ACADEMIC REGULATIONS & SYLLABI

Faculty of Management Studies
Master of Business Administration (MBA)
Batch: 2024-26

Education Campus – Changa, (ECC), hitherto a conglomerate of institutes of professional education in Engineering, Pharmacy, Computer Applications, Management, Applied Sciences, Physiotherapy and Nursing, is one of the choicest destinations by students. It has been transformed into Charotar University of Science and Technology (CHARUSAT) through an Act by Government of Gujarat. CHARUSAT is permitted to grant degrees under Section-22 of UGC – Government of India.

The journey of CHARUSAT started in the year 2000, with only 240 Students, 4 Programmes, one Institute and an investment of about Rs. 3 Crores (INR 30 million). At present there are nine different institutes falling under ambit of six different faculties. The programmes offered by these faculties range from undergraduate (UG) to Ph.D degrees. These faculties, in all offer 74 different programmes. A quick glimpse is as under:

Faculty	Institute	Programmes Offered
Faculty of Technology and Engineering	Chandubhai S. Patel Institute of Technology	B.Tech M.Tech Ph.D
Faculty of Pharmacy	Ramanbhai Patel College of Pharmacy	B.Pharm M.Pharm Ph.D PGDCT / PGDPT
Faculty of Management Studies	Indukaka Ipcowala Institute of Management	BBA MBA Ph.D
Faculty of Computer Applications	Smt. Chandaben Mohanbhai Patel Institute of Computer Applications.	BCA MCA M.Sc IT Ph.D BCA
Faculty of Sciences	P.D. Patel Institute of Applied Sciences	B.Sc M.Sc Ph.D
Faculty of Medical Sciences	Ashok and Rita Institute of Physiotherapy	B.PT M.PT Ph.D
	Manikaka Topawala Institute of Nursing	B.Sc (Nursing) P.B. B.Sc. Nursing GNM

		M.Sc. Ph.D
	Bapubhai Desai bhai Patel Institute of Paramedical Sciences	BMIT BSMT BOTAT BOP MSc. MIT MSMLT MSOTAT PGDMLT PGDCH Ph. D

The development and growth of the institutes have already led to an investment of over Rs.150 Crores (INR 1500 Million). The future outlay is planned with an estimate of Rs.250 Crores (INR 2500 Million).

The University is characterized by state-of-the-art infrastructural facilities, innovative teaching methods and highly learned faculty members. The University Campus sprawls over 125 acres of land and is Wi-Fi enabled. It is also recognized as the Greenest Campus of Gujarat.

CHARUSAT is privileged to have 360 core faculty members, educated and trained in IITs, IIMs and leading Indian Universities, and with long exposure to industry. It is also proud of its past students who are employed in prestigious national and multinational corporations.

From one college to the level of a forward-looking University, CHARUSAT has the vision of entering the club of premier Universities initially in the country and then globally. **High Moral Values like Honesty, Integrity and Transparency** which has been the foundation of ECC continues to anchor the functioning of CHARUSAT. Banking on the world class infrastructure and highly qualified and competent faculty, the University is expected to be catapulted into top 20 Universities in the coming five years. In order to align with the global requirements, the University has collaborated with internationally reputed organizations like Pennsylvania State University – USA, University at Alabama at Birmingham – USA, Northwick Park Institute –UK, ISRO, BARC, etc.

CHARUSAT has designed curricula for all its programmes in line with the current international practices and emerging requirements. Industrial Visits, Study Tours, Expert Lectures and Interactive IT enabled Teaching Practice form an integral part of the unique CHARUSAT pedagogy.

The programmes are credit-based and have continuous evaluation as an important feature. The pedagogy is student-centered, augurs well for self-learning and motivation for enquiry and research, and contains innumerable unique features like:

- Participatory and interactive discussion-based classes.

- Sessions by visiting faculty members drawn from leading academic institutions and industry.
- Regular weekly seminars.
- Distinguished lecture series.
- Practical, field-based projects and assignments.
- Summer training in leading organizations under faculty supervision in relevant programmes.
- Industrial tours and visits.
- Extensive use of technology for learning.
- Final Placement through campus interviews.

Exploration in the field of knowledge through research and development and comprehensive industrial linkages will be a hallmark of the University, which will mould the students for global assignments through technology-based knowledge and critical skills.

The evaluation of the student is based on grading system. A student has to pursue his/her programme with diligence for scoring a good Cumulative Grade Point Average (CGPA) and for succeeding in the chosen profession and life.

CHARUSAT welcomes you for a Bright Future.....

CHARUSAT

FACULTY OF MANAGEMENT STUDIES

ACADEMIC REGULATIONS

Master of Business Administration (MBA)

To ensure uniform system of education, duration of undergraduate and post graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

1. *System of Education*

The Semester system of education should be followed across The Charotar University of Science and Technology (CHARUSAT) both at Undergraduate and at Master's levels. Each semester will be at least 90 working day duration. Every enrolled student will be required to take a specified load of course work in the chosen subject of specialization and complete a project/dissertation if any.

2. *Duration of Programme*

- 21 The Master of Business Administration (MBA) programme of Charotar University of Science and Technology (CHARUSAT) is a **two-year full-time** post-graduate programme, leading to the award of the degree of Master of Business Administration (MBA).
- 22 The span period of the programme is three / four years (as decided by the university from time to time) from the date of registration in the programme.

3. *Eligibility and mode of admissions*

Any graduate who is eligible for admission to the MBA programme will be admitted to the programme according to the regulations for admission decided by Government of Gujarat from time to time.

4. *Programme Structure and Credits*

- 41 *A student admitted to a program should study the course and earn credits specified in the course structure.* The details of programme structure, credit requirements, areas of specialisation proposed to be offered, etc. are presented at Appendix - I.

42 *Programme Outcomes (PO)*

Graduates will be able to...

PO1 - Apply Knowledge of Management Theories and Practices to Solve Business Problems

PO2 - Foster Analytical and Critical Thinking Abilities for Databased Decision Making

PO3 - Ability to Develop Value Based Leadership Ability

PO4 - Ability to Understand, Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business

PO5 - Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment

5. Attendance

- 5.1 All activities prescribed under these regulations and listed by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student from attendance except because of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will require to be condoned by the Dean/Principal.
- 5.2 Student attendance in every course should be 80%.

6. Course Evaluation

- 6.1 The performance of every student in each course will be evaluated as follows:
- 6.1.1 Internal evaluation by the course faculty member(s) based on continuous assessment, for 50% of the marks for the course; and
- 6.1.2 Final examination by the University through written paper or practical test or oral test or presentation by the student or a combination of these, for 50% of the marks for the course.

