

ACADEMIC REGULATIONS & SYLLABUS

**Faculty of Pharmacy
Master of Pharmacy Programme
(Regulatory Affairs)**

(AS PER PCI SYLLABUS)

Ramanbhai Patel College of Pharmacy

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

MASTER OF PHARMACY (M. Pharm.) PROGRAMME

Vision of RPCP

*To Become a Premier Pharma Institute by Creating World Class Pharmacists
and Researchers.*

Mission of RPCP

*To Strive for the Excellence in Pharmaceutical Sciences through Quality
Education and Research.*

PROGRAM OUTCOMES

- 1. Pharmacy Knowledge:** Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioral, social, and administrative pharmacy sciences; and manufacturing practices.
- 2. Planning Abilities:** Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines.
- 3. Problem analysis:** Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.
- 4. Modern tool usage:** Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.
- 5. Leadership skills:** Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfillment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.
- 6. Professional Identity:** Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).
- 7. Pharmaceutical Ethics:** Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behavior that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.
- 8. Communication:** Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.
- 9. The Pharmacist and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.
- 10. Environment and sustainability:** Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- 11. Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self-assess and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.

FACULTY OF PHARMACY
ACADEMIC REGULATIONS
MASTER OF PHARMACY (M. Pharm.) PROGRAMME
Choice Based Credit System (CBCS)

1. Short Title and Commencement

These regulations shall be called as “The Revised Academic Regulations for the postgraduate programmes under the Faculty of Pharmacy”. They shall come into effect from the Academic Year 2018-19. The regulations framed are subject to modifications from time to time by the respective regulatory bodies.

2. Minimum Qualification for Admission

2.1 Candidate shall have passed B. Pharm Degree examination of an Indian university established by law in India from an institution approved by Pharmacy Council of India and has scored not less than 55 % of the maximum marks (aggregate of 4 years of B.Pharm.)

2.2 Every student, selected for admission to post graduate pharmacy program in any PCI approved institution should have obtained registration with the State Pharmacy Council or should obtain the same within one month from the date of his/her admission, failing which the admission of the candidate shall be cancelled.

Note: It is mandatory to submit a migration certificate obtained from the respective university where the candidate had passed his/her qualifying degree (B.Pharm.).

3. Duration of the Programme

The course of study for M.Pharm shall extend over a period of four semesters (two academic years). The curricula and syllabi for the program shall be prescribed from time to time by Pharmacy Council of India, New Delhi.

4. Medium of Instruction and Examinations

Medium of instruction and examination shall be in English.

5. Working Days in a Semester

Each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from December/January to May/June in every calendar year.

6. Attendance and Progress

A candidate is required to put in at least 80% attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

7. Programme Credit Structure

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, tutorial hours, practical classes, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly, the credit associated with any of the other academic, co/extra-curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week.

7.1. Credit assignment

7.1.1. Theory and Laboratory courses

Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having four lectures per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

The contact hours of seminars, assignments and research work shall be treated as that of practical courses for the purpose of calculating credits. i.e., the contact hours shall be multiplied by 1/2. Similarly, the contact hours of journal club, research work presentations and discussions with the supervisor shall be considered as theory course and multiplied by 1.

7.2. Minimum credit requirements

The minimum credit points required for the award of M. Pharm. degree is 95. However based on the credit points earned by the students under the head of co-curricular activities, a student shall earn a maximum of 100 credit points. These credits are divided into Theory courses, Practical, Seminars, Assignments, Research work, Discussions with the supervisor, Journal club and Co-Curricular activities over the duration of four semesters. The credits are distributed semester-wise. Courses generally progress in sequence, building competencies and their positioning

indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

8. Academic work

A regular record of attendance both in Theory, Practical, Seminar, Assignment, Journal club, Discussion with the supervisor, Research work presentation and Dissertation shall be maintained by the department / teaching staff of respective courses.

9. Examinations/Assessments

The scheme for internal assessment and end semester examinations is given in Annexure II (Table – 1 to 5).

9.1. End Semester Examinations

The End Semester Examinations for each theory and practical course through semesters I to IV shall be conducted by the University for which Examinations shall be conducted by the subject experts at college level and the marks/grades shall be submitted to the university.

9.2. Internal Assessment: Continuous Mode

The marks allocated for Continuous mode of Internal Assessment shall be awarded as per the scheme given below.

Table- 1: Scheme for awarding internal assessment: Continuous mode

Theory	
Criteria	Maximum Marks
Attendance (Refer Table – 2)	8
Student – Teacher interaction	2
Total	10
Practical	
Attendance (Refer Table – 2)	10
Based on Practical Records, Regular viva voce, etc.	10
Total	20

Table- 2: Guidelines for the allotment of marks for attendance

Percentage of Attendance	Theory	Practical
95 – 100	8	10
90 – 94	6	7.5
85 – 89	4	5
80 – 84	2	2.5
Less than 80	0	0

9.2.1. Sessional Exams

Two Sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college. The scheme of question paper for theory and practical Sessional examinations will be as prescribed by the regulatory body. The average marks of two Sessional exams shall be computed for internal assessment as per the requirements given in Annexure II. Sessional exam shall be conducted for 30 marks for theory and shall be computed for 15 marks. Similarly Sessional exam for practical shall be conducted for 40 marks and shall be computed for 10 marks.

10. Promotion and Award of Grades

A student shall be declared PASS and eligible for getting grade in a course of M.Pharm. Programme, if he/she secures at least 50% marks in that particular course including internal assessment.

11. Carry Forward of Marks

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 9 above, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

12. Improvement of Internal Assessment

A student shall have the opportunity to improve his/her performance only once in the Sessional exam component of the internal assessment. The re-conduct of the Sessional exam shall be completed before the commencement of next end semester theory examinations.

13. Re-examination of End Semester Examinations

Re-examination of end semester examination shall be conducted as per the schedule given in table 3. The exact dates of examinations shall be notified from time to time.

Table-3: Tentative schedule of end semester examinations

Semester	For Regular Candidates	For Failed Candidates
I and III	November / December	May / June
II and IV	May / June	November / December

14. Academic Progression

No student shall be admitted to any examination unless he/she fulfils the norms given in item no. 6 under the heading of attendance and progress. ATKT rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I and II semesters till the III semester examinations. However, he/she shall not be eligible to attend the courses of IV semester until all the courses of I, II and III semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to IV semesters within the stipulated time period as per the norms.

Note: Grade AB should be considered as failed and treated as one head for deciding ATKT. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

15. Grading of Performances (Letter Grades and Grade Points Allocations)

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – 4.

Table – 4: Letter grades and grade points equivalent to Percentage of marks and performances

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	AA	10	Outstanding
80.00 – 89.99	AB	9	Excellent
70.00 – 79.99	BB	8	Good
60.00 – 69.99	BC	7	Fair
50.00 – 59.99	CC	6	Average
Less than 50	FF	0	Fail
Absent	Ab	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of Ab. and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

16. Semester Grade Point Average (SGPA)

The performance of a student in a semester is indicated by a number called ‘Semester Grade Point Average’ (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses(Theory/Practical) in a semester with credits C1, C2, C3, C4 and C5 and the student’s grade points in these courses are G1, G2, G3, G4 and G5, respectively, and then students’ SGPA is equal to:

$$SGPA = \frac{C1G1 + C2G2 + C3G3 + C4G4}{C1 + C2 + C3 + C4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the FF and Ab. grade awarded in that semester. For example if a learner has a FF or Ab. grade in course 4, the SGPA shall then be computed as:

$$SGPA = \frac{C1G1 + C2G2 + C3G3 + C4Zero}{C1 + C2 + C3 + C4}$$

17. Cumulative Grade Point Average (CGPA)

The CGPA is calculated with the SGPA of all the VIII semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all VIII semesters and their courses. The CGPA shall reflect the failed status in case of FF grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$CGPA = \frac{C1S1 + C2S2 + C3S3 + C4S4}{C1 + C2 + C3 + C4}$$

where C1, C2, C3,.... is the total number of credits for semester I,II,III,.... and S1,S2, S3,....is the SGPA of semester I,II,III,.... .

No student will be allowed to move further if CGPA is less than 3 at the end of every academic year.

18. Declaration of Class (Table-5)

The class shall be awarded on the basis of CGPA as follows:

First Class with Distinction	= CGPA of. 7.50 to 10.00
First Class	= CGPA of 6.0 to 7.49
Second Class	= CGPA of 5.0 to 5.99
Pass Class	<CGPA of 5.00

19. Project Work

All the students shall undertake a project under the supervision of a teacher in Semester III to IV and submit a report. 4 copies of the project report shall be submitted (typed & bound copy not less than 75 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). The projects shall be evaluated as per the criteria given below.

Evaluation of Dissertation Book				
Criteria	Semester-III		Semester-IV	
			Internal Evaluation (Marks)	External Evaluation (Marks)
Objective(s) of the work done	--		05	05
Methodology Adopted	--		25	25
Results and Discussions	--		15	15
Conclusions and Outcome	--		05	05
Total	--		50	50
Final Total			100	
Evaluation of Presentation				
	Semester-III		Semester-IV	
Criteria	Internal Evaluation (Marks)	External Evaluation (Marks)	Internal Evaluation (Marks)	External Evaluation (Marks)
Presentation of work	75	100	75	75
Communication skills	25	50	25	25
Question and answer skills	50	50	50	50
Total	150	200	150	150
Final Total	350		300	

20. Award of Ranks

Ranks and Medals shall be awarded on the basis of final CGPA. However, candidates who fail in one or more courses during the M.Pharm program shall not be eligible for award of ranks.

Moreover, the candidates should have completed the M. Pharm program in minimum prescribed number of years, (two years) for the award of Ranks.

21. Award of degree

Candidates who fulfil the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

22. Duration for completion of the program of study

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

23. Extra Credit:

An extra credit is to be offered to a student for achievements in co-curricular and extra-curricular activities. This credit shall not be counted while considering the minimum credits for completing the program. The activities and appropriate weight (points) to be allocated to award an extra credit are broadly classified as per the tables below:

Extracurricular Activities (25 Marks maximum out of 100 marks) includes

Sr. No.	Name of the activity	Maximum Marks
1	Participation in any Sport	10
2	Participation in any Cultural event	10
3	Community and Extension activities	10
4	Any achievement includes award, prize or special recognition for event	05

Co-Curricular Activities (75 marks maximum out of 100 marks) include

Sr. No.	Name of the activity	Maximum Marks
1	Completion of certificate SWAYAM course (minimum 4 weeks)	20 (10 marks/course, given for maximum two course)
2	Participation in Conference/Seminar/training program/Teach fest etc. (without Paper) includes	10
	a. State/University/Zonal level: 03	
	b. National : 05	
	c. International conference : 07	
3	Presentation in Conference/Seminar/training program/Teach fest etc. includes	15
	a. Oral Presentation: 10	
	b. Poster Presentation: 05	

4	Publication in Peer-reviewed Journal (indexed in Web of Science and Scopus):	20
	a. First paper publication: 10	
	b. Second paper publication:10	
5	Participation in other technical events like model preparation, Rangoli, Painting, Pharma receipt, dare to sell etc.: (05)	05
6	Any achievement includes award, prize or special recognition for any technical events mentioned above: (05)	05

Activities are broadly classified into Extra-curricular and Co-curricular. All suggested activities are counted as total sum of 100 marks.

FACULTY OF PHARMACY
Master of Pharmacy Programme

Syllabi
Semester I

Charotar University of Science and Technology

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA001: Good Regulatory Practices (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Current Good Manufacturing Practices	12
2	Good Laboratory Practices	12
3	Good Automated Laboratory Practices	12
4	Good Distribution Practices	12
5	Quality management systems	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Current Good Manufacturing Practices	12	20%
	Introduction, US cGMP Part 210 and Part 211.EC Principles of GMP (Directive 91/356/EEC) Article 6 to Article 14 and WHO cGMP guidelines GAMP-5; Medical device and IVDs Global Harmonization Task Force (GHTF) Guidance docs.		
2.	Good Laboratory Practices	12	20%
	Introduction, USFDA GLP Regulations (Subpart A to Subpart K), Controlling the GLP inspection process, Documentation, Audit, goals of Laboratory Quality Audit, Audit tools, Future of GLP regulations, relevant ISO and Quality Council of India(QCI) Standards.		
3.	Good Automated Laboratory Practices	12	20%
	Introduction to GALP, Principles of GALP, GALP Requirements, SOPs of GALP, Training Documentation, 21 CFR Part 11, General check list of 21CFR Part 11, Software Evaluation checklist, relevant ISO and QCI Standards.		
4.	Good Distribution Practices	12	20%
	Introduction to GDP, Legal GDP requirements put worldwide, Principles, Personnel, Documentation, Premises and Equipment, Deliveries to Customers, Returns, Self-Inspection, Provision of information, Stability testing principles, WHO GDP, USP GDP (Supply chain integrity), relevant CDSCO guidance and ISO standards.		

5.	Quality Management Systems	12	20%
	Concept of Quality, Total Quality Management, Quality by design, Six Sigma concept, Out of Specifications (OOS), Change control. Validation: Types of Validation, Types of Qualification, Validation master plan (VMP), Analytical Method Validation. Validation of utilities, [Compressed air, steam, water systems, Heat Ventilation and Air conditioning (HVAC)] and Cleaning Validation. The International Conference on Harmonization (ICH) process, ICH guidelines to establish quality, safety and efficacy of drug substances and products, ISO 13485, Sch MIII and other relevant CDSCO regulatory guidance documents.		

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	prepare checklists and SOPs for various good regulatory practices
CO2	categorize the key regulatory and compliance elements with respect to GMP
CO3	categorize the key regulatory and compliance elements with respect to GLP
CO4	categorize the key regulatory and compliance elements with respect to GALP and GDP
CO5	describe the quality management system in the Pharmaceutical Industry

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11
CO1	3	-	3	-	-	-	-	-	3	-	3
CO2	3	-	3	-	-	-	-	-	3	-	3
CO3	3	-	3	-	-	-	-	-	3	-	3
CO4	3	-	3	-	-	-	-	-	3	-	3
CO5	3	-	3	-	-	-	-	-	3	-	3

Recommended Study Material:

❖ Text book:

1. Good Laboratory Practice Regulations, by Sandy Weinberg, Fourth Edition Drugs and the Pharmaceutical Sciences, Vol.168
2. Good Pharmaceutical Manufacturing practice, Rational and compliance by John Sharp, CRC Press
3. Establishing a cGMP Laboratory Audit System, A practical Guide by David M.Bleisner, Wiley Publication.
4. How to practice GLP by PP Sharma, Vandana Publications.

5. Laboratory Auditing for Quality and Regulatory compliance by Donald C.Singer, Drugs and the Pharmaceutical Sciences, Vol.150.
6. Drugs and Cosmetics Act, 1940 and its rules, published by Ministry of health and family welfare, Government of India.
7. Good Drug Regulatory Practices: a Regulatory Affairs Quality Manual (Good Drug Development Series) – Helene I. Dumitriu.
8. WHO GMP guidelines
9. FDA GMP guidelines
10. The Quality Management Sourcebook: An International Guide to Materials and Resources By Christine Avery; Diane Zabel, Routledge, 1997
11. Pharmaceutical facilities, design, layouts and validation, Manohar A. Potdar, PharmaMed Press, Hyderabad.
12. Remington: The Science and Practice of Pharmacy, Vol-I & II, Gennaro, Alfonso R.,
13. Guidelines on cGMP and Quality of Pharmaceutical Products, S.Iyer, D.K.Publications, Mumbai.
14. A manual of laboratory techniques by N.Raghuramulu
15. Good laboratory practice- the Why and the How; by Jurg P. ,Seiler, Springer.

