cocci – gram positive and gram negative, • Bacilli – gram positive and gram negative • Spirochete • Mycoplasma • Rickettsiae • Chlamydiae – • Viruses • Fungi – superficial and deep mycoses, • Parasites, Rodents & vectors, Characteristics, source, portal of entry, transmission of infection. Identification of disease producing micro-organisms collection handling and transportation of various specimens.	16 Hours	26%
5	Immunity • Immunity-types, classification, • Antigen and antibody reaction, • Hypersensitivity – skin test, • Serological tests, • Immunoprophylaxis • Vaccination & sera – types & classification, storage and handling, cold chain, • Immunization for various diseases Immunization schedule.	12 Hours	20%

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Apply understanding of fundamentals of microbiology and identification of various micro-organisms.
CO2	Apply infection control measures in hospital and community settings.

Marks	100	0	0		

A. Outline of the Course:

Sr. No.	Title of the unit	Prescribed hours (theory)
1	Introduction	02
2	Biology of behavior	04
3	Cognitive processes	20
4	Motivation and emotional processes	08
5	Personality	07
6	Developmental psychology	07
7	Mental hygiene and mental health	08
8	Psychological assessment and tests	04

Total hours: 60

B. Detailed Syllabus:

1	Introduction • definition • origin of psychology • scope of psychology • methods of the psychology • importance of psychology	2hours	04%
2	Biology of behavior • body mind relationship • genetics and behavior • brain and behavior : Nervous system, neurons and synapse, Association cortex, right and left hemispheres, Psychology of sensation Muscular and glandular controls of behavior Nature of behavior of an organism/integrated	4 hours	06%
3	Cognitive process • Attention: types, determinants, duration and degree, alterations • Perception: meaning, principles, factors affecting, errors, • Learning: nature, types, learner and learning, factors influencing, laws and theories, process transfer, study habits. • Memory: meaning, types, nature factors influencing, development theories and methods of memorizing and forgetting • Thinking: types and levels, stages of development, relationship with language and communication Intelligence: meaning, classification, uses, theories, • Aptitude: concept, types, individual differences and variability, psychometric	20 hours	34%

	assessment of • Cognitive processes .alteration cognitive processes Applications.		
4	Motivation and emotional process • Motivation: meaning, concepts, types, theories ,motives & behaviors, conflicts and frustration, conflict resolution, Emotions and stress, emotions definition Components Stages in emotions, theories, emotional adjustments, emotions in health and illness. • Stress: stressors, cycle, effect, adaptation and coping, Attitude Meaning nature development. • Factors affecting Behavior and attitudes, attitudinal change. • Psychometric assessment of emotions and attitudes. • Alterations in emotion. • Applications.	8 hours	13%
5	Personality • Definitions, topography, types, theories, Psychometric assessments of personality, Alterations in personality, Applications.	7 hours	12%
6	Developmental psychology • Psychology of people at different ages from infancy to old age. • Psychology of vulnerable individuals - challenged, women sick etc. Psychology of groups.	7 hours	12%
7	Mental health and mental hygiene • Concepts of mental hygiene and mental	8 hours	13%

	health. • Characteristics of mentally healthy person. • Warning signs of poor mental health promotive and preventive mental health-strategies and services. • Ego defense mechanisms and implications. • Personal and social adjustments. • Guidance and counseling Role of nurse.		
8	Psychological assessments and tests • Types development characteristics principles, uses, interpretations and role of nurse in psychological assessment.	4 hours	06%

C. Course outcome

At the end of the courses learner should be able:

C01	Describe the importance of psychology in personal and professional life.
C02	Identify the biology of human behavior.
C03	Integrate cognitive and affective process of human mind.
C04	Develops an understanding of self.
C05	Evaluate the influence of personality of human behavior.
C06	Appraise developmental psychology.

Course Articulation Matrix:

Outline of the course:

Unit No.	Unit Title	Prescribed Hours	
		Theory	Lab
1.	Infection control in clinical settings	10	2
2.	Meeting needs of preoperative patients	20	3
3.	Meeting special needs of the patient	15	7
4.	Care of terminally ill patient	5	1
5.	Professional nursing concepts and practices	6	-
6.	Communication and Nurse patient Relationship	10	1
	Total	66	14

Total hours (Theory): 66 hours

Total hours (Lab demonstration): 14 hours

Total hours (practical): 450 hours

Total hour: 530 hours

Detailed Syllabus:

Unit No.	Prescribed Hours			Unit Content
	Theory	Lab	%	
1.	10	2	30%	Infection control in clinical settings • Infection control, Nature of Infection, Chain of infection transmission • Defenses against infection: natural and acquired Hospital acquired infection (nosocomial infection) • Concept of asepsis: Medical asepsis, Surgical asepsis, Isolation precautions • Barrier nursing, Hand washing :simple, hand antisepsis and surgical antisepsis(scrub) • Isolation: source and protective, Personal protecting equipment's: types, uses and technique of wearing and removing • Decontamination of equipment and unit, Transportation of infected patients • Isolation: source and protective, Personal protecting equipment's: types, uses and technique of wearing and removing • Decontamination of equipment and unit, Transportation of infected patients • Standard safety precautions(universal precaution) Transmission based precautions • Biomedical waste management: Importance, Types of hospital waste, Hazards associated with hospital waste, Decontamination of hospital waste, Segregation and transportation and disposal
2.	20	3	15%	Meeting needs of preoperative patients • Definition and concept of perioperative nursing Pre-operative phase, Preparation of patient for surgery • Intra operative, Operation theatre set up and environment , Role of nurse • Post-operative phase, Recovery unit, Post-operative

				unit, Post-operative care • Wounds: types, classification, wound healing process, factors affecting wound, complication of wound healing • Surgical asepsis, Care of the wound: types, equipment's, procedure and special considerations, dressing, Suture care, Care of drainage, Application of bandages, binders, splints and slings, Heat and cold therapy.
3.	15	7	23%	Meeting special needs of the patient • Care of patients having alteration in Temperature(hyper and hypothermia) types, Assessment, Management • Sensorium (unconsciousness); Assessment, Management • Urinary Elimination (retention and incontinence) Assessment, Management • Functioning of sensory organs (visual and hearing impairment) • Assessment of self-care ability, Communication methods and special considerations • Mobility(physically challenged, cast),assessment of self-care ability: communication methods and special considerations • Mental state(mentally challenged),assessment of self-care ability: • Communication methods and special considerations • Respiration (distress):types, assessment Management • Comfort-(pain)-Nature, types, factors influencing pain, Coping, Assessment, Management • Treatments Related to gastrointestinal system: nasogastric suction, gastric irrigation, and gastric analysis.
4.	5	1	8%	Care of terminally ill patient • Concepts of loss, Grief, Grieving process • Signs of clinical death, Care of dying patient: special considerations • Advance directives: euthanasia, will, dying declaration, organ donation etc

				• Medico-legal issues • Care of dead body: equipment, procedure and care of unit, Autopsy, Embalming.
5.	6	-	9%	Professional nursing concepts and practices • Conceptual and theoretical models of nursing practice: Introduction to models-holistic model, health belief model, health promotion model etc • Introduction to theories in nursing: Peplau's, Henderson's, Orem's, Neuman's, Roger's and Roy's • Linking theories with nursing process
6.	10	1	15%	Communication and Nurse patient Relationship • Communication: Levels, Elements, Types, Modes, Process, factor influencing communication • Methods of effective communication: - Attending skills, Rapport building skills, Empathy skills • Barriers to effective communication • Helping Relationship, phases of a helping Relationship • Communicating effectively with patient, Families and team members and maintain effective human relations with special reference to communicating with vulnerable group (children, woman, physically and mentally challenged and elderly) • Patient teaching: importance, purpose, process, role of Nurse and integrating teaching in nursing process.

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Apply the nursing process at a beginning level of skill to interpret and manage human responses of the clients to their actual or potential health problems.
C02	Illustrate the concept, theories and models of nursing practice
C03	Demonstrate therapeutic communication and decision-making skills to involve the client in decision making regarding his/her healthcare.
C04	Examine scientific principles and critical behaviors of fundamental nursing care.
C05	Practice desirable attitude of ethics and professional standards of moral, ethical, and

	legal conduct.
C06	Develop critical thinking skills as a framework for clinical decision-making.

Course Articulation Matrix:

II. Course Outline

Module No.	Title/Topic	Classroom Contact Sessions
1	Communicative English • <i>Introduction to Communicative Grammar and Usage</i> • <i>Parts of Speech</i> • <i>Tenses and Moods</i> • <i>Reading Literature for English Language</i>	08
2	Functional English • <i>Introduction to Functional English</i> • <i>English for Personal and Social Use</i> • <i>English for Career and Professional Use</i>	08
3	Literature Text and Appreciation • <i>Introduction to Literature and Appreciation</i> • <i>Appreciation of Prose or Fiction</i> • <i>Appreciation of Poetry</i>	08
4	Language, Literature and Contemporary Issues • <i>Language, Culture and Society</i> • <i>Literature and contemporary issues</i>	06
Total		30

III. Pedagogy

Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like critical reading, group work, presentations, speech, Group Discussion, extempore, debate, elocution, etc. Out of 100 marks, 30 marks are for internal evaluation and 70 marks would be external evaluation.

IV. Evaluation

Internal Evaluation

The students' performance in the course will be evaluated (30 marks for practical) on a continuous basis through the following components:

Practical

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Project	02	05	10
2	Assignment	02	05	10
3	Quiz	01	05	05
	Attendance			05
Total				30

External Evaluation

University Practical Examination will be for 70 marks to be conducted at the end of the semester.

,
Practical

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva	01	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

C01	Have developed the ability to communicate effectively.
C02	Be able to communicate message accurately, handle intercultural situation that require thoughtful communication, to use appropriate words and tones and so on.
C03	Be able to understand and demonstrate communicative and functional use of English language.
C04	Be able to appreciate literature and understand socio-cultural context.

Course Articulation Matrix:

SEMESTER III

**FACULTY OF MEDICAL SCIENCES
MANIKAKA TOPAWALA INSTITUTE OF NURSING
NR207 COMMUNICATION & EDUCATIONAL TECHNOLOGY**

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	-	0	4	4
Marks	100	-	0	100	

I. Outline of the course:

Sr.no	Title of the unit	Prescribed Hours		Weightage in question paper (%)
		Theory	Lab./Pr.	
1.	Review of communication process	5	-	8
2.	Interpersonal relations	5	-	9
3.	Human relations	5	-	8
4.	Guidance and counselling	10	5	16
5.	Principles of education & teaching learning process	5	-	9
6.	Methods of teaching	10	10	18
7.	Educational media	10	8	16
8.	Assessment	5	7	8
9.	Information, education & communication for health(IEC)	5	-	8

Total hours (Theory) : 60 hours
Total hours (Lab./Pr.) : 30 hours
Total hours : 90 hours

I	Review of Communication Process	5	8
	Process; elements and channel Facilitator Barriers & methods of overcoming Techniques		
II	Interpersonal Relations	5	9
	Process; elements and channel Facilitator Barriers & methods of overcoming Techniques		
III	Human Relations	5	8
	Understanding self Social behavior, motivation, social attitudes Individual and groups Groups and individuals Human relations in context of nursing Group Dynamics Team work		
IV	Guidance and Counselling	15	16
	Definition Purpose, scope and need Basic principles Organization of counseling services Types of counseling approaches Role and preparation of counselor Issues for counseling in nursing: students and practitioners Counseling process- steps and techniques, tools of counselor Managing disciplinary problems Management of crisis and referral		
V	Principles of Education & Teaching Learning Process	5	9
	Education: meaning, philosophy, aims, functions and principles Nature and characteristics of learning Principles and maxims of teaching Formulating objectives; general and specific Lesson planning Classroom management		
VI	Methods of Teaching: Lecture, demonstration, group discussion, seminar, symposium, panel discussion, role play, Project, field trip, work shop, exhibition, programmed instruction, computer assisted learning, Micro teaching, problem based learning, self-instructional module and simulation etc. Clinical teaching methods: case method, nursing round & reports, bedside clinic, Conference (individual & group) process recording.	20	
VII	Educational Media:	18	
	Purposes & types of A.V.aids, principles and sources etc. Graphic aids: chalk board, chart, graph, poster, flash cards, flannel graph bulletin, cartoon		