6.2 University Examination

- 6.2.1 The final examination by the University for 50% of the evaluation for the course will be through written paper or practical test or oral test or presentation or a combination of these.
- 6.2.2 In order to earn the credit in a course, a student has to obtain a grade other than F (Fail) or Ab (Absent)

6.3 Performance at Internal Evaluation Components & University Examination

- 6.3.1 A student who secures at least 36% marks in the University examinations in any course and at least 36% marks in the internal continuous and comprehensive evaluation components and University examination put together will be declared to have passed that course, as shown in the following table:

Minimum percentage marks in University Exam for pass in any course	Minimum total percentage marks (i.e. Internal+ University) for pass in any course
36%	36%

7. Grading

- 6.3.2 The total of the internal evaluation marks and final University examination marks in each course will be converted to a letter grade on a ten-point scale as per the following scheme:

Grading Scheme:

Range of Marks (%)	≥96	≥ 86 and <95	≥ 76 and <86	≥ 66 and <76	≥ 56 and <66	≥ 46 and <56	≥ 36 and <46	<35
Grade	O	A+	A	B+	B	C	P	F
Grade Point	10	9	8	7	6	5	4	0

7.1 The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are calculated as follows:

(i) SGPA = $\frac{\sum C_i G_i}{\sum C_i}$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i
and $i = 1$ to n , n = number of courses in the semester

(ii) CGPA = $\frac{\sum C_i G_i}{\sum C_i}$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i

and $i = 1$ to n , n = number of courses of all semesters up to which CGPA is computed.

(iii) No student will be allowed to move to the second academic year if he/she fails to clear all the courses at the end of the first academic year.

(iv) in addition to above, a student has to comply with the requirements of the regulatory bodies, wherever such requirements exist.

*(*Whenever the university conducts the examinations of that course, it will be considered as a chance, irrespective of whether the student appears for the examination or not.)*

8. Awards of Degree

6.3.3 Every student of the programme who fulfils the following criteria will be eligible for the award of the degree:

6.3.4 He/ She should have earned at least minimum required credits as prescribed in course structure.

9. Award of Class

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

First Class with Distinction	CGPA ≥ 7.0
First Class	CGPA ≥ 6.0
Second Class	CGPA ≥ 5.0
Pass Class	CGPA ≥ 3.6

10. Transcript

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA and class obtained.

Appendix – I

Details of MBA Programme Structure, Credit Requirements and Specialisation

A1. Programme Structure

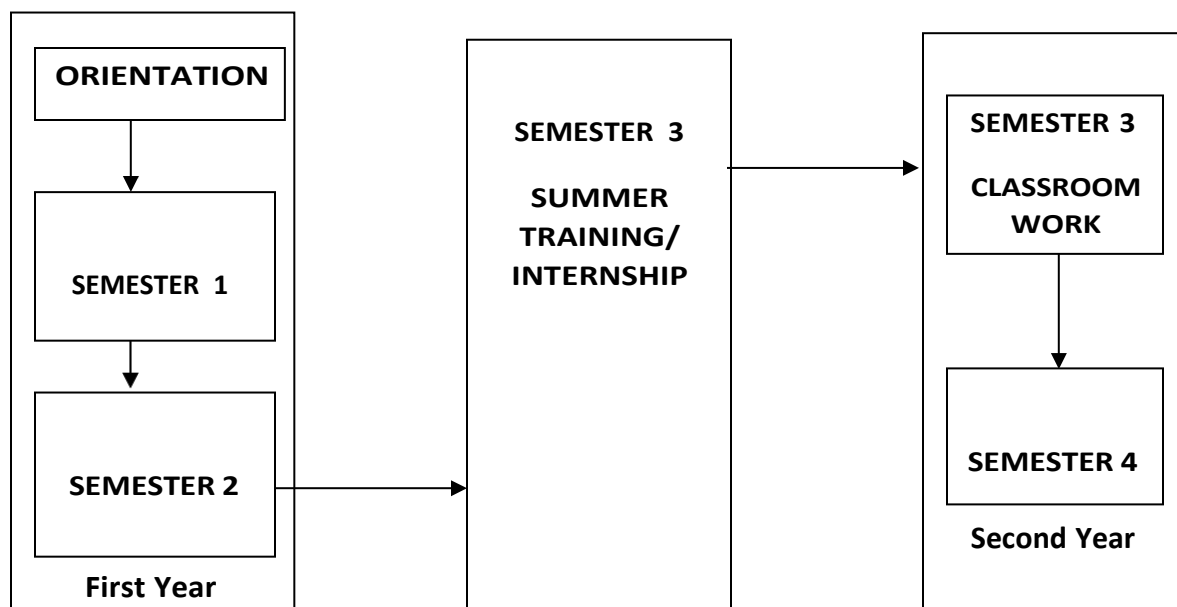

A1.1 The programme is structured into *four semesters*, consisting of classroom contact-based work and a *summer training / internship programme*.

A1.2 Each semester will be for a minimum of *90 working days* for classroom work, covering classroom contact sessions, laboratory/tutorial/library/group work, case discussions and presentation, field-based as well as library/internet search-based assignments and projects, classroom exercises, management and simulation games, short quizzes, and class tests. The duration for any organisational attachment/training during the semester and final University examinations will be in addition to the 90 working days.

A1.3 The summer training / internship programme will be for a minimum duration of 45 days / 6-8 weeks and will commence at the end of the second semester classroom work.

A1.4 The structure of the MBA programme is as shown in the following figure:

Figure A1: MBA Programme Structure

A2. Credits

A2.1 Any student of the MBA programme who earns 100 credits by pursuing the prescribed course work and passing all tests, examinations, assignments, laboratory work, projects and all other evaluation components as per the passing standards of the University will be eligible for the award of the Master of Business Administration (MBA) degree.

A2.2 A credit for the MBA programme will mean fifteen (15) classroom contact sessions of sixty (60) minutes each.

A2.3 The current distribution of credits over the two-year period for classroom contact sessions and laboratory/ tutorial/ library/ group work sessions will be as follows:

Table A2: Semester-wise Distribution of Credits

Sl. No.	Semester	Number of Credits
1	Semester - 1	28
2	Semester - 2	26
3	Semester - 3	28
4	Semester - 4	20
Total		102

A2.4 A course will be of three or more credits as shown in the detailed list of courses for the programme.

A2.5 All courses shown in the list of courses are compulsory for all MBA students. However, students will have the option of pursuing a total of eight elective courses of four credit each, out of ten courses offered during third and fourth semesters and one comprehensive project of six credits during the fourth semester.

A2.6 Some courses will have only classroom contact sessions and some others will have tutorial/ laboratory/ library/ group work sessions, as shown in the list of courses.

A2.7 The University has implemented Choice Based Credit System (CBCS), with effect from 2016-17, which provides a 'cafeteria' approach; wherein the students can take courses of their choice, and adopt an interdisciplinary approach to learning from the pull of courses offered by all the Faculties/ Institutes/ Departments across university.

Below mentioned pull of courses will be offered to the students by different departments/institutes. Each student has to choose one course (of his /her choice) from the offered courses.