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA002: Regulatory Writing (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Documentation in Pharmaceutical industry	12
2	Dossier preparation and submission	12
3	Audits	12
4	Inspections	12
5	Product life cycle management	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Documentation in Pharmaceutical industry	12	20%
	Exploratory Product Development Brief (EPDB) for Drug substance and Drug product, Product Development Plan (PDP), Product Development Report (PDR), Site Master File and Drug Master Files (DMF), Device master file.		
2.	Dossier preparation and submission	12	20%
	Introduction and overview of dossiers, contents and organization of dossier, binders and sections, compilation and review of dossier. Paper submissions, overview and modules of CTD, electronic CTD submissions; Electronic submission: Planning electronic submission, requirements for submission, regulatory bindings and requirements, Tool and Technologies, electronic dossier submission process and validating the submission, Electronic Submission Gateway (ESG). Non eCTD electronic submissions (NeeS), Asian CTD formats (ACTD) submission. Organizing, process and validation of submission. Submission in Sugam system of CDSCO.		
3.	Audits	12	20%
	Introduction, Definition, Summary, Types of audits, GMP compliance audit, Audit policy, Internal and External Audits, Second Party Audits, External third-party audits, Auditing strategies, Preparation and conducting audit, Auditing strategies, audit analysis, audit report, audit follow up. Auditing/inspection of		

	manufacturing facilities by regulatory agencies. Timelines for audits/inspection. GHTF study group 4 guidance document. ISO 13485.		
4.	Inspections	12	20%
	Pre-approval inspections, Inspection of pharmaceutical manufacturers, Inspection of drug distribution channels, Quality systems requirements for national good manufacturing practice inspectorates, inspection report, model certificate of good manufacturing practices, Root cause analysis, Corrective and Preventive action (CAPA). GMP guidelines of Inspection.		
5.	Product lifecycle management	12	20%
	Prior Approval Supplement (PAS), Post Approval Changes [SUPAC], Changes Being Effectuated in 30 Days (CBE-30), Annual Report, Post marketing Reporting Requirements, Post approval Labelling Changes, Lifecycle Management, FDA Inspection and Enforcement, Establishment Inspection Report (EIR), Warning Letters, Recalls, Seizure and Injunctions. ISO Risk Management Standard.		

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	describe the significance of various documents pertaining to drugs in pharmaceutical industry
CO2	narrate the basics of regulatory compilation in format laid down by Regulatory agencies
CO3	create and assemble the regulation submission as per the requirements of agencies
CO4	prepare the checklist of audit and to understand the guidelines of inspections.
CO5	describe and apply follow up the submissions and post approval document requirements

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11
CO1	-	-	-	-	-	3	-	-	-	-	3

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA003: Clinical Research Regulations (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Clinical Drug Development Process	12
2	Ethics in Clinical Research	12
3	Regulations governing Clinical Trials	12
4	Clinical Research Related Guidelines	12
5	USA & EU Guidance	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Clinical Drug Development Process	12	20%
	Different types of Clinical Studies • Phases of clinical trials, Clinical Trial protocol • Phase 0 studies • Phase I and subtype studies (single ascending, multiple ascending, dose escalation, methods, food effect studies, drug – drug interaction, PK end points • Phase II studies (proof of concept or principle studies to establish efficacy) • Phase III studies (Multi ethnicity, global clinical trial, registration studies) • Phase IV studies (Post Marketing Studies; PSUR) • Clinical Investigation and Evaluation of Medical Devices & IVDs Different Types of Studies Key Concepts of Medical Device Clinical Evaluation. Key concepts of Clinical Investigation		
2.	Ethics in Clinical Research	12	20%
	Historical Perspectives: Nuremberg Code, Thalidomide study, Nazis Trials, Tuskegee Syphilis Study, The Belmont Report, The declaration of Helsinki • Origin of International Conference on Harmonization – Good Clinical Practice (ICH-GCP) guidelines. • The ethics of randomized clinical trials • The role of placebo in clinical trials • Ethics of clinical research in special population • Institutional Review Board/Independent Ethics Committee/Ethics Committee – composition, roles, responsibilities, review and approval process and ongoing monitoring of safety data • Data		

	safety monitoring boards. • Responsibilities of sponsor, CRO, and investigator in ethical conduct of clinical research		
3.	Regulations governing Clinical Trials	12	20%
	India: Clinical Research regulations in India – Schedule Y & Medical Device Guidance USA: Regulations to conduct drug studies in USA (FDA) • NDA 505(b)(1) of the FD&C Act (Application for approval of a new drug) • NDA 505(b)(2) of the FD&C Act (Application for approval of a new drug that relies, at least in part, on data not developed by the applicant) • ANDA 505(j) of the FD&C Act (Application for approval of a generic drug product) • FDA Guidance for Industry - Acceptance of Foreign Clinical Studies • FDA Clinical Trials Guidance Document: Good Clinical Practice EU: Clinical Research regulations in European Union (EMA) • Ethical principles governing informed consent process • Patient Information Sheet and Informed Consent Form • The informed consent process and documentation		
4.	Clinical Research Related Guidelines	12	20%
	Good Clinical Practice Guidelines (ICH GCP E6) • Indian GCP Guidelines • ICMR Ethical Guidelines for Biomedical Research • CDSCO guidelines GHTF study group 5 guidance documents Regulatory Guidance on Efficacy and Safety ICH Guidance's • E4 – Dose Response Information to support Drug Registration • E7 – Studies in support of General Population: Geriatrics • E8 – General Considerations of Clinical Trials • E10 – Choice of Control Groups and Related Issues in Clinical Trials, • E 11 – Clinical Investigation of Medicinal Products in the Paediatric Population • General biostatics principle applied in clinical research		
5.	USA & EU Guidance	12	20%
	USA: FDA Guidance • CFR 21Part 50: Protection of Human Subjects • CFR 21Part 54: Financial Disclosure by Clinical Investigators • CFR 21Part 312: IND Application • CFR 21Part 314: Application for FDA Approval to Market a New Drug • CFR 21Part 320: Bioavailability and bioequivalence requirements • CFR 21Part 812: Investigational Device Exemptions • CFR 21Part 822: Post-market surveillance • FDA Safety Reporting Requirements for INDs and BA/BE Studies • FDA Med Watch • Guidance for Industry: Good Pharmacovigilance Practices and		

	Pharmacoepidemiologic Assessment European Union: EMA Guidance • EU Directives 2001 • EudraLex (EMA) Volume 3 – Scientific guidelines for medicinal products for human use • EU Annual Safety Report (ASR) • Volume 9A – Pharmacovigilance for Medicinal Products for Human Use • EU MDD with respect to clinical research • ISO 14155		
--	---	--	--

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	know history, origin and ethics of clinical and biomedical research and evaluation.
CO2	narrate the development process for drug and medical devices and phases of clinical trials with significance.
CO3	appreciate and narrate appropriate process for approval of clinical trial protocols in different populations as well as in different regions of the world
CO4	describe and apply regulatory requirements and guidance for conduct of clinical trials and clinical research as per the guidelines proposed by Indian, US and European regulatory agencies
CO5	compare and differentiate various regulations pertaining to conduct of clinical trial protocols and studies in different countries

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11

CO4	3	3	-	-	-	3	-	-	3	-	3
CO5	3	3	3	-	-	3	-	-	3	-	3

Recommended Study Material:

❖ Textbook:

1. Clinical Trials and Human Research: A Practical Guide to Regulatory Compliance By Fay A. Rozovsky and Rodney K. Adams
2. HIPAA and Human Subjects Research: A Question-and-Answer Reference Guide By Mark Barnes, JD, LLM and Jennifer Kulynych, JD, PhD
3. Principles and Practices of Clinical Research, Second Edition Edited by John I. Gallin and Frederick P. Ognibene

4. Reviewing Clinical Trials: A Guide for the Ethics Committee; Johan PE Karlberg and Marjorie A Speers; Karlberg, Johan Petter Einar, Hong Kong.
5. International Pharmaceutical Product Registration: Aspects of Quality, Safety and Efficacy; Anthony C. Cartwright; Taylor & Francis Inc., USA.
6. New Drug Approval Process: The Global Challenge; Guarino, Richard A; Marcel Dekker Inc., NY.
7. FDA regulatory affairs: a guide for prescription drugs, medical devices, and biologics; Douglas J. Pisano, David Mantus; CRC Press, USA
8. Country Specific Guidelines from official websites.
9. Textbook on clinical research: A guide for Aspiring professionals and Professionals, Guru Prasad Mohanta, Pharma med press.
10. Schedule Y of Drugs and Cosmetics act
11. Clinical trials of drugs & biopharmaceuticals; Chi-Jen Lee, Lucia H. Lee, Christopher L. Wu, Benjamin R. Lee, Mei-Ling Chen, CRC press
12. Drug Screening Methods by S.K.Gupta
13. Basic Principles of clinical Research & Technology by S.K.Gupta
14. International Medical Device Regulators Forum (IMDRF) Medical Device Single Audit Program (MDSAP)

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHCCC007: Hazard, Safety and Risk Management & Intellectual Property
Rights (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Multidisciplinary nature of environmental studies	12
2	Air and Chemical based hazards	12
3	Fire Explosion hazard and hazard risk management	12
4	General Principles of Intellectual Property	12
5	Patent and Trademark	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Multidisciplinary nature of environmental studies	12	20%
	- Natural Resources, Renewable and non-renewable resources, Natural resources and associated problems, a) Forest resources; b) Water resources; c) Mineral resources; d) Energy resources; e) Land resources Ecosystems: Concept of an ecosystem and Structure and function of an ecosystem. - Environmental hazards: Hazards based on Air, Water, Soil and Radioisotopes.		
2.	Air and Chemical based hazards	12	20%
	- Sources, Types of Hazards, Air circulation maintenance industry for sterile area and non-sterile area, Preliminary Hazard Analysis (PHA) Fire protection system: Fire prevention, types of fire extinguishers and critical Hazard management system. - Sources of chemical hazards, Hazards of Organic synthesis, sulphonating hazard, Organic solvent hazard, Control		

	measures for chemical hazards, Management of combustible gases, Toxic gases and Oxygen displacing gases management, Regulations for chemical hazard, Management of over-Exposure to chemicals and TLV concept.		
3.	Fire Explosion hazard and hazard risk management	12	20%
	• Introduction, Safety and hazards regulations, Fire protection system: Fire prevention, types of fire extinguishers and critical Hazard management system mechanical and chemical explosion, multiphase reactions, transport effects and global rates. Preventive and protective management from fires and explosion electricity passivation, ventilation, and sprinkling, proofing, relief systems -relief valves, flares, scrubbers. • Industrial processes and hazards potential, mechanical electrical, thermal and process hazards. Self-protective measures against workplace hazards. Critical training for risk management, Process of hazard management, ICH guidelines on risk assessment and Risk management methods and Tools Factory act and rules, fundamentals of accident prevention, elements of safety programme and safety management, Physicochemical measurements of effluents, BOD, COD, Determination of some contaminants, Effluent treatment procedure, Role of emergency services.		
4.	General Principles of Intellectual Property	12	20%
	• Concepts of Intellectual Property (IP), Intellectual Property Protection (IPP), Intellectual Property Rights (IPR); Economic importance, mechanism for protection of Intellectual Property –patents, Copyright, Trademark; Factors affecting choice of IP protection; Penalties for violation; Role of IP in pharmaceutical industry; Global ramification and financial implications.		
5.	Patent and Trademark	12	20%

	- Definition, Need for patenting, Conditions to be satisfied by an invention to be patentable, Types of patent applications-provisional and Complete Application, PCT and convention patent applications; Filing a patent applications; patent application forms and guidelines - Patent of Addition; International patenting requirement procedures; Rights and responsibilities of a patentee; Practical aspects regarding maintaining of a Patent file; Opposition of Patent (Pre Grant and Post Grant Opposition); Patent infringement meaning and scope. - IP and ethics-positive and negative aspects of IPP; Societal responsibility, avoiding unethical practices, Brief introduction to Trademark and its protection		
--	---	--	--

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	describe the environment and related issues and suggest probable mitigation plans.
CO2	enumerate various hazards associated with the pharmaceutical industries, their management and prevention techniques.
CO3	exhibit comprehensive knowledge on the safety issues associated with the working area and suggest the practices to provide safe working environment.
CO4	describe the concept of intellectual properties as per the laws, components of patent applications and requirements to obtain the patent.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	3	-	-	-	-	3	3	-	-	-	3
CO2	3	-	-	-	-	3	3	-	-	-	3

FACULTY OF PHARMACY

Master of Pharmacy Programme

PHCCC002: Drug Development and Pharmaceutical Statistics (Theory)

Total hours: 30 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	(a) Overview of Drug Development Process	10
	(b) FDA Applications	
	(c) Pre-Clinical Development	
2	(a) Overview of Clinical Development	10
	(b) Regulatory aspects related to clinical trials	
3	Biostatistics	10

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	(a) Overview of Drug Development Process	10	33.3%
	Drug discovery cycle, Lead identification, Timeline for drug development, New Chemical Entities.		
	(b) FDA Applications		
	IND, NDA, ANDA.		
	(c) Pre-Clinical Development		
	Physicochemical properties of NCE, CMC development, pre-clinical testing – toxicity, pharmacokinetics and metabolism of NCE, In vitro methods for pre-clinical studies.		
2.	(a) Overview of Clinical Development	10	33.3%
	Introduction to clinical trials, Clinical trial phases, Clinical study designs, Ethical considerations, Inclusion and Exclusion criteria, Termination criteria, Review and Approval process for Clinical Study, Clinical research protocol		
	(b) Regulatory aspects related to clinical trials		

	ICH GCP. Quality assurance in Clinical research		
3.	Biostatistics	10	33.3%
	Definition, application, sample size, importance of sample size, factors influencing sample size, dropouts, statistical tests of significance, type of significance tests, parametric tests (students-t test, ANOVA, Correlation coefficient, regression), non-parametric tests (wilcoxon rank tests, analysis of variance, correlation, chi square test), null hypothesis, P values, degree of freedom, interpretation of P values		

Course Outcome (COs):

At the end of the course, the students would be able to

CO1	understand the drug discovery and development process.
CO2	gains knowledge regarding clinical studies, guidelines for clinical trials, designing of clinical trial documents and the ethical values to be observed during clinical trials.
CO3	understand types of sampling techniques and design in clinical trials.
CO4	perform statistical analysis of the data generated during pharmaceutical research experiments.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11
CO1	3	3	3	3	-	-	-	-	-	-	3

CO3	3	3	3	3	-	3	3	3	-	-	3
CO4	3	3	3	3	-	-	-	-	-	-	3

Recommended Study Material:**❖ References:**

1. New Drug Approval process, 4th Edition, R.A.Guarino, Marcel Dekker, New York.
2. ICH GCP guidelines.
3. Schedule Y of Drugs and Cosmetics act.
4. Stanford Bolton, Charles Bon (2004), Pharmaceutical Statistics, Practical and Clinical Applications (Fourth rev. ed) Marcel Dekker, Inc.