	Three dimensional aids: objects, specimen, models, puppets Printed aids: pamphlets and leaflets Projected aids: slides, overhead projector, films, TV, VCR/VCD, camera, microscope, LCD Audio aids: tape recorder, public address system, Computer		
VIII	Assessment	12	
	Purpose & scope of evaluation and assessment Criteria for selection of assessment and techniques and methods Assessment of knowledge: essay type question, short answer questions (SAQ), multiple choice question (MCQ) Assessment of skills: observation checklist, practical exam, viva, objective structured clinical examination (OSCE) Assessment of attitudes: attitude scale		
IX	Information, Education & communication for health (IEC):	05	
	Purpose & scope of evaluation and Health behavior and health education Planning for health education Health education with individuals, groups & communities Communicating health message Methods & media for communicating health message Using mass media		

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe the concept of communication, use different types of communication in healthcare delivery.
C02	Describe the inter-personal relationship & apply the knowledge in dealing with the people in the hospital & in community area.
C03	Practice Guidance and counselling activities.
C04	Describe the philosophy & principles of education and explain the teaching learning process.
C05	Construct and use different types of educational audio-visual media.
C06	Create different types of questions for assessment of knowledge, skills, and attitudes.

Marks	100	--	--	100	

J. Outline of the course (Pharmacology):

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction to pharmacology	3
2.	Chemotherapy	6
3.	Pharmacology of commonly used antiseptics, disinfectants and insecticides	2
4.	Drugs acting on G.I. system	2
5.	Drugs used on Respiratory systems	2
6.	Drugs used on Urinary systems	2
7.	Miscellaneous	4
8.	Drugs used on skin and mucous membranes	1
9.	Drugs acting on Nervous system	8
10.	Cardiovascular drugs	5

11.	Drugs used for hormonal disorders and supplementation, contraception and medical termination of pregnancy	4
12.	Introduction to Drugs used in alternatives systems of medicine	6

Total hours (Theory): 45 Hrs.

Practical Hours: 00 Hrs.

Total hours: 45 Hrs.

Detailed syllabus:

1.	Introduction to pharmacology:	3	6%
	• Definitions • Sources • Terminology used • Types: Classification • Pharmacodynamics: Actions, therapeutic • Adverse, toxic • Pharmacokinetics: absorption, distribution, metabolism, interaction, excretion • Review: Routes and principles of administration of drugs • Indian pharmacopoeia: Legal issues • Rational use of drugs • Principles of therapeutics		
2.	Chemotherapy:	6	13%
	• Pharmacology of commonly used: - o Penicillin - o Cephalosporins - o Aminoglycosides - o Macrolide & Broad Spectrum Antibiotics - o Sulfonamides - o Quinolones - o Antiamoebic - o Antimalarials - o Anthelmintics - o Antiscabies agents - o Antiviral & anti – fungal agents. - o Anti-tubercular drugs - o Anti-leprosy drugs - o Anticancer drugs - o Immuno-suppressants - Composition, action, dosage, route, indications, contraindications, drug interactions, side		

	effects, adverse effects, toxicity and role of nurse		
3.	Pharmacology of commonly used antiseptics, disinfectants and insecticides:	2	4%
	• Antiseptics; Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse • Disinfectants • Insecticides		
4.	Drugs acting on G.I. system:	2	5%
	• Pharmacology of commonly usedo Antiemetics - o Emetics - o Purgatives - o Antacids - o Cholinergic - o Anticholinergics - o Fluid and electrolyte therapy - o Anti diarrhoeals - o Histamines - Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
5.	Drugs used on Respiratory systems:	2	5%
	• Pharmacology of commonly usedo Antiasthmatics - o Mucolytics - o Decongestants - o Expectorants - o Bronchodilators - o Broncho constrictors - o Antihistamines - Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
6.	Drugs used on Urinary systems:	2	4%
	• Pharmacology of commonly usedo Diuretics and antidiuretics - o Urinary antiseptics - o Cholinergic and anticholinergics - o Acidifiers and alkanalizers - Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
7.	Miscellaneous:	4	10%
	• Drugs used in de- addiction • Drugs used in CPR and emergency		

	• Vitamins and minerals • Immunosuppressant • Antidotes • Antivenom • Vaccines and sera		
8.	Drugs used on skin and mucous membranes:	1	2%
	• Topical applications for skin, eye, ear, nose and buccal cavity, Antipruritics Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
9.	Drugs acting on Nervous system:	8	20%
	• Basic & applied pharmacology of commonly used: • Analgesics and Anaesthetics - o Analgesics: ▪ Non-steroidal anti-inflammatory (NSAID) drugs - o Antipyretics - o Hypnotics and Sedatives: ▪ Opioids, ▪ Non- Opioids, ▪ Tranquilizers, ▪ General & local anesthetics, ▪ Gases: oxygen, nitrous, oxide, carbon- dioxide • Cholinergic and anti- cholinergic: - o Muscle relaxants - o Major tranquilizers - o Anti- psychotics - o Anticonvulsants - o Adrenergics - o Noradrenics - o Mood stabilizers - o Acetylcholine - o Stimulants Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
10.	Cardiovascular drugs:	5	12%
	• Haematinics • Cardiotonics • Anti anginals • Anti- hypertensive & Vasodilators • Anti- arrhythmics • Plasma expanders • Coagulants & anticoagulants • Antiplatelet & thrombolytic • Hypolipidemics		

	Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
11.	Drugs used for hormonal disorders and supplementation, contraception and medical termination of pregnancy:	4	10%
	• Insulin's & oral hypoglycemic • Thyroid supplements and suppressants • Steroids, Anabolic • Uterine stimulants and relaxants • Oral contraceptives • Other estrogen- progesterone preparations • Corticotrophin & Gonadotropins • Adrenaline • Prostaglandins • Calcitonins • Calcium salts • Calcium regulators Composition, action, dosage, route, indications, contraindications, drug interactions, side effects, adverse effects, toxicity and role of nurse		
12.	Introduction to Drugs used in alternatives systems of medicine:	6	9%
	• Ayurveda, Homeopathy, Unani and siddha etc		

Outline of the course (Pathology):

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction	3
2.	Special pathology	15
3.	Clinical pathology	7
4.	Examination of body cavity fluids, transudates and exudates	3
5.	Urine & faeces	2

Total hours (Theory): 20 Hrs.

Practical Hours: 10 Hrs.

Total hours: 30 Hrs.

Detailed syllabus:

1.	Introduction	3	10%
	- o Importance of the study of pathology - o Definition of terms - o Methods and techniques - o Cellular and Tissue change - o Infiltration and regeneration - o Inflammation and Infections - o Wound healing - o Vascular changes •? Cellular growth, Neoplasms - o Normal and Cancer cell - o Benign and Malignant growths - o In situ carcinoma •? Disturbances of fluid and electrolyte imbalance		
2.	Special pathology	15	50%
	•? Pathological changes in diseases conditions of various systems: •? Respiratory tract: - o Tuberculosis, Bronchitis, Pleural effusion and Pneumonia, - o Lung abscess, emphysema, bronchiectasis - o Bronchial asthma, chronic obstructive pulmonary disease & tumors •? Cardio- vascular system - o Pericardial effusion - o Rheumatic heart disease - o Infective endocarditis, atherosclerosis - o Ischemia, infarction & aneurysm •? Gastro Intestinal Tract - o Peptic ulcer, typhoid		

- o Carcinoma of GI tract- buccal, Esophageal, - o Gastric & intestinal •☐Liver, Gall bladder & Pancreas - o Hepatitis, Chronic liver abscess, cirrhosis - o Tumors of liver, gall bladder and pancreas, - o Cholecystitis •☐Kidneys & Urinary tract - o Glomerulonephritis, pyelonephritis - o Calculi, renal failure, renal carcinoma & cystitis •☐Male genital systems - o Cryptorchidism, testicular atrophy - o Prostatic hyperplasia, carcinoma penis & prostate •☐Female genital system - o Fibroids - o Carcinoma cervix and Endometrium - o Vesicular mole, choriocarcinoma - o Ectopic gestation - o Ovarian cyst & tumors •☐Cancer Breast •☐Central Nervous system - o Hydrocephalus, Meningitis, encephalitis - o Vascular disorders- thrombosis, embolism - o Stroke, paraplegia, quadriplegia - o Tumors, meningiomas-gliomas •☐Metastatic tumor •☐Skeletal system - o Bone healing, osteoporosis,		
--	--	--

	osteomyelitis • Arthritis & tumors		
3.	Clinical pathology	7	24%
	• Various blood and bone marrow tests in assessment and monitoring of disease conditions - o Hemoglobin - o RBC, White cell & platelet counts - o Bleeding time, clotting time and prothrombine time - o Blood grouping and cross matching - o Blood chemistry - o Blood culture - o Serological and immunological tests - o Other blood tests - o Examination of Bone marrow - o Methods of collection of blood specimen for various clinical pathology, biochemistry, microbiology tests, inference and normal values		
4.	Examination of body cavity fluids, transudates and exudates	3	10%
	• The laboratories tests used in CSF analysis • Examination of other body cavity fluids, transudates and exudates- sputum, wound discharge etc. • Analysis of gastric and duodenal contents • Analysis of semen sperm count, motility and morphology and their importance in		

	infertility • Methods of collection of CSF and other cavity fluids specimen for various clinical pathology, biochemistry, microbiology tests, inference and normal values		
5.	Urine & faeces	2	6%
	• Urine - o Physical characteristics - o Analysis - o Culture and sensitivity • Faeces - o Characteristics - o Stool examination: occult blood, ova, parasite and cyst, reducing substance etc, • Methods of collection for various tests. Inference and normal values.		

Outline of the course (Genetics):

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction	3
2.	Maternal, prenatal and genetic influences on development of defects and diseases	3
3.	Genetic testing in the neonates and children	2
4.	Genetics conditions of adolescents and adults	2
5.	Services related to Genetics	5

Total hours (Theory): 15 Hrs.

Practical Hours: 00 Hrs.

Total hours: 15 Hrs.