Semester 2

Sr. No.	Course Code & Course Name	Department / Faculty offering the Course
1	CEUD501: Project Management	CE/CSPIT
2	MEUD551: Occupational Health and Safety	ME/CSPIT
3	CAUD516: Internet and Web Designing	CMPICA
4	CAUD517: Mobile Application Development	CMPICA
5	PTOD501: Fitness and Nutrition	ARIP
6	MBUD557: Software based Statistical Analysis	IIIM
7	NROD555: First Aid and Life Support	MTIN
8	CHDE558: Introduction to Polymer Science	PDPIAS
9	PH892.01: Intellectual Property Rights	RPCP
10	PH893: Clinical Data and Interpretation	RPCP

A3. Specialisation / Concentration

A3.1 The Institute will offer courses of specialisation in the following functional / sectoral areas /streams of management:

Table A3: Areas/Streams of Specialisation/ Concentration

Functional Areas of Management
• Marketing Management • Financial Management • Human Resource Management • Business Analytics

The Institute will endeavour to offer specialisation in as many areas/streams as possible from the above list. However, the Institute will offer any specific area / stream of specialisation / course during any year only if about twenty-five percentages of the students opt for it and if the faculty resources are available.

A3.2 Any student can claim to have specialised in a particular area/ stream if he has successfully completed

- (i) At least six courses (amounting to a minimum of twenty-four credits) in the area/ stream by taking electives offered in the area/ stream during the third and fourth semesters of the programme, and
- (ii) A comprehensive project of eight credits in the area/stream.

A3.3 Each student has to opt for specialisation in only one functional area of management for the award of MBA degree.

A3.4 A student may specialise in only one functional / sectoral areas / streams of management by taking six courses in each of the areas and carrying out a comprehensive project in each of the areas.

A3.5 However, no student will be allowed to specialise in more than one functional stream of management.

A4. Courses, Curricula and Revision

A4.1 The Faculty Board of the Faculty of Management Studies and the Dean of the Faculty of Management Studies will keep the curricula current and in tune with the changes happening in the world of management and make it relevant to the needs of different organs of society.

A4.2 The review of the programme, its structure, the course curricula, pedagogy and evaluation will be undertaken by the individual Boards of Studies at least once in every two years.

A4.3 Every course of the programme will be designated by a five-digit alphanumerical code as per the following scheme:

M	B	U	Number 1	Number 2 & 3
↑	↑	↑	↑	↑
(Management)	(Business)	(On Campus)	(Level / Year)	(Course Serial No.)

Business Analytics	Fundamentals of Database System	Basic Programming using Python	Multivariate Data Analytics	Optimization Analytics	Machine Learning	Data Visualization For Analytics	Big Data Analytics	Data Mining and Business Intelligence

Note:

1. Procedure for Selection of Streams / Area / Group and Courses

Step: 1 – Selection of Stream (Only One for the Programme)

A student must choose any one stream of specialization out of the offering. The stream so chosen by the student will remain same for Semester – III and IV. This will be the area of specialization. Under no circumstances, the stream / area of specialization can be changed.

Step: 2 – Choice of Courses in Semester – III

From the stream so chosen (as mentioned in Step: 1), the student has to opt for any 04 (four) out of 08 (eight) in the same stream. The total credit that can be obtained in Semester-III for specialization courses will 4 courses x 4 credits = 16 Credits

Step: 3 – Choice of Courses in Semester – IV

A Student has to repeat Step: 2 in Semester – IV and will have to choose 02 (two) more courses out of 08 (eight) in the same stream / area of specialization that he / she has selected during the start of Semester – III. The total credit that can be obtained in Semester-IV for specialization courses except the core course Managerial Effectiveness and Comprehensive Project will be 4 courses x 2 credits = 08 Credits.

Step: 4 – Comprehensive Project

During Semester – IV, a student must undertake his / her Comprehensive Project in the same stream / area that he / she had chosen during the start of the Semester – III. However, research / project of interdisciplinary nature can be undertaken with the permission of the concerned guide and head of the institute / principal. The total credit that can be obtained in Semester-IV for specialization through Comprehensive Project is Six (08) credits.

Step: 5 – Total Number of Credits for Specialization

The total credits for specialization will be 24 i.e. (6*4) for courses and 08 credits for Comprehensive Project. Hence, the specialization will be of 32 credits.

2. Rules for offering Elective Stream / Courses

- Minimum 25% of students must have opted for a particular course.
- Based on availability of faculty.

Note: The course on Managerial Effectiveness and Comprehensive Project in Semester-IV shall be carried out with Industry Placement.

Master of Business Administration (MBA) Programme

SYLLABUS (Semester – I)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

MBU501: MANAGERIAL ECONOMICS
YEAR 1, SEMESTER – I

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Managerial Economics deals with allocating the scarce resources in a manner that minimizes the cost. Managers study managerial economics because it gives them insight to reign the functioning of the organization. Managerial Economics is of great help in price analysis, production analysis, capital budgeting, risk analysis and determination of demand. If manager uses the principles applicable to economic behaviour in a reasonably manner, then it will result in smooth functioning of the organisations. Economic principles assist in rational reasoning and defined thinking. It develops logical ability and decision making of a manager. Decision Making is one of the vital skill which a manager come across while handling the routine tasks. Along with the decision making, a Manager is expected to have certain abilities which involves critical and logical way of thinking. This course Logical Analysis and Decision Making will accustom students to analyze day-to-day tasks and will develop students as managers with independent, self-directed thinking.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction	05
2	Demand & Supply Analysis	10
3	Theory of Production and Cost	10
4	Theory of Firm and Market Structures	10
5	Macroeconomic Indicators	10
6	Macroeconomic Policies and Economic Planning	10
7	Recent and Contemporary Issues / Cases	05
Total Contact Hours		60

Course Syllabus

Module 1: Introduction

05 hours

Definition of Economics, Ten Principles of Economics, Relationship between Micro and Macroeconomics, Economics as a decision making tool.

Module 2: Demand & Supply Analysis

10 hours

Concept of Demand, Types of Demand, Demand Function, Factors Affecting Demand, Shift in Demand Curve, Demand Elasticity, Measurements: Price Elasticity – Income , Elasticity – Cross-elasticity, Demand Forecasting, Law of Supply and Supply Function, Supply Elasticity.

Module 3: Theory of Production and Cost

10 hours

Factors of Production or inputs, Production Function, Isoquant and Isocosts, Returns to Scale, Types of Cost – Short run & Long run, Cost curve, Choosing the least cost input combination.

Module 4: Theory of Firm and Market Structures

10 hours

Modern Theories of Profit, Profit Maximization, Sales Maximization, Organizational Slack, Perfect competition, Imperfect competition, Asymmetric Information.

Module 5: Macroeconomic Indicators

10 hours

Macroeconomic issues and concepts – The Circular Flow of Income, Concepts of National Income and its Measurement, Gross National Savings, Consumer Price Index & Wholesale Price Index, Index of Industrial Production (IIP), Business Cycle Indicators – Leading – Lagging – Coincident Indicators, Inflation and Unemployment.

Module 6: Macroeconomic Policies and Economic Planning

10 hours

Monetary Policy, Industrial Policy, Fiscal Policy, Lectures from industry experts on contemporary topics in Economic theories and concepts.

