Institute of Physiotherapy

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

FACULTY OF MEDICAL SCIENCES

ASHOK & RITA PATEL INSTITUTE OF PHYSIOTHERAPY

M.P.T. PROGRAMME

COURSE REGULATIONS

1. OBJECTIVES:

The Post Graduate of Physiotherapy programme:

- Integrate knowledge of basic sciences and physiotherapy in order to modify treatment approaches that reflect the breadth and scope of physiotherapy practice.
- Integrate the use of basic principles of research in critical analysis of concepts and findings generated by self and others.
- Practice in an ethical and legal manner that values the professionalism.
- Prepare leaders in the multifaceted roles of clinicians, educators, researchers, and administrators in individual, group, and community contexts model.
- Facilitate commitment to independent thinking and lifelong learning and realization of the intrinsic rewards of these attributes.
- Design a plan of care that synthesizes best available evidence and patient preferences, implementing safe and effective psychomotor interventions, and determining the efficacy of patient outcomes.
- Develops interests for care of the individual and provide physiotherapy services to the community.

2. ELIGIBILITY FOR ADMISSION:

Eligibility of a candidate for admission to Master of Physiotherapy programme will be according to the regulations for admission decided by CHARUSAT norms from time to time.

3. DURATION OF THE COURSE:

The duration of Master of Physiotherapy programme shall be of two academic years (4 semesters).

4. MEDIUM OF INSTRUCTION:

English shall be the medium of instruction for all the courses of study and for the examinations.

5. ATTENDANCE:

A candidate is required to attend at least 80% of the total classes conducted in a semester in each course prescribed for that semester, separately in theory, practical and clinical practice.

6. COURSES OF STUDY:

The courses of M.P.T. programme of two years are given in **ANNEXURE I**.

7. COURSE EVALUATION:

7.1 The performance of every student in each course for university examination will be evaluated as follows:

7.1.1 Internal evaluation by the course faculty member(s) based on continuous assessment, for 30% of the marks for the course;

7.1.2 Final examination by the university through written paper or practical examination or oral examination by the student of combination of any two or more of these, for 70% of the marks of the course.

7.2 Internal evaluation:

7.2.1 The internal assessment is done based on continuous evaluation method. Every semester, there will be two internal examinations for theory and practical. For the award of internal marks in theory and practical, the average of the two tests shall be considered along with other components like attendance, case presentations, microteaching, journal clubs and assignments.

7.3 University (External) Examination:

7.3.1 Every student has to score minimum 40 % of marks in theory and practical examination separately to pass in the final University Examination.

7.4 Aggregate:

7.4.1 Every student has to have an aggregate score of 50 % of marks of both in theory and practical examination separately to pass in the final University Examination and the grade will be awarded based on the aggregate marks.

8. GRADING:

8.1 The total of the internal evaluation marks and final University examination marks in each course will be converted to a letter grade on a ten-point scale as per the following scheme:

Range of Marks (%)	≥80	≥75 <80	≥70 <75	≥65 <70	≥60 <65	≥55 <60	≥50 <55	<50
Letter Grade	AA	AB	BB	BC	CC	CD	DD	FF
Grade Point	10	9	8	7	6	5	4	0

8.2 The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA).

The SGPA and CGPA are defined as follows:

(i) $SGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i and $i = 1$ to n , n = number of courses in the semester

(ii) $CGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i
and $i = 1$ to n , n = number of courses of all semesters up to which CGPA is computed.

(iii) No student will be allowed to move further if CGPA is less than 3 at the end of first year.

(iv) In addition to above, the student has to complete the required formalities as per the regulatory bodies.

9. Awards of Degree:

9.1 Every student of the programme who fulfils the following criteria will be eligible for the award of the degree:

9.1.1 He/She should have earned at least minimum required credits as prescribed in course structure,

9.1.2 He/She should have cleared all internal and external evaluation components in every course,

9.1.3 He/She should have secured a minimum CGPA of 5.0 at the end of the programme,

9.1.4 He/She should have completed the dissertation.

9.2 The student who fails to satisfy minimum requirement of CGPA will be allowed to improve the grades in the final semester so as to secure a minimum CGPA for award of degree. Only latest grade will be considered.

10. Award of Class:

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Distinction: $10.0 \geq \text{CGPA} \geq 7.5$

First class: $7.5 > \text{CGPA} \geq 6.0$

Second Class: $6.0 > \text{CGPA} \geq 5.0$

Pass class: $5.0 > \text{CGPA} \geq 4.5$

11. Transcript:

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA, class obtained, etc.

CHOICE BASED CREDIT SYSTEM

FOR

**MASTER OF PHYSIOTHERAPY
(NEUROLOGICAL SCIENCES)**

CHOICE BASED CREDIT SYSTEM

With the aim of incorporating the various guidelines initiated by the University Grants Commission (UGC) to bring equality, efficiency and excellence in the Higher Education System, Choice Based Credit System (CBCS) has been adopted. CBCS offers wide range of choices to students in all semesters to choose the courses based on their aptitude and career objectives. It accelerates the teaching-learning process and provides flexibility to students to opt for the courses of their choice and / or undergo additional courses to strengthen their Knowledge, Skills and Attitude.

1. CBCS – Conceptual Definitions / Key Terms (Terminologies)

Types of Courses: The Programme Structure consist of 3 types of courses: Foundation courses, Core courses, Elective courses.

1.1. Foundation Course

These courses are offered by the institute in order to prepare students for studying courses to be offered at higher levels.

1.2. Core Courses

A Course which shall compulsorily be studied by a candidate to complete the requirements of a degree / diploma in a said programme of study is defined as a core course. Following core courses are incorporated in CBCS structure:

A. University Core courses(UC):

University core courses are compulsory courses which are offered across university and must be completed in order to meet the requirements of programme. Environmental science will be a compulsory University core for all Undergraduate Programmes.

B. Programme Core courses(PC):

Programme core courses are compulsory courses offered by respective programme owners, which must be completed in order to meet the requirements of programme.

1.3. Elective Courses

Generally, a course which can be chosen from a pool of courses and which may be very specific or specialised or advanced or supportive to the discipline of study or which provides an extended scope or which enables an exposure to some other discipline / domain or nurtures the candidate's proficiency / skill is called an elective course. Following elective courses are incorporated in CBCS structure:

A. University Elective Courses(UE):

The pool of elective courses offered across all faculties / programmes. As a general guideline, Programme should incorporate 2 University Electives of 2 credits each (total 4 credits).

B. Programme Elective Courses(PE):

The programme specific pool of elective courses offered by respective programme.

1.4. Medium of Instruction

The Medium of Instruction will be English.

Ashok & Rita Patel Institute of Physiotherapy

Vision

To become a leading institute in evidence based education and research by preparing physiotherapists having proficiency and ethical values

Mission

To create physiotherapists with contemporary knowledge, entrepreneurial skills and ethical values to serve society

Program Outcomes: Physiotherapy

PO1 Communication: Demonstrate effective communication and interpersonal skills, which are adapted to meet the needs of diverse individuals and groups

PO2 Diagnosis and plan of care: Develop physiotherapy diagnoses and an individualized plan of care for the management and prevention of movement dysfunction

PO3 Evidence based practice: Apply principles of critical thinking and clinical reasoning to evidence-based physiotherapy practice.