Detailed syllabus

1.	Introduction	3	20%
	• Practical application of genetics in Nursing • Impact of genetics conditions on families • Review of cellular division mitosis and meiosis • Characteristics and structure of genes • Chromosomes – sex determination • Chromosomal aberrations patterns of inheritance: - o Mendalian theory of inheritance - o Multiple allots and blood groups - o Sex linked inheritance - o Mechanism of inheritance - o Errors in transmission(Mutation)		
2.	Maternal, prenatal and genetic influences on development of defects and diseases:	3	20%
	• Condition affecting the mother genetic and infections • Consanguinity atopy • Prenatal nutrition and food allergies • Maternal Age • Maternal drug therapy • Prenatal testing and diagnosis • Effect of Radiation, drugs and chemicals • Infertility • Spontaneous abortion • Neural Tube Defects and the role of folic acid in lowering the risks • Down syndrome(Trisomy 21)		
3.	Genetic testing in the neonates and	2	14%

	children		
	☐ Screening for - o Congenital abnormalities - o Developmental delay - o Dysmorphism		
4.	Genetics conditions of adolescents and adults	2	14%
	•☐Cancer genetics – Familial Cancer •☐Inborn errors of metabolism •☐Blood group alleles and haematological disorder •☐Genetic haemochromatosis •☐Huntington"s disease •☐Mental illness		
5.	Services related to Genetics	5	32%
	•☐Genetic testing •☐Human genome project •☐Gene therapy •☐The Eugenics movement •☐Genetic Counseling Legal and Ethical issues Role of nurse		

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe basic pharmacological principles
C02	Explain various bactericidal solution and their action
C03	Illustrate the use of different drugs and their action & nursing responsibilities
C04	Illustrate pathological changes in disease conditions of various systems
C05	Assist in various procedures and laboratory test
C06	Explain basic concept, nature, and principles of genetics

Course Articulation Matrix:

Marks	100	100	0	200	

K. Outline of the course:

Sr.no	Title of the unit	Prescribed Hours	Weightage in question paper (%)
1.	Introduction	15	10
2.	Common signs and symptoms and management	15	11
3.	Nursing management of patients(adults including elderly)with respiratory problems	20	14
4.	Nursing management of patients(adults including elderly)with digestive problems	30	20
5.	Nursing management of patients(adults including elderly)with blood and cardio vascular problems	30	20
6.	Nursing management of patients (adults including elderly) with disorders of endocrine system	10	7
7.	Nursing management of disorders of male (adults including elderly) disorders of integumentary system	10	7
8.	Nursing management of patients (adults including elderly) with musculoskeletal problems	15	11

Total hours (Theory) : 145 hours
Total hours (Practical) : 460 hours
Total hours : 605 hours

Detailed Syllabus:

1.	Introduction	15 Hours	10%
	• Introduction to medical surgical nursing Evolution and trends of medical and surgical nursing. • Review of concepts of Health and illness Disease-concepts, causations, classification-International Classification of Diseases (ICD-10 or later version) Acute illness Chronic illness & Terminal illness, stages of illness. • Review of concepts of comprehensive nursing care in medical surgical conditions based on nursing process • Role of Nurse, patient and family in care of adult patient • Role and responsibilities of a nurse in medical surgical settings		
2.	Common signs and symptoms and management	15 Hours	11%
	• Fluid and electrolyte imbalance • Vomiting • Dyspnea and cough. Respiratory obstruction • Fever • Shock • Unconsciousness, Syncope • Pain • Incontinence • Edema • Age related problems-geriatric		
3.	Nursing management of patients(adults including elderly)with respiratory problems	20 Hours	14%
	Review of anatomy and physiology of respiratory system • Nursing Assessment- History and physical assessment • Etiology, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of adults including elderly with Upper respiratory tract infection o Bronchitis o Asthma o Emphysema o Empyema o Atelectasis o Chronic Obstructive pulmonary Disease (COPD) o Bronchiectasis o Pneumonia o		

	Pulmonary tuberculosis o Lung abscess o Pleural effusion o Cysts and Tumors o Chest injuries o Respiratory arrest and insufficiency o Pulmonary embolism • Special therapies, alternative therapies • Nursing procedures • Drugs used in treatment of respiratory disorders		
4.	Nursing management of patients(adults including elderly)with digestive problems	30 Hours	20%
	Review of anatomy and physiology of digestive system • Nursing Assessment – History and Physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of adults including elderly with disorders of: o Oral cavity- lips, gums, tongue, salivary glands and teeth o Oesophagus- inflammation, stricture, obstruction, bleeding and tumors o Stomach and duodenum- hiatus hernia, gastritis, peptic and duodenal ulcer, bleeding, tumors, pyloric stenosis o Small intestinal disorders- inflammation and infection, enteritis, malabsorption, obstruction, tumor and perforation o Large intestinal disorders- Colitis, inflammation and infection, obstruction, tumor and lump o Hernias o Appendix- inflammation, mass, abscess, rupture o Anal & Rectum: hemorrhoids, fissures, fistulas o Peritonitis/acute abdomen o Pancreas- inflammation, cyst, abscess and tumors o Liver- cysts, inflammation, abscess, cirrhosis, portal hypertension, hepatic failure, tumors o Gall Bladder- inflammation, obstruction, stones and tumors • Special therapies, alternative therapies • Nursing procedures • Drugs used in treatment of disorders of digestive system		
5.	Nursing management of patients(adults including elderly)with blood and cardio vascular problems	30 Hours	20%

	Review of anatomy and physiology of blood and cardio vascular system • Nursing Assessment – History and physical assessment • Etiology, pathophysiology, clinical manifestation, diagnosis, treatment modalities and medical, surgical, dietetics & nursing management of- • Vascular system - o Hypertension, Hypotension - o Artherosclerosis - o Reynard"s disease - o Aneurism and peripheral vascular disorders HEART • Coronary artery diseases - o Ischemic Heart disease - o Coronary atherosclerosis - o Angina pectoris - o Myocardial infarction • Valvular disorders of the heart - o Congenital Heart acquired - o Rheumatic Heart disease • Endocarditic, Pericarditis, Myocarditis • Cardio Myopathies • Cardiac dysrhythmias, Heart Block • Congestive cardiac failure - o Cor-pulmonale, pulmonary edema, cardiogenic shock, cardiac tamponade • Cardiac emergencies and arrest • Cardio pulmonary Resuscitation • Blood - o Anaemias - o Polycythemia - o Bleeding disorders: clotting factor defects and platelets defects - o Thalassemia - o Leukemia - o Leucopenia and agranulocytosis - o Lymphomas - o Myelomas • Special therapies - o Blood transfusion, safety checks, procedures and requirements, management of adverse transfusion reaction, records for blood transfusion - o Management and counseling of blood donors, phlebotomy procedure, and post donation management. Blood bank function and hospital transfusion committee. Bio- safety and waste management in relation to blood transfusion - o Role of a nurse in organ donation, retrieval and banking • Alternative therapies • Nursing procedures • Drugs used in treatment of blood and cardio vascular disorders		

6.	Nursing management of patients (adults including elderly) with disorders of endocrine system	10 Hours	7%
	Review of anatomy and physiology of endocrine system • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of o Disorders of thyroid and parathyroid o Diabetes mellitus o Adrenal tumor o Pituitary disorders • Special therapies, alternate therapies • Nursing procedures • Drugs used in treatment of disorders of endocrine system		
7.	Nursing management of disorders of male(adults including elderly) disorders of integumentary system	10 Hours	7%
	Review of anatomy and physiology of skin and its appendages • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of disorders of skin and its appendages o Lesion and abrasions o Infection and infestations; dermatitis o Dermatoses; infectious and non-infectious “inflammatory dermatomes” o Acne vulgaris o allergies and eczema o Psoriasis o Malignant melanoma o Alopecia • Special therapies, alternate therapies • Nursing procedures • Drugs used in treatment of disorders of integumentary system		
8.	Nursing management of patients (adults including elderly) with musculoskeletal	15 Hours	11%
	Review of anatomy and physiology of musculoskeletal system • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of Disorders of o Muscles, ligaments and		

	joints- inflammation, infection, Trauma o Bones- inflammation, infection, dislocation, fracture, tumors and trauma o Osteomalacia and osteoporosis o Arthritis o Congenital deformities o Spinal column-defects and deformities, tumors, prolapsed Inter vertebral disc, pott"s spine o Paget"s disease • Amputation • Prosthesis • Transplant and replacement surgeries • Rehabilitation • Special therapies, alternate therapies • Nursing procedures • Drugs used in treatment of disorders of musculoskeletal system		
--	---	--	--

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Identify the Medical surgical nursing Evolution and trends in present and future and able incorporate with development.
C02	Identify the common sign & symptoms of various disorder.
C03	Evaluate critical condition of patient and plan & implementing effective nursing care to the client as per need.
C04	Practice nursing care to adult patients with medical & surgical disorders.
C05	Demonstrate the skills of counselling.
C06	Identify the medical and surgical ailment and able to provide effective care.

Course Articulation Matrix:

FACULTY OF MANAGEMENT STUDIES DEPARTMENT OF
HUMANITIES AND SOCIAL SCIENCES

HS 128.01 G: ACADEMIC WRITING

I. Credits and Schemes:

Sem	Course Code	Course Name	Credits	Teaching Scheme	Evaluation Scheme				
				Contact Hours/Week	Theory		Practical		Total
					Internal	External	Internal	External	
II I	HS128 G	Academic Writing	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Basics of Academic Writing • <i>Meaning and Definition of Academic Writing</i> • <i>The Purpose of Academic Writing</i> • <i>The Features of Academic Writing</i>	04
2	Elements of Academic Writing 1 • <i>Avoiding Plagiarism</i> • <i>Finding Key -points and Note-making</i> • <i>Organizing paragraphs</i>	10
3	Elements of Academic Writing 2 • <i>Paraphrasing</i> • <i>Summarizing</i> • <i>Abstract writing</i>	10
4	Cover Letter & Resume Building • <i>Concept of Cover Letter & Resume Building</i> • <i>Types of Cover Letter & Resume</i> • <i>Process and Methods of Writing Cover Letter & Resume</i>	06
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, critical reading, group work, independent and collaborative research, presentations etc.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Journal / Practical Performance	-	25	25
4	Attendance and Class Participation			05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the professional communication skills and academic writing.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical	-	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	Will have sound understanding of the concept and applications of academic writing
CO2	Will have acquired enough knowledge of academic writing style, strategy and approach
CO3	Will be able to demonstrate error free and effective academic writing
CO4	Will be able to demonstrate ability to work on project/report/paper writing

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9
CO1	-	-	-	-	2	-	-	-	-
CO2	-	-	-	-	2	-	-	-	-
CO3	-	-	-	-	2	-	2	-	-
CO4	1	-	-	-	3	-	2	-	-

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

Manikaka Topawala Institute of Nursing
University Level Elective for
Undergraduate students: NR251.01-
First Aid & Life-support (FALS)

I. Credits & Scheme:

Semester	Course Code	Course Name	Credits	Teaching Scheme	Evaluation Scheme				
				Contact Hours/Week	Theory		Practical		Total
					Internal	External	Internal	External	
III	NR251	First Aid & Life Support (FALS)	02	02	-	-	30	70	100

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction and Basics of First Aid:	2
2	Medical emergencies and their first aid:	12
3	Injury emergencies and their first aid:	8
4	Environmental emergencies and first aid:	7
5	Preparation of First Aid Kit	1

Practical Hours: 30 Hrs.

Detailed Syllabus:

Unit No.	Title of Unit	Prescribed Hours	
I.	Introduction and Basics of First Aid: • Rescuer Duties, Victim and Rescuer Safety • Looking for Help • After the emergency	2	10%
II.	Medical emergencies and their first aid: • Breathing Problems • Choking in an Adult • Allergic Reactions • Heart Attack • Fainting • Diabetes and Low Blood Sugar • Stroke	12	50%
	• Shock - Abdominal maneuver, CPR, ventilation etc.		
III.	Injury emergencies and their first aid: • Bleeding: You Can See/You Can't See • Wounds • Burns and Electrical Injuries • Fractures - Bandaging, immobilization, transferring etc.	8	20%
IV.	Environmental Emergencies and first aid: • Bites and Stings • Poison Emergencies • Heat-Related Emergencies • Cold-Related Emergencies	7	15%
V.	Preparation of First Aid Kit	1	5%
Total		30 Hours	

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Demonstrate basic first aid skills needed to control bleeding and immobilize injuries.
CO2	Demonstrate the skill needed to assess the ill or injured person.
CO3	Demonstrate skills to assess and manage foreign body airway obstruction in infants, children and adults.
CO4	Demonstrate skills to provide one- and two- person cardiopulmonary resuscitation to infants, children and adults

Course Articulation Matrix:

SEMESTER IV

FACULTY OF MEDICAL SCIENCES
Manikaka Topawala Institute of Nursing
NR206.01: Medical Surgical Nursing-II

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	16	--	20	Theory- 4 Practical- 8 =12
Marks	100	200	--	300	

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Nursing management of patients (adults including elderly) with genito-urinary problems	10
2	Nursing management of disorders of male (adults including elderly) reproductive system	5
3	Nursing management of patients (adults including elderly) with immunological problems	10
4	Nursing management of patients (adults	20
5	Peri-operative nursing	25

Total hours (Theory): 70 Hrs.