Contemporary Issues / Affairs

05 hours

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. Mankiw, Principles of Microeconomics, (Latest Edition), Cengage Learning.

Reference Books:

1. Robert Pindyck and Daniel Rubinfeld, Microeconomics, (Latest Edition), Pearson.
2. Dwivedi, D.N, Macroeconomics – Theory and Policy, (Latest Edition), Tata McGraw Hill Publications.
3. David Dranove, David Besanko, Mark Shanley, Scott Schaefer, Economics of Strategy, Wiley publications.
4. Geetika, Piyali Ghosh, Purba Roy Choudhary, Managerial Economics, (Latest Edition), Tata McGraw Hill Publications.
5. R. Glenn Hubbard, Anthony Patrick O'Brien, Macroeconomics, Pearson Education.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Understand the scope of Managerial Economics in Decision Making.
CO2	Understand the importance of supply, demand and its determinants.
CO3	Acquiring knowledge about production and cost structure involved in producing goods and services.
CO4	Apply optimizing techniques in competitive strategy in different markets.
CO5	Distinguish several macroeconomic indicators.
CO6	Understanding the concept of measuring the value of economic activities.

MBU502: BUSINESS ANALYTICS
YEAR 1, SEMESTER – I

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Analytics is not just about number crunching. It has evolved into a competitive strategy that drives innovation across several organizations. This course will introduce the students to foundations of Data Science and expose them to several analytics techniques. Further, it will help the students to understand and apply the use of analytics across the industries for decision-making, problem solving, and driving organizational innovation.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction to Analytics	05
2	Descriptive Analytics and Probability	10
3	Sampling and Estimation	10
4	Hypothesis Testing	15
5	Correlation and Regression	15
6	Contemporary Issues	05
Total Contact Hours		60

Course Syllabus

Module 1: Introduction to Analytics

05 hours

Introduction to business analytics, The science of data-driven decision making, Types of analytics, Roadmap for analytics capabilities.

Module 2: Descriptive Analytics and Probability

10 hours

Introduction, Data types and scale of variable measurement, Population and Sample, Measures of central tendency, Measures of shape, Data visualization, Introduction to probability theories, Binomial distribution, Poisson distribution, Normal distribution.

Module 3: Sampling and Estimation

10 hours

Introduction, Population parameters and sample statistics, Sampling, Probabilistic sampling, non-probabilistic sampling, Central limit theorem.

Module 4: Hypothesis Testing

15 hours

Introduction, Setting up a hypothesis, One-tailed and two-tailed test, Type-I and Type-II errors, One sample test, Independent sample test, Paired sample test, Chi-Square test.

Module 5: Correlation and Regression

15 hours

Introduction to correlation, Pearson correlation coefficient, Spurious correlation, Introduction to regression, Simple linear regression, Multiple linear regression, Introduction to Logistic regression.

Module 6: Contemporary Issues

05 hours

Contemporary Issues in Business Analytics

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. U. Dinesh Kumar, Business Analytics, Latest Edition, Wiley.

Reference Books:

1. Doane, Seward, and Chowdhury, Applied Statistics in Business and Economics, Latest Edition, McGraw Hill.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Learn the foundation of analytics and its importance in decision making
CO2	Apply the appropriate statistical techniques to understand the business requirements.
CO3	Analyze the data to make inference about the population characteristics.
CO4	Propose models that can be used for the purpose of prediction / forecasting.

MBU503: CRITICAL THINKING AND CASE ANALYSIS
YEAR 1, SEMESTER – I

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Management Professionals are required to get involved in decision-making on a day-to-day basis. This decision-making process is expected to be backed by critical thinking process. The course Critical Thinking and Case Analysis will enable students to understand the technicalities involved in decision-making and rational thinking process and will prepare them to face real-life situations.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Fundamentals of Critical Thinking	05
2	Mapping an Argument	10
3	Researching and Writing Arguments	10
4	Introduction to Case Analysis	10
5	Performing Case Analysis	10
6	Common Tools for Case Analysis	05
7	Analyzing Course Specific Cases	10
Total Contact Hours		60

Course Syllabus

Module 1: Fundamentals of Critical Thinking

05 hours

Introduction to Critical Thinking, Barriers to Critical Thinking, Moral Reasoning, Scientific Reasoning, Persuasion, Indian Model of Critical Thinking – Shastra (Knowledge System), Yukti (Reasoning), Anubhav (Experience)

Module 2: Mapping an Argument

10 hours

Identifying Statements, Premises, Conclusions, Understanding Arguments, Types of Arguments, Deductive Arguments, Inductive Arguments, Analyzing Arguments, Evaluating Arguments, Categorical Logic, Propositional Logic, Fallacious Arguments, Fallacies of Relevance, Fallacies of Insufficient Evidence,

Module 3: Researching and Writing Arguments

10 hours

Finding, Evaluating and Using Sources, Writing Argumentative Essays, Thinking Critically about the Media, Science and Pseudoscience

Module 4: Introduction to Case Analysis

10 hours

Purpose of Case Method, Benefits of Learning Case Method, Reading a Case, Types of Cases

Module 5: Performing Case Analysis

10 hours

Identifying and Analyzing the Issues, Problems and Opportunities, Developing and Evaluating the Alternative solutions, Making Recommendations for Action

Module 6: Common Tools for Case Analysis

05 hours

Stakeholder's Analysis, SWOT Analysis, Industry Analysis, Ratio Analysis, Profitability Analysis, Break-Even Analysis, PESTLE Analysis, Porter's Five Forces Analysis, Value Chain Analysis.

Module 7: Analyzing Course Specific Cases

10 hours

General management cases, HRM Cases, Finance cases, Marketing cases

MBU504: MANAGERIAL COMMUNICATION
YEAR 1, SEMESTER – I

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

An efficient management executive requires being proficient in effective communication and Interpersonal skills, along with their core skills. Their soft skills will enable them to create opportunities of Business for themselves and others, will aid them to fit in any organization and escalate on the ladder of success, eventually. This curriculum course structure is designed and developed considering the present day industry requirements.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction	10
2	Interpersonal Communication-I	10
3	Interpersonal Communication-II	10
4	Managerial Writing	10
5	Communicating in Work Teams	10
6	Contemporary Issues	10
Total Contact Hours		60

Course Syllabus

Module 1: Introduction

10 hours

The Role of Communication in Contemporary Business, communicating within Organizations, Types of Communication, Process of Communication, The C's of Good Business Communication, Causes of Interference to Effective Business Communication, External Influences on Business Communication, Using Technology to Improve Business Communication.

Module 2: Interpersonal Communication- I

10 hours

Introduction to Interpersonal Communication, Communication Styles or Modes, Managerial Listening and Responding, Nonverbal Communication.

Module 3: Interpersonal Communication- II

10 hours

Managing Conflicts in Organization, Communicating in Diverse Environment, Managerial Negotiation, Interviews.