PO4 Teaching and learning principles: Apply learning and teaching principles in educational, clinical and community settings

PO5 Team Member: Participate as an effective intra- and inter-professional team member

PO6 Ethical and legal standards: Adhere to safe, ethical and legal standards of current practice (as identified by professional organizations, central and state law and accrediting bodies)

PO7 Professional Responsibility and commitment: Develop responsibility and commitment to the profession and society through life-long learning and involvement in activities beyond job responsibilities

II. Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Introduction to French Language Facts and figures about French Language Basic French Linguistics * Alphabets * Accents * Liaison * Nasalization French Culture, Differ between French and English Grammar : • Subject Pronoun • Verbs : (être ,avoir, habiter,regarder,manger ... “er” verb) • Form of address • Numbers (1 to 20) • Nouns and plurals of nouns • The expression : C’est ,Il y a Presentation: 1) Self Introduction 2) Question and answering Dialogue	08
2	Grammar : • Definite articles • Indefinite articles • Present tense ○ Positive Forms ○ Negative Forms • Numbers (21 to 100 , 100-1000) • Days ,Months ,Family • Verbs: (aller,venir,finir,pouvoir,vouloir “ir “ verb) Social Links: 1) My family & relations 2) Appointments 3) Gathering information from someone Dialogue	08

3	Grammar : • Common Adjectives • Comparative Adjectives • Common Adverbs • Interrogative Forms • The expression : “On” • Directions , Countries, Nationalities, Seasons, Weather, • Professions • Verbs: (Prendre, Apprendre, Comprendre, faire ... “re “ verb) Work , Study and Travel 1) Job/ Profession 2) Ticket Reservation (At Bus/At Railway/At Airport) Dialogue	08
4	Grammar : 1) Common Prepositions 2) Common Conjunctions 3) Past Tense 4) Future Tense 5) Colors ,Shapes, Animals ,Vegetables, Fruits 6) Verbs: (“er”, “ir”, ”re” etc...) Food & Shopping 1) Buy a vegetables and fruits 2) Any Conversation between Customer and Vendor (At Mall/ At Restaurant / At Market) Dialogue	06
Total		30

III. Instruction Methods and Pedagogy

The course is based on pragmatic learning. Teaching will be facilitated by Reading Material, Discussion, Task-based learning, assignments and various interpersonal activities like group/pair work, independent and collaborative work, presentations, etc.

IV. Evaluation:

The students will be evaluated continuously in the form of their consistent performance. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

The students’ performance in the course will be evaluated on a continuous basis through the following components:

Internal Evaluation:

Sl. No.	Component	Number	Marks per incident	Total Marks
1	Assignment / Presentation/ Task	5	5	25
2	Attendance and Class Participation			05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the LSRW skills in the French Language.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Term Work, Viva and Practical (LSRW)	-	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	Have a basic overview of the French language and culture.
CO2	Develop a basic understanding of the usage of French language such as alphabets,numbers,months , colour etc.
CO3	Learn the basics of French Grammar and their usages
CO4	Learn to use basic language functions such as introducing oneself, answering basic Wh questions
CO5	be able to initiate conversations/dialogues in the French language confidently.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	2	-	-	-	-	-	2
CO2	3	-	-	-	-	-	-
CO3	3	-	-	-	-	-	-
CO4	3	-	-	-	-	-	-
CO5	3	-	-	-	2	-	2

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

Note: The reference/ reading material will be provided in consultation with the expert.

1	HS704 A/B/C/D/E/F/G /H	Academic Speaking	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Foundations of Advance Communication - Meaning and Definition of Advance Communication - Advance Communication in Digital, Social, Mobile World - Strategies for Advance Communication - Meaning and Concept of Academic Language - High Frequency Academic Vocabulary	04
2	Art of Conversation - Describing people, places and things - Expressing opinions - Making suggesting - Persuading someone - Interpreting and Summarizing	06
3	Science of Power Speaking - Phonemes - Word Stress - Pronunciation - Intonation - Pause - Register - Fluency - Prosody - Lexical Range	06

4	Academic Speaking Application – Part I • Art of Oratory • Formal Presentation • Speech Analysis – Decoding Best Speeches	08
5	Academic Speaking Application – Part II • Job Interview • Group Discussion • Meeting	06
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, group work, independent and collaborative research, presentations etc.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	I-Talk	1	10	25
2	Situational Speaking	1	05	
3	Case Study - Speech Analysis	2	10	
4	Attendance and Class Participation	-		05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the advance communication skills and academic speaking.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical	-	70	70
Total				70

Course Outcome (COs):

After completion of the course the student would :

CO1	understand and demonstrate advance communication skills and academic speaking.
CO2	demonstrate linguistic competence
CO3	demonstrate performing ability at group discussion and personal interview.
CO4	demonstrate the formal presentation skills.
CO5	demonstrate ability to communicate in diverse situations

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7

3.	INTRODUCTION TO YOGA	15

Total Hours (Theory): 00

Total Hours (Practical): 40

Total Hours: 40

B. Content of The Course:

1	INTRODUCTION TO HEALTH	10 hrs	25%
1.1	What is health?		
1.2	Healthcare delivery system: Developing Countries, Developed Countries		
1.3	Human anatomy, physiology & physical fitness		
1.4	Basics of Nutrition		
1.5	Life style disorders – obesity & diabetes		
2	PHYSICAL ACTIVITY	15 hrs	37.5%
2.1	What are Physical activity, exercise, physical fitness and epidemiology?		
2.2	Measurement of Physical Activity in individuals		
2.3	Physical Activity – Theoretical Perspective: Self-determination, trans theoretical		
2.4	Physical Activity and mental health – Body image, depression, problem with exercise		
2.5	Barriers & Facilitators of Physical Activity		
3	INTRODUCTION TO YOGA	15 hrs	37.5%
3.1	What is yoga?		
3.2	Types of yoga		
3.3	Benefits of yoga to various body systems		
3.4	Asanas, Pranayam		
3.5	Yoga therapy for various back pain, asthma, stress, hypertension, diabetes		

Course outcomes (COs)

At the end of the course, the student will be able:

CO1	Describe interrelation between physical activity, its physiological effects and changes in human anatomy.
CO2	Understand the health-related benefits of physical activity and risks associated with physical inactivity
CO3	Realize the areas of nutrition, cardiovascular health, diseases related to physical activity, stress management, substance use and abuse, and sexually transmitted diseases
CO4	Describe correlation of physical activity and mental health
CO5	Describe yoga, different types yoga and its application in different health disorders

A.Outline of The Course:

Sl. No.	Skill Sets
1	Communication and motivation skills for relatives, care givers and members of the multidisciplinary team
2	Communication skills with patients and primary caregiver
3	Procedural skills and Knowledge about common outcome measures in neurological sciences
4	Functional assessment in neurological patients
5	Diagnostic skills and knowledge
6	Common investigative procedures in neurological patients
7	Interpreting pathological & radiological assessments
8	Assessment and Evaluation Skills to record prognosis or progression
9	Goal setting based on the patient's complaints and preferences
10	Tailored protocol to optimize function of the individual
11	Application of Evidence Based Practice based on the individual clinical scenario
12	Effective family and patient education for community reintegration
13	Working effectively as a member of the rehabilitation team
14	Professional Commitment and Ethical attitude towards the patients

Clinical training comprises all of the formal and practical "real-life" learning experiences provided for students to apply knowledge and skills in the clinical environment. Experiences would include those of short and long duration (e.g., part-time, full-time) and those that provide a variety of learning experiences (e.g., rotations on different units within the same practice setting such as Physiotherapy OPD, Neuro OPD & IPD, NICU, etc.) to include comprehensive care of patients. Each student will be under the supervision of a clinical supervisor at the clinical education site who directly instructs and

supervises students during their clinical learning experiences. Clinical supervisors will evaluate each student twice during clinical training (mid-term and final) using a standard evaluation tool.

The student will be formally evaluated through **Objective Structured Clinical Examination (OSCE)** by the by internal and external examiners.