Practical Hours: 260 Hrs.

Total hours: 330 Hrs.

B. Detailed Syllabus:

1.	Nursing management of patients (adults including elderly) with genito- urinary problems	10	14%
	• Review of anatomy and physiology of genitor-urinary system • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of: - o Nephritis - o Nephritic syndrome - o Nephrosis - o Renal calculus - o Tumours - o Acute renal failure - o Chronic renal failure - o End stage renal Disease - o Dialysis - o Renal transplant - o Congenital disorders, urinary Infections - o Benign prostatic hypertrophy - o Disorders of ureter, urinary bladder and urethral inflammation, infection, stricture, obstruction, tumors, Prostate • Special therapies, alternative therapies • Nursing procedures • Drugs used in treatment of genitor-urinary disorders		
2.	Nursing management of disorders of male (adults including elderly) reproductive system:	5	8%
	• Review of anatomy and physiology of male reproductive system • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of disorders of male reproductive system: - o Congenital malformations; cryptorchidism - o Hypospadiasis, epispadiasis - o Infections - o Testis and adjacent structure - o Penis - o Prostate: inflammation, infection, Hypertrophy, tumour		

	- o Sexual dysfunction - o Infertility - o Contraception - o Breast: gynecomastia, tumours - o Climacteric changes • Special therapies, alternative therapies • Nursing procedures • Drugs used in treatment of disorders of male reproductive system		
3.	Nursing management of patients (adults including elderly) with immunological problems:	10	14%
	• Review of anatomy and physiology of skin and its appendages • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical, surgical, dietetics and nursing management of: - o Immunodeficiency disorders - o Primary immuno deficiency - o Phagocytic dysfunction - o B-cell and T-cell deficiencies - o Secondary immunodeficiency - o Acquired immunodeficiency syndrome (AIDS) - o Incidence of HIV/AIDS - o Epidemiology - o Transmission- prevention of transmission - o Standard safety precaution - o Role of nurse; counselling - o Health education and home care Consideration - o National AIDS control programme (NACO), various national and International agencies - o Infection control programme - o Rehabilitation • Special therapies, alternate therapies • Nursing procedures • Drugs used in treatment of disorders of immunological system		
4.	Nursing management of patients (adults including elderly) with communicable diseases:	20	28%
	• Overview of infectious disease, the infectious process • Nursing assessment- history and physical assessment • Etiology, pathophysiology, clinical manifestations, diagnosis,		

	treatment modalities and medical, surgical, dietetics. Control and eradication of Common communicable disease: - o Tuberculosis - o Diarrheal disease - o Hepatitis A-E - o Herpes - o Chickenpox - o Smallpox - o Typhoid - o Meningitis - o Gas gangrene - o Leprosy - o Dengue - o Plague - o Malaria - o Diphtheria - o Peruses - o Poliomyelitis - o Measles - o Influenza - o Tetanus - o Yellow fever - o Filariasis - o HIV/AIDS • Reproductive tract infections • Special infectious control measures: Notification, isolation, quarantine, immunization, infectious disease Hospitals • Special therapies, alternate therapies • Nursing procedures • Drugs used in treatment of communicable diseases		
5.	Peri-operative nursing:	25	36%
	• Organization and physical set of the operation theatre (OT): - o Classification - o O.T.DESIGN - o Staffing - o Members of the OT team - o Duties and responsibilities of nurse in OT - o Principles of health and Operating room attire - o Instruments - o Sutures and suture materials - o Equipment"s - o O.T.tables and sets for common surgical procedures		

	- o Scrubbing procedures - o Gowning and gloving - o Preparation of OT Sets - o Monitoring the patient during surgical procedures • Maintenance of therapeutic environment in OT • Standard safety measures - o Infection control ; fumigation, disinfection, and sterilization - o Biomedical waste management - o Prevention of accidents and hazards in OT. • Anaesthesia - o Types - o Methods of administration - o Effects and stages - o Equipment"s - o Drugs • Cardio pulmonary resuscitation (CPR) • Pain management techniques • Legal aspects		
--	--	--	--

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Explain anatomy and physiology of different organ system
C02	Describe the alternative therapies, treatment & management of various disorders
C03	Discuss the overview of communicable diseases, transmission and process of immunization
C04	Illustrate the setup, staffing pattern, environment, and safety measures in various units

Course Articulation Matrix:

Hours/week	4 hrs./week	0	0	4	Theory-04
Marks	100	0	0		

A. Outline of the Course:

Sr. No.	Title of the unit	Prescribed hours (theory)
1	Introduction	01
2	Individual and society	03
3	Culture	03
4	Social groups and processes	04
5	Population	06
6	Family and marriage	05
7	Social stratification	07
8	Types Of Communities In India (rural, urban & regional)	06
9	Social change	04
10	Social organization and social system	04
11	Social control	02
12	Social problems	15

Total hours: 60

B. Detailed Syllabus:

	Introduction • Definition of sociology • Nature and scope of discipline • Importance and application of sociology in nursing	1hour	02%
	Individual and society • Society and community • Nature of society • Difference between society and community • Process of socialization and individualization • Personal disorganization	3 hours	05%
	Culture • Nature of culture • Evolution of culture • Diversity and uniformity of culture • Culture and socialization • Trans cultural society • influence on health and disease	3 hours	05%
	Social groups and processes • The meaning and classification of groups • Primary and secondary group • In-group V/s out group, class tribe caste • Economic, political, religious groups, mob, crowd, public and audience • interaction & • Social processes • Co-operation, competition, conflict • Accommodation, assimilation & isolation	4 hours	07%
	Population • Society and population • Population distribution in India- demographic characteristics • Malthusian theory of populations • Population explosion in India and its impact on health status • Family welfare programme	6 hours	10%
	Family and marriage • family- function • Types : joint, nuclear, blended and extended family • Characteristics • The modern family : changes, problems-dowry ,etc. welfare services • Changes and legislations of family and marriage in India- marriage acts • Marriage : forms and functions of marriage, • Marriage and family problems in India • Family, marriage and their influence on health and health practices	5 hours	08%

	Social stratification • Meaning and types of social stratification • The Indian caste system- origin and features • Features of caste in India today • Social class system and status • Social mobility- meaning & types • Race as a biological concepts, criteria of racial classification • Salient features of primary races- Racism • Influence of class, caste and race on health and health practices	7 hours	12%
	Types Of Communities In India (rural, urban & regional) • Features of village community & characteristics of Indian villages- panchayat system, • Social dynamics • Community development project and planning • Changes in Indian rural life • Availability of health facilities in rural and its impact on health and health practices • Urban- community-features • The growth of cities: urbanization and its impact on health and health practices • Major urban problems- urban slums • Region: problems and impact on health	6 hours	10%
	Social change • Nature and process of social change • Factors influencing social change : cultural change, cultural lag • Introduction to theories of social change: linear, cyclical, Marxian, functional • Role of nurse – change agents	4 hours	07%
	Social organization and social system • Social organization: elements, types, • Democratic and authoritarian modes of participation • Voluntary association • Social system : definition and types of social system • Role and status as structural elements of social system • Inter-relationship of institution	4 hours	07%
	Social control • Nature and process of social control • Political, legal, religious, educational, economic, industrial and technological system, norms and values-folkways & mores customs, laws and fashion • Role of nurse	2hours	03%
	Social problems • Social disorganization • Control and planning: poverty, housing, illiteracy, food supplies, prostitution, rights of Women and children, vulnerable groups: elderly, handicapped, minority groups	15hours	24%

	and other marginalized groups, child labour, child abuse, delinquency and crime, substance abuse, HIV/AIDS		
	• Social welfare programme in India • Role of nurse		

C. Course outcome

At the end of the courses learner should be able:

C01	Recite the meaning of sociology.
C02	Paraphrase the social groups and process.
C03	Express the cultural differences.
C04	Recognize the social stratification as well as social problems
C05	Predict the various communities and social system of India.

Total hours (Theory): 90 Hrs.

Practical Hours: 135 Hrs.

Total hours: 225 Hrs.

M. Detailed Syllabus:

1.	Introduction	02 Hours	2%
	Introduction: • Community health nursing, • Definition, concept and dimensions of health, • Promotion of health Maintenance of health		
2.	Determinants of health:	20 Hours	22%
	• Eugenics • Environment: • Physical: Air, light, Ventilation, Water, Housing, Sanitation; disposal of waste, disposal of dead bodies, Forestation, Noise, Climate, Communication; infrastructure facilities and Linkages • Acts regulating the environment: National pollution control board • Bacterial & viral: Agents, host carriers and immunity • Arthropods and Rodents • Food hygiene: Production, Preservation, purchase, Preparation, Consumption • Acts regulating food hygiene act, Drugs and cosmetic act • Socio – cultural: Customs, taboos • Marriage system • Family structure • Status of special groups: Females, Children, Elderly, challenged groups and sick persons • Life style • Hygiene • Physical activity ✓ Recreation and sleep ✓ Sexual life ✓ Spiritual life philosophy ✓ Self-reliance ✓ Dietary pattern ✓ Education ✓ Occupation • Financial Management ✓ Income ✓ Budget ✓ Purchasing power ✓ Security		

3.	Epidemiology:	10 Hours	10%
	• Definition, concept, aims, scope, uses and terminology used in epidemiology • Dynamics of disease transmission: epidemiological triad • Morbidity and mortality: measurements • Levels of prevention • Methods of epidemiology of: ✓ Descriptive ✓ Analytical: Epidemic investigation ✓ Experimental		
4.	Epidemiology and nursing management of common Communicable diseases:	25 Hours	26%
	• Respiratory infections: Small pox, Chicken pox, Measles, Influenza, Rubella, ARI"s & Pneumonia, Mumps, Diphtheria, Whooping cough, Meningococcal meningitis, Tuberculosis, SARS • Intestinal infections: Poliomyelitis, Viral Hepatitis, Cholera, Diarrhoeal diseases, Typhoid Fever, Food poisoning, Amoebiasis, Hook worm infection, Ascariasis, Dracunculiasis • Arthropod infection: Dengue, Malaria, Filariasis • Zoo noses • Viral: Rabies, Yellow fever, Japanese encephalitis, Kyasnur Forest Disease • Bacterial: Brucellosis, Plague, Human Salmonellosis, Anthrax, Leptospieosis • Rickettsial diseases: Rickettsial Zoonoses, Scrub typhus, Murine typhus, Tick typhus Q fever • Parasitic zoonoses: Taeniasis, Hydatid disease, Leishmaniasis • Surface infection: Trachoma, Tetanus, Leprosy, STD & RTI, Yaws, HIV/AIDS Any other		

5.	Epidemiology and nursing management of Non Communicable diseases:	10 Hours	12%
	Malnutrition: under nutrition, over nutrition, nutritional deficiencies Anemia, Hypertension, Stroke, Rheumatic Heart Disease, Coronary Heart Disease, Cancer, Diabetes mellitus, Blindness, Accidents, Mental illness, Obesity, Iodine Deficiency, Fluorosis, Epilepsy		
6.	Demography	06 Hours	8%
	• Definition, concept and scope • Methods of collection, analysis and interpretation of demographic data • Demographic rates and ratios		
7.	Population and its control:	17 Hours	20%
	• Population explosion and its impact on social, economic development of individual, society and country • Population control: ○ Overall development; Women empowerment, social, economic and educational development • Limiting family size: ○ Promotion of small family norm ○ Methods: spacing (natural, biological, chemical, mechanical methods etc) ○ Terminal: surgical methods ○ Emergency contraception		

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Apply community health nursing process for rendering individual and family health care services.
C02	Describe dimensions and determinants of health.
C03	Demonstrate epidemiological approaches to provide preventive and promotive health care services.
C04	Demonstrate the role of community health nurse in prevention of Communicable and non-communicable diseases.
C05	Apply demographic data in health planning.
C06	Describe impact of population explosion and apply various initiatives of population control.