Module 4: Managerial Writing

10 hours

Stages of Writing process, Preparing Good-and-Neutral News Messages, Preparing Bad-News Messages, Preparing Persuasive Messages, Notice, Agenda and Minutes of Various Official Meetings, Organizing Business Reports and Proposal, Communication for Employment.

Module 5: Communicating in Work Teams

10 hours

Productive Meeting Management, Making Formal Presentation.

Module 6: Contemporary Issue

10 hours

Trends and Practices in Communication, Case Studies

**MBU505: FINANCIAL ACCOUNTING
YEAR 1, SEMESTER – I**

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Accountancy is an important language of business. Its knowledge has become indispensable for recording and analyzing business transactions, interpreting the business results thereof and initiating future action. Accountancy education leads to improvement in students' numeracy skills and further provides them with background skills for future studies.

The highlights of this course include:

- a) The knowledge of principles and practices of financial accounting.
- b) The preparation of financial statements of Trading and Non-Trading Organisations.
- c) The provision of hands-on practice about Computers in Accounting

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction to Financial Accounting	10
2	Preparation of Final Accounts	10
3	Financial Statement Analysis	10
4	Accounting for retail businesses	10
5	Computerized Accounting System	10
6	Contemporary Issues / Affairs	10
Total Contact Hours		60

Course Syllabus

Module 1: Introduction to Financial Accounting

10 hours

Accounting Principles, Standards and International Financial Reporting System, Double Entry Accounting: Classification of accounts, Accounting Equation approach, Journal, Posting to Ledger accounts, Trial Balance: Objectives of trial balance, Methods of trial balance, adjustment entries, errors and their rectification.

Module 2: Preparation of Final Accounts

10 hours

Statement of Profit and Loss, Balance Sheet, Statement of Change in Equity, Cash Flow Statement, Notes to Accounts, Final Accounts with Adjustments-Provision for doubtful debts, Discount on Debtors and Creditors, Bad Debts, Interest on Capital, Prepaid expenses, outstanding expenses, etc.

Module 3: Financial Statement Analysis

10 hours

Tools and Techniques – Common size statement and comparative statements, Trend analysis, Preparation of cash flow statement

Module 4: Accounting for retail businesses

10 hours

Distinguish between the activities and financial statements of service and retail businesses, Describe and illustrate the accounting for merchandise transactions, Describe and illustrate the adjusting process for a retail business, Describe and illustrate the financial statements and closing entries for a retail business.

Module 5: Computerized Accounting System

10 hours

Importance of Accounting Computerization, Differences between Manual Accounting and Computerized Accounting system, Computerized Accounting packages

Module 6: Contemporary Issues / Affairs

10 hours

Guest Lecture from industry experts on contemporary accounting practices in decision making.

MBU506: MANAGEMENT PROCESS AND ORGANIZATION BEHAVIOUR
YEAR 1, SEMESTER – I

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Management has evolved over the years and has become an integral part of any business. With advent of latest technology and prevailing cut throat competition in the globalization era has make it imperative to impart the management skills among the managers for getting desired success. There is a massive demand for trained professionals with good managerial skills. The course will enable the students to prepare themselves for understanding organizational dynamics and challenges for managing the businesses. Decision Making is one of the vital skill which a manager come across while handling the routine tasks. Along with the decision making, a Manager is expected to have certain abilities which involves critical and logical way of thinking. This course Logical Analysis and Decision Making will accustom students to analyze day-to-day tasks and will develop students as managers with independent, self-directed thinking.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

**MBU507: INTRODUCTION TO COMPUTERS AND INFORMATION
TECHNOLOGY
YEAR 1, SEMESTER – I**

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

A management graduate requires hands on experience on computers and its components to exhibit their technical skills. These skills are quintessential for dealing with usage of software's and its computer applications in the organization and their functional areas.

This curriculum course structure is developed such that the student is able to develop required technical knowhow and practical exposure to various hands-on training and experience using computer and its software etc. for professional success.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Conceptual Framework	10
2	Microsoft Office Word	10
3	Microsoft Office Excel (Spreadsheet)	10
4	Microsoft Office PowerPoint	10
5	Data Communication and Network (DCN)	10
6	Introduction to IT & its Applications	10
Total Contact Hours		60

Course Syllabus

Module 1: Conceptual Framework

10 hours

Introduction; Digital and Analog Computers, Characteristics of Computer, Generations of Computer, Application of Computers, Hardware / Software, Types of Software, System Software; Application Software; Software Acquisition; Operating System (Introduction, Objectives of Operating System, Types of OS, Functions of OS, Process Management, Memory Management, File Management, Device Management, Protection and Security, User Interface, Examples of Operating Systems), Folder and Files, MS Windows / Windows Accessory, Widows Utilities.

Module 2: Microsoft Office Word

10 hours

Creating and Editing document, Formatting and Printing, Table and Graphics, Mail Merge and Labels.

Module 3: Microsoft Office Excel (Spreadsheet)

10 hours

Introduction to Excel, Formula and Function, Formatting and Printing, Charts.

Module 4: Microsoft Office PowerPoint

10 hours

Introduction to PowerPoint, Working with Slide, Formatting and Printing.

Module 5: Data Communication and Network (DCN)

10 hours

Concept OF Computer Networks and types of DCN, History of Internet, Managing / Connecting the Internet, Internet Connections; Internet Address, Internet Services; Uses of Internet, Introduction to Internet of Things (IoT), Wearable Computing, and Cloud Computing, Introduction to E-commerce, E-governance, Smart City and GIS, Security Threat and Security Attack, Malicious Software, Security Mechanisms, Security Awareness.

Module 6: Introduction to IT & its Applications

10 hours

E-mail Services and Searching, Introduction to Designing Web-Pages, Insert Text, Image, Hyperlink.

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Practical examination will be based on project or report presentation and viva-voce examination or software based analysis depending on the nature of the course.

Text Book:

1. R. P. Soni, Harshal Arolkar, Sonal Jain, Working with Personal Computer Software, Latest Edition, Books India Publications.

Reference Books:

1. Stephen L. Nelson, The Complete Reference: Office XP, Latest Edition, Tata McGraw-Hill Publications.
2. Elaine Marmel, Microsoft Office Project Bible, Latest Edition, Wiley Publications.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Understand the parts of computer system, technology, network structure and their utilization in business organizations.
CO2	Apply the knowledge of Microsoft office tools and software through hands on experience in decision-making.
CO3	Analyze the Information security and its components for effective communication worldwide.
CO4	Demonstrate the technical skills through use of technical software's in business functional areas.
CO5	Create knowledge through software's and hardware based integration for effective organizational functioning.