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Demonstrate professional behavior and respectful communication with patients, caregivers and colleagues in all educational activities
CO2	Incorporate patient safety competencies in all relevant learning activities
CO3	Safely administer and interpret standardized assessment procedures with published guidelines for reference
CO4	Demonstrate professional and academic integrity
CO5	Perform a basic neurological assessment to provide the relevant information for effective treatment planning for patients with neurological conditions across the lifespan
CO6	Identify and prioritize patient's problems

A. Detailed Syllabus:

1	INTRODUCTION TO RESEARCH	05 Hours	6%
1.1	Definition and need for research		
1.2	History of research in physiotherapy		
1.3	Research problem and research question		
1.4	Variables and its types		
1.5	Literature search using electronic databases		
2	STUDY DESIGNS	10 Hours	13%
2.1	Bias in research: types, the ways in which it can threaten study validity, measures to minimize bias in research		
2.2	Quantitative and qualitative research designs		
2.3	Internal and external validity of research		
2.4	Commonly used quantitative research designs and their major strength and limitations: Descriptive, observational, analytical and experimental study designs		
2.5	Overview of qualitative research methods		
3	SAMPLING	10 Hours	12%
3.1	Populations and samples		
3.2	Sampling methods: Probability and non-probability sampling methods		
3.3	Assignment to groups		
3.4	Sample size calculation		
4	DATA COLLECTION	15 Hours	19%
4.1	Primary versus secondary data collection		
4.2	Measurement error and the factors contribute to measurement error		
4.3	Outcome measures: types, validity, reliability and its uses in research		
5	BIOSTATISTICS	35 Hours	44%
5.1	Data display and summary		
5.2	Summary statistics for quantitative data		
5.3	Statements of probability and confidence intervals		
5.4	Choosing appropriate statistics		
5.5	Interpreting results of statistics such as p-value, confidence interval		
5.6	P-values, power, type I and type II errors		
5.7	Difference between clinical and statistical significance		
5.8	Use of computer software: Excel, SPSS		
6	PUBLISHING AND PRESENTING RESEARCH	05 Hours	6%

6.1	Types of publication
6.2	Peer review process
6.3	Components of research manuscript: IMRAD format
6.4	Introduction to the EQUATOR network reporting guidelines for various study design
6.5	Guidelines for presenting research: platform presentation, poster presentation

Course Outcomes (COs):

At the end of the course, the student will be able to

CO1	Develop understanding on various kinds of research, objectives of doing research, research process, research designs and sampling techniques.
CO2	Able to distinguish a purpose statement, a research question or hypothesis, and a research objective.
CO3	Identify and discuss the role and importance of research in the physiotherapy.
CO4	Differentiate between qualitative and quantitative research.
CO5	Have basic knowledge of data analysis-and hypothesis testing procedures
CO6	Prepare a research proposal

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	-	2	2	1	-	3	3
CO2	-	1	-	1	-	2	1
CO3	1	-	-	2	1	-	-
CO4	-	-	1	3	1	3	2
CO5	-	-	-	-	-	3	3
CO6	-	-	2	1	3	3	1

Recommended Study Material:

MPT (Neurological Sciences) - Semester I
PT794 MEASUREMENT IN PHYSIOTHERAPY

Credit Hours:

Hrs. / Wk.			Credits			Total Marks		Total
L	P	T	L	P	T	Theory	Practical	
4	-	4	4	-	4	100	-	100

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1.	MEASUREMENT IN CLINICAL PRACTICE	12
2.	VALIDITY	23
3	MEASUREMENT ERROR	15
4	COMMON MEASUREMENT TOOLS USED IN PHYSIOTHERAPY	30

Total hours (Theory): 80

Total hours (Practical): 00

Total hours: 80

B. Detailed Syllabus:

1	MEASUREMENT IN CLINICAL PRACTICE	12 Hours	15%
1.1	Need for standardized measurement in clinical practice		
1.2	Purpose of measurement in clinical practice: Screening, diagnosis, prognosis and treatment outcomes		
1.3	Levels of measurement: Nominal, ordinal, interval and ratio level		
1.4	WHO's ICF as a framework for measuring functioning and disability Classification of measurement tools: physiologic measures and biomarkers, performance based measures and self-reports, norm referenced and criterion referenced tests, disease specific and generic measures		
2	VALIDITY	23 Hours	29%
2.1	Content validity		
2.2	Construct Validity including convergent, discriminant concurrent and criterion validity		
2.3	Responsiveness to change		
2.4	Methods to evaluate various types of validity of measurement tools including responsiveness to change (MCID)		
2.5	Interpretation of validity assessment		
3	MEASUREMENT ERROR	15 Hours	19%
3.1	Measurement error: definition and sources of error		
3.2	Strategies to eliminate measurement error		
3.3	Estimation of measurement error associated with a measurement tool		
3.4	Reliability (test-retest, inter-intra rater reliability)		
3.5	Interpreting measurement error: Standard error of measurement (SEM) & The Bland- Altman plot , minimum detectable change (MDC), Receiver Operating Characteristic (ROC) curve		
4	COMMON MEASUREMENT TOOLS USED IN PHYSIOTHERAPY	30 Hours	38%
	Validity, interpretability and clinical utility of measures of the following:		
4.1	Measures of muscle performance: strength, tone, flexibility		
4.2	Measures of joint functions		
4.3	Measures of functional status		
4.4	Measures of pain		
4.5	Measures of balance and gait		
4.6	Measures of cardiovascular functions		
4.7	Screening tests of cognitive functions, nerve, muscle and other soft tissue integrity		

Course Outcomes (COs):

At the end of the course the student will be able to:

CO1	Recognize the value and importance of using standardized measurement tools in routine clinical practice.
CO2	Communicate the problems and biases that may arise when assessing constructs in clinical practice
CO3	Identify and define different types of reliability, distinguishing among types of reliability and their unique insights into the assessment of outcomes
CO4	Define measurement error, its types and recognize its influence in interpreting measurement scores
CO5	Evaluate and interpret the validity and errors of measurement tools in making clinical decisions about patient care.

2.	CURRICULUM DESIGNING	10
3.	PRINCIPLES & METHODS OF TEACHING	10
4.	MEASUREMENT AND EVALUATION	10
5.	GUIDANCE AND COUNSELING AND AWARENESS PROGRAMME	10
6.	PHYSIOTHERAPY PROFESSION AND STAFF ROLES	10

Total hours (Theory): 60 Hrs.

Total hours (Practical): 40 Hrs.

Total hours: 100 Hrs.

Detailed Syllabus:

1	CONCEPT OF TEACHING AND LEARNING	10 Hours	10%
1.1	Meaning and scope of Educational Psychology.		
1.2	Meaning and Relationship between teaching and learning.		
1.3	Learning Theories.		
1.4	Dynamics of behavior.		
1.5	Individual Meaning and concept.		
2	CURRICULUM	10 Hours	10%
2.1	Basis of curriculum formulation.		
2.2	Framing objectives for curriculum.		
2.3	Process of curriculum development and factors involved.		
2.4	Evaluation of curriculum differences.		
2.5	Curriculum planning – Integrated teaching, Problem based learning, Evidence based medicine.		
2.6	Skill development- Clinical skills, Communication skills, Counseling skills.		
3	PRINCIPLES AND METHODS OF TEACHING	10 Hours	10%
3.1	Bloom's taxonomy of instructional objectives.		
3.2	Writing instructional objectives in behavioral terms.		
3.3	Unit planning, Lesson planning.		
3.4	Lecture, Demonstration Discussion, Seminar, Assignment.		
3.5	Types of teaching aids.		
3.6	Principles of selection, preparation and use of audio-visual aides.		
4	MEASUREMENT AND EVALUATION	10 Hours	10%
4.1	Nature of educational measurement: meaning, process, types of tests.		
4.2	Construction of an achievement test and its analysis.		
4.3	Standardized test.		
4.4	Introduction of some standardized tools, important tests of intelligence.		
4.5	Aptitude and personality.		
4.6	Continuous and comprehensive evaluation.		
5	GUIDENCE AND COUSSELLING AWARENESS PROGRAMME	10 Hours	10%
5.1	Meaning & concepts of guidance and counseling.		
5.2	Principles of guidance and counseling.		
5.3	Awareness and guidance to the common people about health and diseases.		
6	PHYSIOTHERAPY PROFESSION AND STAFF ROLES	10 Hours	10%
6.1	Physiotherapy: Definition and Development.		