IV	HS133 A/B/C/D/E/F/G/H	Creativity, Problem Solving and Innovation	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Introduction to Creativity, Problem Solving and Innovation · Definitions of Creativity and Innovation · Need for Problem Solving and Innovation · Scope of Creativity in various Domains · Types and Styles of Thinking · Strategies to develop Creativity, Problem Solving and Innovation skills	06
2	Questioning, Learning and Visualization · Strategy and Methods of Questioning · Asking the Right Questions · Strategy of Learning and its Importance · Sources and Methods of Learning · Purpose and Value of Creativity Education in real life · Visualization strategies - Making thoughts Visible · Mind Mapping and Visualizing Thinking	06

3	Creative Thinking and Problem Solving · Creative Thinking and its need · Strategy of Thinking Fluency · Generating all Possibilities · SCAMPER Technique · Divergent Vs Convergent Thinking · Lateral Vs Vertical Thinking · Fusion of Ideas for Problem Solving · Applying strategies for Problem Solving	06
4	Logic, Language and Reasoning · <i>Basic Concepts of Logic</i> · <i>Statement Vs Sentence</i> · <i>Premises Vs Conclusion</i> · <i>Concept of an Argument</i> · <i>Functions of Language: Informative, Expressive and Directive</i> · <i>Inductive Vs Deductive Reasoning</i> · <i>Critical Thinking & Creativity</i> · <i>Moral Reasoning</i>	06
5	Contemporary Issues and Practices in Creativity and Problem Solving · <i>Cognitive Research Trust Thinking for Creatively Solving Problems</i> · <i>Case Study on Contemporary Issues and Practices in Creativity and Problem Solving</i>	06
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by Slides Presentations, Reading Material, Discussions, Case Studies, Puzzles, Ted Talks, Videos, Task-Based Learning, Projects, Assignments and various Individual and Interpersonal activities like, Critical reading, Group work, Independent and Collaborative Research, Presentations, etc.

IV. Evaluation:

There will be no end semester university examinations. Students will be evaluated continuously in the form of internal as well as external evaluation. The evaluation is schemed as 30 marks for internal evaluation and 70 marks for external evaluation. The concerned teacher shall evaluate students distribute the marks (out of 30 as Internal and out of 70 as External) and submit them.

Evaluation Scheme

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Attendance	100 %	--	20
2	Individual Activity Participation	As stipulated by the Resource Person(s) in the Training		20
3	Group Activity Participation			20
4	Presentation			30
5	Feedback on Improvement			10
			Total	100

Course Outcome (COs):

After completion of the course, the student would :

CO1	Demonstrate creativity in their day to day activities and academic output
CO2	Solve personal, social and professional problems with a positive and an objective mindset
CO3	Think creatively and work towards problem solving in a strategic way
CO4	Initiate new and innovative practices in their chosen field of profession

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9
CO1	3	-	-	-	-	-	-	3	-
CO2	-	2	-	-	-	-	-	3	-
CO3	-	-	-	-	-	-	-	3	-
CO4	-	-	3	-	-	-	-	3	2

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

Total hours: 410 Hrs.

O. Detailed Syllabus:

Unit No.	Prescribed Hours		Unit Content
	Theory	%	
1.	15	11%	• Review of anatomy and physiology of the Ear, Nose and Throat • Nursing assessment- History and physical assessment • Etiology, Pathophysiology, Clinical manifestation, Diagnosis, Treatment modalities and medical and surgical nursing management of Ear, Nose and Throat disorders: ➤ External ear: deformities otalgia, foreign bodies and tumors ➤ Middle ear: impacted wax, Tympanic membrane perforation, otitis media, otosclerosis, mastoiditis, tumors ➤ Inner ear: meniere's disease, labyrinthitis, ototoxicity, tumors ➤ Upper airway infection- common cold, sinusitis, ethinitis, rhinitis, pharyngitis, tonsillitis and adenoiditis, peritonsillar abscess, laryngitis • Upper respiratory airway- epistaxis • Nasal obstruction, laryngeal obstruction, cancer of the larynx. • Cancer of oral cavity • Speech defects and speech therapy • Deafness • Prevention, control and rehabilitation • Hearing aids, implanted hearing devices • Special therapies Nursing procedures Drugs used in treatment of disorders of Ear, Nose and Throat Role of Nurse communicating with hearing impaired and muteness.

2.	15	11%	• Review of anatomy and physiology of the eye • Nursing assessment- History and physical assessment • Etiology, Pathophysiology, Clinical manifestation, Diagnosis, Treatment modalities and medical and surgical nursing management of eye disorders: ➤ Refractive errors ➤ Eyelids- infection, tumors and deformities ➤ Conjunctiva- inflammation and infection, bleeding ➤ Cornea- inflammation and infection ➤ Lens-cataracts, Glaucoma, Disorder of the uveal tract, Ocular tumors, Disorder of posterior chamber and retina: retinal and vitreous problems, Retinal detachment, Ocular emergencies and their prevention, Blindness • National blindness control program ➤ Eye banking ➤ Eye prostheses and rehabilitation Role of nurse – communication with visually impaired patient, eye campus Special therapies Nursing procedures Drugs used in treatment of disorders of eye.
3.	20	14%	• Review of anatomy and physiology of the neurological system • Nursing assessment- history and physical and neurological assessment and Glasgow coma scale • Etiology, Pathophysiology, Clinical manifestation, Diagnosis, Treatment modalities and medical and surgical nursing management of neurological disorders. • Congenital malformation • Headache, Head injuries • Spinal injuries ➤ Paraplegia ➤ Hemiplegia

			➤ Quadriplegia • Spinal cord compression- herniation of intervertebral disk • Tumors of the brain and spinal cord, Intra cranial and cerebral aneurysms • Infections: ➤ Meningitis, encephalitis, Brain abscess, neurocysticercosis • Movement disorder: ➤ Chorea ➤ Seizures ➤ Epilepsies • Cerebro Vascular Accidents (CVA) • Cranial, spinal neuropathies- Bell's palsy, trigeminal neuralgia • Peripheral neuropathies, Guillain Barr'e Syndrome • Myasthenia gravis • Multiple sclerosis • Degenerative disease: ➤ Delirium ➤ Dementia ➤ Alzheimer's disease ➤ Parkinson's disease • Management of unconscious patients and patients with stroke • Role of the nurse in communicating with patient having neurological deficit • Rehabilitation of patient with neurological deficit Role of nurse in long stay facility (institutions) and at home Special therapies Nursing procedures Drugs used in treatment of neurological disorders
4.	16	12%	• Review of anatomy and physiology of the female reproductive system

			• Nursing assessment- History and Physical assessment • Breast self-examination • Etiology, Pathophysiology, Clinical manifestation, Diagnosis, Treatment modalities and medical and surgical nursing management of disorders of Female reproductive system • Congenital abnormalities of female reproductive system • Sexuality and reproductive Health • Sexual health assessment • Menstrual disorders: Dysmenorrhea, Amenorrhea, Premenstrual syndrome • Abnormal uterine bleeding: Menorrhagia, Metrorrhagia • Pelvic inflammatory disease • Ovarian and fallopian tube disorders: infections, cysts and tumors • Uterine and cervical disorders: endometriosis, polyps, Fibroids, cervical and uterine tumors, uterine displacement, cystocele/urethrocele/rectocele • Vaginal disorders: infections and discharges, Fistulas • Vulvar disorders: infections, cysts and tumors • Disease of breast: deformities, infections, cyst and tumor • Menopause and Hormonal replacement therapy • Infertility • Contraception: type, methods, risk and effectiveness ➤ Spacing methods- Barrier methods, Intrauterine devices, Hormonal, post conceptional methods etc. ➤ Terminal methods- sterilization • Emergency contraceptive method • Abortion- Natural, Medical and surgical abortion-MTP act • Toxic shock syndrome • Injuries and Trauma; sexual Violence
--	--	--	--

			Special therapies Nursing procedures Drugs used in treatment of gynecological disorders National family welfare programme
5.	10	7%	• Review of anatomy and physiology of the skin and connective tissues and various deformities • Nursing assessment- History and physical assessment and assessment of Burn and fluid and electrolyte loss • Etiology, Classification, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of Burns and Re-constructive and cosmetic surgery • Types of Re-constructive and cosmetic surgery; for Burn, congenital deformities, injuries and cosmetic purposes • Role of Nurse • Legal aspects • Rehabilitation • Special therapies ➤ Psychosocial aspects Nursing procedures Drugs used in treatment of Burns, reconstructive and cosmetic surgery
6.	10	7%	• Structure & characteristics of normal and cancer cells • Nursing assessment- History and physical assessment • Prevention, screening, early detection, warning sign of cancer • Epidemiology, Etiology, Classification, Pathophysiology, Staging, Clinical manifestation, Diagnosis, Treatment modalities and medical & surgical Nursing management of oncological conditions • Common malignancies of various body systems; oral, larynx, lung, stomach and colon, liver, leukemia and lymphomas, Breast, cervix, ovary, uterus, sarcoma,

			Brain, renal, bladder, prostate etc. • Oncological emergencies • Modalities of treatment: ➤ Immunotherapy ➤ Chemotherapy ➤ Radiotherapy ➤ Surgical interventions ➤ Stem cell and bone marrow transplants ➤ Gene therapy ➤ Other forms of treatment • Psychosocial aspects of cancer • Rehabilitation • Palliative care, symptoms and pain management, nutritional support • Home care • Hospice care • Stomal therapy • Special therapies: Psychosocial aspects • Nursing procedures
7.	10	7%	• Concepts and principles of Disaster Nursing • Causes and types of Disaster: Natural and Man-made: ➤ Earthquakes, Floods, Epidemics, Cyclones ➤ Fire, Explosion, accidents ➤ Violence, Terrorism, Biochemical war • Policies related to emergency/Disaster management; International, National, State, Institutional • Disaster preparedness • Team, Guidelines, Protocols, Equipments, Resources • Coordination and involvement of; community, various Government departments, Non-govt. organizations and international agencies • Role of Nurse: working • Legal aspects of Disaster Nursing • Impact on Health and After effects; post traumatic stress disorder