Master of Business Administration (MBA) Programme

SYLLABUS **(Semester – II)**

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

MBU551: RESEARCH METHODS FOR MANAGEMENT
YEAR 1, SEMESTER – II

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Research methods for management are transformative and central to an enhanced postgraduate research experience. It gives research legitimacy and provides scientifically sound findings. It helps identify problems and using this information, wise decisions can be made to tackle the issue appropriately. This course offers students the opportunity to learn the various aspects of the research process within quantitative and qualitative methods approaches.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction to Research Methodology	10
2	Research Methods	10
3	Data Preparation & Collection	10
4	Data Analysis	10
5	Multivariate Data Analysis	10
6	Ethics, Report Writing	10
Total Contact Hours		60

Course Syllabus

Module 1: Introduction to Research Methodology

10 hours

Meaning and Types of Research, Research Process, Defining Research Problem & Structuring Research Questions, Research Design, Literature Review.

Module 2: Research Methods

10 hours

Quantitative Research: Nature of Quantitative Research, Sampling Design, Questionnaire Design, Secondary Analysis and Official Data, Qualitative Research: Nature of Qualitative Research, Observation, Interviewing Focus Group Discussion.

Module 3: Data Preparation & Collection

10 hours

Data Collection: Research Proposal and Field Work, Undertaking the Field Work, Actual Collection of Data (Primary, Secondary), Data Preparation: Data Checking, Data Editing, Data Coding, Data Cleaning (Missing Values, Outliers), Tabulation & Graphical Representation, Reliability & Validity Testing.

Module 4: Data Analysis

10 hours

Descriptive Analysis: Measures of Central Tendency, Measures of Dispersion, Measures of Skewness, Hypothesis Testing, Introduction & Types Parametric Tests, Non-Parametric Tests.

Module 5: Multivariate Data Analysis

10 hours

Correlation and Regression Analysis, Introduction to Correlation, Simple Linear Regression, Model Building, Factor Analysis, Principal Components, Factor Analysis Model, Extracting Common Factors, Determining Number of Factors, Transformation of Factor Analysis Solutions, Factor Scores, Cluster Analysis, Introduction, Types of Clustering.

Module 6: Ethics, Report Writing

10 hours

Ethics in Research, Report Writing, Oral Presentation & Viva Voce.

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. Bryman Alan, Bell Emma, Business Research Methods, Oxford University Press (Latest Edition).

Reference Books:

1. Hair, Joseph, et. al., Multivariate Data Analysis, Pearson Education, (Latest Edition).
2. Kothari, Research Methodology, Methods and Techniques, New Age International Publishers, (Latest Edition).
3. Zikmund, Babin, Carr, Adhikari, Griffin, Business Research Methods, A South Asian Perspective, Cengage Learning, (Latest Edition).

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Identify research problems using appropriate research design and reviewing of literature
CO2	Identify quantitative and qualitative research methods and prepare research proposal
CO3	Undertake field work and prepare data for analysis and interpretation
CO4	Use the principles and techniques of multivariate data analysis and have hands on experience on SPSS
CO5	Use and apply the principles of ethics in research and prepare the research report

MBU552: COSTING AND CONTROL SYSTEM
YEAR 1, SEMESTER – II

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Cost techniques helps the management foresee the cost price and selling price of a product or a service, which helps them formulate business policies. With cost value as a reference, the management can come up with techniques to control costs with the aim to achieve maximum profitability. It helps in determining the total per-unit cost of a product or a service, so that the business can fix the selling price for it. Management may put an end to non-profitable activities while developing and expanding the profitable ones. Also, data in the cost sheets prepared for various time periods helps in comparing the cost for the same product or a service over a period of time. Decision Making is one of the vital skill which a manager come across while handling the routine tasks. Along with the decision making, a Manager is expected to have certain abilities which involves critical and logical way of thinking. This course Logical Analysis and Decision Making will accustom students to analyze day-to-day tasks and will develop students as managers with independent, self-directed thinking.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Costing Terms and Introductory Concepts	10
2	Product Costing	10
3	Contract Costing	10
4	Service Costing	10
5	Standard Costing and Variance Analysis	10
6	Contemporary Issues / Affairs	10
Total Contact Hours		60

Course Syllabus

Module 1: Costing Terms and Introductory Concepts

10 hours

Introduction to Cost Term and Cost Classification, Integration of Costs into Statements (Cost Sheet), Comparing Financial accounting and Cost accounting, Cost objects and Cost –centres

Module 2: Product Costing

10 hours

Unit Costing, Job Costing, Batch Costing, Classification, Allocation and Application of overhead cost, Absorption of overhead cost (Traditional approach and ABC approach)

Module 3: Contract Costing

10 hours

Meaning of contract costing, Understanding the terms – Certified work, Uncertified work and Notional profit, Preparation of Contract a/c

Module 4: Service Costing

10 hours

Service Costing – Costing in different undertakings, Transport costing, Hotel Costing, Hospital costing & Pricing Decision

Module 5: Standard Costing and Variance Analysis

10 hours

Standard Costing, Material Variance, Labor Variance, Sales Variance, Overhead Variance, Interpreting and Using Variance Analysis

Module 6: Contemporary Issues / Affairs

10 hours

Target costing, Life Cycle costing

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. CA (Dr.) P.C. Tulsian CA Bharat Tulsian (Latest edition), Cost Accounting, S. Chand.

Reference Books:

1. Jawahar lal and Seema Srivastava, Cost Accounting (Latest edition), Mc-Graw Hill.
2. V. Rajasekaran R. Lalitha, Cost Accounting (Latest edition), Pearson.
3. Ravi Kishore, Cost and Management Accounting (Latest edition), Taxmann.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Comprehensively able to describe the problem and aids management in decision making.
CO2	Suggest a very comprehensive and implementable action plan.
CO3	Performing a comprehensive quantitative data analysis.
CO4	Ability to represent the analyses as a complete solution to the business problem.
CO5	Understanding various aspects of costing construction projects including treatment of profit on incomplete contracts.

**MBU553: HUMAN RESOURCE MANAGEMENT
YEAR 1, SEMESTER – II**

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

The course seeks to instill solid grasp of knowledge of Human Resource Management (HRM), Training and Development, Rewarding and Separating Human Resource. It also helps to equip the students with abilities to deal with the issues arising out of trade unionism, industrial work stoppages, the rights and duties of employers and workers that figure in the area of employment relations through legal aspects in HRM.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction to HRM and the Environment	10
2	Acquiring Human Resources	10
3	Developing Human Resources	10
4	Rewarding and Separating Human Resources	10
5	Legal Aspects in HRM	10
6	Contemporary Issues	10
Total Contact Hours		60

Course Syllabus

Module 1: Introduction to HRM and the Environment

10 hours

Fundamentals of HR Management – Concept and Perspectives, Role and Accountability in HR, Strategic and Global HRM, Challenges of HRM in Dynamic Environment.

Module 2: Acquiring Human Resources

10 hours

HR Planning and Forecasting, Job Analysis and Job Design, Recruitment and Selection, Employee Engagement.

Module 3: Developing Human Resources

10 hours

Training and Development, Need for Training and Development, Individual vs. Organizational Needs, Training Objectives and Strategies, Training Methods and Techniques, Design and Organization of Training, Career Planning and Development, Talent Management, Succession Planning.

Module 4: Rewarding and Separating Human Resources

10 hours

Performance Evaluation and Management, Wage and Salary Administration, Statutory and Non-Statutory Benefits, Dismissal, Retrenchment, Removal, Suspension, Layoff etc.

Module 5: Legal Aspects in HRM

10 hours

Employee Health and Safety, Collective Bargaining, Grievance Redressal, The Industrial Disputes Act, 1947, The Minimum Wages Act, 1948, The Payment of Bonus Act, 1965, The Factories Act, 1948, The Employees' Compensation Act, 1923.

Module 6: Contemporary Issues

10 hours

Contemporary Issues in HR

3	Financing Decisions	10
4	Working Capital Management	10
5	Payout Policy	10
6	Basics of Financial Modeling & Contemporary Issues	10
Total Contact Hours		60

Course Syllabus

Module 1: Introduction to Financial Management

10 hours

Profit vs. Wealth Maximization, Finance Decisions – Investing Financing and Dividend decisions, Role of Financial Manager, The Financial System, Risk and Return trade-off.

Module 2: Investment Decisions

10 hours

The Time Value of money, Techniques of Capital Budgeting, NPV, IRR, ARR and Payback, Basics of Cost of Capital, Cost of Debt, Equity and Preference.

Module 3: Financing Decisions

10 hours

Financing and Operating Leverage, Capital Structure Theory and Policy, Sources of Long-Term Fund, Entrepreneurial Finance, Raising Long Term Funds.

Module 4: Working Capital Management

10 hours

Determinant of Working Capital, Working Capital Policy, Operating Cycle and Cash Cycle, Cash Management, Credit Management, Inventory Management, Sources of Short-Term Funds.

Module 5: Payout Policy

10 hours

Dividend Policy & Firm Value, Dividend Theories and Models, Dividend Decision, Bonus Shares and Stock Split, Share buyback.

Module 6: Basics of Financial Modeling & Contemporary Issues

10 hours

MBU555: MARKETING MANAGEMENT
YEAR 1, SEMESTER – II

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

Marketing management course enables a student to understand the fundamentals of marketing concepts and the role marketing plays in business. Students should be able to demonstrate their comprehension of marketing concepts and knowledge by applying those in their written exams, case studies discussions, presentations and projects. Classroom activities including lectures, discussions and case studies will be designed to encourage students to get involved, absorb and assimilate inputs. These activities will also be supplemented by group discussions, cooperative group solving problems, live projects, analysis of video cases and debates. Decision Making is one of the vital skill which a manager come across while handling the routine tasks. Along with the decision making, a Manager is expected to have certain abilities which involves critical and logical way of thinking. This course Logical Analysis and Decision Making will accustom students to analyze day-to-day tasks and will develop students as managers with independent, self-directed thinking.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Fundamentals of Marketing Management	10
2	Understanding the Market	10
3	Analysing Marketing opportunities	10
4	Managing Distribution Decisions	10
5	Developing Effective Communications	10
6	Contemporary Issues	10
Total Contact Hours		60

Course Syllabus

Module 1: Fundamentals of Management Marketing

10 hours

Introduction to Marketing, Definition and scopes of Marketing, Philosophy of Marketing, Fundamentals of Marketing Concepts, Marketing and Customer Value, Marketing and Customer Value, Value Delivery Process, Strategic Planning

Module 2: Understanding the Market

10 hours

Analyzing Customer / Consumer Markets, Analyzing Business Markets, Marketing Research, Introduction, Objective of Marketing Research, Scope of Marketing Research, Steps Involved Marketing Research, Application of Marketing Research, Limitation of Marketing Research, CRM, Customer Relationship Management & its Importance, Features of CRM, Misunderstanding of the CRM, The Benefits of CRM Solutions, Challenges of CRM Implements, The Future of CRM in India, Marketing Information System, Component of Marketing Environment, Forecasting and Demand Management, Developing A Winning Marketing Strategy, Strategic Planning, Marketing and Customer Value, Value Delivery Process and Strategic Planning, Marketing Planning / Marketing Plan, Formulating Marketing Strategies, Types of Marketing Strategies , Identifying Market Segments and Target Customers, Crafting a Customer Value Proposition and Position.

Module 3: Analysing Marketing opportunities

10 hours

Consumer Behaviour, Introduction, Factors Influencing CB, Various stages of Model of Buying Process Unit, Different Types of Market, Introduction to Business Market, Buying Situations, Business Buying Behaviour, Institutional and Government Market, Managing B2B Customer Relationship, Segmentation, Targeting and Position, Basis of Market Segment, Types of Market Segmentation, Steps in Market Segmentation, Target Market, Positioning, Steps to Product Positioning, Product Life Cycle, Concepts of PLC, Stages of Product Life Cycle, Product Strategy for Life Cycle Stages Unit, New Product Development (NPD), Introduction, Definition and Classification of NPD, Significance of New Product Development, New Product Development Process.

Module 4: Managing Distribution Decisions

10 hours

Intermediaries / Channel Marketing, Different Types of Channels, Channel Strategies, Steps Involved in Designing a Marketing Channel, Key process of Supply Chain Management, Strategic Supply Chain Management Decisions, Classification of retail options, Major types of retail operations, Retail Marketing Strategy.

Module 5: Developing Effective Communications

10 hours

Advertising – Definition / Nature / Advantages / Disadvantages, Managing the Developing Advertising Program, steps in Developing a Creative, Advertising Strategy, Managing of Public Relations (PR), Managing Direct Selling, Managing Event, Integrated Marketing Communications (IMC), Social Media and Marketing.

Module 6: Contemporary Issues

10 hours

Challenges of Marketing Communication

Course Evaluation

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. David Holt, Marketing Management: A South Asian Perspective, Pearson Education

Reference Books:

1. Stanton, Etzel, Walker, Fundamentals of Marketing, Mcgraw Hill Series In Marketing
2. V. S. Ramaswamy, S. Namakumari, Marketing Management: Indian Context Global Perspective, Sage Publications India Pvt Ltd

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Relate the basic concepts, methods, models and technologies used by the marketing managers that can stimulate business development.
CO2	Identify key resources required to develop strong conceptual knowledge in the functional area of marketing management.
CO3	Design and Apply knowledge, skills and the right attitude necessary to provide effective leadership in a global environment.
CO4	Evaluate the central role of opportunity in delivering and Communicating Value.
CO5	Synthesize factors are required as a key process – command and control, calculated risk-taking and opportunity recognition to promote the products / services.

MBU556: STRATEGIC MANAGEMENT
YEAR 1, SEMESTER – II

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
04	Theory	04	60	120

Rationale

New age organizations do not limit strategic management to the top level management. Middle-level managers also have a crucial role in organizational decision-making. The participants of this course intent to join the work force as middle level managers. The course will help participants develop expertise in Analyzing a firm's external and internal environment. To identify and create competitive advantage as well as to formulate, implement and evaluate cross-functional decisions. At the end of this program, the participants should understand what allows certain organizations to make profits while others fail to do so.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom sessions, assignments, presentations, management exercises or games/simulations or activities and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Strategic Management	10
2	Strategy Formulation	10
3	Strategy Implementation & Innovation	10
4	Strategic Leadership	10
5	Strategy Evaluation	10
6	Capstone Project Presentations	10
Total Contact Hours		60

Course Syllabus

Module 1: Strategic Management

10 hours

What is Strategy? Introduction to Strategic Management - Firm Performance, Vision, Mission, and Strategic Intent, External Environment Analysis, Internal Environment Analysis, Sustained Competitive Advantage, Competition Evaluation & Competitive Positioning.

Module 2: Strategy Formulation

05 hours

Introduction to Strategy formulation, Functional Strategies, Operations Strategy, Marketing Strategy, Human Resources Strategy, Financial Strategy, Business Level Strategies, Cost leadership strategy, Differentiation Strategy, Corporate Strategy, Integration Strategies, Intensive Strategies, Diversification Strategies, Managing a Multi-Business Firm, International Strategy, Strategy for Emerging Markets.

Module 3: Strategy Implementation & Innovation

05 hours

Introduction to Strategy Implementation, Organizational Structure & Systems, Implementation Risks & Mitigation, Corporate Social Responsibility, Digital Transformation Strategies, Business Models of the Future.

Module 4: Strategic Leadership

15 hours

Corporate Governance and Ethics, Strategic Leadership and Change Management, Leading High-performance Teams, Leading organisations into a new paradigm/ growth strategy, Leadership inspired by Indian/ International culture.

Module 5: Strategy Evaluation

10 hours

Balanced Scorecard, Design Thinking and its Application in Organizational Strategy, Role of Analytics in executing & evaluating strategy.

Module 6: Capstone Project Presentations

15 hours

Course Evaluation

I. Continuous and Comprehensive Evaluation (50 Marks)

Component	Marks
Quiz	70
Assignment/ Project/ Presentation	50
Online Course	60
Internal Examination	40
Participation	30
Total marks (CCE)	250

II. Semester End Evaluation (50 Marks):

- University Examination will be carried out at the end of the semester.
- Theory examination will be for 2 hours based on written paper for 50 marks.

Text Book:

1. Fred R. David & Forest R. David, Strategic Management concepts and cases - A Competitive Advantage Approach, Latest Edition, Pearson Education.

Reference Books:

1. Gregory Dess, Gerry McNamara Alan Eisner Seung, Hyun Lee, Strategic Management Text and Cases, Latest Edition, McGraw-Hill.
2. Michael E. Porter, Competitive Advantage, Latest Edition, Free Press.
3. Arthur A Thompson Jr, A J Strickland III, John E Gamble, Arun K Jain, Crafting and Executing Strategy, Latest Edition, McGraw-Hill.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Understand the fundamentals of business management from the perspective of strategy and competitive advantage
CO2	Apply insights gained into formulation and implementation of effective and focused business strategies
CO3	Display active leadership competencies to overcome business challenges and opportunities
CO4	Enhance critical thinking and strategic decision-making skills to use emerging technologies for business growth, and innovation

MBUD557: SOFTWARE BASED STATISTICAL ANALYSIS
YEAR 1, SEMESTER – II

Credit	Component	Instruction/ Contact/ Practical Hours (Per Week)	Instruction/ Contact/ Practical Hours (Per Course)	Notional Hours (Per Course)
02	Practical	02	30	60

Rationale

The course "Software-Based Statistical Analysis" is designed to provide a comprehensive understanding of statistical methods and their application in research using various software tools. It begins with a foundational introduction to statistics and research techniques, followed by hands-on experience with software for data manipulation, hypothesis testing, and regression analysis. The course also covers statistical analysis using open-source software, enabling students to manage data, perform transformations, and create visualizations. Finally, students will apply their knowledge by reviewing and analyzing research articles or papers, bridging theory with practical application.

Course Pedagogy

The course will emphasize self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will consist of classroom or practical contact sessions, research paper discussions and student feedback.

Course Outline

Module Number	Title of the Module	Contact Hours
1	Introduction to Statistics	06
2	Use of Software in Research	12
3	Statistical Analysis using Open Source Software	10
4	Article / Research Paper Reviews	02
Total Contact Hours		30

Course Syllabus

Module 1: Introduction to Statistics

06 hours

Research and Innovation, Introduction to Statistics, Quantitative Techniques in Research

Module 2: Use of Software in Research

12 hours

Introduction to the Software, Creating Variables, Data and its Types, Importing Data from MS-Excel, Transformation of Variables, Visual Benning, Determining Validity and Reliability of Scale using CFA - Cronbach's(alpha): a coefficient of internal consistency, Estimation & Hypothesis Testing: Parametric Tests: Z Test, t – Test, Cross Tabulation and Chi – square, One-Way & Two-Way Analysis of Variance (ANOVA), Pearson's Correlation Analysis, Regression Analysis, Simple & Multiple Linear Regression Analysis, Measures of Model Fit (R and R-square Statistics). Non-Parametric Tests: Mann-Whitney U Test, Wilcoxon Signed Rank Test, Run test, Krushal-Wallis Test, Spearman Correlation Analysis

Module 3: Statistical Analysis using Open source Software

10 hours

Introduction to Software, Programming Language Basics – including creating, subsetting and analyzing, Managing your files and workspace, Controlling functions (procedures or commands), Data Acquisition – Reading files, Data Transformations, Selecting variables and observations, Writing functions(macros), Graphics

Module 4: Article / Research Paper Reviews

02 hours

Course Evaluation

I. Continuous and Comprehensive Evaluation (25 Marks)

Component	Marks
Quiz	90
Assignment/ Project	100
Participation	60
Total marks (CCE)	250

II. Semester End Evaluation (25 Marks):

- University Examination will be carried out at the end of the semester.
- Practical examination will be based on project or report presentation and viva-voce examination or software-based analysis depending on the nature of the course.

Text Book:

1. Latest Manuals of Software.

Reference Books:

1. David .M. Levine, Krehbiel, Berenson, P.K. Viswanathan, (Latest Edition), Business Statistics – A First Course, (Latest Edition), Pearson Education.

Programme Outcomes: Upon successful completion of the course, students will be,

PO1	Apply Knowledge of Management Theories and Practices to Solve Business Problems.
PO2	Foster Analytical and Critical Thinking Abilities for Databased Decision Making.
PO3	Ability to Develop Value Based Leadership Ability.
PO4	Ability to Understand , Analyze and Communicate Global, Economic, Legal, and Ethical Aspects of Business.
PO5	Ability to Lead themselves and others in the Achievement of Organizational Goals, Contributing Effectively to a Team Environment.

Course Outcomes: Upon successful completion of the course, students will be,

CO1	Develop skills related to use of statistical techniques for analysis using software.
CO2	Have Rational decision making skills for typical business / other decisions.
CO3	Review articles / research papers especially related to use of statistical techniques and analysis based on software.
CO4	Plan and implement suitable materials handling principles and practices in the operations.