6.2	Physiotherapy practice in India and their demands. Physiotherapy services in rural and urban areas.
6.3	History taking, assessment, tests, Patient communication, documentation of findings, treatment organization and planning/execution for intervention.
6.4	Documentation of rehabilitation assessment and management using International
6.5	Standardized tests and scales used in various types of cases for assessment and interpretation in Physiotherapy practice.
6.6	Roles of Physiotherapy Director, Physiotherapy Supervisor, Physiotherapy Assistant, Physiotherapy, Occupational therapist, Home Health Aide and Volunteer

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Interpret the concept of teaching & learning
CO2	Design a curriculum for basic and advanced courses
CO3	Deliver the class in an effective manner by engaging all
CO4	Apply the managerial skills and knowledge in physiotherapy profession
CO5	Justify various teaching learning tools for effective assessment practices
CO6	Create counselling and awareness programme for various groups of patients

Course Articulation Matrix:

2.	NATIONAL & GLOBAL GUIDELINES, CODES AND REGULATIONS	15
3.	RESPECT FOR PERSONS: INFORMED CONSENT AND ASSENT PROCESS, VULNERABLE POPULATIONS	15
4.	SCIENTIFIC INTEGRITY & DATA MANAGEMENT	10
5.	PUBLICATION, PEER REVIEW AND AUTHORSHIP	10
6.	CONFLICT OF INTEREST & COMMITMENT	07

Total hours (Theory): 60 Hrs.

Total Hours (Practical):00 Hrs.

Total Hours (Practical): 00 Hrs.

B.Detailed Syllabus:

1.	HISTORY AND FRAMEWORK FOR ETHICAL CLINICAL RESEARCH	03 Hours	5 %
1.1	Ethics of clinical research, Historical Perspectives on Healthcare Research using human participants		
2.	NATIONAL & GLOBAL GUIDELINES, CODES AND REGULATIONS	15 Hours	25 %
2.1	Belmonte report, Nuremberg Code of Medical ethics, Helsinki Declaration CIOMS/WHO guidelines for epidemiological studies		
2.2	ICMR Guidelines for Biomedical Research using human participants: Ethical Principles of Ethical Research viz. essentiality, voluntariness, informed consent and community agreement, non-exploitation, privacy and confidentiality, precaution and risk minimization, Accountability and transparency professional conduct, public domain, totality of responsibility		
3.	RESPECT FOR PERSONS: INFORMED CONSENT AND ASSENT PROCESS, VULNERABLE POPULATIONS	15 Hours	25 %
3.1	Informed Consent Process, documentation of informed consent, waivers of informed consent, Assent and Permission for Children's Participation in research, compensation issues for research participation		
3.2	Defining and determining vulnerability in context of health care research, Beneficence & Justice, Vulnerability and cognitive impairment, Inclusion of non-competent subjects, Safeguards for vulnerable and non-competent subjects,		
3.3	Ethical Concerns for Vulnerable Population involving pregnant females, human fetuses, neonates, children, persons who are physically handicapped, mentally disabled, economically disadvantaged, educationally disadvantaged, Institutionalized		
4.	SCIENTIFIC INTEGRITY & DATA MANAGEMENT	10 Hours	16.67 %
4.1	Importance of scientific integrity in healthcare research, behaviors that affect scientific integrity, allegations of scientific misconduct, adverse events, scientific record, maintenance, responsibility of researchers for maintaining accuracy of scientific records, data retention		
4.2	Institutional Ethics Committee : Mandate, Role & composition of IEC in ensuring scientific integrity, Proposal Review Process and decision making		
5.	PUBLICATION, PEER REVIEW AND AUTHORSHIP	10 Hours	16.67 %
5.1	Purpose of publication, replication of results of new findings into clinical practice, avoiding fragmentary publication		

5.2	Authorship Issues: ICMJE guidelines to authorship, roles and responsibilities of authors and contributors		
5.3	Peer review: Purpose of peer review, elements of peer review		
6.	CONFLICT OF INTEREST & COMMITMENT	07 Hours	11.66 %
6.1	Defining COI for human research participants including authors, contributors, editorial boardmembers, reporting COI		

Course Outcomes (COs):

CO1	Describe the history and importance ethics of human subjects protections
CO2	Identify research activities that involve human subjects ethics
CO3	Discover the risks a research project might pose to participants and understand how to minimize the risks posed by a research project
CO4	Describe additional protections needed for vulnerable populations
CO5	Describe appropriate procedures for recruiting research participants and obtaining informed consent
CO6	Identify the different professional committees that monitor human subjects protections

PT875 IMAGING IN PHYSIOTHERAPY

Credit Hours:

Hrs. / Wk.			Credits			Total Marks		Total
L	P	T	L	P	T	Theory	Practical	
3	2	5	3	1	4	100	100	200

A. Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	INTRODUCTION TO IMAGING	12
2.	RADIOLOGIC EVALUATION, SEARCH PATTERNS AND DIAGNOSIS	8
3.	RADIOLOGIC EVALUATION OF MUSCULOSKELETAL DISORDERS	16
4.	RADIOLOGIC EVALUATION OF NEUROLOGICAL DISORDERS	12
5.	RADIOLOGIC EVALUATION OF CARDIORESPIRATORY DISORDERS	12

Total hours (Theory): 60 Hrs.

Total hours (Practical): 40 Hrs.

Total hours: 100 Hrs.

B. Detailed Syllabus:

1	INTRODUCTION TO IMAGING	12 Hours	20%
1.1	Introduction to: Radiology (X-Ray), Computer tomography (CT), Magnetic resonance imaging (MRI), Diagnostic ultrasound, Angiography, Doppler and Echocardiogram.		
1.2	Role of the various imaging modalities: strengths, limitations, relative cost, associated risks, ionizing radiations, Contrast media-related issues.		
1.3	Integration of Imaging Into Physiotherapy Practice.		
2	RADIOLOGIC EVALUATION, SEARCH PATTERNS AND DIAGNOSIS	8 Hours	13.3%
2.1	Search pattern: the ABCs of radiologic analysis.		
2.2	Understanding the image and the radiologic report.		
3	RADIOLOGIC EVALUATION OF MUSCULOSKELETAL DISORDERS	16 Hours	26.6%
3.1	Routine radiologic evaluation & Advance imaging evaluation of common spine, upper limb and lower limb disorders.		
4	RADIOLOGIC EVALUATION OF NEUROLOGICAL DISORDERS	12 Hours	20%
4.1	Routine radiologic evaluation & Advance imaging evaluation of common neurological disorders.		
5	RADIOLOGIC EVALUATION OF CARDIORESPIRATORY DISORDERS	12 Hours	20%
5.1	Routine radiologic evaluation & Advance imaging evaluation of common cardiorespiratory disorders.		