			• Rehabilitation: Physical, Psychosocial, Financial, Relocation Emergency Nursing: • Concepts, Priorities, principles and scope of Emergency Nursing • Organization of emergency services: physical set up, Staffing, equipment and supplies, protocols, concepts of triage and role of triage nurse • Coordination and involvement of different departments and facilities • Nursing assessment- History and physical assessment • Etiology, Classification, Pathophysiology, clinical manifestations, diagnosis, treatment modalities and medical and surgical nursing management of patient with medical surgical emergency • Principles of Emergency management • Common emergencies, Respiratory emergencies, Cardiac emergencies, Shock and hemorrhage, Pain, Poly-trauma, Road accidents. Crush injuries, wound, Bites • Poisoning: food, gas, drugs & chemical poisoning • Seizures • Thermal emergencies; Heat stroke & cold injuries • Pediatric emergencies, Psychiatric emergencies, Obstetrical emergencies, Violence, Abuse, Sexual assault, Cardiopulmonary Resuscitation, Crisis intervention • Role of nurse: communication and inter personal relations • Medico- legal Aspects
8.	6	4%	Fundamentals of Forensic Nursing: • Introduction & Definition • Principles • Domain of forensic nursing

			• Ethical issues in forensic nursing Medico-legal and investigative aspects of nursing: • Police administration • Legal procedure • Ballistic • Toxicology • Serology and biology (DNA) • Sexual offense • Organ transplant
9.	10	7%	• Nursing assessment- History and Physical assessment • Ageing • Demography; Myths and realities • Concepts and theories of ageing • Cognitive aspects of ageing • Normal biological ageing • Age related body system changes • Psychosocial aspects of Ageing • Medication and elderly • Stress and coping in older adults • Common health problems & Nursing Management: ➤ Cardiovascular ➤ Respiratory ➤ Musculoskeletal ➤ Endocrine ➤ Genitourinary ➤ Gastrointestinal ➤ Neurological, skin and other Sensory organs ➤ Psychosocial and sexual ➤ Abuse of elderly • Role of Nurse for care of elderly: ambulation, Nutritional, communicational, psychosocial and spiritual • Role of Nurse for caregivers of elderly • Role of Family and formal and non formal caregivers

			• Use of aids and prosthesis (hearing aids, dentures) • Legal and ethical issues • Provisions and programmes for elderly: privileges, community programs and health services • Home and institutional care
10.	20	14%	• Nursing assessment- History and physical assessment • Classification • Principles of critical care nursing • Organization, physical setup, policies, staffing norms • Protocols, equipment and supplies • Special equipment, ventilators, cardiac monitoring, defibrillators • Resuscitation equipment • Infection control protocols • Nursing management of critical ill patients • Monitoring of critical ill patients • CPR- advance cardiac life support • Treatments and procedures • Transitional care • Ethical and legal aspects • Communication with patient and family • Intensive care records • Crisis intervention • Death and Dying-coping with • Drugs used in critical care unit
11.	8	6%	• Nursing assessment- History and physical assessment • Etiology, Pathophysiology, Clinical manifestation, Diagnosis, Treatment modalities and medical and surgical nursing management of occupational and industrial Health disorders • Role of Nurse Special therapies, alternative therapies Nursing procedures Drugs used in treatment of occupational and industrial disorders

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Formulate effective therapeutic communication techniques to establish and maintain therapeutic nurse-patient relationships.
C02	Apply the Nursing Process to assess, plan, implement, evaluate and prioritize basic care for critically ill adult clients.
C03	Generate clinical decision making to critically think, analyze clinical problems, and strategically plan appropriate patient centered solutions
C04	Demonstrate management and leadership skills to provide care for individuals, groups, and communities in collaboration with other health care providers to ensure continuous and holistic care.
C05	Demonstrate evidence- based practice to support therapies such as ventilation, defibrillation, dialysis, and cardiac monitors
C06	Formulate a patient centred teaching plan to assist patients and families about their plan of care, medical diagnosis, medication, and treatment regimen.

Practical Hours: 270 Hrs.

Total hours: 390 Hrs.

Q. Detailed Syllabus:

Unit No.	Prescribed Hours		Unit Content
	Theory	%	
1.	5	4	Perspectives of mental health and mental health nursing, evolution of mental health services, treatment and nursing practices. • Prevalence and incidence of mental health problems and disorders • Mental health Act • National mental health policy vis a vis National Health policy • National mental Health Programme • Mental health team • Nature and scope of mental health nursing • Role and function of mental health nurse in various settings and factors affecting the level of nursing practice • Concepts of normal and abnormal behavior
2.	10	8	Definitions: Mental health nursing and terminology used • Classification of mental disorders: ICD • Review of personality development, defense mechanism • Maladaptive behavior of individuals and groups: stress crisis and disaster • Etiology: Bio-psycho-social factors • Psychopathology of mental disorders: review of structure and function of brain, limbic system and abnormal neuro transmission • Principles of mental health nursing • Standards of mental health nursing practice • Conceptual models and the role of nurse: o Existential Model, o Psycho-analytical models, o Behavioral models, o Interpersonal models
3.	13	11	History taking • Mental status examination • Mini mental status examination • Neurological examination: review • Investigations: related blood chemistry, EEG, CT & MRI • Psychological tests • Role and responsibilities of Nurse
4.	8	6	Therapeutic communication: types, techniques, characteristics • Types of relationship • Ethics and responsibilities • Elements of nurse patient contract • Review of technique of IPR- Johari window • Goals, phases, tasks, therapeutic techniques •

			Therapeutic impasse and its interventions
5.	24	20	Psycho pharmacology • Psychological therapies: o Therapeutic community, o Psycho therapy- individual, o Psycho-analytical, o Cognitive and supportive, o Family, o Group, o Behavioral, o Play, o Psycho-drama, o Music, o Dance o Recreational and light therapy, o Relaxation therapies: ♣ Yoga ♣ Medication ♣ Bio feedback. • Alternative system of medication • Occupational therapy, Physical therapy: electroconvulsive therapy • Geriatric considerations Role of nurse in above therapies
6.	6	5	• Classification: ICD • Etiology, psycho-pathology, types, clinical manifestations, diagnosis • Nursing assessment- History, Physical and mental assessment • Treatment modalities and nursing management of patients with schizophrenia and other psychotic disorders • Geriatric consideration • Follow-up and home care and rehabilitation
7.	7	6	Mood disorders: Bipolar affective disorder, Mania, depression and diathermia etc. • Etiology, psycho-pathology, types, clinical manifestations, diagnosis • Nursing assessment- History physical and mental assessment • Treatment modalities and nursing management of patients with mood disorders • Geriatric consideration • Follow-up and home care and rehabilitation
8.	10	9	Anxiety disorders, phobias, Dissociation and conversion disorders, obsessive compulsive disorder, somatoform disorders, post traumatic stress disorders • Etiology, psycho-pathology, types, clinical manifestations, diagnosis Nursing assessment- History, physical and mental assessment • Treatment modalities and nursing management of patients with neurotic, stress related and somatization disorders • Geriatric consideration • Follow-up and home care and rehabilitation
9.	5	4	Commonly used psychotropic substance: classification. forms, routes, action, intoxication and withdrawal • Etiology of

			dependence, tolerance, psychological and physical dependence, withdrawal syndrome, diagnosis • Nursing assessment- History physical and mental assessment and drug assay • Treatment (detoxification, antabuse and narcotic antagonist therapy and harm reduction) and nursing management of patients with substance use disorders. • Geriatric consideration • Follow-up and home care and rehabilitation
10.	5	5	Classification of disorders • Etiology, psycho-pathology, characteristics, diagnosis, nursing assessment- History physical and mental assessment • Treatment modalities and nursing management of patients with personality, sexual and eating disorders • Geriatric consideration • Follow-up and home care and rehabilitation
11.	6	5	Classification • Etiology, psycho-pathology, characteristics, diagnosis, nursing assessment- History physical and mental and IQ assessment • Treatment modalities and nursing management of childhood disorders including mental deficiency • Follow-up and home care and rehabilitation
12.	5	4	Classification: ICD • Etiology, psycho-pathology, clinical features, diagnosis and differential diagnosis (parkinsons and alzheimers), nursing assessment- History physical, mental and neurological assessment • Treatment modalities and nursing management of organic brain disorders • Geriatric consideration • Follow-up and home care and rehabilitation
13.	8	6	Types of psychiatric emergencies and their management • Stress adaptation model: stress and stressor, coping, resources and mechanism • Grief: theories of grieving process, principles, techniques of counseling Types of crisis • Crisis intervention: principles, technique and process • Geriatric consideration • Role and responsibilities of Nurse
14.	4	4	• The Mental health Act 1987: Act, Sections, articles and their implications etc. • Indian Lunacy act, 1912 • Rights of mentally ill clients, • Forensic psychiatry • Act related to narcotic and

			psychotropic substance and ill legal drug trafficking • Admission and discharge procedures Role and responsibilities of nurse.
15.	4	4	• Development of community Mental health services, • National mental health programme, • Institutionalization versus deinstitutionalization • Model of preventive psychiatric: levels of prevention • Mental health services available at the primary, secondary, tertiary levels including rehabilitation and role of nurse • Mental health agencies: Government and voluntary, National and international • Mental health nursing issues for special populations: children, adolescence, women, elderly, victims of Violence and abuse, handicapped, HIV/AIDS etc.

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Develop and implement pre-discharge care plans that meet the need of psychiatric/mental health clients.
C02	Demonstrate skill in collecting history; perform mental status and mini mental status examination and neurological examination.
C03	Identify patient with mental health problems.
C04	Demonstrate Guidance and counseling skills.
C05	Recall different drugs involved in psychopharmacology.
C06	Demonstrate skill in various nursing psychiatric Procedure in psychiatry

Total		90 Hours	--

Total hours (Theory) :90 hours

Total hours (Practical) :270 hours

Total Hours: 360 hours

Detailed Syllabus:

1.	Introduction modern concepts of childcare	15 Hours	13%
	• Internationally accepted rights of the child • National policy and legislations in relation to child health and welfare • National programmes related to child health and welfare • Agencies related to welfare services to the children • Changing trends in hospital care, preventive, promotive and curative aspects of child health • Child morbidity and mortality rates • Differences between an adult and child • Hospital environment for a sick child • Impact of hospitalization on the child and family • Grief and Bereavement • The role of a child health nurse in caring for a hospitalized child • Principles of pre and post operative care of infants and children • Child health nursing procedures		
2.	The healthy child	20 Hours	22%
	• Principles of growth and Development • Factors effecting Growth and Development • Growth and Development from birth to adolescence • The need of normal children through the stages of development and parental guidance • Nutritional needs of the children & infants: breast feeding, exclusive breast feeding supplementary/ artificial feeding and weaning • Baby friendly hospital concepts		

	• Accidents : causes and prevention • Value of play and selection of play material • Preventive immunization, Immunization programme and cold chain • Preventive pediatric • Care of under five & under five clinics/ well baby clinics		
3.	Nursing care of a neonate	15 Hours	13%
	• Nursing care of a normal new born/ Essential newborn care • Neonatal Resuscitation, Nursing management of a low birth weight baby, Kangaroo mother care • Nursing management of common neonatal disorders • Organization of neonatal unit • Identification & nursing management of common congenital malformations.		
4.	Integrated management of neonatal and childhood illnesses (IMNCI)	10 Hours	13%
	Integrated management of neonatal and childhood illnesses (IMNCI)		
5.	Nursing management in common childhood diseases	20 Hours	26 %
	• Nutritional deficiency disorders • Respiratory disorders and infections • Gastrointestinal infections, infestations and congenital disorders • Cardio vascular problems: congenital defects and rheumatic fever, rheumatic Heart diseases • Genitor-Urinary disorders, Acute glomerulo nephritis, Nephrotic syndrome, wilms tumor, infections and congenital disorders		

	- Neurological infections and disorders: convulsions, epilepsy, meningitis, hydrocephalus, spina-bifida - Hematological disorders: anemia, thalasemia, ITP, leukemia, hemophilia - Endocrine disorders: Juvenile Diabetes Mellitus - Orthopedic disorders: club feet, hip dislocation and fracture - Disorders of Skin, Eye and Ear - Common communicable diseases in children, their identification, nursing management in hospital and home and prevention - Child health emergencies: poisoning, foreign bodies, hemorrhage, burns and drowning. - Nursing care of infant and children with HIV/AIDS.		
6.	Management of behavioral & social problems in children	10 Hours	13 %
	- Management of common behavioral disorders - Management of common psychiatric disorders - Management of challenged children: mentally, physically and socially challenged - Welfare services for challenged children in India - Child Guidance clinic		

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe the modern concept of childcare, principles, programmes and legislations of child health
C02	Practice the major functions and role of the Pediatric nurse in caring for a hospitalized child.
C03	Apply the Concepts Of Growth And Development In Providing Care To The Paediatric Clients And Their Families
C04	Recognize the health needs and problems of neonate and implement appropriate nursing intervention
C05	Demonstrate skill in meeting the needs of the sick infants and children based on the IMNCI guidelines
C06	Identify childhood diseases and provide preventive, Promotive, curative and rehabilitative nursing care

Total hours (Theory): 90 Hrs.

Practical Hours: 360 Hrs.

Total hours: 450 Hrs.

T. Detailed Syllabus:

1.	Introduction to midwifery and obstetrical Nursing	03 Hours	03%
	• Introduction to concepts of midwifery and obstetrical nursing • Trends in midwifery and obstetrical nursing ➤ Historical perceptive and current trends ➤ Legal and ethical aspects ➤ Pre-conception care and preparing for parenthood ➤ Role of nurse in midwifery and obstetrical care ➤ National policy and legislation in relation to maternal health and welfare ➤ Maternal morbidity, mortality and fertility rates ➤ Perinatal, morbidity and mortality rates		
2.	Review of anatomy and physiology of female reproductive system and foetal development	08 Hours	06%
	• Female pelvis – general description of the bones, joints, ligaments, planes of the pelvis diameters of the true pelvis, important landmarks, variation in pelvis shape • Female organ of reproduction- external genitalia, internal genital organs and their anatomical relations, musculature- blood supply, nerves, lymphatics, pelvic cellular tissue, pelvic peritoneum. • Physiology of menstrual cycle • Human sexuality • Foetal development: ➤ Conception ➤ Review of fertilization, implantation (embedding of the ovum), development of the embryo and placenta at term- functions, abnormalities, the foetal sac, amniotic fluid, the umbilical cord ➤ Foetal circulation ➤ Foetal skull, bones, sutures and measurements Review of Genetics.		
3.	Assessment and management of pregnancy (Ante-natal)	08 Hours	10%
	• Normal pregnancy • Physiological changes during pregnancy: ➤ Reproductive system ➤ Cardio vascular system ➤ Respiratory system ➤ Urinary system ➤ Gastrointestinal system ➤ Metabolic changes ➤ Skeletal changes		

	➤ Skin changes ➤ Endocrine system ➤ Psychological changes ➤ Discomforts of pregnancy • Diagnosis of pregnancy ➤ Sign ➤ Differential diagnosis ➤ Confirmatory tests • Ante-natal care ➤ Objectives ➤ Assessment: -History and physical examination -Antenatal examination -Sign of previous child birth ➤ Relationship of foetus to uterus and pelvis: Lie, Attitude, Presentations, Position ➤ Per vaginal examination • Screening and assessment of High risk • Risk approach • History and physical examination • Modalities of Diagnosis; Invasive and Non-invasive, Ultrasonics, Cardiotomography, NST, CST • Antenatal preparation: Antenatal counseling, Antenatal exercise, Diet, Substance use, Education for child birth, Husband and families, Preparation for safe-confinement, Prevention from, radiation. • Psycho-social and cultural aspects of pregnancy: Adjustment to pregnancy, Unwed mother, Single parent, Teenage pregnancy, Sexual violence, Adoption		
4.	Assessment and management of Intra-natal period	12 Hours	14%
	• Physiology of labour, Mechanism of labour • Management of labour: • First stage: - Signs and symptoms of onset of labour; normal and abnormal - Duration - Preparation: Labour room, woman - Assessment and observation of women in labour: Partogram- maternal and foetal monitoring - Active management of labour, Induction of labour - Pain relief and comfort in labour • Second stage ➤ Signs and symptoms; normal and abnormal ➤ Duration ➤ Conduct of delivery; principles and techniques ➤ Episiotomy (only in required) ➤ Receiving the new born: - Neonatal resuscitation; initial steps and		

	- subsequent resuscitation - Care of umbilical cord - Immediate assessment, including screening for congenital anomalies - Identification - Bonding - Initiate feeding - Screening and transportation of the neonate • Third stage: ➤ Signs and symptoms: normal and abnormal ➤ Duration ➤ Methods of placental expulsion ➤ Management; principles and techniques ➤ Examinations of the placenta ➤ Examination of perineum • Maintaining records and reports • Fourth stage		
5.	Assessment and management of women during post-natal period	05 Hours	06%
	• Normal puerperium; physiology, Duration • Postnatal assessment and management: ➤ Promoting physical and emotional wellbeing ➤ Lactation management ➤ Immunization • Family dynamic after child Birth • Family welfare services: methods, counseling • Follow- up • Records and reports		
6.	Assessment and management of normal neonates	06 Hours	07%
	• Normal neonates: ➤ Physiological adaptation ➤ Initial and daily assessment ➤ Essential newborn care; Thermal control ➤ Breast feeding, Prevention of infections • Immunization • Minor disorders of new born and its management • Levels of neonatal care (level I, II, and III) • At primary, secondary and tertiary levels Maintenance of reports and records		
7.	High-risk pregnancy – Assessment and management	10 Hours	12%
	• Screening and assessment ➤ Ultrasonic, Cardio tomography, NST, CST, Non-invasive & invasive		

	➤ Newer modalities of diagnosis • High risk approach • Levels of care: primary, secondary and tertiary levels • Disorders of pregnancy ➤ Hyper-emesis gravidarum, bleeding in early pregnancy, abortion, ectopic ➤ Pregnancy, Vesicular mole ➤ Ante-partum hemorrhage • Uterine abnormality and displacement • Diseases complicating pregnancy ➤ Medical and surgical conditions ➤ Infections, RTI (STD), UTI, HIV, TORCH ➤ Gynecological diseases complicating pregnancy ➤ Pregnancy induced hypertension & diabetes, Toxemia of pregnancy, Hydramnios ➤ Rh incompatibility ➤ Mental disorders • Adolescent pregnancy, elderly primi and grand multipara • Multiple pregnancy • Abnormalities of placenta and cord • Intra-uterine growth retardation • Nursing management of mothers with high risk pregnancy • Maintenance of Records and reports		
8.	Abnormal labour- assessment and management	10 Hours	12%
	• Disorders in labour: CPD and contracted pelvis, Malpositions and Malpresentations, Premature labour, disorders of uterine actions – precipitate labour, prolonged labour, Complication of third stage: injuries of birth canal. • Obstetrical emergencies and their management ➤ Presentations and prolapse of cord, vasa praevia, amniotic fluid embolism, rupture of uterus, shoulder dystocia, obstetrical shock • Obstetrical procedures and operations ➤ Induction of labour, forceps, vacuum version, manual removal of placenta, caesarean section, destructive operations • Nursing management of women undergoing obstetrical operations and procedures		
9.	Abnormalities during postnatal periods	04 Hours	04%
	• Assessment and management of woman with postnatal complications ➤ Puerperal infections, breast engorgement & infections, UTI, thrombo-embolic disorders, post-		

	- partum hemorrhage, Eclampsia and subinvolution ➤ Psychological complications: - Post partum Blues - Post partum Depression - Post partum psychosis		
10.	Assessment and management of High-risk newborn	10 Hours	12%
	• Admission of neonates in the neonatal intensive care unit- Protocols • Nursing management of: ➤ Low birth weight babies ➤ Infections ➤ Respiratory problems ➤ Hemolytic disorders ➤ Birth injuries ➤ Malformations • Monitoring of high risk neonates • Feeding of high risk neonates • Organization and management of neonatal intensive care units. • Infection control in neonatal intensive care units • Maintenance of records and reports		
11	Pharmaco-therapeutic in obstetrics	04 Hours	04 %
	• Indications, dosage, action, contraindication and side-effects of drugs • Effect of drugs on pregnancy, labour and puerperium • Nursing responsibilities in the administration of drug in obstetrical- oxytocins, antihypertensives, diuretics, tocolytics agents, anti convulsants. • Analgesics and anesthetics in obstetrics • Effects of maternal medication of foetus and neonate		
12	Family welfare programmes	10 Hours	10 %
	• Population trends and problems in India • Concepts, aims, importance and history of family welfare programme • National population: dynamics, policy and education • National Family Welfare Programme: RCH, ICDS, MCH, Safe motherhood • Organization and administration: at national, state, district, block and village levels • Methods of contraception: Spacing, temporary and permanent, emergency contraception • Infertility and its management • Counseling for family welfare • Latest research in contraception		

	• Maintenance of vital statistics • Role of national, international and voluntary organizations • Role of a nurse in family welfare programme • Training/supervision/collaboration with other functionaries in community like ANMs, LHVs, Anganwadi workers, TBAs (Traditional Birth Attendant Dai)		
--	--	--	--

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Describe the trends and issues in midwifery/obstetrical nursing.
C02	Review and describe the anatomy and physiology of human reproductive system and conception.
C03	Demonstrate competency in providing respectful maternity care to the normal and high-risk women during the antenatal, intra-natal and postnatal period.
C04	Demonstrate competency in providing care for normal as well as high risk newborn.
C05	Practice the skills of counselling and care for couples with infertility.
C06	Identify and implement the various government programs related to Maternal and child health care.

A. Outline of the Course:

Sr. no.	Title of the unit	Minimum number of the hour
1.	Introduction	5
2.	Health planning and policies and problems	10
3.	Delivery of community health services	15
4.	Community health nursing approaches, concepts and roles and responsibilities of nursing personnel	25
5.	Assisting individuals and groups to promote and maintain their health	15
6.	National health and family welfare programmes and the role of a nurse	20
7.	Health Agencies	10
Total Hours		100

Total hours (Theory): 100 Hrs.

Practical Hours: 150 Hrs.

Total hours: 250 Hrs.

Unit No	Unit Content	Hours
1.	• Definition, concept & scope of Community Health and Community Health Nursing. • Historical development of ➤ Community health ➤ Community health Nursing. - Pre-independence - Post-independence	5

2.	• National planning in India Five Year Plans • Various Committees and commissions on health and family welfare ➤ Central council for health and family welfare (CCH and FW) ➤ National health policies (1983,2002, 2017) ➤ National population policy ➤ SDGs, NITI Aayog • Health problems in India	10
3.	• Planning, budgeting and material management of SCs, PHC and, CHC • Rural: Organization, staffing and functions of rural health services provided by government at: ➤ Village ➤ Subcentre ➤ Primary health centre ➤ Community health center / subdivisional ➤ Hospitals ➤ District ➤ State ➤ Centre • Urban: Organization, staffing and functions of urban health services provided by government at: ➤ Slums ➤ Dispensaries ➤ Maternal and child health centres ➤ Special clinics ➤ Hospitals ➤ Corporation / Municipality/ Board • Components of health services ➤ Environmental sanitation ➤ Health education ➤ Vital statistics ➤ M.C..H.-antenatal, natal, postnatal, MTP Act, female foeticide act, child adoption act ➤ Family Welfare ➤ National health programmes ➤ School health services ➤ Occupational health ➤ Defence services ➤ Institutional services • Roles and responsibilities of community health nursing personnel in ➤ Family health services ➤ National Health Programmes ➤ Environmental sanitation ➤ Maternal and child health and family welfare	15

	➤ School Health Services • System of medicine and health care ➤ Allopathy ➤ Indian System of Medicine and Homeopathy ➤ Alternative health care systems like yoga, meditation, social and spiritual healing etc Referral system	
4.	• Approaches ➤ Nursing theories And Nursing process ➤ Epidemiological approach ➤ Problem solving approach ➤ Evidence based approach ➤ Empowering people to care for themselves • Concepts of primary Health Care : ➤ Equitable distribution ➤ Community participation ➤ Focus on prevention ➤ Use of appropriate technology ➤ Multi-sectoral approach • Roles and responsibilities of community health nursing personnel in ➤ Information Education Communication (IEC) ➤ Management Information System (MIS): Maintenance of records and reports ➤ Training and supervision of various categories of health workers ➤ Treatment of minor ailments ➤ Occupational health ➤ Organization of clinics, camps: types, preparation, planning, conduct and evaluation ➤ Waste management in the center, clinics etc. • Home visit : Concept, principles, process, Techniques: Bag techniques home visit • Qualities of Community Health Nurse • Job description of community health nursing personnel	25
5.	• Empowerment for self care of individuals, families and groups in – A. Assessment of self and family ➤ Monitoring growth and development - Mile stones - Weight measurement - Social development ➤ Temperature and blood pressure monitoring ➤ Menstrual cycle ➤ Breast self examination and testicles ➤ Warning signs of various diseases ➤ Tests: urine for sugar and albumin and blood sugar B. Seek health services for	15

	➤ Routine checkup ➤ Immunization ➤ Counseling ➤ Diagnosis ➤ Treatment ➤ Follow up C. Maintenance of health records for self and family D. Continue medical care and follow up in community for various diseases and disabilities E. Carryout therapeutic procedures as prescribed/required for self and family F. Waste Management ➤ Collection and disposable of waste at home and community G. Sensitize and handle social issues affecting health and development for self and family ➤ Women empowerment ➤ Women and child abuse ➤ Abuse of elders ➤ Female foeticide ➤ Commercial sex workers ➤ Food adulteration ➤ Substance abuse H. Utilize community resources for self and family ➤ Trauma services ➤ Old age homes ➤ Orphanage ➤ Homes for physically and mentally challenged individuals Homes for destitute	
6.	1. National ARI programme 2. Revised National Tuberculosis Control Programme (RNTCP) 3. National Anti- Malaria programme 4. National Filaria control programme 5. National Guinea worm eradication programme 6. National Leprosy eradication programme 7. National AIDS control programme 8. STD control programme 9. National programme for control of blindness 10. Iodine deficiency disorder programme 11. Expanded programme on immunization 12. National Family Welfare programme- RCH Programme historical development, organization, Administration, research, constraints 13. National water supply and sanitation programme	20

	14. Minimum Need programme 15. National Diabetics control programme 16. Polio Eradication: pulse Polio Programme 17. National Cancer Control Programme 18. Yaws Eradication Programme 19. National Nutritional Anemia Prophylaxis Programme 20. 20 point programme 21. ICDS Programme 22. Mid-day meal applied nutritional programme 23. National mental health programme • Health schemes ➤ ESI ➤ CGHS ➤ Health insurance ➤ Universal Health Coverage- Ayushman Bharat Yojana.	
7.	International – WHO, UNFPA, UNDP, World Bank, FAO, UNICEF, DANIDA, European Commission (EC), Red cross, USAID, UNESCO, Colombo Plan, ILO, CARE etc. National – Indian Red Cross, Indian Council for child welfare, Family Planning Association of India (FPAI), Tuberculosis Association of India, Hindu Kush Nivaran Sangh, Central Social Welfare Board, All India women's conference, Blind Association of India etc.	10

B. Detailed Syllabus:

Syllabus Content (Practical):

Skill Title	Activities
Community health survey	➤ Community diagnosis ➤ Family care: home adaptation of common procedures ➤ Home visit: bag technique ➤ Organize and conduct clinics- antenatal, postnatal, well baby clinic, camps etc
Screening and referrals	➤ High risk mothers and neonates ➤ Accident and emergencies ➤ Illnesses: physical and mental ➤ Disabilities
	➤ Conduct delivery at centre/ home: episiotomy and suturing ➤ Resuscitate newborn
School Health programme	➤ Screen, manage, refer children
Training on need based Health Services	➤ Collaborate with health and allied agencies ➤ Train and Supervise health workers

	➤ Provide family welfare services: insertion of IUD ➤ Counsel and teach individual, family and community about : HIV, TB, Diabetes, hypertension, Mental health, adolescents, elderly's health physically and mentally challenged individuals etc ➤ Collect and calculate vital health statistics
Document and maintain	➤ Individual, family and administrative records ➤ Write reports-center, disease, national health programme/ projects.

Course Outcome:

At the end of the course students will be able to

C01	Identify different health policies and programs available for prevention, promotion and restoration of health
C02	Choose various health services available for primary, secondary and tertiary care in the community setting
C03	Explored different health agencies and NGO's working for enhancing health of the people.
C04	Demonstrate skills in rendering health services independently under different health policies, schemes and programs available for comprehensive health care.

Course Articulation Matrix

	P01	P02	P03	P04	P05	P06	P07	P08	P09	P010	PS01	PS02	PS03

Hours/week	0	3	0	3	3
Marks	0	100	0	100	

C. Outline of the Course:

Sr.No	Skills/activity	Prescribed Practical Hours
1.	• Role & Responsibilities of Mid-level Healthcare Provider (MLHP)	1
2.	• New National Programmes	2
3.	• Ayushman Bharat- Concept Health and Wellness Centre, Comprehensive Primary Health Care	2
4.	• Diagnosing and treatment skills essential at Subcentre using standard treatment Protocols as per National Health Programmes	2

5.	- Nutritional Assessment and assessment of nutritional deficiencies - Introduction to Rashtriya Bal Sureksha karyakara, (RBSK)	2
6.	Programme management including supervision and monitoring	1
7.	Organizing and Conducting Special Clinics Diabetic clinic/antenatal clinic/geriatric clinic/Cancer screening clinic etc	2
8.	Investigation of an Outbreak	1
9.	- Integrated Disease Surveillance Project (IDSP) - Identification and appropriate management of communicable diseases - Identification and appropriate management of Non-communicable Diseases (NCD)	1 1 1
10.	Social Mobilization Skills	1
11.	Health Education/Counseling-GATHER Approach	1
12.	Recording and Reporting Format	1
13.	Hand Washing Skills	1
14.	Bio-medical Waste Management	1
15.	Procedures for basic tests	1
16.	Drugs dispensing and injections: oral drugs/ injections/ IV Fluid	1
17.	Examination of Lumps and joint pain	1
18.	- Assessment of the patient with eye problems - Assessment of patients with Ear, Nose and Throat (ENT) problems	1 1
19.	Identification and management of Dental problems	1
20.	Suturing of superficial Wounds	1
21.	Basic Life Support	2
22.	Identification and care of patients with common conditions and emergencies	1
23.	- Aches and Pain - Common Fevers	1
24.	Assessment and care of health problems among elderly	1
25.	Mother and Child Tracking System (MCTS)	1
26.	- Health Assessment of Women (15 to 45 years of age) - Assessment and care of antenatal woman	1
27.	- Organization of labor room as per LAQSHYA initiative - Monitoring labour and maintaining partograph	1
28.	Conducting Vaginal Examination	1
29.	Conducting Episiotomy	1

30.	Care during various stages of labor • Safe Child Birth Checklist	1
31.	Post-Partum Care	1
32.	Identification and management of complications during labor	1
33.	Assessment and Management of STIs/RTIs	1
34.	Insertion and removal of IUDs	1
35.	Management of abortion and counseling	1
36.	Adolescent Counseling • Mental Health Act • Drug De-addiction Programmes	1
37.	• Resuscitation of New Born • Assessment of a Newborn Baby • Kangaroo Mother Care (KMC) • Care of Child with Febrile Seizure	1
38.	Infant and Young Child Feeding	1
39.	Promoting and Monitoring Growth and Development and Plotting Chart	1
40.	Immunization and safe injection practices	1
41.	Family Planning 2020	1
42.	• Food Borne diseases	1

Total Hours- 50 Hours

Course Outcome:

At the end of the course students will be able to

CO1	Recognize health status of Individual, families and community.
CO2	Organize various health clinics and health campus.
CO3	Identify Health Program/schemes available for individuals, families and community
CO4	Analyze outbreaks and resources management.

Total hours (Theory): 90 Hrs.

Practical Hours: 0Hrs.

Total hours: 90 Hrs.

V. Detailed Syllabus:

1.	Research and research process:	8	6.6%
	➤ Introduction and need for nursing research ➤ Definition of research and nursing research ➤ Steps of scientific method ➤ Characteristics of good research ➤ Steps of research process-overview		
2.	Research Problems/ Question	8	13.3%
	➤ Identification of problem area ➤ Problem statement ➤ Criteria of a good research problem ➤ Writing objectives		
3.	Review of literature:	8	6.6%
	➤ Location ➤ Sources ➤ On line search; CINHAI, COCHRANE etc ➤ Purposes ➤ Method of review		
4.	Research approaches and designs	8	13.3%
	➤ Historical, survey and experimental ➤ Qualitative and quantitative designs		
5.	Sampling and data collection	12	13.3%
	➤ Definition of Population, Sample, Sampling criteria, factors influencing sampling process, types of sampling techniques. ➤ Data- why, what, from whom, when and where to collect. ➤ Data collection method and instruments : ▪ Methods of data collection ▪ Questioning, interviewing ▪ Observation, record analysis and measurement ▪ Types of instruments ▪ Validity & reliability of instrument ▪ Pilot study ▪ Data collection procedure		
6.	Analysis of data:	8	13.3%
	➤ Compilation, tabulation, classification, summarization, presentation, interpretation of data		
7.	Introduction to statistics:	20	20%
	➤ Definition, use of statistics, scales of measurement. ➤ Frequency distribution and graphical presentation of data ➤ Mean, Median, Mode, Standard deviation ➤ Normal probability and tests of significance ➤ Co-efficient of correlation		

	➤ Statistical packages and its application		
8	Communication and utilization of research:	8	13.3%
	➤ Communication of research findings ▪ Verbal report ▪ Writing research report ▪ Writing scientific article/ paper - Critical review of published research - Utilization of research findings		

Course Outcomes (COs):

At the end of the course, the students will be able to

C01	Identify the overall process of designing a research study from its inception to its report.
C02	Identify and discuss the complex issues inherent in selecting a research problem, selecting an appropriate research design, and implementing a research project
C03	Identify and discuss the concepts and procedures of sampling, data collection, analysis and reporting
C04	Perform literature reviews using print and online databases
C05	Demonstrate the use of basic statistics in research

	Total	30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, critical reading, group work, independent and collaborative research, presentations etc.

IV. Evaluation:

The students will be evaluated continuously in the form of internal as well as external evaluation. It is schemed as 30 marks for internal evaluation and 70 marks for external evaluation in the form of University examination.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
3	Assignment / Project Work / Term Work / Quiz	5	5	25
4	Attendance and Class-room Participation			05
			Total	30

External Evaluation

The University Practical examination will be of 70 marks and will test the contributory personality aspects and their applications by carrying out practical assessment. The examination will avoid, as far as possible, evaluation on the basis of grammatical errors. Instead, it will focus on applications.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Practical Exam / Viva	01	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

C01	Develop conceptual understanding of the term Personality and understand one's own personality Traits
C02	Develop soft skills for holistic personality development for career and in personal life