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA004: Regulatory Affairs Practical-I (Practical)

Total hours: 180 Hr

Outline of the course:

Sr. No.	Title of the unit
1	Preparation of SOPs, Analytical reports (Stability and validation)
2	Protocol preparation for documentation of various types of plan and reports (Product Development Plan (PDP), Product Development Report (PDR), Site Master File and Drug Master Files (DMF), Device master file)
3	Labeling comparison between brand & generics, Import of drugs for research and developmental activities
4	Study of Phases of clinical trials and preparation of Clinical Trial protocol
5	Patient Information Sheet and Informed Consent Form
6	Informed consent process and documentation
7	Preparation of clinical trial protocol for registering trial in India, USA and Europe
8	Registration for conducting BA/ BE studies in India, USA and Europe
9	Preparation of regulatory dossier as per CTD (ICH, WHO) and ACTD format and submission
10	Registering for different Intellectual Property Rights in India
11	GMP Audit Requirements as per WHO
12	Preparation and documentation for Indian Patent application
13	Preparation of checklist for registration of IND as per ICH CTD format
14	Preparation of checklist for registration of NDA as per ICH CTD format
15	Preparation of checklist for registration of ANDA as per ICH CTD format
16	Case studies on response with scientific rationale to USFDA Warning Letter
17	Preparation of submission checklist of IMPD for EU submission
18	Comparison study of marketing authorization procedures in EU
19	Comparative study of DMF system in US, EU and Japan
20	Preparation of regulatory submission using eCTD software
21	Preparation of Clinical Trial Application (CTA) for US submission
22	Preparation of Clinical Trial Application (CTA) for EU submission
23	Comparison of Clinical Trial Application requirements of US, EU and Japan of a dosage form

24	Regulatory requirements checklist for conducting clinical trials in India
25	Regulatory requirements checklist for conducting clinical trials in Europe
26	Regulatory requirements checklist for conducting clinical trials in USA

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	prepare the documentation requirements for product registration and able to prepare those documents
CO2	describe the clinical trials requirements for conducting clinical trials, and able to prepare clinical trial protocol for US, EU and Japan
CO3	categorize the requirements for the various types of submission application for US, EU and Japan and to understand the Regulatory guidance's and guidelines for filing and approval process
CO4	prepare the regulatory dossiers as per CTD (ICH, WHO), e-CTD and ACTD format and their submission to regulatory agencies in different countries

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

FACULTY OF MANAGEMENT STUDIES DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES

HS704 B: ACADEMIC SPEAKING (Sem-I)

I. Credits and Schemes:

Sem	Course Code	Course Name	Credits	Teaching Scheme	Evaluation Scheme				
				Contact Hours/ Week	Theory		Practical		Total
					Internal	External	Internal	External	
1	HS704 A/B/C/D/E/F/G/ H	Academic Speaking	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Foundations of Advance Communication - Meaning and Definition of Advance Communication - Advance Communication in Digital, Social, Mobile World - Strategies for Advance Communication - Meaning and Concept of Academic Language - High Frequency Academic Vocabulary	04
2	Art of Conversation - Describing people, places and things - Expressing opinions - Making suggesting - Persuading someone - Interpreting and Summarizing	06
3	Science of Power Speaking - Phonemes - Word Stress - Pronunciation	06

	• <i>Intonation</i> • <i>Pause</i> • <i>Register</i> • <i>Fluency</i> • <i>Prosody</i> • <i>Lexical Range</i>	
4	<i>Academic Speaking Application – Part I</i> • <i>Art of Oratory</i> • <i>Formal Presentation</i> • <i>Speech Analysis – Decoding Best Speeches</i>	08
5	<i>Academic Speaking Application – Part II</i> • <i>Job Interview</i> • <i>Group Discussion</i> • <i>Meeting</i>	06
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, group work, independent and collaborative research, presentations etc.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	I-Talk	1	10	25
2	Situational Speaking	1	05	
3	Case Study - Speech Analysis	2	10	
4	Attendance and Class Participation	-		05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the advance communication skills and academic speaking.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical	-	70	70

Total	70
--------------	-----------

Course Outcome (COs):

After completion of the course the student would:

CO1	understand and demonstrate advance communication skills and academic speaking.
CO2	demonstrate linguistic competence
CO3	demonstrate performing ability at group discussion and personal interview.
CO4	demonstrate the formal presentation skills.
CO5	demonstrate ability to communicate in diverse situations

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	-	-	-	-	-	-	-	3	-	-	-
CO2	-	-	-	-	-	-	-	3	-	-	-
CO3	-	-	-	-	3	-	-	3	-	-	-
CO4	-	-	-	-	-	-	-	3	-	-	-
CO5	-	2	-	-	3	-	-	3	-	-	-

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

V. Reference Books

- Headway Academic Skills - Level 1: Listening, Speaking and Study Skills Student's Book Paperback

VI. Reading

- **Unit 1:** Business communication Today (Thirteenth Edition) by Courtland L. Bovee, John V. Thill and Roshan Lal Raina
- **Unit 2:** Effective Speaking Skills by Terry O' Brien
- **Unit 2:** Speak Better Write Better by Norman Lewis
- **Unit 2:** Well Spoken: Teaching Speaking to All Students by Erik Palmer
- **Unit 3:** Let Us Hear Them Speak: Developing Speaking – Listening Skills in English by Jayshree Mohanraj (Publisher – Sage Publication)
- **Unit 4:** The craft of scientific presentations: Critical steps to succeed and critical errors to avoid. New York: Springer by Michael Alley
- **Unit 4:** Presentation Skills in English by Bob Dignen (Publisher: Orient Black Swan)

FACULTY OF PHARMACY
Master of Pharmacy Programme

Syllabi
Semester II

Master of Pharmacy Programme
PHRGA006: Regulatory Aspects of Drug & Cosmetics (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	USA, CANADA	12
2	European Union, Australia	12
3	Japan	12
4	Emerging Market	12
5	India, Brazil, ASEAN, CIS and GCC Countries	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	USA, CANADA	12	20%
	Organization structure and functions of FDA. Federal register and Code of Federal Regulations (CFR), History and evolution of United States Federal, Food, Drug and Cosmetic Act (FFDCA), Hatch Waxman act and Orange book, Purple book, Drug Master Files (DMF) system in US, Regulatory Approval Process for Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA), Supplemental New Drug Application (SNDA); Regulatory requirements for Orphan drugs and Combination Products, Changes to an approved NDA / ANDA. Regulatory considerations for manufacturing, packaging and labelling of pharmaceuticals in USA. Legislation and regulations for import, manufacture, distribution and sale of cosmetics in USA and Canada.		
2.	European Union, Australia	12	20%
	Organization and structure of EMA & EDQM, General guidelines, Active Substance Master Files (ASMF) system in EU, Content and approval process of IMPD, Marketing Authorization		

	procedures in EU (Centralized procedure, Decentralized procedure, Mutual recognition procedure and National Procedure). Regulatory considerations for manufacturing, Packaging and labeling of pharmaceuticals in EU, Eudralex directives for human medicines, Variations & extensions, Compliance of European Pharmacopoeia (CEP)/ Certificate of Suitability (CoS), Marketing Authorization (MA) transfers, Qualified Person (QP) in EU. Legislation and regulations for import, manufacture, distribution and sale of cosmetics in European Union & Australia.		
3.	Japan	12	20%
	Organization of the PMDA, Pharmaceutical Laws and regulations, types of registration applications, DMF system in Japan, drug regulatory approval process, Regulatory considerations for manufacturing, packaging and labelling of pharmaceuticals in Japan, Post marketing surveillance in Japan. Legislation and regulations for import, manufacture, distribution and sale of cosmetics in Japan		
4.	Emerging Market	12	20%
	Introduction, Countries covered, Study of the world map, study of various committees across the globe (ASEAN, APEC, EAC, GCC, PANDRH, SADC) WHO: WHO, GMP, Regulatory Requirements for registration of drugs and post approval requirements in WHO through prequalification programme, Certificate of Pharmaceutical Product (CoPP) - General and Country Specific (South Africa, Egypt, Algeria and Morocco, Nigeria, Kenya and Botswana)		
5.	India, Brazil, ASEAN, CIS and GCC Countries	12	20%
	Regulatory requirements and approval procedures for Drugs as per CDSCO and State Licensing Authority, ASIAN Countries: Introduction to ACTD, Regulatory Requirements for registration of drugs and post approval requirements in China and South Korea & Association of Southeast Asian Nations (ASEAN) Region i.e.		

	Vietnam, Malaysia, Philippines, Singapore and Thailand. CIS (Commonwealth Independent States): Regulatory prerequisites related to Marketing authorization requirements for drugs and post approval requirements in CIS countries i.e. Russia, Kazakhstan and Ukraine GCC (Gulf Cooperation Council) for Arab states: Regulatory prerequisites related to Marketing authorization requirements for drugs and post approval requirements in Saudi Arabia and UAE. Legislation and regulations for import, manufacture, distribution and sale of cosmetics in India, Brazil, ASEAN, CIS and GCC Countries.		
--	--	--	--

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	narrate the organization of drug regulatory bodies in various countries
CO2	summarize drug discovery and development and generic product development regulatory approval process and registration procedures for API and drug products in US, EU, Japan.
CO3	summarize cosmetic regulations in regulated and semi-regulated countries.
CO4	describe the comparative study of India with other regulated markets.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11
CO1	3	-	-	-	-	-	-	-	-	-	3
CO2	3	-	-	-	-	-	-	-	-	-	3
CO3	3	-	-	-	-	-	-	-	-	-	3

28. Pharmaceutical Product Licensing: Requirements for Europe, by A. C. Cartwright, CRC Press.

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA007: Regulatory Aspects of Food, Herbal & Nutraceuticals (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Nutraceuticals	12
2	Herbal Products	12
3	India	12
4	USA	12
5	European Union	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Nutraceuticals	12	20%
	Introduction, History of Food and Nutraceutical Regulations, Meaning of Nutraceuticals, Dietary Supplements, Functional Foods, Medical Foods, Scope and Opportunities in Nutraceuticals Market. WHO guidelines on nutrition. NSF International: It's Role in the Dietary Supplements and Nutraceuticals Industries, NSF Certification, NSF Standards for Food And Dietary Supplements. Good Manufacturing Practices for Nutraceuticals.		
2.	Herbal Products	12	20%
	Introduction, History of Herbal Product Regulations, Meaning of herbal products, Scope and Opportunities in herbal product Market Rules, WHO guidelines on Traditional Medicine and Regulation of Herbal, regulation of Complementary and Alternative Medicine Products. Regulation of herbal products in Australia, Canada, South Africa and Japan.		
3.	India	12	20%
	Regulations, guidelines and standards for regulatory filing of		

	Herbals products in India Food Safety and Standards Act, Food Safety and Standards Authority of India: Organization and Functions, Regulations for import, manufacture and sale of Nutraceuticals products in India, Recommended Dietary Allowances (RDA) in India.		
4.	USA	12	20%
	Regulations, guidelines and standards for regulatory filing of Herbals products in USA US FDA Food Safety Modernization Act, Dietary Supplement Health and Education Act. U.S. regulations for manufacture and sale of nutraceuticals and dietary supplements, Labelling Requirements and Label Claims for Dietary Supplements, Recommended Dietary Allowances (RDA) in the U.S		
5.	European Union	12	20%
	Regulations, guidelines and standards for regulatory filing of Herbals products in EU European Food Safety Authority (EFSA): Organization and Functions. EU Directives and regulations for manufacture and sale of nutraceuticals and dietary supplements. Nutrition labelling. European Regulation on Novel Foods and Novel Food Ingredients. Recommended Dietary Allowances (RDA) in Europe.		

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	define and differentiate nutraceuticals, functional foods, dietary supplements, and medical foods
CO2	compare the global aspects of regulations in food and nutraceutical markets
CO3	describe the nutraceutical regulations in India, USA and Europe
CO4	describe the regulatory requirements for the herbal products
CO5	summarize the legislations proposed for evaluation of quality and safety of herbal products

Course Articulation Matrix:

Regulatory

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA008: Regulatory Aspects of Biological & Medical Devices (Theory)

Total hours: 60 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Medical Devices and Biologics Regulation in USA	12
2	Medical Devices and Biologics Regulation in India	12
3	Medical Devices and Biologics Regulation in Europe	12
4	Vaccine regulations in India, USA and Europe	12
	Ethics in Medical Devices Regulation	
5	Regulation in emerging market and Regulated market	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Medical Devices and Biologics Regulation in USA	12	20%
	Introduction, Classification, Regulatory approval process for Medical Devices (510k) Premarket Notification, Pre-Market Approval (PMA), Investigational Device Exemption (IDE) and In-vitro Diagnostics, Quality System Requirements 21 CFR Part 820, Labeling requirements 21 CFR Part 801, Post marketing surveillance of MD and Unique Device Identification (UDI). Basics of In vitro diagnostics, classification and approval process. Introduction to Biologics, biological and biosimilars, different biological products, difference between generic drug and biosimilars, laws, regulations and guidance on biologics/ biosimilars, development and approval of biologics and biosimilars (IND, PMA, BLA, NDA, 510(k), pre-clinical and clinical development considerations, advertising, labelling and packing of biologics		
2.	Medical Devices and Biologics Regulation in India	12	20%
	Introduction, Definition, Risk based classification and Essential		

	Principles of Medical Devices and IVDs. Differentiating medical devices IVDs and Combination Products from that of pharmaceuticals, History of Medical Device. Regulation, Product Lifecycle of Medical Devices and Classification of Medical Devices. Introduction, Applicable Regulations and Guidelines, Principles for Development of Similar Biologics, Data Requirements for Preclinical Studies, Data Requirements for Clinical Trial Application, Data Requirements for Market Authorization Application, Post-Market Data for Similar Biologics, Pharmacovigilance. GMP and GDP.		
3.	Medical Devices and Biologics Regulation in Europe	12	20%
	Introduction, Classification, Regulatory approval process for Medical Devices (Medical Device Directive, Active Implantable Medical Device Directive) and in vitro Diagnostics (In Vitro Diagnostics Directive), CE certification process. Basics of In vitro diagnostics, classification and approval process. Introduction to Biologics; directives, scientific guidelines and guidance related to biologics in EU, comparability/ biosimilarity assessment, Plasma master file, TSE/ BSE evaluation, development and regulatory approval of biologics (Investigational medicinal products and biosimilars), pre-clinical and clinical development considerations; stability, safety, advertising, labelling and packing of biologics in EU		
4.	Vaccine regulations in India, USA and Europe, Ethics in Medical Devices Regulation	12	20%
	Vaccine regulations in India, USA and Europe Clinical evaluation, Marketing authorisation, Registration or licensing, Quality assessment, Pharmacovigilance, Additional requirements Blood and Blood Products Regulations in India, US and European Union: Regulatory Requirements of Blood and/or Its Components Including Blood Products, Label Requirements, ISBT		

	(International Society of Blood Transfusion) and IHN (International Haemovigilance Network) Ethics in Medical Devices Regulation Clinical Investigation of Medical Devices, Clinical Investigation Plan for Medical Devices, Good Clinical Practice for Clinical Investigation of medical devices (ISO 14155:2011) Quality: Quality System Regulations of Medical Devices: ISO 13485, Quality Risk Management of Medical Devices: ISO 14971, Validation and Verification of Medical device, Adverse Event Reporting of Medical device		
5.	Regulation in emerging market and Regulated market	12	20%
	Regulations, guidelines and standards for regulatory filing of Medical Devices and Biologics Regulation in ASEAN, CIS, Japan, Canada, Australia, South Africa, China.		

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	recognize the regulation for newly developed biologics and biosimilar
CO2	describe importance of Pre-formulation studies in pharmaceutical product development.
CO3	discuss the regulatory requirements of blood and/or its components including blood products and label requirements
CO4	describe the basics of medical devices and IVDs, process of development, ethical and quality considerations
CO5	describe and differentiate the medical devices and IVDs directives in European Union and USA

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11
CO1	3	3	-	-	-	3	3	-	3	-	3
CO2	3	3	-	-	-	3	3	-	3	-	3
CO3	3	3	-	-	-	3	3	-	3	-	3
CO4	3	3	-	-	-	3	3	-	3	-	3
CO5	3	3	-	-	-	3	3	-	3	-	3

Recommended Study Material:

❖ Textbook:

1. Regulatory affairs: a guide for prescription drugs, medical devices, and biologics by Douglas J. Pisano, David Mantus.
2. Medical Device Development: A Regulatory Overview by Jonathan S. Kahan
3. Medical Product Regulatory Affairs: Pharmaceuticals, Diagnostics, Medical Devices by John J. Tobin and Gary Walsh
4. Compliance Handbook for Pharmaceuticals, Medical Devices and Biologics by Carmen Medina
5. Development and control of medicines and medical devices, Robin J Harman, Pharmaceutical press, 2004
6. International Medicines Regulation A Forward Look to 1992 Editors: Walker, S.R., Griffin, A.R., Springer Science & Business Media, 2012
7. Country Specific Guidelines from official websites.
8. Regulatory Affairs for Biomaterials and Medical Devices, Edited by: S. Amato and B. Ezzell, Woodhead Publishing
9. Safety Evaluation of Pharmaceuticals and Medical Devices: International Regulatory Guidelines, Shayne C. Gad Springer.

FACULTY OF PHARMACY

Master of Pharmacy Programme

PHCCC008: Pharmaceutical Validation and Documentation (Theory)

Total hours: 60

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	a) Introduction of validation	12
	b) Qualification	
2	(a) Qualification of manufacturing equipment	12
	(b) Qualification of laboratory equipment	
	(c) Validation of Utility systems	
3	Process validation and Analytical method validation	12
4	(a) Cleaning validation	12
	(b) Computerized system validation	
5	Pharmaceutical Documentation	12

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	(a) Introduction of validation	12	20%
	Definition of Calibration, Qualification and Validation, Scope, frequency and importance. Difference between calibration and validation. Calibration of weights and measures. Advantages of Validation, scope of Validation, Organization for Validation, Validation Master plan, Types of Validation, Streamlining of qualification & Validation process and Validation Master Plan.		
	(b) Qualification		
	User requirement specification, Design qualification, Factory Acceptance Test (FAT)/Site Acceptance Test (SAT), Installation qualification, Operational qualification, Performance qualification, Re-Qualification (Maintaining status-Calibration Preventive Maintenance, Change management).		
2.	(a) Qualification of manufacturing equipment	12	20%
	Dry Powder Mixers, Fluid Bed and Tray dryers, Tablet Compression (Machine), Dry heat sterilization/Tunnels,		

	Autoclaves, Membrane filtration, Capsule filling machine.		
	(b) Qualification of laboratory equipment		
	Hardness tester, Friability test apparatus, tap density tester, Disintegration tester, Dissolution test apparatus		
	(c) Validation of Utility systems		
	Pharmaceutical water system & pure steam, HVAC system, Compressed air and nitrogen		
3.	Process Validation		
	Concept, Process and documentation of Process Validation. Prospective, Concurrent & Retrospective Validation, re validation criteria, Process Validation of various formulations (Coated tablets, Capsules, Ointment/Creams, Liquid Orals and aerosols.), Aseptic filling: Media fill validation, USFDA guidelines on Process Validation- A life cycle approach.	12	20%
4.	(a) Cleaning Validation		
	Cleaning Method development, Validation of analytical method used in cleaning, Cleaning of Equipment, Cleaning of Facilities. Cleaning in place (CIP). Validation of facilities in sterile and non-sterile plant.	12	20%
	(b) Computerized system validation		
	Electronic records and digital signature - 21 CFR Part 11 and GAMP		
5.	Pharmaceutical Documentation		
	Brief introduction to Good Documentation Practices in Pharmaceutical Industry, Documentation control, Paperless documentation system i) Manufacturing documents: Batch manufacturing record, Batch formula record, Master Formula Record. ii) Quality Assurance Documents: Validation protocols, Validation master plan, analytical method validation protocols, and Validation reports: IQ, OQ, PQ protocols, SOP, Audit Records, and Security Records. iii) Testing Documents: Certificate of Analysis, IPQC protocols, Test method protocol, finished product and raw material protocol, Stability studies protocol iv) Maintenance and Environmental Control related documents. v) Store Management Records: Store reconciliation records for raw material, finished products and Packaging materials. vi) Consumer Related Documents: Product recall, complaint traceability, printing packing.	12	20%

Course Outcome (COs):

At the end of the course, the students would be able to

CO1	describe the concept and preparation aspect of validation and qualification in pharmaceutical industry.
CO2	differentiate qualification and validation process and narrate the process for validating various pharmaceutical instruments and equipment.
CO3	summarize the process validation for pharmaceutical dosage forms.
CO4	narrate the implementation of digital processes and cleaning process in pharmaceutical industry.
CO5	prepare different types of pharmaceutical documents and suggest the approaches for storage of the documents with reference to easy retrieval.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	3	3	3	3	-	-	-	-	-	-	3
CO2	3	3	3	-	-	-	-	-	-	-	3
CO3	3	3	3	-	-	-	-	-	-	-	3
CO4	3	3	3	3	-	3	-	-	-	-	3
CO5	3	3	3	3	-	3	3	-	-	-	3

Recommended Study Material:**❖ References:**

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHCCC004: Research Methodology (Theory)

Total hours: 30 Hr

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	(a) General Research Methodology	10
	(b) Declaration of Helsinki	
2	(a) Medical Research	10
	(b) CPCSEA guidelines for laboratory animal facility	
3	Design of Experiments	10

Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	(a) General Research Methodology	10	33.33%
	Research, objective, requirements, practical difficulties, review of literature, study design, types of studies, strategies to eliminate errors/bias, controls, randomization, crossover design, placebo, blinding techniques.		
	(b) Declaration of Helsinki		
	History, introduction, basic principles for all medical research.		
2.	(a) Medical Research	10	33.33%
	History, values in medical ethics, guidelines, ethics committees, conflicts of interests, referral, treatment of family members, fatality.		
	(b) CPCSEA guidelines for laboratory animal facility		
	General introduction, guidelines applicable in India, constitution and function of the committee, record keeping, SOPs, personnel and training, transport of lab animals		

3.	Design of Experiments	10	33.33%
	- Variables - Definition of Variable, Types of variables (Dependent and Independent variables, confounded variables), Measurement of variables, Types of measurement scales and their comparison. Reliability and Validity of Measurements. - Definition, Need, Advantages of DOE in Pharmacoinformatics Experimental designing, planning of an experiment, description of terms such as replication and randomization. - Placket-Burman design, Factorial-Fractional designs, Simplex design, mixture designs, central composite designs and Box Benken method in optimization, Application of optimization techniques in QbD in product development Evolution of full and reduced mathematical models in experimental designs, polynomial equations, Response surface methodology, contour plots, and their interpretation. - Application of DOE in pharmaceutical research: Discipline specific applications.		

Course Outcome (COs):

At the end of the course, the students would be able to

CO1	narrate the drug discovery and development process.
CO2	describe the stages of clinical studies along with relevant guidelines, designing of clinical trial documents including the ethics involved in clinical trials
CO3	enumerate sampling techniques and suggest the sampling technique with justification
CO4	perform statistical analysis of the data generated during pharmaceutical research experiments and interpret the results.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11

FACULTY OF PHARMACY
Master of Pharmacy Programme
PHRGA009: Regulatory Affairs Practical-II (Practical)

Total hours: 180 Hr

Outline of the course:

Sr. No.	Title of the unit
1	Regulatory Approval Process for Investigational New Drug (IND), New Drug Application (NDA), Abbreviated New Drug Application (ANDA), Supplemental New Drug Application (SNDA)
2	Marketing Authorization procedures in EU (Centralized procedure, Decentralized procedure, Mutual recognition procedure and National Procedure)
3	Preparation of various reports and records (IPQC, BMR, BPR, MFR, COA, Specification etc.)
4	Preparation of audit checklist for various agencies
5	Preparation of submission to FDA using eCTD software
6	Preparation of submission to EMA using eCTD software
7	Preparation of submission to MHRA using eCTD software
8	Preparation of Biologics License Applications (BLA) in India, USA, Europe
9	Preparation of documents required for Vaccine Product Approval in India, USA, Europe
10	Comparison of clinical trial application requirements of US, EU and India of Biologics
11	Preparation of Checklist for Registration of Medical devices in India, USA, Europe
12	Registration requirement comparison study of medical devices and biological in regulated and emerging market
13	Registration requirement comparison study in emerging market and preparing check list for market authorization
14	Preparation of submission documents required for Herbal product Approval in India, USA, Europe
15	Preparation of submission documents required for Nutraceuticals Product Approval in India, USA, Europe
16	Registration requirement comparison study in emerging markets (ASEAN, CIS, GCC) and preparing check list for market authorizationWarning Letter

17	Registration requirement comparison study in regulated markets (TGA, MCC, Health Canada, PMDA) and preparing check list for market authorization
18	Checklists for 510k and PMA for US market
19	Checklist for CE marking for various classes of devices for EU
20	STED Application for Class III Devices
21	Audit Checklist for Medical Device Facility
22	Clinical Investigation Plan for Medical Devices
23	Case studies on Topics mentioned

Course Outcome (COs):

At the end of the course, the students would be able to;

CO1	prepare the documentation required for product registration and able to prepare those documents.
CO2	describe the requirements for the Herbal product Approval in India, USA, and Europe.
CO3	describe the requirements for the Nutraceuticals Product Approval in India, USA, and Europe.
CO4	prepare the documents for registering the biological product approval of various countries.
CO5	prepare the necessary documents for the medical devices product approval of various countries.

Course Articulation Matrix:

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
FACULTY OF MANAGEMENT STUDIES
DEPARTMENT OF HUMANITIES AND SOCIAL SCIENCES
HS705 (B): ACADEMIC WRITING

I. Credits and Schemes:

Sem	Course Code	Course Name	Credits	Teaching Scheme	Evaluation Scheme				
				Contact Hours/Week	Theory		Practical		Total
					Internal	External	Internal	External	
II	HS705 (B)	Academic Writing	02	02	--	--	30	70	100

II. Course Outline

Module No.	Title / Topic	Classroom Contact Hours
1	Academic Writing and Research Process • <i>Introduction to Academic Writing</i> • <i>Academic Writing as a Part of Research</i> • <i>Types of Academic Writing</i> • <i>Features of Academic Writing</i> • <i>Importance of Good Academic Writing in various Academic Works</i>	05
2	Anatomy of Academic Writing • <i>Academic Vocabulary</i> • <i>Simple and Complex Sentences</i> • <i>Organizing Paragraphs</i> • <i>The Writing Process</i> • <i>Adopting Academic Writing Style</i>	05
3	Key Academic Skills • Note – taking • Note – making • Paraphrasing • Summarizing	05
4	Accuracy in Academic Writing • <i>Lexical Range</i> • <i>Academic Language and Structures</i>	05

	• <i>Elements of Writing</i> • <i>Proof Reading, Editing, and Rewriting</i>	
5	Using and Citing Sources of Ideas • <i>Academic Texts and their Types</i> • <i>Intellectual Honesty in Academic Writing</i> • <i>Avoiding Plagiarism – Idea Theft</i> • <i>Degrees of Plagiarism</i> • <i>Types of Borrowing</i> • <i>Anatomy of Citations</i> • <i>Common Citation Styles</i>	05
6	Contemporary Practices in Academic Writing • Analytical Essays • Graph / Table / Process Interpretation and Description • Writing Reports • Writing Research / Concept Papers	05
Total		30

III. Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like writing, group work, independent and collaborative research, etc.

IV. Evaluation

The students will be evaluated continuously in the form of their consistent performance throughout the semester. There is no theoretical evaluation. There is just practical evaluation. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Paragraph Writing	1	3	03
2	Note-taking / Note-making	1	3	03
3	Paraphrasing / Summarizing	1	4	04
4	Essay Writing	1	5	05
5	Concept Paper Writing	1	10	10
5	Attendance and Class Participation			05
Total				30

External Evaluation

The University Practical Examination will be for 70 marks and will test the professional communication skills and academic writing skills of the students.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Viva / Practical /Quiz/ Project / Academic Writing	-	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	have sound understanding of the concept and applications of academic writing
CO2	have acquired enough knowledge of academic writing style, strategy and approach
CO3	be able to demonstrate error free and effective academic writing
CO4	be able to demonstrate ability to work on project/report/paper writing
CO5	understand the concept of plagiarism and learn to use different citation styles as a part of referencing

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
CO1	-	-	-	-	-	-	-	3	-	-	-
CO2	-	-	-	-	-	-	-	3	-	-	-
CO3	-	-	-	-	-	-	-	3	-	-	-
CO4	-	-	-	-	-	-	-	3	-	-	-
CO5	-	-	-	-	-	-	2	-	-	-	-

Correlation levels 1, 2 or 3 are as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

V. Reference Books / Reading

Essential Reading for Concepts

UNIVERSITY ELECTIVE LEVEL-POSTGRADUATE

CHAROTAR UNIVERSITY OF SCIENCE&TECHNOLOGY

List of University Elective Courses First Semester Postgraduate Programme

(Academic year 2019-20)

Sr. No.	Course Code & Course Name	Department / Faculty offering the course
1	MA771.01: Reliability and Risk Analysis-I	PDPIAS / FAS
2	EE781.01:Optimization Techniques	EE/FTE
3	CE772.01:Research Methodology	CE / FTE
4	CA730: Internet and Web Designing	CMPICA / FCA
5	PT795.01 Heath and Physical activity	ARIP / FMD
6	NR755: First aid and Life support	NURSING / FMD
7	RD701.01: Introduction to analytical Techniques	PDPIAS/FAS
8	RD702.01:Introduction to Nanoscience and Technology	PDPIAS/FAS
9	MB650: Creative Leadership	I2IM / FMS
10	PH891:Community Pharmacy ownership	RPCP/FPH
11	ME781.01: Occupational Health and Safety	ME/FTE
12	PD261: Astrophysics, Space and Cosmos-1(ASC-1)	PDPIAS/FAS

MA771.01: RELIABILITY AND RISK ANALYSIS-I

Credits and Hours:

Teaching Scheme	Theory	Practical/Tutorial	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the course:

Sr No.	Title of the unit	Minimum number of hours
1.	Introduction to Probability and Statistics	06
2.	Characteristics of Reliability	06
3.	Reliability of Simple Systems	06
4.	Concept of Safety and Risk Analysis	06
5.	Reliability Modeling	06

Total Hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1	Introduction to Probability and Statistics	06 Hours	20%
1.1	Random Event.		
1.2	Basic formula of Probability.		
1.3	Random Variable and Probability Distribution Functions.		
1.4	descriptive statistics		
2	Characteristics of Reliability	06 Hours	20%
2.1	Reliability of a Unit Functioning until First Failure		
2.2	System Reliability		
2.3	Testing for Reliability		
2.4	Exponential Law and Evaluation of parameter		
3.	Reliability of Simple Systems	06	20%
	Hours		
3.1	Series System		

3.2	Parallel System	
3.3	K out of N systems	
4.	Concept of Safety and Risk Analysis	06 Hours
4.1	Qualitative definition of Risk	
4.2	Quantitative definition of Risk	
4.3	Failure Model and Effect Analysis(FMEA)	
4.4	Hazard and operability analysis(HAZOP)	
4.5	Fault Tree Analysis	
5.	Reliability Modeling	06 Hours
5.1	Software Reliability Analysis	
5.2	Human Reliability	
5.3	Stress-Strength Analysis	

C. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures/laboratory which carries a 5% component of the overall evaluation.
- Minimum two internal exams will be conducted and average of two will be considered as a part of 15% overall evaluation.
- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weighting of 5%.
- Two Quizzes (surprise test) will be conducted which carries 5% component of the overall evaluation.

D. Student Learning Outcomes:

- At the end of the course the students will be able to understand the basic concepts of Reliability and Risk Analysis.
- Student will be able to apply concepts of these course in their study of specialization

E. Recommended Study Material:

❖ Text Books:

1. Mathematical Methods of Reliability Theory. B. V. Gnedenko, Yu. K. Belyayev, and A. D. Solovyev ,Academic Press 1969
2. An Introduction to Basics of Reliability and Risk Analysis. Enric Zio, World Scientific Publishing Co.Pte. Ltd.2007
3. Reliability and Risk Analysis. Terje Aven, Elsevier Publicaion,1992

❖ **Reference Books/Articles:**

1. On The Quantitative Definition of Risk, Stanley Kaplan and B. John Garrick, Risk Analysis, Vol. I, No. I , 1981
2. Probability concepts in engineering planning and design. Volume II – decision, risk and reliability. Ang, A.H.-S. and Tang, W.H John Wiley & Sons, Inc., New York (1984)
3. M. Modarres, Reliability and Risk Analysis, Marcel Dekker (1993).
4. N.J. McCormick, Reliability and Risk Analysis, Academic Press (1981).

EE781.01: OPTIMIZATION TECHNIQUES

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course:

Sr. No.	Title of Unit	Min. no of hours
1	Fundamentals of Optimization	01
2	Linear Programming	05
3	Unconstrained Optimization	04
4	Nonlinear Programming	05
5	Fundamentals of Artificial Intelligence methods	01
6	Particle Swarm Optimization and Cuckoo Search Algorithm	08
7	MATLAB programming and Optimization Toolbox	06

Total Hours (Theory): 30

B. Detailed Syllabus

Sr. No.	UNIT	Hours	Weightage (%)
1	Fundamentals of Optimization	01 Hours	3.33%
	Introduction, Feasibility and optimality, Convexity, constraints, Rates of convergence		
2	Linear programming	05 Hours	16.66%
	Introduction, Formulation of Linear programming problem, Graphical method, Simplex method, Basic solution, Basic feasible solution, Simplex algorithm, Two phase method.		
3	Unconstrained Optimization	04 Hours	13.33%
	Introduction, Optimality conditions, Newton's method for minimization, Line search methods, Steepest-Descent method, Quasi-Newton method, Modified newton's method		
4	Nonlinear Programming	05 Hours	16.66%

	Optimality conditions for constrained problems, Kuhn-Tucker conditions, Penalty function method, Barrier method, The Lagrange multipliers and the Lagrangian function, Sensitivity analysis, Computing the Lagrange multipliers, Sequential quadratic programming, Interior point method		
5	Fundamentals of Artificial Intelligence methods	01 Hours	3.33%
	To understand importance of AI methods and their comparison with various classical methods using various criteria.		
6	Particle Swarm Optimization and Cuckoo Search Algorithm	08 Hours	26.66%
	Introduction to PSO, Unconstrained and constrained optimization using PSO, Effects of various coefficients on convergence, Cuckoo Search (CS) Algorithm, Comparison between PSO and CS		
7	MATLAB programming and Optimization Toolbox	06 Hours	20%
	MATLAB programming of various classical and AI methods. Use of MATLAB optimization toolbox to solve various optimization problems.		

C. Instructional Methods and Pedagogy

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures which carries a component of the overall evaluation.
- Minimum two internal exams will be conducted and will be considered as a part of overall evaluation.
- Assignments based on course content will be given to the students for each unit/topic and will be evaluated at regular interval and its weightage may be reflected in the overall evaluation.

D. Student Learning Outcomes:

- A. The students will be able to get awareness about the optimization problems. They can differentiate the class of classical optimization methods and AI methods
- B. The student will learn to handle, solve and analyzing problems using linear programming and other mathematical programming algorithms

- C. The students will also be able to learn different techniques to solve Non- Linear Programming Problems. They can also use search techniques methods, which are based on iterative methods, to find optimal solutions of Non-Linear Programming Problems.
- D. Ability to develop codes for evolutionary optimization techniques and to solve wide range of optimization problem.
- E. The students will be able to solve optimization methods using software tools such as MATLAB and be prepared for developing case studies and simulation examples

E. Recommended Study Material:

Books:

1. “Optimization Methods for Engineers”, N.V.S. Raju, PHI, 2014.
2. “Artificial intelligence and intelligent systems”, N.P. Padhy, Oxford University Press, 2005
3. “Engineering Optimization: Theory and Practice”, S. Rao, 4th Edition, John Wiley & Sons, Inc., 2009

CE772.01: RESEARCH METHODOLOGY

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	General introduction to Research	02
2	Research problem Formulation	03
3	Research Design	08
4	Research Publication & Presentation	08
5	Research Ethics and Morals	05
6	Quality indices of research publication	04

Total hours: 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1	General introduction to Research <i>General Introduction:</i> Importance of Research, Role of Research, Aims & Objectives, Research Process, Phases of Research. Introduction to Research Methodology: Meaning of Research, Objectives of Research, Motivations in Research, Types of Research, Research Approaches, Significance of Research, Research Methods v/s Methodology, Research and Scientific Methods, Research Process, Criteria of Good Research.	02 Hours	06%
2.	Research problem Formulation:	03 Hours	09%

<i>Review of Research Literature:</i> Defining the Research Problem: What is Research Problem, Selecting the Problem, Necessity of and Techniques in defining the problem. Purpose and use of literature review, locating relevant information, use of library & electronic databases, preparation & presentation of literature review, research article reviews, theoretical models and frame work. Identification of gaps in research, formulation of research problem, definition of research objectives.			
3.	Research Design:	08 Hours	27%
<i>Research Design:</i> Meaning, Need, Features of Good Design, Concepts, Types. Basic Principles of Experimental Design, Developing a Research Plan. <i>Qualitative Methods:</i> Types of hypothesis and characterization. <i>Quantitative Methods:</i> Statistical methods for testing and evaluation. <i>Characterization of experiments:</i> Accuracy, reliability, reproducibility, sensitivity, Documentation of ongoing research. <i>Sample Design:</i> Implication, Steps. Criteria for selecting a sample procedure, Characteristics of Good sampling Procedure, Types of Sample Design, Selecting Random Samples, Complex random sampling Design. <i>Measurement and Scaling Techniques:</i> Measurement in Research, Measurement Scales, Sources of Errors in measurement, Tests of Second measurement, Technique of developing Measurement Tools, Meaning of Scaling, Scale Classification Bases, Important Scaling Techniques, Scale Construction Techniques. <i>Methods of Data Collection:</i> Collection of Primary Data, Observation Method, Interview method, Collection of Data through questionnaire and Schedules, Other methods. Collection of Secondary Data, Selection of appropriate method for data collection, Case Study Method, Guidelines for developing questionnaire, successful interviewing. Survey v/s Experiment. <i>Processing and Analysis of Data :</i> Processing Operations (Meaning, Problems), Data Analysis (Elements), Statistics in Research, Measures of Central Tendency, Dispersion, Asymmetry, Relationship. Regression Analysis, Multiple			

correlation and Regression, Partial Correlation, Association in case of Attributes. <i>Sampling Fundamentals:</i> Definition, Need, Important sampling Distribution, Central limit theorem Sampling Theory, Sandler's A-test, Concept of Standard Error, Estimation, Estimating population mean, proportion. Sample size and its determination, Determination of sample size. <i>Analysis of Variance and Covariance:</i> Basic Principles, techniques, applications, Assumptions, limitations. <i>Analysis of Non-parametric or distribution-free Tests :</i> Sign Test, Fisher-Irwin Test, McNemer Test, Wilcoxon Matched pair Test (Signed Rank Test). <i>Sum Tests :</i> a) Wilcoxon-Mann-Whitney Test b)Kruskal-Wallis Test, One sample Runs Test, Multivariate Analysis Techniques: Characteristics, Application, Classification, Variables, Techniques, Factor Analysis (Methods, Rotation), Path Analysis.			
4.	Research Publication & Presentation:	08 Hours	27%
Thesis, Research paper, Organization of thesis and reports, formatting issues, citation methods, references, effective oral presentation of research, Documentation of ongoing research.			
5.	Research Ethics and Morals:	05 Hours	19%
Issues related to plagiarism and ethics. Intellectual Property Rights: Copy rights, Patents, Industrial Designs, Trademarks.			
6.	Quality indices of research publication:	04 Hours	12%
Impact factor, Immediacy factor.			

C. Instructional Method and Pedagogy:

- At the starting of the course, delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of Multi-Media projector, Black Board, OHP etc.
- Attendance is compulsory in lectures.
- Internal exams/Unit tests/Surprise tests/Quizzes/Seminar/Assignments etc. will be conducted as a part of continuous internal theory evaluation.
- Tutorials related to course content will be given to students.
- In the lectures discipline and behaviour will be observed strictly.

- Industrial visits will be organized for students to explore industrial facilities. Students are required to prepare a report on industrial visit and submit as a part of the assignment.

D. Student Learning Outcomes:

- Research Methodology as a subject should help researchers to prepare the literature in chronological pattern and should logically analyse the concerns.
- This subject should help in framing the research problems to enhance the scale of understanding.
- In this world of global village, research papers are available in abundance; one thesis submitted by a scholar, in no way should be a repetition of a work already done.
- This subject should help researchers to use tools, techniques, concepts and world's best practices to present a unique research.

E. Recommended Study Material:

❖ Text Books:

1. Research Methodology, Methods & Techniques, C.R. Kothari, Viswa Prakashan, 2nd Edition, 2009.
2. Research Methods- A Process of Inquiry, Graziano, A.M., Raulin, M.L, Pearson Publications, 7th Edition, 2009.
3. How to Write a Thesis:, Murray, R. Tata McGraw Hill, 2nd Edition, 2010.
4. Writing For Academic Journals, Murray, R., McGraw Hill International, 2009.
5. Writing for Publication, Henson, K.T., Allyn & Bacon, 2005.

4. A Handbook of Academic Writing, Murray, R. and Moore, S., Tata McGraw Hill International, 2006.

CA730: INTERNET AND WEB DESIGNING

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

B. Outline of the Course:

Sr. No.	Content
1.	Overview of Internet and WWW, Basic elements of the Internet, Internet services, Internet Browsers and Servers, Hardware and Software requirements to connect to the internet, Internet Service Provider (ISP), Introduction to Internet Protocols
2.	Introduction to Web Page, Web Site, Web Browser, Overview of HTML, Structure of HTML Documents
3.	HTML Basics Tags and HTML elements
4.	List, Marquee & Hyperlink in HTML
5.	Images and Tables in HTML
6.	Forms in HTML
7.	Media Element in HTML5
8.	Introduction to Cascading Style Sheet (CSS), Ways to embed CSS in HTML
9.	CSS selectors & Layout
10.	CSS Properties
11.	Creation of Menu with CSS
12.	Introduction to Web Publishing or Hosting : Domain Name, Web Server, Website Parking, Publishing Website through FTP

Total Hours (Theory): 30

❖ Text Books:

PT795.01: HEALTH & PHYSICAL ACTIVITY

Total Hours (Theory): 30

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction to health	10
2.	Physical Activity	10
3.	Introduction to Yoga	10

B. Detailed Syllabus:

1	Introduction to Health	10 hours
1.1	What is health?	
1.2	Healthcare delivery system: Developing Countries, Developed Countries	
1.3	Human anatomy, physiology & physical fitness	
1.4	Basics of Nutrition	
1.5	Life style disorders – obesity & diabetes	
2	Physical Activity	10 hours
2.1	What is Physical activity, exercise, physical fitness, epidemiology?	
2.2	Measurement of Physical Activity in individuals	
2.3	Physical Activity – Theoretical Perspective: Self-determination, trans theoretical	
2.4	Physical Activity and mental health – Body image, depression, problem with exercise	
2.5	Barriers & Facilitators of Physical Activity	
3	Introduction to Yoga	10 hours
3.1	What is yoga?	
3.2	Types of yoga	
3.3	Benefits of yoga to various body systems	
3.4	Asanas, Pranayam	
3.5	Yoga therapy for various back pain, asthma, stress, hypertension, diabetes	

C. Instructional Method and Pedagogy:

- Interactive classroom sessions using black-board and audio-visual aids.
- Using the available technology and resources for e-learning.
- Students will be encouraged towards self-learning and under direct interaction with course faculty.
- Students will be enabled for continuous evaluation.
- Case study, didactic mode of group discussions

D. Student Learning Outcomes:

Upon completion of the course, the student should be able to:

- Appraise the importance of exercise in maintenance of health and fitness.
- Objectively define health and physical activity in realistic environment.

E. Recommended Study Material:

❖ Textbooks:

1. ACSM's "Health Related Physical Fitness Assessment Manual Lippincott Williams and Walkins USA, 2005.
2. Nilima Patel (2008) Yoga and Rehabilitation, Jaypee Publication, India

❖ Reference books:

1. Biddle, S. J. H., & Mutrie, N. (2008). Psychology of physical activity. London: Routledge
2. B.C. Rai. Health Education and Hygiene Published by Prakashan Kendra
3. Puri. K. Chandra. S.S. (2005). Health and Physical Education. New Delhi: Surjeet Publications

NR755: First Aid and Life Support

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course:

Unit No.	Title of Unit	Prescribed Hours
I.	Introduction and Basics of First Aid: ☐ ● Rescuer Duties, Victim and Rescuer Safety ● Looking for Help ☐ ● After the emergency	2
II.	Medical emergencies and their first aid: ☐ ● Breathing Problems ☐ ● Choking in an Adult ☐ ● Allergic Reactions ☐ ● Heart Attack ● Fainting ☐ ● Diabetes and Low Blood Sugar ☐ ● Stroke ☐ ● Shock Abdominal maneuver, CPR, ventilation etc.	12
III.	Injuries emergencies and their first aid: ● Bleeding: You Can See/ You Can't See ● Wounds ☐ ● Burns and Electrical Injuries ☐ ● Fractures Bandaging, immobilization, transferring etc.	8
IV.	Environmental Emergencies and first aid: ● Bites and Stings ☐ ● Poison Emergencies ☐ ● Heat-Related Emergencies ☐ ● Cold-Related Emergencies	7
V.	Preparation of First Aid Kit	1
Total		30 Hours

B. Instruction Method and Pedagogy

The course is based on theory & practical learning. Teaching will be facilitated by reading material, discussion, microteaching, task-based learning, assignments, field visit and various interpersonal activities like group work, independent and collaborative

research, presentations etc. Practical will be facilitated by demonstrations and preparing check-lists etc.

C. Evaluation: The students will be evaluated continuously in the form of internal as well as external examinations. The evaluation (practical) is schemed as 30 marks for internal evaluation and 70 marks for external evaluation in the form of University examination.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Following components:				
Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Assignments	1	8	8
2	Internal Test/ Model Exam	1	12	12
3	Attendance and Class Participation	Minimum 80% attendance		10
Total				30

External Evaluation

The University Practical examination will be of 70 marks and will test the logic and critical thinking skills of the students by asking them to demonstrate or putting scenario based application of knowledge I avoid, as far as possible, grammatical errors and will focus on applications.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Practical cum Viva-Voce	01	70	70
Total				70

D. Learning Outcomes: At the end of the course, learners will be able to:

- Demonstrate bandaging and immobilization of patient ☐
- Demonstrate the skill for transferring injured person ☐
- Demonstrate skills to clear airway & ventilate the patient ☐
- Demonstrate skills to perform CPR

RD701.01: INTRODUCTION TO ANALYTICAL TECHNIQUES

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course

Sr. No.	Title of Unit	No. of hrs.
1.	HPLC	08
2.	TGA-DSC	09
3.	DLS	05
4.	PCR	08

Total Hours (Theory): 30

B. Syllabus Topics:

Sr. No.	Title of Unit	Topics
1.	High Performance Liquid Chromatography (HPLC)	Introduction to HPLC, Basic Principle of HPLC, Instrumentation for HPLC, Types of Detector used in HPLC, Column efficiency in liquid chromatography
2.	TGA-DSC	General Discussion, Thermogravimetry Analysis, Instruments available for Thermogravimetric analysis, Detailed Discussion, Principle and Applications in various fields of Science and Engineering. Data Analysis
3.	DLS	Concept of Dynamic light scattering and basics of Particle size analyzer, Data Analysis and applications of DLS
4.	PCR	Introduction and principle of Polymerase Chain Reaction (PCR), Principle of PCR, Primer designing, Detailed methodology of PCR, Modifications of PCR, Applications of PCR

C. Instructional Methods and Pedagogy:

The topics will be discussed in interactive class room sessions using classical black-board teaching to power-point presentations. Unit tests will be conducted regularly as a part of

continuous evaluation and suggestions will be given to student in order to improve their performance.

D. Student Learning Outcomes / objectives:

- The Programme aims at providing students with the methodological concepts and tools needed to acquire top-level skills in the field of some selected instrumentation
- At the end students would gain experience in using these tools and analyzing the data.

E. Recommended Study Material:

❖ **Text books/Reference books**

1. Instrumental methods of analysis by Williard Merritt Dean Settle, 7th Ed. CBS publishers and distributors Pvt. Ltd.,
2. Instrumental methods of analysis by Williard Merritt Dean Settle, 7 th Ed. CBS publishers and distributors Pvt. Ltd.,
3. Principles of Gene Manipulation and Genomics by Sandy B. Primrose, Richard Twyman 7 th Ed. Wiley-Blackwell
4. Molecular Cloning: A Laboratory Manual by Joseph Sambrook, David William Russell 3 rd Ed.CSHL Press
5. Principles and Techniques of Biochemistry and Molecular Biology by Wilson and Walker 7 th Ed. Cambridge University Press
6. Principles of Instrumental Analysis by Douglas A. Skoog, F.James Holler and Timothy A.Nieman. Publisher: Saunders College Publishing.

RD 702.01: INTRODUCTION TO NANOSCIENCE & TECHNOLOGY

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course:

Sr No.	Title of Unit	Minimum No. of Hrs
1.	Nanotechnology – development history & Implications of nanotechnology	6
2.	Overview on characterization and synthesis of nanostructure materials	10
3.	Overview of nanostructures & Nano devices	10
4.	New fields of nanotechnology	4

Total Hours (Theory): 30

B. Syllabus Topics:

1. Nanotechnology – development history & Implications of nanotechnology
Concept of nanoscience and nanotechnology, Nanotechnology in the history and in nature. Impact of the nanotechnology in the society: Ethical, social, economic and environmental implications. the nanoscale. Size dependent physical and chemical properties. Surface effects. Importance of the surface at nanoscale. The surface/volume ratio. Size dependent properties
2. Overview on synthesis and characterization of nanostructure materials.
Physical, chemical and biological methods of synthesis of nanostructures, Electron microscopy, scanning probe microscopy, non-imaging techniques
3. Overview of nanostructures & Nano devices
zero dimensional, one dimensional and two dimensional nanostructures , Electronic devices, magnetic devices, photonic devices, mechanical devices, fluidics devices and biomedical devices
4. New fields of nanotechnology
quantum computing, spintronics, nanomedicines, energy, etc.

C. Instructional Methods and Pedagogy:

The topics will be discussed in interactive class room sessions using classical black-board teaching to power-point presentations. Students will be exposed to practical operations, and lab

visit and experimental demonstrations of some of the equipment facilities for Nano fabrication & characterization available in UNI. Students will produce a technical report on the experiences.

D. Student Learning Outcomes / objectives:

Nanotechnology promises to be the technology of the future benefitting the humanity in a number of ways. This course is aimed at preparing students for further industrial or academic work in the field of nano-characterization techniques.

E. Recommended Study Material:

❖ Text Books / Reference Books:

1. Essentials of nanotechnology by Jeremy Ramsden [JR], 2009, Jeremy Ramsden & Ventus Publishing ApS,
2. Introduction to Nanoscience, S.M.Lindsay, Oxford ISBN 978-019-954421-9 (2010).
3. Guozhong Cao (2004). *Nanostructures and Nanomaterials: Synthesis, Properties & Applications*, 448 pages, Imperial College Press, ISBN-10: 1860944159.
4. NANO: The Essentials Understanding Nanoscience and Nanotechnology, T. Pradeep, Tata McGraw-Hill Publishing Co. Ltd., 2007.
5. Nanoscience and Nanotechnology, B K Parthsarathy, ISHA Books, New Delhi, 2007.
6. Nanotechnology: Principles and practices, Sulabha K Kulkarni, Capital publishing company, 2007.

MB650: CREATIVE LEADERSHIP

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course:

Module No.	Title/Topic	Classroom Contact Sessions
1	Introduction to Leadership • What are Leadership Skills? • Ways of Conceptualizing Leadership • Definition and Components • A Born Leader • Traits of Successful Leader • Why Leadership? ○ Managerial Roles • Importance of Leadership Leading Vs Managing • Roles and Relationships • Developing Personality for Effective Leading Roles • Authority Vs. Responsibility • Leading the Team • Leadership–Styles, Models and Philosophy	05
2	Leadership Approach • Trait Approach • Skills Approach • Style Approach • Situational Approach • Psychodynamic Approach Leadership Theories • Contingency Theory • Path-Goal Theory • Leader-Member Exchange Theory	05
3	Leadership Processes • Transactional Leadership • Transformational Leadership • Authentic Leadership • Team Leadership	05

Module No.	Title/Topic	Classroom Contact Sessions
	• Integrative Leadership • Liquid Leadership	
4	Women and Leadership • Gender and Leadership Styles • Gender and Leadership Effectiveness • Glass Ceiling Turned Labyrinth • Strengths of Women Leadership • Criticism and Application	05
5	Culture and Leadership • Dimensions of Culture • Clusters of World Cultures • Leadership Behavior and Culture Clusters • Universally Desirable and Undesirable Leadership Attributes • Criticism and Application • Leadership for High Performing Organisations • General Principles for Creative Culture • Nurturing Personal Creativity	05
6	Contemporary Issues in Leadership • Power and Politics in Leadership • Ethics in Leadership • Cases in Leadership	05
Total		30

B. Pedagogy

The course will emphasise self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will be as follows:

▪ Classroom Contact Sessions	...	About 20 Sessions
▪ Case Discussions	...	About 03 Sessions
▪ Presentation	...	About 03 Sessions
▪ Management Exercise/ Stimulations/Game	...	About 02 Sessions
▪ Feedback	...	About 02 Sessions

The exact division among the above components will be announced by the instructor at the beginning of the semester as a part of detailed session-wise schedule.

C. Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sr. No.	Component	Number	Marks per incidence	Total Marks	Percentage of total internal evaluation
1	Quizzes	3	10	30	10
2	Case Analysis and Presentation	2	45	90	30
3	Assignment / Project work	1	60	60	20
4	Internal Tests	2	45	90	30
5	Attendance and Class Participation			30	10
Total				300	100

The total marks will be divided by 10 and declared as Institute-level evaluation marks for the course. The Institute-level evaluation will constitute 30% of the total marks for the course.

D. External Evaluation

The University examination will be based on oral presentation, review of students' reports and a viva-voce and will carry 70% marks for the course evaluation.

E. Learning Outcomes

At the end of the course, the student should have developed:

- Appreciation for types, traits, approaches and leadership models/theories.
- Motivation for leadership roles and responsibilities.
- Qualities of creative leadership skills.

F. Reference Material

❖ Text-book:

1. Leadership – Theory and Practices , Peter G. Northouse, Sage Publications India Pvt. Ltd., Latest Edition

❖ Reference Books:

1. Liquid Leadership by Brad Szollose, Prolibris Publishing Media, Latest Edition
2. Effective Leadership by Lussier/ Achua , Cengage Learning Publications, Latest Edition
3. Integrative Leadership by Hatala & Hatala, Pearson Power Publication, Latest Edition
4. Cases in Leadership by Rowe and Guerrero, Sage Publications India Pvt. Ltd., Latest Edition

❖ Journals / Magazines / Newspapers:

1. HBR Issues on Building Leadership Skills
2. International Journal of Innovation, Creativity and Change
3. Economic Times
4. Business Standard

PH891: COMMUNITY PHARMACY OWNERSHIP

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of course:

Sr. No.	Title of Unit	No. of Contact Hours
1	Introduction to Community pharmacy	10
2	Community Pharmacy Management	10
3	Pharmacy Business Plan	10
	Total	30

B. Detailed Syllabus:

Sr no	Title of Unit	Topics
1	Introduction to Community pharmacy	Roles & Responsibility, relationship with other health care providers, Prescribed medication order interpretation including OTC medicines, Safe use of medical devices.
2	Community Pharmacy Management	Role, process and scope of Community Pharmacy Management, modern technologies, financial, material, staff management and Drug store management, Code of ethics for Pharmacy.
3	Pharmacy Business Plan	Creating a Successful Pharmacy Business Plan, Business Owner Roles, Responsibilities, and Management Styles, Legal, Financial and Accounting Advice for the Beginning Owner, Marketing of Pharmacy Practice.

C. Instructional Methods and Pedagogy:

The content of the syllabus would be transmitted through different pedagogy tools like interactive class room sessions using classical chalk - board teaching to Power point presentations. Class room teaching would also be supplemented with group discussions, seminars, assignments and case studies.

D. Student Learning Outcomes / Objectives

At the end of the course, the student will be able to understand

- The concept of Community Pharmacy Ownership and its scope

- Students understand the role of the pharmacist in community and development
- Able to learn skill require to set Pharmacy store & its management

E. Recommended Study Material

❖ **Text / Reference Books:**

1. Mohd. Aquil, Practice of Hospital, clinical & Community Pharmacy Elsevier
2. Paul Rutter, Community Pharmacy E-Book, Symptoms, Diagnosis and Treatment, 3rd Edition
3. A Textbook of Clinical Pharmacy Practice: G. Parthasarathi, Karin Nyfort-Hansen and Milap Nahata, Universities Press.
4. Research articles as per the assignment

ME781.01: OCCUPATIONAL HEALTH & SAFETY

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	NA	2	2	2
Marks	NA	100	100	

A. Outline of the Course:

Sr. No.	Title of the Unit	Minimum Number of Hours
1	Introduction to occupational health and safety	02
2	Occupational safety and management standards, and regulations for health, safety and environment	04
3	Identifying safety and health hazards, and risk analysis	04
4	Occupational physiology and psychosocial factors, and work organization	04
5	Ergonomic workplace design and musculoskeletal diseases	04
6	Control of workplace hazards	04
7	E-waste management	04
8	Work practices in industries and global strategy on occupational safety and health	04

Total Hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1	Introduction to occupational health and safety	02 Hours	9%
	Definition and history of occupational health & safety, workplace hazards.		
2	Occupational safety & management standards and regulations for health, safety and environment	04 Hours	13%

2.1	Factories act and rules; Workmen compensation act. Indian explosive act - Gas cylinder rules - SMPV Act - Indian petroleum act and rules.		
2.2	Environmental pollution act. Manufacturing, storage and import of Hazardous Chemical rules 1989, Indian Electricity act and rules. Overview of OHSAS 18000 and ISO 14000 National legislation and public organizations.		
3	Identifying safety and health hazards, and risk analysis	04 Hours	13%
3.1	Hazard, risk issues and hazard assessment, Introduction to hazard, hazard monitoring-risk issue.		
3.2	Hazard assessment, procedure, methodology; safety audit, checklist analysis, what-if analysis, safety review, preliminary hazard analysis (PHA), hazard operability studies (HAZOP).		
3.3	Computer aided risk analysis, Fault tree analysis & Event tree analysis, Logic symbols, methodology, minimal cut set ranking - fire explosion and toxicity index (FETI), various indices – Hazard analysis (HAZAN).		
3.4	Failure Mode and Effect Analysis (FMEA), Basic concepts of software on risk analysis, CISCON, FETI, ALOHA.		
4	Occupational physiology, Psychosocial factors and Work organization	04 Hours	13%
4.1	Man as system component – allocation of functions – efficiency.		
4.2	Occupational work capacity aerobic and anaerobic work – evaluation of physiological requirements of jobs – parameters of measurements – categorization of job heaviness		
4.3	Work organization – stress – strain – fatigue – rest pauses – shift work – personal hygiene.		
5	Ergonomic workplace design and Musculoskeletal diseases	04 Hours	13%
5.1	Meaning of Ergonomic		
5.2	Meaning of Workplace Design.		
5.3	Musculoskeletal Diseases causes and prevention		

6	Control of workplace hazards	04 Hours	13%
6.1	Workplace hazards and risk control, Transport hazards and risk control, Musculoskeletal hazards and risk control, Work equipment hazards and risk control		
6.2	Electrical safety, Fire safety, Chemical and biological health hazards and risk control, Physical and psychological health hazards and risk control, Health and safety practical application		
7	E-waste management	04 Hours	13%
7.1	Waste characteristics, generation, collection, transport and disposal		
8	Work practices in industries and global strategy on occupational safety and health	04 Hours	14%
8.1	Work practices in industries in manufacturing industries		
8.2	Work practices in industries in service industries		

C. Instructional Method and Pedagogy:

- At the starting of the course, delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of Multi-Media projector, Black Board, OHP etc.
- Attendance is compulsory in lectures.
- Internal exams/Unit tests/Surprise tests/Quizzes/Seminar/Assignments etc. will be conducted as a part of continuous internal theory evaluation.
- Tutorials related to course content will be given to students.
- In the lectures discipline and behavior will be observed strictly.
- Industrial visits will be organized for students to explore industrial facilities. Students are required to prepare a report on industrial visit and submit as a part of the assignment.

D. Students Learning Outcomes:

- Students will be able to make models for safety at work.
- Students will be able to select safety methods.
- Students will be able to understand how hazardous the process is at work.
- Students will be able to understand proneness of accidents.

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

FACULTY OF APPLIED SCIENCES DEPARTMENT OF PHYSICAL SCIENCE

PD261 : Astrophysics, Space and Cosmos-1 (ASC-1)

University Elective Semester 3 Undergraduate Programme Semester 1 Postgraduate Programme

Prerequisite:

Student having exposure of 10+2 level of Physics, and studying in bachelor and master program from any institute can join this course.

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the Course:

Sr. No.	Title of the Unit	Minimum Number of Hours
1.	Basic Astronomical Techniques	10
2.	The Frontier of Space	06
3.	The Life and Death of Stars	08
4.	The Universe	06

Total Hours (Theory): 0

Total Hours (Lab): 30

Total Hours: 30

B. Detailed Syllabus:

1.	Basic Astronomical Techniques	10 Hrs
	Description of Telescopes, Methods of observation, electromagnetic spectral window, resolution, sensitivity, noise, signal to noise ratio, background, aberrations, Telescopes at different wavelengths, Detectors at different wavelengths, Imaging techniques, spectroscopy, calibration, Atmospheric effects at different wavelengths, Astronomical data analysis, H-R diagram, sun and solar system, Sky Gazing.	6 (L) + 4 (P)
2.	The Frontier of Space	6 Hrs
	Outer reaches of earth's Atmosphere, Earth's Atmospheric Layers and Orbital Mechanism: Types of Orbits Launching of Satellites, Basics of Satellite subsystems, channel and link. Satellite Applications: Earth Observation, Scientific Study, Weather Forecast, Military Applications, GPS.	
3.	The Life and Death of Stars	8 Hrs
	Stars and Galaxies, The story of collapsing stars: Star formation and evolution, Interstellar Nebula, Red Giant, Planetary Nebulae, Planetary Dynamics, White Dwarfs, Red super Giant, Supernovae- Neutron star, Black hole, naked singularity. Gravitational Lensing, Accretion disks Around Compact Objects, Binary pulsar, Gravitational Waves.	
4.	The Universe	6 Hrs
	Universe in different scale: solar scale, Galactic scale, Cosmological scale, vastness of our universe, Expanding universe (Big bang, inflation), some interesting facts of our universe.	

C. Instructional Methods and Pedagogy

The topics will be discussed in interactive class room sessions using classical black-board teaching, ICT, hands-on-experiments and demonstration of experiments, whichever is relevant. Assignments, small projects and lab-exercise will be to the students. Student's needs to submit solution/report/results of above mentioned work, which will be eventually used for the evaluation purpose. Occasionally seminar/viva presentation will also be used as one of the evaluation tools.

D. Student Learning Outcomes:

Students will get preliminary knowledge about Astrophysics, Space and Cosmology. This is a level one course, which provides basis for the second level course. After completion of this course, students can start taking small project in this or allied fields.

F. Recommended Study Materials**❖ Reference Book & Text Book:**

1. The Story of Collapsing Stars: Black Holes, Naked Singularities, and the Cosmic Play of Quantum Gravity, Prof. Pankaj S. Joshi
2. An Introduction to Cosmology 3ed, J.V. Narlikar
3. An introduction to modern cosmology, Andrew R. Liddle
4. Astronomy: Astronomy for Beginners: The Magical Science of Stars, Galaxies, Planets, Black Holes, Wormholes and much, much more! (Astronomy, Astronomy Textbook, Astronomy for Beginners), Miles Clarke
5. Satellite Communication, Dennis Roddy, Mc-Graw Hill publication
6. Satellite Communication, Timothy Pratt, Charles Bostian, Jeremy Allnut, John Wiley and Sons publication

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY

List of University Elective Courses For Second Semester Postgraduate Programme (Academic year 2019-20)

Sr. No.	Course Code & Course Name	Department / Faculty offering the Course
1	EE782.01: Energy Auditing and Management	EE/CSPIT
2	CE771.01: Project Management	CE/CSPIT
3	IT771.01: Cyber Security & Laws	IT/CSPIT
4	CA842: Mobile Application Development	CMPICA
5	PT796.01: Fitness and Nutrition	ARIP
6	NR 752.01: Epidemiology & Community Health	MTIN
7	OC733.01: Introduction to Polymer Science	PDPIAS
8	MB651: Software based Statistical Analysis	I2IM
9	MA772.01: Design of Experiments	PDPIAS
10	PH892: Intellectual Property Rights	RPCP
11	PD262: Astrophysics, Space and Cosmos-2 (ASC-2)	PDPIAS

EE782.01: ENERGY AUDITING & MANAGEMENT

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the Course:

Sr. No.	Title of Unit	Min. No. of Hrs
1	Electrical Energy Conservation	3
2	Electrical Energy Management	10
3	Financial Management	4
4	Energy Management & Audit	5
5	Energy Efficient Technologies In Electrical Systems	3
6	Energy Storage Systems	3
7	Case Studies.	2

Total hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1	Electrical Energy Conservation	3 Hours	11.33%
1.1	Energy Scenario: Introduction to energy science and energy technology, various forms of energy. Law of conservation of energy. Energy scenario of India, Introduction to global energy scenario. Carbon credit, Energy Sector Reforms, Energy Strategy for the Future, Energy Conservation Act 2001 and its features.		
1.2	Measures for energy conservation: Potential energy conservation opportunities in: HVAC System, Lighting systems, Motors and Transformers.		
2	Electrical Energy Management	10 Hours	29.12%
2.1	Concept of energy management, Design of Energy management programmes, energy cost, Energy planning, Energy staffing, Energy Organization, Energy Requirement, Energy Costing, Energy Budgeting, Energy Monitoring, Energy consciousness, Energy		

	Management Professionals, Environment pollution due to energy use. Need of energy planning, steps for energy planning, Energy management in industry, Energy management cell function and objective, Energy management cell roles and responsibilities, Role of energy manager, benchmarking, Social and economic cost benefits. Seven principals of energy management.		
2.2	Electrical System Optimization Electricity rate tariff, key to reduction in electrical energy Consumption, Methods to improve plant power factor, load management, conduction loss, switching loss, magnetic loss, harmonic Compensation, Motor control, Lighting energy saving.		
2.3	Cogeneration Definition, Need, Application, Advantages, Classification, Saving potentials		
3	Financial Management	4 Hours	11.11%
	Investment-need, Appraisal and criteria, Financial analysis techniques-Simple payback period, Return on investment, Net present value, Internal rate of return, Cash flows, Risk and sensitivity analysis; Role of ESCOs.		
4.	Energy Management & Audit	5 Hours	12.89%
	Introduction, Definition, Energy audit- needs, types and walkthrough energy audit. Energy audit at unit level, Industrial Audit approaches. Procedure for energy audit and equipments required. Comprehensive Energy audit Site testing Measurement & Analysis of Electrical System like Induction Motors. Transformers, Illumination system, Problems on Energy Management.		
5.	Energy Efficient Technologies In Electrical Systems	3 Hours	11.11%
	Load Management and Maximum demand control. Electrical distribution system. Maximum demand controllers, Automatic power factor controllers, Energy efficient motors, Soft starters with energy saver, Variable speed drives, Energy efficient transformers, Electronic ballast, Occupancy sensors, Energy efficient lighting controls.		
6.	Energy Storage Systems	3 Hours	13.33%
	Introduction, Demand for energy storage, Energy storage systems: heat storage- hot water, hot solids, phase change materials; Potential energy storage: spring, compressed gas. Pumped hydro: Flywheels. Rolling mills, Electrical and magnetic energy storage systems.		
7.	Case Studies.	2 Hours	11.11%

C. Instructional Methods and Pedagogy

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures which carries a component of the overall evaluation.
- Minimum two internal exams will be conducted and will be considered as a part of overall evaluation.

- Assignments based on course content will be given to the students for each unit/topic and will be evaluated at regular interval and its weightage may be reflected in the overall evaluation.

D. Student Learning Outcomes:

After the completion of the course the students will be able to:

1. Analyze about energy scenario nationwide and worldwide
2. Decide about energy management in more effective way.
3. To propose the effective way for energy conservation
4. Carry out financial management.
5. Can design energy efficient technologies and provide alternative solutions for energy storage

E. Recommended Study Material:

❖ Text Book:

1. Amlan Chakrabarti, Energy engineering and management, PHI Learning Private Limited.
2. K. Nagabhusan Raju, Industrial Energy Conservation Techniques, Atlantic Publishers & Distributors (P) Ltd.

❖ Reference Book:

1. Renewable energy sources and conservation technology By- N.K.Bansal, Kleemann and Meliss
2. Non – conventional energy sources by G.D. Rai
3. Energy technology by S.Rao.
4. A guide to energy management by Barney L Capehart, William J Kennedy, Wayne C Turner.

❖ Web Material:

1. www.energymanagertraining.com
2. www.bee-india.gov.in

CE771.01: PROJECT MANAGEMENT

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Overview of Project Management	03
2	Project Management Concepts and Techniques	03
3	Project Cost Estimation	04
4	Project Planning and Scheduling	05
5	Project Monitoring and Control	05
6	Material Management in Project	04
7	Management of Special Projects and Project	06

Total hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Overview of Project Management	03 Hours	10 %
	Introduction to Project Management Overview of Project Planning, Project Estimation, Project Scheduling, Organization and Team Structure, Risk Analysis and Management, Resource Allocation Project Management Process and Role of Project Manager		
2.	Project Management Concepts and Techniques	03 Hours	10 %
	Project Screening and Selection Techniques Structuring Concepts and Tools (WBS,ORS,LRC) Project Planning Tools (Bar Chart, LOB, CPM and PERT) Risk Analysis and Management		
3.	Project Cost Estimation	04 Hours	13 %
	Types of Estimates and Estimating Methods Project Budgeting		
4.	Project Planning and Scheduling	05 Hours	17 %
	Dynamic Project Planning and Scheduling Project Scheduling with Resource Constraints		

5.	Project Monitoring and Control	05 Hours	17 %
	Monitoring Techniques and Time control system Project Cost Control and Time cost tradeoff		
6.	Material Management in Project	04 Hours	13 %
	Project Procurement and Material Management		
7.	Management of Special Projects and Project Management Software Tools	06 Hours	20 %
	Management of SE/NPD/R&D/Hi-Tech and Mega Projects Software tools for Project Management: MS Project, Primavera, Turbo Project, Riski Project.		

C. Instructional Method and Pedagogy:

- Lectures will be taken in class room with the use of multi-media presentations and black board – mix of both.
- Assignments based on above course content will be given to the students at the end of each chapter. Each assignment contains minimum 5 questions.
- Quizzes and Surprise tests will be conducted for testing the knowledge of students for particular topic.

D. Student Learning Outcomes:

Upon successful completion of this course, students will be able to understand project management process and different aspect of development process necessary for the management of the project which includes various activities, resources, quality, cost and system configuration etc.

E. Recommended Study Material:

❖ **Text Books:**

1. Project management: engineering, technology, and implementation by Shtub, Avraham, Jonathan F. Bard, and Shlomo Globerson, Prentice-Hall, Inc., 1994.
2. Project Management Handbook by Lock, Gower.
3. VNR Project Management Handbook by Cleland and King.
4. Management guide to PERT/CPM by Wiest and Levy, PHI.
5. Project Management: A Systemic Approach to Planning, Scheduling and Controlling by Horald Kerzner, CBS Publishers, 2002.
6. Project Scheduling and Monitoring in Practice by S. Choudhury,
7. Total Project Management: The Indian Context by P. K. Joy, Macmillan India Ltd.

❖ **Reference Books:**

1. Project Management for Business and Technology: Principles and Practice by John M Nicholas, Prentice Hall of India, 2002.
2. Project Management, by N. J. Smith (Ed), Blackwell Publishing, 2002.

Marks	-	100	100	

A. Outline of the Course:

Sr No.	Title of the unit	Minimum number of hours
1.	Computer and Cyber Security Basics	06
2.	Security Threats	09
3.	Provisions in Indian Laws in dealing with Cyber Crimes	07
4.	Case Studies	08

Total hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours	Weightage (%)
1.	Computer and Cyber Security Basics	06 hours	20 %
	Introduction to Computers, Computer History, Software, Hardware, Classification, Computer Input-Output Devices, Windows, DOS Prompt Commands, Basic Computer Terminology, Internet, Networking, Computer Storage, Computer Ethics and Application Programs, Security : Security trends –Goal, Attacks, Services and Mechanism		
2.	Security Threats	09 hours	30 %
	Application security (Database, E-mail and Internet), Data Security Considerations- Backups, Archival Storage and Disposal of Data, Security Technology-Firewall and VPNs, Intrusion Detection, Access Control. Security Threats -Viruses, Worms, Trojan Horse, Bombs, Trapdoors, Spoofs, E-mail viruses, Macro viruses, Malicious Software, Network and Denial of Services Attack, Security Threats to E-Commerce- Electronic Payment System, e-Cash, Credit/Debit Cards. Digital Signature, public Key Cryptography.		
3.	Provisions in Indian Laws in dealing with Cyber Crimes	07 hours	23 %

	Security Policies, Why Policies should be developed, WWW policies, Email Security policies, Policy Review Process-Corporate policies-Sample Security Policies, Publishing and Notification Requirement of the Policies. Information Security Standards-ISO, IT Act, Copyright Act, Patent Law, Cyber Laws in India; IT Act 2000 Provisions, Intellectual Property Law.		
4.	Case Studies	08 hours	27 %
	Identity Management, Cyber Security and Terrorism: Case Studies, The DigiNotar case, Deutsche Telekom, The disruption at the IT service provider Tieto, Web Based Attacks by Symantec, Password Security		

C. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Two internal exams will be conducted and average of the same will be converted to equivalent of 15 Marks as a part of internal theory evaluation.
- **Assignments** based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weightage of **5 Marks** as a part of internal theory evaluation.
- Surprise Tests/Quizzes/Seminar/**Case Study** will be conducted which carries **10 Marks** as a part of internal theory evaluation.

D. Student Learning Outcome:

Learning outcomes of the course are:

- Students will able to do classification of cybercrime, methods used to perform crime, apply cyber security, and know the detailing of Information Technology Acts against offences.
- Students will understand and appreciate the legal and ethical environment impacting individuals as well as business organizations and have an understanding of the ethical implications of IT legal decisions.
- Students will have a fundamental knowledge of Information Technologies which affect organizational processes and decision-making.

E. Recommended Study Material:

❖ Reference Books:

1. Charles P. Pfleeger, Shari Lawerance Pfleeger, “Analysing Computer Security”, Pearson Education India.
2. V.K. Pachghare, “Cryptography and information Security”, PHI Learning Private Limited, Delhi India.

3. Dr. Surya Prakash Tripathi, Ritendra Goyal, Praveen kumar Shukla,"Introduction to Information Security and Cyber Law" Willey Dreamtech Press.
4. Schou, Shoemaker, " Information Assurance for the Enterprise", Tata McGraw Hill.
5. CHANDER, HARISH," Cyber Laws And It Protection " , PHI Learning Private Limited ,Delhi ,India

CA 842: MOBILE APPLICATION DEVELOPMENT

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the Course:

Week No	Practical	Description
1	Brief about mobile technologies and challenges in mobile application development and architectural overview of an Android platform.	Different mobile application development platform overview and Android architecture overview and basic components of Android application development overview.
2	Development of first Android based mobile application and overview of necessary components required for development.	Working of Android Studio IDE, Android project directory structure, Dalvik Virtual Machine Overview, Android Software development kit explanation, Virtual device creation and execution of first application on virtual as well as actual device
3	Fundamentals of User Interface designing.	XML based user interface designing using different available layouts like Relative Layout, Linear Layout, Table Layout etc.
4	User Interface Widgets-1	Hands-on demonstration of basic widgets like- TextView, EditText, Button, ToggleButton, RadioButton, RadioGroup, CheckBox, RatingBar, SeekBar etc.
5	User Interface Widgets-2	Hands-on demonstration of composite widgets like- ListView, Spinner and AutoCompleteTextView and customization of the composite controls.
6	Activity, Activity navigation and Intents.	Activity life cycle, Linking Activity using Intents:startActivity(), StartActivityForResult(). Calling built-in applications: ACTION_MAIN, ACTION_VIEW, ACTION_DIAL, ACTION_SEND
7	Android Resources, Styles and Themes.	Usage and implementation of different resources like drawable, string, color, dimes, raw and animation. Creating and Applying simple Style, Inheriting built-inStyle and User defined style, Using Styles as themes.
8	Dialogs & Menus.	Hands-on demonstration of different dialogs and menus available in Android.
9	Data Persistence Techniques.	User Preferences and Database management through SQLite

10	Broadcast Actions and Services implementation.	Service: life cycle, create and destroy service, Alarm Manager and SMS Manager. Standard Broadcast Actions.
11	PHP based web service implementation in Android	Creation and consumption of PHP based web service.
12	Simple Google Map incorporation with Android application.	Google Developer console usage, SHA-1 certificate creation and API-KEY creation and incorporation in Android application.

Total hours (Theory): 30

❖ **Text Books:**

1. Wei-Meng Lee: Beginning Android 4 Application Development, Wiley India Pvt Ltd.
2. Mark L. Murphy: The Busy Coder's Guide to Android Development

Reference Books:

1. Jonathan Simon: Head First Android Development, O'REILLY publication

PT796.01: FITNESS AND NUTRITION

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the course:

S. No.	Title of the unit	Minimum number of hours
1.	Physical Education and Physical Fitness	10
2.	Nutrition and Health	10
3.	Sports and Life Skills Education	10

Total hours (Theory): 30

B. Detailed syllabus:

Sr. No.	UNIT	Hours
1	PHYSICAL EDUCATION AND PHYSICAL FITNESS	10 hours
1.1.	Concept of Physical Education, Meaning, Definition, Aims and Objectives of Physical Education, Need and Importance of Physical Education	
1.2	Physical Education and its Relevance in Inter Disciplinary Context	
1.3	Physical Fitness Components: Type of Fitness, Health Related Physical Fitness, Performance Related Physical Fitness	
2	NUTRITION AND HEALTH	10 hours
2.1	Concept of Food and Nutrition, Balanced Diet, Food Pyramid Index	
2.2	Macro and Micronutrients: Types, functions and classification system	
2.3	Carbohydrates : Types, RDA data, Glycemic index, Sources of Fats, saturated, unsaturated fats, recommended intake, importance of fat in diet, fats in health and disease	
2.4	Protein: Types EAA, function, assessing quality of proteins, selecting incomplete proteins, RDA sources.	
2.5	Vitamins And Minerals: Types, functions, sources, and minerals - calcium, Phosphorus	

	, iron, magnesium, sodium, potassium, and chloride. Trace elements - sources and functions.	
2.6	Determining Caloric Intake and Expenditure, Obesity, Causes and Preventing Measures – Role of Diet and Exercise, Importance of hydration in exercise	
3	SPORTS AND LIFE SKILLS EDUCATION	10 hours
3.1	Sports and Socialization	
3.2	Physical Activity and Sport – Emotional Adjustment and Wellbeing	
3.3	Substance Abuse among Youth – Preventive Measures and Remediation	
3.4	Yoga, Meditation and Relaxation	
3.5	Sports and Character Building	
3.6	Values in Sports	
3.7	Sports for World Peace and International Understanding	

C. Instructional Method And Pedagogy:

- Interactive classroom sessions using black-board and audio-visual aids.
- Using the available technology and resources for e-learning.
- Students will be encouraged towards self-learning and under direct interaction with course faculty.
- Students will be enabled for continuous evaluation.
- Case study, didactic mode of group discussions

D. Student Learning Outcomes:

Upon completion of the course, the student should be able to :

- Appraise the importance of exercise in maintenance of health and fitness.
- Objectively define health and fitness in realistic environment and inculcate habits of physical activity, nutrition and sports as a behavior change and overall health promotion

E. Recommended Study Material:

❖ Textbooks:

1. ACSM's "Health Related Physical Fitness Assessment Manual Lippincott Williams and Walkins USA, 2005.
2. Siedentop.D,(1994) Introduction to Physical Education and Sports (2nd ed.), California: Mayfield Publishing Company.
3. Corbin.Charles Beetal. C.A., (2004) Concepts of Fitness and Welfare Boston McGraw Hill.

NR 752.01: EPIDEMIOLOGY & COMMUNITY HEALTH

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the Course:

Unit No.	Title of Unit	Prescribed Hours
1	Introduction: • Concept, scope, definition, trends, History and development of modern Epidemiology • Contribution of epidemiology • Implications	5
2	Health Statistics: • Morbidity & Mortality	2
3	Epidemiological approaches: • Study of disease causatives (Cause & Risk) • Health promotion • Levels of prevention	4
4	Epidemiology of • Communicable diseases • Non-communicable diseases	10
5	Disaster: • Disaster preparedness, • Disaster management	3
6	Health Organizations: • Voluntary health organizations • International health agencies –WHO, World health assembly, UNICEF, UNFPA, SIDA, US AID, DANIDA, DFID. AusAID etc	6
Total		30 Hours

B. Instruction Method and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, microteaching, task-based learning, assignments, field visit and various interpersonal activities like group work, independent and collaborative research, presentations etc.

C. Evaluation:

The students will be evaluated continuously in the form of internal as well as external examinations. The evaluation (Theory) is schemed as 25 marks for internal evaluation and 75 marks for external evaluation in the form of University examination.

Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Assignments	1	8	8
2	Internal Test/ Model Exam	1	12	12
3	Attendance and Class Participation	Minimum 80% attendance		10
Total				30

External Evaluation

The University examination will be for 70 marks and will be based on practical based tests and a viva-voce.

D. Learning Outcomes: At the end of the course, learners will be able to:

- Understand the epidemiologic terminology,
- Understand the health statistic
- Understand the various methods of epidemiology
- Understand the role and functions of various health agencies
- Understand the epidemiological trends in communicable and non-communicable diseases.

OC733.01: INTRODUCTION TO POLYMER SCIENCE

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the course

Sr.No	Title of Unit	Approximate No of Hours
1	Basic concepts of Polymer Chemistry	5
2	Chemistry of Polymerization	8
3	Kinetics of polymerization	8
4	Molecular weight and size	9

Total Hours (Theory): 30

B. Detailed syllabus:

Sr. No	Title of Unit	Approximate No of Hours
1.	Basic concepts of Polymer Chemistry	5
	Introduction to polymers, How are polymers made, Classification of polymers.	
2.	Chemistry of Polymerization	8
	Chain polymerization, Step polymerization, Miscellaneous polymerization reactions, Polymerization techniques.	
3.	Kinetics of polymerization	8
	i). Free – Radical chain polymerization. ii). Cationic & anionic polymerization. iii). Polycondensation	
4.	Molecular weight and size	9
	Number – Average molecular weight. Viscosity – Average molecular weight. Polydispersity and molecular weight. Significance of polymer molecular weight. Size of polymer molecules	

C. Instrumental Methods and Pedagogy:

Topics will be taught in interactive class room sessions using black-board and if required power-point presentations will also be employed. Special interactive problem solving sessions will be conducted. Course materials will be provided from various sources of information. Students will be trained to measure molecular weight of polymers using appropriate instrument(s). Unit test

will be taken regularly as a part of continuous evaluation and suggestions will be given to the students in order to do better in their performance.

D. Student Learning Outcomes/Objective:

- The programme aims at providing the basic concepts in polymer science.
- Ensuring that students acquire skills for further research in this area.

E. References:

1. A First Course in Polymer Chemistry by A. Strepikheyev , V.Derevitskaya and G.Slonimsky ; MIR Publishers, Moscow
2. Polymer Science by V.R.Gowariker , N.V.Viswanathan and Jayadev Sreedhar, New Age International Publishers.
3. Polymer Science and Technology of Plastics and Rubbers by Premamoy Ghosh, Tata McGraw-Hill Publishing Company Ltd. New Delhi.

MB651: SOFTWARE BASED STATISTICAL ANALYSIS

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Course Outline

Module No.	Title/Topic	Classroom Contact Sessions
1	Introduction to Statistics - Research and Innovation - Introduction to Statistics - Quantitative Techniques in Research	06
2	Software # 1 - Use of Software in Research - Introduction to the Software - Creating Variables - Data and its Types - Importing Data from MS-Excel - Transformation of Variables - Visual Benning - Determining Validity and Reliability of Scale using CFA - Cronbach's (alpha) : a coefficient of internal consistency - Estimation & Hypothesis Testing: - Parametric Tests - Z Test - t – Test - Cross Tabulation and Chi – square - One-Way & Two-Way Analysis of Variance (ANOVA) - Pearson’s Correlation Analysis - Regression Analysis - Simple & Multiple Linear Regression Analysis - Measures of Model Fit (R and R-square Statistics) - Non-Parametric Tests - Mann-Whitney U Test - Wilcoxon Signed Rank Test - Run test - Krushal-Wallis Test - Spearman Correlation Analysis	12
3	Statistical Analysis Using Open Source software Introduction to Software	10

Module No.	Title/Topic	Classroom Contact Sessions
	• Programming Language Basics – including creating, sub-setting and analyzing • Managing your files and workspace • Controlling functions (procedures or commands) • Data Acquisition – Reading files • Data Transformations • Selecting variables and observations • Writing functions (macros) • Graphics	
4	Article / Research Papers Reviews	02
Total		30

B. Pedagogy

The course will emphasise self-learning and active classroom interaction based on students' prior preparation. The course instructor is expected to prepare a detailed session-wise schedule, showing the topics to be covered, the reading material and case material for every session. Wherever the material for any session is drawn from sources beyond the prescribed text-book, reference books, journals and magazines in the library, or from websites and other resources not accessible to the students, the course instructor should make the material available to the students well in advance, so that the students can come prepared for the classes. The pedagogical mix will be as follows:

- Classroom / Practical Contact Sessions ... About 28 Sessions
- Research Paper Discussions / Feedback ... About 02 Sessions

The exact division among the above components will be announced by the instructor at the beginning of the semester as a part of detailed session-wise schedule.

C. Internal Evaluation

The students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks	Percentage of total internal evaluation
1	Quizzes	3	10	30	10
2	Assignment / Project work	1	150	150	50
3	Internal Tests	2	45	90	30
4	Attendance and Class Participation			30	10
Total				300	100

The total marks will be divided by 10 and declared as Institute-level evaluation marks for the course. The Institute-level evaluation will constitute 30% of the total marks for the course.

D. External Evaluation

The University examination will be for 70 marks and will be based on practical computer-based tests and a viva-voce.

E. Learning Outcomes

At the end of the course, the student should have developed:

- Skills related to use of statistical techniques for analysis using software
- Rational decision making skills for typical business / other decisions
- Inputs for reviewing articles / research papers especially related to use of statistical techniques and analysis based on software

F. Reference Material

❖ **Text-book**

1. Latest Manuals of Software

❖ **Reference Books**

1. David .M. Levine, Krehbiel, Berenson, P.K. Viswanathan, (Latest Edition), Business Statistics – A First Course, (Latest Edition), Pearson Education

MA 772.01: DESIGN OF EXPERIMENTS

Credits and Hours:

Teaching Scheme	Theory	Practical/Tutorial	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the course:

Sr No.	Title of the unit	Minimum number of hours
1.	Principles of Experimental Design	06
2.	Statistical Concepts	06
3.	Single Factor Experiments	08
4.	Factorial Experiments	10

Total hours (Theory): 30

B. Detailed Syllabus:

Sr. No.	UNIT	Hours
1	Principles of Experimental Design 06 Hours	20%
1.1	Basic Terminologies: Types of Investigations and Experiments	
1.2	Confirmatory and Exploratory Experiments	
1.3	Modeling and selecting Response	
1.4	Minimizing Bias and Variability	
2	Statistical Concepts 06 Hours	20%
2.1	Descriptive Statistics and Graphical Presentation	
2.2	Probability Distributions, Hypothesis Tests and Confidence Intervals	
2.3	Power and Sample size calculation	
2.4	Experiments for Two Treatments	
2.5	Linear Regression: Simple and Multiple	
3.	Single Factor Experiments 08 Hours	30%
3.1	Completely Randomized Designs	
3.1	Concepts of Multiple comparison	

3.2	Pairwise Comparisons	
3.3	Comparisons with a Control	
3.4	General Contrast	
4.	Factorial Experiments	10Hours
4.1	Inference from Factorial Experiments	
4.2	Two-Level Factorial Experiments	
4.3	Definition and Estimation of Main Effects and Interactions	
4.4	Statistical Analysis	
4.5	Two-Level Fractional Factorial Experiments: Introduction	

C. Instructional Method and Pedagogy:

- At the start of course, the course delivery pattern, prerequisite of the subject will be discussed.
- Lectures will be conducted with the aid of multi-media projector, black board, OHP etc.
- Attendance is compulsory in lectures/laboratory which carries a 5% component of the overall evaluation.
- Minimum two internal exams will be conducted and average of two will be considered as a part of 15% overall evaluation.
- Assignments based on course content will be given to the students at the end of each unit/topic and will be evaluated at regular interval. It carries a weighting of 5%.
- Two Quizzes (surprise test) will be conducted which carries 5% component of the overall evaluation.

D. Student Learning Outcomes:

- At the end of the course the students will be able to understand the basic concepts of Design of Experiment.
- Student will be able to apply concepts of these course in their study of specialization

E. Recommended Study Material:

❖ Text Books:

1. Tamhane, Ajit C. Statistical analysis of designed experiments: theory and applications. Vol. 609. John Wiley & Sons, 2009.
2. Hinkelmann, Klaus, and Oscar Kempthorne. Design and Analysis of Experiments, Introduction to Experimental Design. Vol. 1. John Wiley & Sons, 2008.
3. Lorenzen, Thomas, and Virgil Anderson, eds. *Design of experiments: a no-name approach*. CRC Press, 1993.

❖ Reference Books:

1. Cox, David Roxbee, and Nancy Reid. *The theory of the design of experiments*. CRC Press, 2000.

2. Goupy, Jacques L. *Methods for experimental design: principles and applications for physicists and chemists*. Vol. 12. Elsevier, 1993.

PH892: INTELLECTUAL PROPERTY RIGHTS

Credits and Hours:

Teaching scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the course:

Sr. No.	Title of Unit	No. of Contact Hours.
1	Intellectual Property Concepts	07
2	Practical aspect of patenting	20
3	IPR related treaties	03

Total Hours (Theory): 30

B. Syllabus Topics:

Sr. No.	Title of Unit	Topics
1	Intellectual Property Concepts	• Concept of property, conventional property vs. Intellectual Property • Basic aspect of the 8 different IPR mechanism Viz. Patents, Copyright, trademark, industrial design, layout design of integrated circuits, geographical indicators, plant varieties & trade secrets. • Benefits of IPRs to improve the quality of research work • Strategies for avoiding research duplications, infringements
2	Practical aspect of patenting	• Indian patent act and its recent amendment with respect to following aspect: Patentable and non-patentable inventions, Essential criteria for filing a patent, Filing a patent in India and abroad, Drafting of patent application • Patent Filing and Commercialization: Procedure for patent obtaining in India, National and International Patent Search, Patent Analysis, Patent Drafting and Filing Procedure in India, Patent Specification and Claims, How to right a Claim of Patent, Pre/Post Grant Issues in Patenting, Opposition of Patent Granting, Infringement Analysis, Ground of Defense, Intellectual Property Appellation Board (IPAB), International Filing: PCT System • Patent and Biodiversity Act

		• Introduction to World Intellectual Property Organization. (WIPO) • Commercialization of patent: Need for Commercialization of research and role of IPRs in research Commercialization. • Benefit/Disadvantages of patenting to the society • Latest Amendment/Emerging Issues in Patenting • Case Study
3	IPR related treaties	• Patent co-operative treaty • Budapest treaty

C. Instructional Methods and Pedagogy:

The course employs in interactive classroom session using chalk and talk teaching to power point presentations. It also includes presentation by students on a specific topic assigned to them by the faculty and case study discussion with various litigation, infringement and patent rejection cases. Unit test will be conducted regularly as a part of continuous evaluation and suggestion will be given to student in order to improve their performance.

D. Students Learning Outcomes/Objectives:

- At the end of the course, the student will be able to understand the fundamental concepts of Intellectual Property Rights which further will be helpful in understanding other advanced aspects of Patent and Trademark applications in various scientific research and innovation.
- At the end student would gain experience in filling and drafting procedure of Patent.

E. Recommended Study material

1. Intellectual Property Right basic Concept, by M. M. S. Khatri, Atlantic Publisher and Distributors Pvt. Ltd., New Delhi.
2. Epstein on Intellectual Property: 5th Edition by Michael M. Epstein, Wolters Kulwer India Pvt. Ltd. Gurgaon, India.
3. Intellectual Property Right and Human Development in India by Shabana Talwar, First Edition, Serials Publications, New Delhi, India.
4. IPR Handbook for Pharma Students and Researchers, Parikshit Bansal, Pharma Book Syndicate, Hyderabad, India.
5. Patents, N. R. Subbaram, Pharma Book Syndicate, Hyderabad.
6. Intellectual Property Right by Nikolaus Thumm, Springer-Verlag Publications, Germany.
7. Intellectual Property - Patents, Copyright, TradeMarks and Allied Rights by Cornish, Aplin and Llewelyn, Sweet and Maxwell – Thomson Publishers, New Delhi, India
8. The Enforcement of Intellectual Property Rights: A Case Book by Louis Tc. Harms, WIPO Publishing House, Geneva.
9. Intellectual Property: From Creation to Commercialization - A Practical Guide for Innovators & Researchers by John P., MC Manus, Oak Tree Press, Ireland.

CHAROTAR UNIVERSITY OF SCIENCE & TECHNOLOGY
FACULTY OF APPLIED SCIENCES
DEPARTMENT OF PHYSICAL SCIENCE

PD262 : Astrophysics, Space and Cosmos-2 (ASC-2)

University Elective

Semester 4 Undergraduate Programme
Semester 2 Postgraduate Programme

Prerequisite:

Student having exposure of 10+2 level of Physics, and studying in bachelor and master program from any institute can join this course.

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	-	2	2	2
Marks	-	100	100	

A. Outline of the Course:

Sr. No.	Title of the Unit	Minimum Number of Hours
1.	Black holes and Shadows	10
2.	Gravitational Waves	06
3.	Sensors and Detectors for Satellite Imaging	08
4.	Cosmology	06

Total Hours (Theory): 0

Total Hours (Lab): 30

Total Hours: 30

B. Detailed Syllabus:

1.	Black holes and Shadows	10 Hrs
	Spacetime, Schwarzschild metric, Null Geodesics in Schwarzschild metric, Photon sphere, Einstein ring, Shadow of Black hole, shadow of Naked singularity, recent observation of black hole image (M87 Galaxy), experiments using imaging technique	8 (L) + 2 (P)
2.	Gravitational Waves	6 Hrs
	Introduction to Gravitational Waves; recent development for the detection of Gravitational waves; Overview of Gravitational Wave detectors (i.e. LIGO, KAGRA, etc.) and its scientific and technologic importance; Outline of Interferometers & its applications; Construction and working of Michelson Interferometer & its application potentiality in Advance- LIGO; Demonstration experiment of Michelson Interferometer.	4 (L) + 2 (P)
3.	Sensors and Detectors for Satellite Imaging	8 Hrs
	Introduction to sensors, Signal, Parameters, Types of Sensors: CCD and CMOS, CMOS sensors: Architecture Configuration and Working, CCD sensors: Architecture Configuration and Working.	
4.	Cosmology	6 Hrs
	Galaxies: General Description, The Milky-Way, M87 Galaxy, Rotation Curves of Spiral Galaxies, Galaxy Formation, Expanding Universe, Hubble's Law, Dark matter and Dark Energy.	

C. Instructional Methods and Pedagogy

The topics will be discussed in interactive class room sessions using classical black-board teaching, ICT, hands-on-experiments and demonstration of experiments, whichever is relevant. Assignments, small projects and lab-exercise will be to the students. Students needs to submit solution/report/results of above mentioned work, which will be eventually used for the evaluation purpose. Occasionally seminar/viva presentation will also be used as one of the evaluation tools.

D. Student Learning Outcomes:

After completion of Astrophysics, Space and Cosmology level one and two courses, students will explore themselves for taking projects, which may eventually fulfill their curiosity in these and allied fields. It may open up new avenues in their career.

E. Recommended Study Materials