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Understand the concept of imaging techniques used in musculoskeletal, neurological and cardiorespiratory disorders.
CO2	Interpret the imaging based on the evidence, ethical and legal standards.
CO3	Integrate imaging concept in clinical assessment and management
CO4	Practice effective inter-professional communication in rehabilitation team.
CO5	Criticize the imaging study and communicate effectively with various stakeholders.

Course Articulation Matrix:

II	HS705	Academi c Writing	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title / Topic	Classroom Contact Hours
1	Academic Writing and Research Process • Introduction to Academic Writing • Academic Writing as a Part of Research • Types of Academic Writing • Features of Academic Writing • Importance of Good Academic Writing in various Academic Works	05
2	Anatomy of Academic Writing • Academic Vocabulary • Simple and Complex Sentences • Organizing Paragraphs • The Writing Process • Adopting Academic Writing Style	05
3	Key Academic Skills • Note – taking • Note – making • Paraphrasing • Summarizing	05
4	Accuracy in Academic Writing • Lexical Range • Academic Language and Structures • Elements of Writing • <i>Proof Reading, Editing, and Rewriting</i>	05
5	Using and Citing Sources of Ideas • Academic Texts and their Types • Intellectual Honesty in Academic Writing • Avoiding Plagiarism – Idea Theft • Degrees of Plagiarism • Types of Borrowing • Anatomy of Citations • <i>Common Citation Styles</i>	05

6	Contemporary Practices in Academic Writing - Analytical Essays - Graph / Table / Process Interpretation and Description - Writing Reports - Writing Research / Concept Papers	05
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like writing, group work, independent and collaborative research, etc.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Paragraph Writing	1	3	03
2	Note-taking / Note-making	1	3	03
3	Paraphrasing / Summarizing	1	4	04
4	Essay Writing	1	5	05
5	Concept Paper Writing	1	10	10
5	Attendance and Class Participation			05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the professional communication skills and academic writing skills of the students.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical /Quiz/ Project / Academic Writing	-	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	have sound understanding of the concept and applications of academic writing
CO2	have acquired enough knowledge of academic writing style, strategy and approach
CO3	be able to demonstrate error free and effective academic writing
CO4	be able to demonstrate ability to work on project/report/paper writing
CO5	understand the concept of plagiarism and learn to use different citation styles as a part of referencing

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3	-	-	-	-	-	-
CO2	3	-	-	-	-	-	-
CO3	3	-	-	-	-	-	-
CO4	3	-	-	-	3	-	-
CO5	3	-	-	-	-	-	2

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

2.	NUTRITION AND HEALTH	15
3.	SPORTS AND LIFE SKILLS EDUCATION	15

Total hours (Theory): 00

Total Hours (Practical):40

Total Hours: 40

B. DETAILED SYLLABUS:

1	INTRODUCTION TO THE USE OF DRUGS IN SPORT	10 Hours	25%
1.1.	Concept of Physical Education, Meaning, Definition, Aims and Objectives of Physical Education, Need and Importance of Physical Education		
1.2	Physical Education and its Relevance in Inter Disciplinary Context		
1.3	Physical Fitness Components: Type of Fitness, Health Related Physical Fitness, Performance Related Physical Fitness		
2	NUTRITION AND HEALTH	15 Hours	37.5%
2.1	Concept of Food and Nutrition, Balanced Diet, Food Pyramid Index		
2.2	Macro and Micronutrients: Types, functions and classification system		
2.3	Carbohydrates: Types, RDA data, Glycemic index, Sources of Fats, saturated, unsaturated fats, recommended intake, importance of fat in diet, fats in health and disease		
2.4	Protein: Types EAA, function, assessing quality of proteins, selecting incomplete Proteins, RDA sources.		
2.5	Vitamins And Minerals: Types, functions, sources, and minerals - calcium, Phosphorus, iron, magnesium, sodium, potassium, and chloride. Trace elements - Sources and functions.		
2.6	Determining Caloric Intake and Expenditure, Obesity, Causes and Preventing Measures – Role of Diet and Exercise, Importance of hydration in exercise		
3	SPORTS AND LIFE SKILLS EDUCATION	15 Hours	37.5%
3.1	Sports and Socialization		
3.2	Physical Activity and Sport – Emotional Adjustment and Wellbeing		
3.3	Substance Abuse among Youth – Preventive Measures and Remediation		
3.4	Yoga, Meditation and Relaxation		
3.5	Sports and Character Building		
3.6	Values in Sports		
3.7	Sports for World Peace and International Understanding		

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	To underline general concepts of physical education and physical fitness.
CO2	To Appraise the importance of exercise in the maintenance of health and fitness.
CO3	To promote and understand the value of sports for life skill development.

CO4	Introduce nutritional principles and application to improve overall health.
CO5	To apply fitness related components in fitness assessment.

A. Outline of the course:

Sl. No.	Skill Sets
1	Communication and motivation skills for relatives, care givers and members of the multidisciplinary team
2	Counseling skills for patients and primary caregiver in case of deteriorating condition or chronic disability
3	Knowledge of application and interpretation of common outcome measures in neurological sciences
4	Functional assessment in neurological patients
5	Diagnostic skills and knowledge
6	Common investigative procedures in neurological patients
7	Interpreting pathological & radiological assessments
8	Assessment and Evaluation Skills to record prognosis or progression
9	Goal setting based on the patient's complaints and preferences
10	Tailored protocol to optimize function of the individual
11	Application of Evidence Based Practice based on the individual clinical scenario
12	Effective family and patient education for community reintegration
13	Working effectively as a member of the rehabilitation team
14	Professional Commitment and Ethical attitude towards the patients

Clinical training comprises all of the formal and practical "real-life" learning experiences provided for students to apply knowledge and skills in the clinical environment. Experiences would include those of short and long duration (e.g., part-time, full-time) and those that provide a variety of learning experiences (e.g., rotations on different units within the same practice setting such as Physiotherapy OPD, Neuro OPD & IPD, NICU, etc.) to include comprehensive care of patients. Each student will be under the supervision of a clinical supervisor at the clinical education site who directly instructs and supervises students during their clinical learning experiences. Clinical supervisors will evaluate each student twice during clinical training (mid- term and final) using a standard evaluation tool.

The student will be formally evaluated through **Objective Structured Clinical Examination (OSCE)** by the by internal and external examiners.

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Self-assess knowledge, skills, behaviors and attitudes during learning sessions
CO2	Deliver information to the patient and family in such a way that it is understandable, encourages discussion and promotes patient participation in decision-making
CO3	Recognize the psychosocial aspects of disability in treatment planning and relative to the individual's role in his/her family and society
CO4	Recognize the importance of record keeping in patient management, communication and service delivery
CO5	Appropriately select, modify as necessary, and correctly demonstrate advanced physiotherapeutic treatment procedures commonly used in the management of neurological dysfunction
CO6	Demonstrate team work for group activities

Course Articulation Matrix:

A. Outline of The Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	MOTOR CONTROL	30
2.	MOTOR DEVELOPMENT	20
3	MOTOR LEARNING	30

Total hours (Theory): 80

Total hours (Practical): 00

Total hours: 80

B. Detailed Syllabus:

1	MOTOR CONTROL	30 Hours	38%
1.1	What is Motor control		
1.2	Motor control: Importance for Physiotherapist		
1.3	Movement: Nature and Analysis		
1.4	Theories of Motor control: Reflex theory, Hierarchical theory, Motor programming theory, Systems theory, Dynamic action theory, Ecological theory		
1.5	Physiology of Motor control		
2	MOTOR DEVELOPMENT	20 Hours	24%
2.1	Theories of Motor Development: Maturation and Dynamic Systems theories of motor development		
2.2	Development of postural control		
2.3	A lifespan perspective of mobility		
2.4	Reach, Grasp and Manipulation: Changes across the lifespan		
3	MOTOR LEARNING	30 Hours	38%
3.1	Theories of Motor learning: Adam's closed loop theory, Schimdt's schema theory, Ecological theory, and theories related to stages of learning motor skills		
3.2	Human information processing		
3.3	Practice Conditions		
3.4	Augmented Feedback		

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Describe the concepts of motor control, motor development and motor learning theories and their application to physiotherapy practice
CO2	Discuss factors influencing motor learning for skill acquisition
CO3	Demonstrate concepts of practice, feedback, stages of learning through lab activities and clinic experience related to this course
CO4	Explain factors that influence therapy interventions related to principles of motor learning and motor control
CO5	Describe a model for clinical decision making that incorporates components of motor control, motor development and motor learning

1.	INTRODUCTION TO LITERATURE REVIEW	10
2.	ACCESSING LITERATURE	15
3	SUMMARISING AND SYNTHESISING INFORMATION	15
4	WRITING UP THE LITERATURE REVIEW	20

Total hours (Theory) : 60 Hrs.

Total hours (Practical): 40 Hrs.

Total hours: 100 Hrs.

B. Detailed Syllabus:

1	INTRODUCTION TO LITERATURE REVIEW	10 Hours	17%
1.1	Introduction and Definition		
1.2	Annotated bibliography vs. literature review		
1.3	Purpose of a literature review		
1.4	Types : narrative review and systematic review		
2	ACCESSING LITERATURE	15 Hours	25%
2.1	Formulating the search question		
2.2	Developing key words and search strategy		
2.3	PubMed Search: Using MeSH terms, advance search, use of limits and filters		
3	SUMMARISING AND SYNTHESISING INFORMATION	15 Hours	25%
3.1	Critical appraisal of the literature		
3.2	Structuring the literature review: The funnel method		
3.3	Coding and creating a matrix		
3.4	Analyzing the literature: Meta-analysis, Meta ethnography and thematic analysis		
4	WRITING UP THE LITERATURE REVIEW	20 Hours	33%
4.1	Sources of bias in creating and completing a literature review.		
4.2	Mistakes commonly made in reviewing research literature		
4.3	Criteria for good literature review		
4.4	Avoiding plagiarism and misinterpretation		

Course Outcome (COs):

At the end of the course, the student will be able to

CO1	Formulate an appropriate review question
CO2	Develop literature search strategy relevant to the review question
CO3	To critically appraise literature in the context of its contribution to understanding the research problem being studied.
CO4	Demonstrate how to construct and write a literature review

4.4	Palliative Care		
5	INFECTIONS IN NEONATES	10 Hours	12%
5.1	Timing of Infections		
5.2	Types of Neonatal infection		
5.3	Identifying and Treating Minor & Major Infections		
6	MANAGEMENT OF MORBIDITIES IN NEONATES	20 Hours	25%
6.1	Respiratory (RDS, ;BPD, MAS, Apnea of Prematurity, Birth Asphyxia, TTN)		
6.2	Neurological (PVL, HIE, IVH, Encephalopathy, NEC, ROP)		
6.3	Polycythemia, Anemia, Hypotension, Hypoglycemia, IEM, PDA		
7	FAMILY CENTERED CARE	8 Hours	10%
7.1	Professional- Parent Partnerships		

7.2	Parents' responses and Parent-Infant Interaction
7.3	Caregiving and the Environment
7.4	Sleep position protocols

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Demonstrate skills of communication, assessment and management and recognize potential adverse outcomes for the neonate
CO2	Interpret indications, limitations, and gestational-age norms laboratory and imaging studies unique to the NICU setting
CO3	Evaluate, formulate a differential diagnosis with appropriate prioritization and manage common signs and symptoms of disease in high risk newborns
CO4	Demonstrate effective approach to assessment and daily management of seriously ill neonates using decision-making and problem solving skills
CO5	Demonstrate effectively as a part of an interdisciplinary team member in the NICU
CO6	Demonstrate knowledge of ethical and medical-legal consideration in the care of critically ill newborns

A. Outline of The Course:

Sl. No.	Skill Sets
1	Communication and motivation skills for relatives, care givers and members of the multidisciplinary team
2	Counseling skills for patients and primary caregiver in case of deteriorating condition or chronic disability
3	Knowledge of application of the most appropriate outcome measures in neurological sciences and its accurate interpretation
4	Functional assessment in neurological patients in line with the standardized/ universal tools like ICF
5	Differential Diagnostic skills and knowledge
6	Disease specific investigative procedures in line with guideline or evidence in neurological patients
7	Interpreting pathological & radiological assessments for the diagnosis as well as prognosis
8	Assessment and Evaluation Skills to record prognosis or progression
9	Goal setting based on the patient's complaints and preferences
10	Tailored protocol to optimize function of the individual
11	Application of Evidence Based Practice based on the individual clinical scenario
12	Effective family and patient education for community reintegration
13	Working effectively as a member of the rehabilitation team and demonstrate leadership qualities
14	Professional Commitment and Ethical attitude towards the patients

Clinical training comprises all of the formal and practical "real-life" learning

experiences provided for students to apply knowledge and skills in the clinical environment. Experiences would include those of short and long duration (e.g., part-time, full-time) and those that provide a variety of learning experiences (e.g., rotations on different units within the same practice setting such as Physiotherapy OPD, Neuro OPD & IPD, NICU, etc.) to include comprehensive care of patients. Each student will be under the supervision of a clinical supervisor at the clinical education site who directly instructs and supervises students during their clinical learning experiences. Clinical supervisors will evaluate each student twice during clinical training (mid-term and final) using a standard evaluation tool.

The student will be formally evaluated through **Objective Structured Clinical Examination (OSCE)** by the by internal and external examiners.

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Identify PT treatments specific to adults with neurological condition population according to the best evidence to date
CO2	Identify how to progress the patient towards achieving set goals
CO3	Monitor patient response to therapy/exercise and adjust treatment accordingly
CO4	Identify and recommend appropriate equipment, devices, and orthotics
CO5	Provide safe exercise to patients and maintain ethical norms while working in clinical set up.

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
FACULTY OF MEDICAL SCIENCES
ASHOK & RITA PATEL INSTITUTE OF PHYSIOTHERAPY
MPT (Neurological Sciences) - Semester III
PT910.01-DISSERTATION I

INTRODUCTION

The dissertation is aimed to train a postgraduate student in research methods and techniques. It includes identification of a problem, formulation of a hypothesis, search and review of literature getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparison of results and drawing conclusions. Every candidate pursuing MPT degree course is required to carry out work on a selected research project under the guidance of a recognized postgraduate teacher. The result of such a work shall be submitted in the form of dissertation.

Course Work:

Submission of dissertation proposal to the dissertation proposal approval committee

Content of a proposal:

The proposal shall include the following sections.

- 1. Introduction:** This should give a short overview of the problem, issues, or topic to be studied and reasons why it is an important problem to study. Often, it includes some historical background of the problem.
- 2. Statement of the problem:** This is a more complete discussion of the problem of the dissertation. The major questions, hypotheses, or statements should be included with a possible list of secondary questions if appropriate. This section is an extended discussion of the problem often with some literature noted.
- 3. Statement of the significance of this study to the field :** In other words, why is this study important? It should include a statement about how it advances knowledge in the field with reference to past literature and general concerns of the area.
- 4. Literature Review related to the problem, issue, or topic:** In this, various schools of thought on this problem are explored with significant attention to the conceptual and the theoretical aspects of the problem and how those contribute to the topic's development.
- 5. Methodology:** It includes a discussion of the research design, the population to be studied, discussion of appropriate instruments, sampling concerns, data collection approaches, analyses to be conducted and a projected timetable for completion of the dissertation.
- 6. Limitations:** It is to clarify or limit the scope of the method(s) employed in this study.

Once the student has received the permission from their Dissertation guide to defend their proposal, the proposal defense will be scheduled. The proposal approval committee would be constituted consisting of 3 members with one external member, one internal faculty (other than

guide) from the institute and the head of institute. The dissertation committee member's backgrounds should complement the area of anticipated study. This does not require that each member be an expert on every aspect of the study. Potentially, the members will all bring different strengths or knowledge bases to the committee.

The dissertation proposal approval committee approves the dissertation proposal subject to the further approval from IRB.

The Institutional Review Board Approval Process:

Researchers who use human participants in their research must follow specific guidelines as a condition for using the data provided by these persons. If the proposal involves human participants, the student will need to submit an application to the Institutional Review Board (IRB) of the Institute. In consultation with his or her Guide, the student prepares an IRB application and submits it to the institute's IRB coordinator. The IRB judge's application on issues related to protection of participants from physical and emotional distress and not on theoretical or methodological grounds. The study cannot go forward until IRB approval is received. In many cases, minor revisions to the study will be necessary to gain approval. Collecting data prior to receiving IRB approval is considered sufficient grounds for halting a research study. In general, students should not submit their IRB application before the proposal defense as any major changes in the proposal would necessitate re-applying to the IRB.

This proposal is considered an agreement or contract describing how the student will conduct the study and cannot be changed without guide/committee approval. Substantial changes to the methods, goals, and objectives articulated in a proposal will necessitate a new proposal defense.

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Recognise the importance of planning and preparation required to undertake a research project
CO2	Articulate a clear research question or problem and formulate a hypothesis
CO3	Know existing body of research relevant to their topic and explain how their project fit
CO4	Critically analyse and evaluate the knowledge and understanding in relation to the agreed area of study
CO5	Design an appropriate research proposal to carry out research

1.2	The biopsychosocial model of disability		
1.3	Family centered care		
1.4	Application of WHO's International Classification of Functioning, Disability and Health in paediatric physiotherapy		
2	CEREBRAL PALSY (CP)	15 hrs	25%
2.1	Epidemiology, classification, risk factors, clinical features, diagnosis and medical and surgical management of CP		
2.2	Assessment of motor development, sensorimotor impairments, gross motor functions and activities of daily living, and family needs of children and adolescents with CP		
2.3	Neonatal care: Screening and early intervention		
2.4	Impairment and activity based interventions in the management of CP in improving motor development and participation at home, school and in the community		
2.5	Prevention and management of secondary complications of CP		
3	BRACHIAL PLEXUS INJURY	10 hrs	16%
3.1	Epidemiology, classification, risk factors, clinical features, diagnosis and medical and surgical management of brachial plexus injury in neonates and children.		
3.2	Assessment of sensorimotor impairments, upper limb functions and activities of daily living in children and adolescents with brachial plexus injuries.		
3.3	Rehabilitation of Brachial Plexus injuries: Management of muscle atrophy, pain, sensory reeducation, Constraint Induced Movement Therapy (CIMT).		
3.5	Prevention and management of complications		
4	SPINA BIFIDA	10 hrs	17%
4.1	Epidemiology, classification, risk factors, clinical features, diagnosis and medical and surgical management of children with spina bifida.		
4.2	Assessment of sensorimotor impairments, bowel and bladder dysfunctions, pressure sore and activities of daily living and quality of life in children and adolescents with Spina bifida.		
4.3	Early Intervention and age specific physiotherapy management: newborn and infant, toddler and preschool, school age.		
4.4	Prevention and management of complications		

5	MUSCULAR DYSTROPHIES	10 hrs	17%
5.1	Epidemiology, pathology and clinical features, disease progression, differential diagnosis, medical and surgical management		
5.2	Interventions to maintain and improve flexibility, physical fitness, strength, mobility, and quality of life.		
5.3	Prevention and management of secondary complications		

Course Outcomes (COs):

CO1	Demonstrate professional behavior and respectful communication with parents and children with various childhood onset neurological disorders
CO2	Describe the epidemiology, etiology, pathophysiology, development and prognosis of selected progressive and non-progressive neurological disorders of childhood
CO3	Determine appropriate tests and measures, for generic and selected paediatric neurological conditions based on patient presentation
CO4	Evaluate the role of the physiotherapist in acute, community and voluntary settings, within the multi-disciplinary team, in managing and caring for children with paediatric neurological conditions
CO5	Formulate acute and long term physiotherapy interventions for the management of paediatric neurological conditions, in the context of the evolving evidence base and ethical framework

Course Articulation Matrix:

B.Outline of the course:

Sr No.	Title of the unit	Minimum number of hours
1.	PRINCIPLES OF ADULT NEUROPHYSIOTHERAPY	10
2.	STROKE	10
3	TRAUMATIC BRAIN INJURY	10
4	SPINAL CORD INJURY	10
5	DISEASES OF MYONEURAL JUNCTION	10
6	EXTRAPYRAMIDAL AND MOVEMENT DISORDERS	5
7	DEMYELINATING DISEASES, POLYNEUROPATHIES AND OTHER DISORDERS OF THE PERIPHERAL NERVOUS SYSTEM	5

Total hours (Theory) : 60

Total hours (Practical): 80

Total hours: 140

Detailed syllabus:

1	PRINCIPLES OF ADULT NEUROPHYSIOTHERAPY	10 hrs	17%
1.1	Multi-disciplinary care in Neurorehabilitation		
1.2	Brain recovery following disease and Neuroplasticity		
1.3	Evidence based clinical decision making in Neurophysiotherapy		
1.4	Goal Setting and Patient centered care		
1.5	Health promotion and disease prevention		
2	STROKE	10 hrs	17%
2.1	Stroke epidemiology, classification, risk factors, clinical syndromes		
2.2	Acute care in stroke rehabilitation: Early rehabilitation interventions and prevention of complications		
2.3	Measurement of post stroke severity, sensorimotor impairments, fall risk, gait, endurance and functional status.		
2.4	Evidence based stroke rehabilitation interventions to improve mobility and transfer including walking and sit to stand, self-care, upper limb functions, fall prevention, domestic and social life participation including work.		
2.5	Management of secondary complications such as shoulder subluxation and pain, fatigue, and depression.		
3	TRAUMATIC BRAIN INJURY	10 hrs	17%
3.1	Epidemiology, pathophysiology, classification and recovery from traumatic brain injury.		
3.2	Impairment of consciousness, sensorimotor, cognitive and behavioral changes associated with traumatic brain injury.		
3.3	Examination of level of consciousness, cognitive and sensorimotor functions, functional status and quality of life.		
3.4	Management: Acute care, physiotherapy in intensive care unit, managing patients with low level of consciousness, attention and memory, rehabilitation of mobility, self-care and community reintegration.		
4	SPINAL CORD INJURY	10 hrs	17%
4.1	Types, classifications, clinical syndromes of traumatic and non-traumatic spinal cord injuries		

4.2	Measurement of impairments and disabilities following spinal cord injury: motor and sensory function, ADL, ambulation status, spasticity, autonomic function, depression, quality of life		
4.3	Acute care and prevention of complication such as orthostatic hypotension, autonomic dysreflexia, pressure sores, bowel and bladder incontinence, venous thromboembolism, cardiovascular complications		
4.4	Rehabilitation after spinal cord injury: mobility, self-care, domestic life and social participation including work, respiratory management, wheeled mobility, seating equipment and other assistive technologies, pain, and spasticity.		
5	DISEASES OF MYONEURAL JUNCTION	10 hrs	17%
5.1	Myasthenia gravis and Lambert Eaton Syndrome: Epidemiology, pathology and clinical features, disease progression, differential diagnosis, medical and surgical management		
5.2	Interventions to maintain and improve flexibility, physical fitness, strength, mobility, and quality of life.		
5.3	Prevention and management of secondary complications		
6	EXTRAPYRAMIDAL AND MOVEMENT DISORDERS	5 hrs	7%
6.1	Parkinson’s Disease and other parkinsonian disorders: Epidemiology, pathophysiology clinical features, disease progression, differential diagnosis, medical and surgical management		
	Classification of severity, measurement of fall risk, functional status and quality of life		
6.2	Interventions to improve flexibility, physical fitness, mobility, self-care, domestic and social participation, and fall risk prevention strategies		
6.3			
7	DEMYELINATING DISEASES, POLYNEUROPATHIES AND OTHER DISORDERS OF THE PERIPHERAL NERVOUS SYSTEM	5 hrs	8%
7.1	Polyneuropathies: Classification, types and management		
7.2	Management of Multiple Sclerosis and acute disseminated encephalomyelitis		
7.3	Rehabilitation of Guillain-Barre syndrome, Bell’s palsy, carpal tunnel syndrome, Benign paroxysmal positional vertigo, common peroneal and radial nerve dysfunction		

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Apply advanced clinical reasoning skills and an evidence-based approach to decision making in neurological physiotherapy practice
-----	---

CO2	Apply the principles of neuroscience to the understanding of pathophysiology
CO3	Identify and understand the various roles of the PT through the course of the
CO4	disease/injury and the individual's life including patient and family education"
CO5	Explain the principles of exercise prescription and the rationale for selecting specific exercises for the purposes of improving functional outcomes for individuals with neurological conditions
CO6	Apply principles of motor control and motor learning to formulate and implement a safe and effective treatment plan with short and long-term goals

Course Articulation Matrix:

A. Outline of the course:

Sl. No.	Skill Sets
1	Communication and motivation skills for relatives, care givers and members of the multidisciplinary team
2	Counseling skills for patients and primary caregiver in case of deteriorating condition or chronic disability
3	Knowledge of application of the most appropriate outcome measures in neurological sciences and its accurate interpretation
4	Functional assessment in neurological patients in line with the standardized/ universal tools like ICF
5	Differential Diagnostic skills and knowledge
6	Disease specific investigative procedures in line with guideline or evidence in neurological patients
7	Interpreting pathological & radiological assessments for the diagnosis as well as prognosis
8	Assessment and Evaluation Skills to record prognosis or progression
9	Goal setting based on the patient's complaints and preferences
10	Tailored protocol to optimize function of the individual
11	Application of Evidence Based Practice based on the individual clinical scenario
12	Effective family and patient education for community reintegration
13	Working effectively as a member of the rehabilitation team and demonstrate leadership qualities
14	Professional Commitment and Ethical attitude towards the patients

Clinical training comprises all of the formal and practical "real-life" learning experiences provided for students to apply knowledge and skills in the clinical environment. Experiences would include those of short and long duration (e.g., part-time, full-time) and those that provide a variety of learning experiences (e.g., rotations on different units within the same practice setting such as Physiotherapy OPD, Neuro OPD& IPD, NICU, etc.) to include comprehensive care of patients. Each student will be under the supervision of a clinical supervisor at the clinical education site who directly instructs and supervises students during their clinical learning experiences. Clinical supervisors will evaluate each student twice during clinical training (mid-term and final) using a standard evaluation tool.

The student will be formally evaluated through **Objective Structured Clinical Examination (OSCE)** by the by internal and external examiners.

Course Outcomes (CSO):

At the end of the course, the students will be able to

CO1	Identify PT treatments specific to adults with neurological condition population according to the best evidence-to date
CO2	Identify how to progress the patient towards achieving set goals
CO3	Monitor patient response to therapy/exercise and adjust treatment accordingly
CO4	Identify and recommend appropriate equipment, devices, and orthotics
CO5	Provide safe exercise to patients and maintain ethical norms while working in clinical set up.
CO6	Identify PT treatments specific to adults with neurological condition population according to the best evidence-to date

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
FACULTY OF MEDICAL SCIENCES
ASHOK & RITA PATEL INSTITUTE OF PHYSIOTHERAPY
MPT (Neurological Sciences) - Semester IV
PT914.01- DISSERTATION II

Course work:

Submission of the completed dissertation

Content :

Every candidate shall submit to the Registrar (Academic) of the university in the prescribed proforma, within 1 month from the date of commencement of the course on or before the dates notified by the university.

The dissertation should be written under the following headings.

1. Introduction
2. Aims or objectives of study
3. Review of literature
4. Methodology
5. Results
6. Discussion
7. Conclusion
8. Summary
9. References
10. Tables & Figures
11. Annexure.

The printed text of dissertation should not be less than 50 pages/2500 words and shall not exceed 75 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing (Font 12, Times New Roman) on one side of paper (A4 Size, 8.27" X 11.69") and

Hard bound properly (No Spiral binding). Four copies of dissertation thus prepared shall be submitted to the Registrar (Evaluation), one month before final examination on or before the dates notified by the university duly certified by the guide, head of the department and head of the institution. In the Dissertation the Candidate should not disclose his Identity or of the Guide or Institution in anyway.

Three examiners appointed by the university shall evaluate the dissertation. Two of the examiners (external) shall be from outside university and one examiner (internal) will be from the institute.

A candidate who has submitted his/her dissertation once is not required to submit a fresh dissertation if he/she reappears for the examination in the same branch on the subsequent occasion, provided the dissertation has been accepted by the examiners.

If the student has submitted her examination form & also his/her dissertation previously, he/she will be permitted to give the examination within a period of 4 years anytime in future provided the dissertation has been accepted. The terms satisfactorily kept by him will be valid for a period of 4 years subsequent to submission of the dissertation after which he/she will have to undergo Post-graduate training again for terms to be eligible for appearing for theory & Practical examination.

POST-GRADUATE GUIDE:

A PG guide must have a Post-Graduate Degree in Physiotherapy with at-least 5 years of full time teaching in the core areas of physiotherapy after post-graduation. Notwithstanding the above clause, in a case of acute shortage of qualified Post-Graduate guides, a PG teacher with 3 years full time teaching experience after Masters Degree can be considered. The PG guide can only guide student belonging to his/her specialized branch. These clauses may be reviewed after two years. The age of teacher /guide shall not exceed 62 years and the guide student ratio shall be 1: 3.

Co-guide: may be included provided the work requires substantial contribution from a sister department or from another medical institution recognized for teaching /training by the University. The co- guide shall be a recognized postgraduate teacher of the University

Change of Guide: In the event of a recognized guide leaving the college for any reason or in the event of death of guide, another recognized guide may take over the duties of the guide with prior permission from the university.

Course Outcomes (COs):

At the end of the course, the students will be able to

CO1	Identify, analyse and interpret suitable data to enable the research question to be answered
CO2	Demonstrate the ability to collate and critically assess/interpret data
CO3	Develop an ability to effectively communicate knowledge in a scientific manner
CO4	Describe the process of carrying out independent research in written format and report your results and conclusions with reference to existing literature
CO5	Work autonomously in an effective manner, setting and meeting deadlines
CO6	Present the research effectively in a conference setting or a written publication

Course Articulation Matrix:
