Year – 2021-2022

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
DEVANG PATEL INSTITUTE OF ADVANCE TECHNOLOGY AND RESEARCH
COMPUTER SCIENCE & ENGINEERING

Vision

To become the frontiers for dissemination and creation of knowledge in the field of computer science & engineering.

.

Mission

To empower ambitious engineers with expertise and experience to solve the challenges of technological era by:

- Providing diverse interdisciplinary environment to endeavor collaborative research and industry-based projects which offer opportunities for deep-rooted synergy with academia and industry.
- Encouraging experiential learning and self-learning through professional society chapters for better understanding of the subject.
- Enhancing critical and computational thinking to make young minds ready for global platform.

THE PROGRAMME EDUCATIONAL OBJECTIVES (PEOs)

PEO1	To establish a strong foundation in students and help them to apply engineering fundamentals, mathematics, science and humanities necessary to formulate, analyze, design and implement engineering solutions.
PEO2	To engage in research and find the appropriate solutions for the benefits of mankind through continuous learning, relearning and unlearning.
PEO3	To bring out world class engineers, scientists, entrepreneurs, model citizens, problem solvers and critical thinkers with skills developed by practices of advance technologies.
PEO4	To make students aware about their capabilities so that they can analyze real life problems to develop economically viable and socially acceptable solutions that are sustainable using their technical and analytical skills.
PEO5	To provide an environment where the students are nurtured in every aspect for their holistic development such that they achieve excellence in professionalism, interpersonal skills as well as moral and ethical conduct.
PEO6	To infuse in students, the ability to work as a part of team on multidisciplinary projects and develop leadership qualities that meet the challenging and changing global needs.
PEO7	To prepare and make students ready for presenting themselves on global platform by encouraging them to adapt rapidly changing industry requirements.

PROGRAM OUTCOMES (POs)

At the end of the program, the student will be able to:

PO1	Engineering knowledge: Apply knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet specified needs with appropriate consideration for public health and safety, and the cultural, societal, and environmental considerations.
PO4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
PO6	The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO9	Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
PO11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

At the end of the program, the student will be able to:

PSO1	To instill analytical, technical and ethical skills required to identify optimized IT solutions for complex problems by applying critical and computational thinking.
PSO2	To undergo appropriate research and use innovative technologies for designing IT based solutions that meet specified needs with appropriate consideration for public health and safety, cultural, societal, and environmental benefits.

FACULTY OF TECHNOLOGY AND ENGINEERING
ACADEMIC REGULATIONS
Bachelor of Technology Programmes
Choice Based Credit System

To ensure uniform system of education, duration of undergraduate and post graduate programmes, eligibility criteria for and mode of admission, credit load requirement and its distribution between course and system of examination and other related aspects, following academic rules and regulations are recommended.

1. *System of Education*

Choice based Credit System with Semester pattern of education shall be followed across The Charotar University of Science and Technology (CHARUSAT) both at Undergraduate and Master's levels. Each semester will be at least 90 working day duration. Every enrolled student will be required to take a course works in the chosen subject of specialization and also complete a project/dissertation if any. Apart from the Programme Core courses, provision for choosing University level electives and Programme/Institutional level electives are available under the Choice based credit system.

2. *Duration of Programme*

(i)	Undergraduate programme	(B.Tech)
	Minimum	8 semesters (4 academic years)
	Maximum	16 semesters (8 academic years)

3. *Eligibility for admissions*

As enacted by Govt. of Gujarat from time to time.

4. *Mode of admissions*

As enacted by Govt. of Gujarat from time to time.

5. *Programme structure and Credits*

As per annexure – 1 attached

6. *Attendance*

- 61 All activities prescribed under these regulations and listed by the course faculty members in their respective course outlines are compulsory for all students pursuing the courses. No exemption will be given to any student from attendance except on account of serious personal illness or accident or family calamity that may genuinely prevent a student from attending a particular session or a few sessions. However, such unexpected absence from classes and other activities will be required to be condoned by the Dean/Principal.
- 62 Student attendance in a course should be 80%.

7 *Course Evaluation*

- 71 The performance of every student in each course will be evaluated as follows:
- 711 Internal evaluation by the course faculty member(s) based on continuous assessment, for 30% of the marks for the course; and
- 712 Final examination by the University through written paper or practical test or oral test or presentation by the student or a combination of any two or more of these, for 70% of the marks for the course.

72 *Internal Evaluation* ***As per Annexure – 1 attached***

73 *University Examination*

- 731 The final examination by the University for 70% of the evaluation for the course will be through written paper and 100% for practical test or oral test or presentation by the student or a combination of any two or more of these.
- 732 **In order to earn the credit in a course a student has to obtain grade other than FF.**

74 *Performance at Internal & University Examination*

- 741 Minimum performance with respect to internal marks as well as university examination will be an important consideration for passing a course. Details of minimum percentage of marks to be obtained in the examinations (internal/external) are as follows

Minimum marks in University Exam per subject	Minimum marks Overall per subject
40%	45%

- 742 A student failing to score 45% of the final examination will get a FF grade.
- 743 If a candidate obtains minimum required marks per subject but fails to obtain minimum required overall marks, he/she has to repeat the university examination till the minimum required overall marks are obtained.

8 Grading

- 8.1 The total of the internal evaluation marks and final University examination marks in each course will be converted to a letter grade on a ten-point scale as per the following scheme:

Table: Grading Scheme (UG)

Range of Marks (%)	≥80	≥73 <80	≥66 <73	≥60 <66	≥55 <60	≥50 <55	≥45 <50	<45
Letter Grade	AA	AB	BB	BC	CC	CD	DD	FF
Grade Point	10	9	8	7	6	5	4	0

- 8.2 The student's performance in any semester will be assessed by the Semester Grade Point Average (SGPA). Similarly, his performance at the end of two or more consecutive semesters will be denoted by the Cumulative Grade Point Average (CGPA). The SGPA and CGPA are calculated as follows:

- (i) $SGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i
and $i = 1$ to n , n = number of courses in the semester
- (ii) $CGPA = \sum C_i G_i / \sum C_i$ where C_i is the number of credits of course i
 G_i is the Grade Point for the course i
and $i = 1$ to n , n = number of courses of all semesters up to which CGPA is computed.
- (iii) No student will be allowed to move further if CGPA is less than 3 at the end of every academic year.
- (iv) A student will not be allowed to move to third year if he/she has not cleared all the courses of first year.
- (v) A student will not be allowed to move to fourth year if he/she has not cleared all the courses of second year.

9 Awards of Degree

- 9.1 Every student of the programme who fulfils the following criteria will be eligible for the award of the degree:
- 9.1.1 He should have earned at least minimum required credits as prescribed in course structure; and
- 9.1.2 He should have cleared all internal and external evaluation components in every course; and
- 9.1.3 He should have secured a minimum CGPA of 4.5 at the end of the programme;
- 9.1.4 In addition to above, the student has to complete the required formalities as per the regulatory bodies, if any.

- 9.2 The student who fails to satisfy minimum requirement of CGPA at the end of program will be allowed to improve the grades so as to secure a minimum CGPA for award of degree. Only latest grade will be considered.

10. Award of Class

The class awarded to a student in the programme is decided by the final CGPA as per the following scheme:

Distinction:	$\text{CGPA} \geq 7.5 \text{ \& } \leq 10.0$
First class:	$\text{CGPA} \geq 6.0 \text{ \& } < 7.5$
Second Class:	$\text{CGPA} \geq 5.0 \text{ \& } < 6.0$
Pass Class:	$\text{CGPA} < 5.0$

11. Transcript

The transcript issued to the student at the time of leaving the University will contain a consolidated record of all the courses taken, credits earned, grades obtained, SGPA, CGPA, class obtained, etc.

**CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
(CHARUSAT)**

FACULTY OF TECHNOLOGY & ENGINEERING (FTE)

CHOICE BASED CREDIT SYSTEM

FOR

BACHELOR OF TECHNOLOGY & ENGINEERING

A. Choice Based Credit System:

With the aim of incorporating the various guidelines initiated by the University Grants Commission (UGC) to bring equality, efficiency and excellence in the Higher Education System, Choice Based Credit System (CBCS) has been adopted. CBCS offers wide range of choices to students in all semesters to choose the courses based on their aptitude and career objectives. It accelerates the teaching-learning process and provides flexibility to students to opt for the courses of their choice and / or undergo additional courses to strengthen their Knowledge, Skills and Attitude.

1. CBCS – Conceptual Definitions / Key Terms (Terminologies)

1.1 Core Courses

1.1.1 University Core (UC)

University Core Courses are those courses which all students of the University of a Particular Level (PG/UG) will study irrespective of their Programme/specialisation.

1.1.2 Programme Core (PC)

A ‘Core Course’ is a course which acts as a fundamental or conceptual base for Chosen Specialisation of Engineering. It is mandatory for all students of a particular Programme and will not have any other choice for the same.

1.2 Elective Course (EC)

An ‘Elective Course’ is a course in which options / choices for course will be offered. It can either be for a Functional Course / Area or Streams of Specialization / Concentration which is / are offered or decided or declared by the University/Institute/Department (as the case may be) from time to time.

1.2.1 Institute Elective Course (IE)

Institute Courses are those courses which any students of the University/Institute of a Particular Level (PG/UG) will choose as offered or decided by the University/Institute from time-to-time irrespective of their Programme /Specialisation

1.2.2 Programme Elective Course (PE):

A ‘Programme Elective Course’ is a course for the specific programme in which students will opt for specific course(s) from the given set of functional course/ Area or Streams of Specialization options as offered or decided by the department from time-to-time

1.2.3 Cluster Elective Course (CE):

An ‘Elective Course’ is a course which students can choose from the given set of functional course/ Area or Streams of Specialization options (eg. Common Courses to EC/CE/IT/EE) as offered or decided by the Institute from time-to-time.

13 Non Credit Course (NC) - AUDIT Course

A 'Non Credit Course' is a course where students will receive Participation or Course Completion certificate. This will not be reflected in Student's Grade Sheet. Attendance and Course Assessment is compulsory for Non Credit Courses

Note:

- **University Elective (UE):** - University Electives are offered in common slots and offered by various departments. Students of any programme can select these electives. Subjects like Research Methodology, Occupational Health & Safety, Engineering Economics, Professional Ethics, and Project Management, Disaster Management, Risk Management etc. can be included.
- **Cluster Elective (CT):** - Institutional Electives means common electives among a cluster of programmes (eg. CE/IT/EC/EE etc.). If Institutional Electives are not applicable, it will be Programme electives
- **Programme Elective (PE):** -
- **Institute Elective (IE):-**
- Provision for Auditing a course will be available
- Audit courses may be offered and decided based on need of the institute/programs.

B. Tech. (Computer Science & Engineering) Programme

SYLLABI

(Semester – 3)

**CHAROTAR UNIVERSITY OF SCIENCE AND
TECHNOLOGY**

MA253: DISCRETE MATHEMATICS AND ALGEBRA

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	0	0	4	4
Marks	100	0	-	100	

Pre-requisite courses:

- Engineering Mathematics

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Predicate Calculus	08
2.	Relations and Lattice	10
3.	Graph Theory	12
4.	Recurrence Relations	05
5.	Abstract Algebra	09
6.	Linear Algebra	16

Total hours (Theory): 60

Detailed Syllabus:

1.	Predicate Calculus:	08 Hours	13%
	Revision: Propositions, connectives, converse, inverse, contrapositive, tautology, contradiction. Logical equivalence. Minimal functionally complete set of connectives. Principle conjunctive normal forms and Principle disjunctive normal forms. Predicate calculus using rules of inferences.		
2.	Relations and Lattice:	10 Hours	17%
	Revision of properties of relations on sets. Representations of relations: graphical and matrix representation. Equivalence relation, covering of a set, partition of a set. Partially ordered sets, totally ordered sets, Hasse diagram. Lattices, sub lattices. Properties of lattices (without proof). Complete lattices, bounded lattices, distributive lattices, complemented lattices and complemented distributive lattices.		
3.	Graph Theory:	12 Hours	20%
	Basic terminologies, Simple graph, Types of graphs. Degree of a vertex, matrix representations of graph. Path and connectivity. Eulerian and Hamiltonian graph. Subgraphs, spanning subgraphs, isomorphic graphs. Planar graphs. Matching in graphs. Graph coloring.		
4.	Recurrence Relations:	05 Hours	08%
	Solutions of recurrence relation by direct methods. Generating functions and solutions of recurrence relation.		
5.	Abstract Algebra:	09 Hours	15%
	Groupoid, semi group, monoid, group. Order of group, order of an element, Lagrange's theorem. Subgroup, cyclic subgroup, permutation group.		
6.	Linear Algebra:	16 Hours	27%
	Vector space: definition and examples. Subspaces. Linear combinations, linearly dependence and linearly independence. Basis and dimension of a vector space. Linear transformations. Null space and range of a linear transformation. Rank - nullity theorem. Isomorphisms.		

Student Learning Outcomes:

At the end of the course the students would be able to

CO1	Develop logical argument using truth table and rules of inferences in predicate calculus.
CO2	Relation and types of relations define on sets and utilize it to construct Hasse diagram and lattices on sets.
CO3	Graph and types of the graphs and identify the real world phenomena in terms of graph theory.
CO4	The concept of recurrence, generating functions and their applications in solving recurrence relations.
CO5	Different algebraic structures like groupoid, semi group, monoid, group , cyclic group and permutation group
CO6	Definition of vector space, concepts of the terms: linear span, linear independence, basis, dimension. Definition and properties of linear transformations, range and kernel of a linear transformation.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	1	-	1	-	-	-	-	-	-	-	2	-
CO2	3	2	-	-	-	-	-	-	-	-	-	-	3	-
CO3	3	2	1	-	2	-	-	-	-	-	-	-	3	1
CO4	3	-	-	-	1	-	-	-	-	-	-	-	3	-
CO5	3	1	-	-	-	-	-	-	-	-	-	-	2	-
CO6	2	1	-	1	-	-	-	-	-	-	-	-	2	-

Correlation levels 1, 2 or 3 as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

CE251: JAVA PROGRAMMING

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	4	0	7	5
Marks	100	100	0	200	

Pre-requisite courses:

- Basic programming skill.

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Fundamental of Programming in Java	02
2.	Class Fundamentals	04
3.	Array & String Handling	02
4.	Inheritance, Interfaces & Packages	06
5.	Exceptions Handling	05
6.	Multithreaded Programming	07
7.	File I/O and NIO	07
8.	Java Collection Frameworks and Generics	12
	Total hours (Theory) :	45
	Total hours (Lab) :	60
	Total hours :	120

Detailed Syllabus:

1.	Fundamental of Programming in Java	02 Hours	04%
	History of Java, Basic overview of java, Bytecode, JVM Buzz-words, Application and applets, Constants, Variables & Data Types, Comment, Operators, Control Flow		
2.	Class Fundamentals	04 Hours	09%

	General form of class, Creating class Overloading methods, Constructor ,Declaring Object, Returning objects, using objects as parameters, Assigning object reference variables, Introducing Access control , Understanding static Introducing final, The finalize () method,The this keyword ,Garbage collection		
3.	Array & String Handling	02 Hours	04%
	Array basics, String Array, String class, StringBuffer and StringBuilder class, String Tokenizer Class and Object Class		
4.	Inheritance, Interfaces & Packages	06 Hours	14%
	Inheritance: Using super creating multilevel Hierarchy, method overriding, Dynamic method dispatch, abstract classes, Using final with Inheritance, Using Package: Defining package, Finding package and CLASSPATH, Access protection, Importing package, Interface: Defining Interface, Default Methods, Implementing Interface, Variables in Interface		
5.	Exceptions Handling	05 Hours	11%
	Exception types, Try ...Catch...Finally, Throw, Throws, creating your own exception subclasses		
6.	Multithreaded Programming	07 Hours	16%
	Life cycle of thread, thread methods, thread priority, thread exceptions, Implementing Runnable interface, Synchronization and Concurrency		
7.	File NIO	07 Hours	16%
	File and Directories, Byte streams and character streams, Random Access Files,NIO: Meta Data File Attributes Buffers, Channels, Recursive Operation.		
8.	Collection Framework and Generics	12 Hours	26%
	Collections of objects, Collections: Sets, Sequence, Map, Understanding Hashing, Use of Array List & Vector, Generics Class, Lamda Expression, Functional Reference, Method Reference, Optional Classes, Processing data with streams		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand and implement Object Oriented programming concept using basic syntaxes of control Structures, strings and function for developing skills of logic building activity and garbage collection for saving resources.
CO2	Demonstrate basic problem solving skills: analyzing problems, modeling a problem as a system of objects, creating algorithms, and implementing models and algorithms in an object-oriented computer language (classes, objects, methods with parameters, abstract classes, interfaces, inheritance and polymorphism).
CO3	Use and develop Concurrency theory: progress guarantees, deadlock, livelock, starvation, linearizability.
CO4	Build and test program using new IO api and exception handling
CO5	Analyze and apply collection framework and generics to solve different data structure algorithms.
CO6	Understand and apply java new features

Course Articulation Matrix:

CE252: DIGITAL ELECTRONICS

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	0	5	4
Marks	100	50	0	150	

Pre-requisite courses:

- Basic Electronics

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Number Systems	5
2.	Boolean Algebra and Logic Gates	5
3.	Simplification of Boolean Functions	6
4.	Combinational Logic	5
5.	Combinational Logic With MSI AND LSI	5
6.	Sequential Logic	10
7.	Registers, Counters and the Memory Unit	5
8.	Processor Logic Design	4
	Total hours (Theory) :	45
	Total hours (Lab) :	30
	Total hours :	75

Detailed Syllabus:

1.	Number Systems	05 Hours	10%
	Digital computer and digital systems, Binary Number, Number base conversion Octal and Hexadecimal Number, Complements, Binary Codes, Binary Storage and register, Binary Logic, Integrated Circuit		
2.	Boolean Algebra and Logic Gates	05 Hours	10%
	Basic Definition, Axiomatic Definition of Boolean Algebra, Minterm And Maxterms, Basic Theorem and Properties of Boolean Algebra, Logic Operations, Digital Logic Gates, IC digital Logic Families		

3.	Simplification of Boolean Functions	06 Hours	12%
	Two-Three Variable K-map, Four- Five Variable K-map, Product of sum Simplification, NAND or NOR implementation, Don't Care condition 3.4 Tabulation method		
4.	Combinational Logic	05 Hours	12%
	Introduction, Design Procedure, Hazards, Adder, subtractor, Code Conversion, Universal Gate, exclusive OR & equivalence functions		
5.	Combinational Logic With MSI and LSI	05 Hours	12%
	Introduction, Binary Parallel Adder, Decimal Adder, Magnitude Comparator, Decoder, Multiplexer, ROM, PLA, PAL		
6.	Sequential Logic	10 Hours	22%
	Introduction, RS,JK,D,T Flip-Flops, Triggering of Flip-Flops, Flip-Flop Excitation Tables, Analysis of Clocked Sequential Circuits, State Reduction and Assignment Design Procedure, Design of Counters, Design with State Equations		
7.	Registers, Counters and the Memory unit	05 Hours	12%
	Introduction, Registers, Shift Registers, Ripple Counters, Synchronous Counters, Timing Sequences, Memory Unit, Johnson counter		
8.	Processor Logic Design	04 Hours	10%
	Processor Organization, Arithmetic Logic Unit, Design of ALU, Status Register, Design of Shifter, Processor Unit		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand, convert and examine the structure of various number systems and its application in digital design.
CO2	Simplification of Boolean function and its conversion in different forms.
CO3	Understand, analyse and design various combinational circuits.
CO4	Compare different flip-flop characteristics and design of Flip-Flop with gates. With FF Design, understand and analyse various sequential circuits.
CO5	Explain the basic requirements of ALU design and its variation.

Course Articulation Matrix:

CE257: DATA COMMUNICATION & NETWORKING

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	2	-	6	5
Marks	100	50	-	150	

Pre-requisite courses:

- N/A

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction and Basic Concepts	04
2.	Network Model	04
3.	Signals	04
4.	Digital and Analog Transmission	09
5.	Multiplexing	06
6.	Data Transmission	02
7.	Error Correction and Detection	05
8.	Data Link Control	04
9.	Media Access Control	06
10.	Switching	01
11.	Wired and Wireless LAN	09
12.	Network Routing	06
	Total hours (Theory) :	60
	Total hours (Lab) :	24
	Total hours :	84

Detailed Syllabus:

1.	Introduction and Basic Concepts	04 Hours	6%
	Data Communication, Networks, Network Types, Internet History, Standards and Administration		
2.	Network Model	04Hours	6%
	Protocol Layering, TCP/IP Protocol Suites, The OSI Model		
3.	Signals	04 Hours	6%

	Data and Signals, Periodic Analog Signal, Digital Signal, Transmission Impairment, Data Rate limits, Performance		
4.	Digital and Analog Transmission	09 Hours	15%
	Transmission Modes, Digital to Digital Conversion, Analog to Digital Conversion, Digital to Analog Conversion, Analog to Analog Conversion		
5.	Multiplexing	06 Hours	10%
	Frequency division Multiplexing, Wave length division Multiplexing, Time division Multiplexing, Multiplexing applications, Spread Spectrum		
6.	Data Transmission	02 Hours	3%
	Guided Media, Unguided Media,		
7.	Error Correction and Detection	05 Hours	8%
	Types of Errors, Redundancy, Detection versus correction, Block Coding, Cycle Coding, Checksum		
8.	Data Link Control	04 Hours	6%
	DLC Services, Data Link Layer Protocol, HDLC, Point-to-point Protocol		
9.	Media Access Control	06 Hours	10%
	Random Access, Controlled Access, Channelization		
10.	Switching	01 Hours	1%
	Circuit Switching, Packet Switching		
11.	Wired and Wireless LAN	09Hours	15%
	Ethernet Protocol, Standard Ethernet, Fast Ethernet, Gigabit Ethernet, Wireless characteristics and access control, IEEE 802.11 project.		
12	Network Routing	06 Hours	10%
	Unicast Routing, Routing Algorithms, Unicast Routing Protocols: IS,RIP,OSPF		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand and identify different physical layer transmission fundamentals such as types of signals, transmission, multiplexing, types of medium and modulation.
CO2	Evaluate existing layer-2 networking standards and implementations.

CO3	Evaluate key networking protocols, and their hierarchical relationship in the context of a conceptual model, such as the OSI and TCP/IP framework.
CO4	Understand existing different medium access protocols and evaluate for adoption for future networking.
CO5	Understand and differentiate functionality of existing network routing protocols.
CO6	Measure different network parameter such as Throughput & different types of delays.

Course Articulation Matrix:

CE244: SOFTWARE GROUP PROJECT-I

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	0	4	-	4	2
Marks	0	100	-	100	

Pre-requisite courses:

- Programming Language, Software Engineering.

Outline of the Course:

- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Students will work together in a team (at most three) with any programming language.
- Students are required to get approval of project definition from the department.
- After approval of project definition students are required to report their project work on weekly basis to the respective internal guide.
- Project will be evaluated at least once per week in laboratory Hours during the semester and final submission will be taken at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as a solution of particular problem by applying principles of Software Engineering.
- Students have to submit project with following listed documents at the time of final submission.
 - a. Final Project Report
 - b. Project Setup file with Source code
 - c. Project Presentation (PPT)
- A student has to produce some useful outcome by conducting experiments or projectwork.

Total hours (Theory) : 00

Total hours (Lab) : 30

Total hours : 30

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Create enhanced employment by moulding the students with higher technical skill.
CO2	Promote creative thinking, to provide hands on actual technology.
CO3	Handle software project and get use to software development processes.
CO4	Correlate knowledge of different subjects and apply theoretical knowledge to implement project for identified problem.
CO5	Write technical report and deliver presentation by applying different visualization tools and evaluation metrics.
CO6	Improve communication and presentation skill.

(Semester – 4)

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY

CE245: DATA STRUCTURE AND ALGORITHMS

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	-	5	4
Marks	100	50	-	150	

Pre-requisite courses:

- ☐ Programming Language

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction to Data Structure.	04
2.	Linear Data Structure	12
3.	Non Linear Data Structure	16
4.	Sorting	10
5.	Searching	01
6.	Dictionaries	02
	Total hours (Theory) :	45
	Total hours (Lab) :	30
	Total hours :	75

Detailed Syllabus:

1.	Introduction	04 Hours	08%
	Introduction to data structure (Types of data structure), Introduction to algorithms. Algorithm Analysis and Big O notation, Memory representation of Array: Row Order and Column Order, Abstract Data Types(ADT)		
2.	Linear Data Structure	12 Hours	27%
	Stack: Operations: push, pop, peep, change, Applications of Stack: Recursion: Recursive Function Tracing, Principles of recursion, Tail recursion, Removal of Recursion, Tower of Hanoi, Conversion: Infix to Postfix, Infix to Prefix. Evaluation: Prefix and Postfix expression,		

	Queue Simple Queue: Insert and Delete operation, Circular Queue: Insert and Delete operation, Concepts of: Priority Queue, Double-ended Queue, Applications of Queue, Linked List: Memory Representation of LL, Singly Linked List, Doubly Linked List, Circular Linked List, Applications of Linked List		
3.	Non Linear Data Structure	16 Hours	36%
	Tree: Tree Concepts, Tree Traversal Techniques: Pre-order, Post-order and In-order (Recursive and Iterative), Binary Search Tree: Iterative and Recursive, Balanced Trees (AVL Trees, Applications of Tree, Heaps: priority queues and Binary Heaps, Graph: Graph concepts, Memory Representation of Graph, BFS and DFS, Applications of Graph		
4.	Sorting	10 Hours	23%
	Sorting (concepts, Selection Sort, Bubble Sort, Merge Sort, Radix Sort, Insertion Sort, Heap Sort, Quick Sort)		
5.	Searching	01 Hours	02%
	Sequential Search, Binary Search		
6.	Dictionaries	02 Hours	04%
	Hashing, Hashing Functions, Collision-Resolution Techniques, Applications		

Course Outcome (COs):

At the end of the course, the students will be able to:

CO1	Understand and Implement Algorithms and core Data Structures such as stack, queue, hash table, priority queue, binary search tree and graph in programming language.
CO2	Analyse data structures in storage, retrieval and computation of ordered or unordered data.
CO3	Compare alternative implementations of data structures with respect to demand and performance.
CO4	Describe and evaluate the properties, operations, applications, strengths and weaknesses of different data structures.
CO5	Apply and select the most suitable data structures to solve programming challenges.
CO6	Discover advantages and disadvantages of specific algorithms.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	-	2	-	-	-	-	-	-	-	-	-	3	-
CO2	-	2	-	-	-	-	-	-	-	-	-	-	3	-
CO3	-	3	3	3	-	-	-	-	-	-	-	-	2	-
CO4	-	1	-	1	2	-	-	-	-	-	-	-	2	-
CO5	2	2	2	2	-	-	-	-	-	-	-	2	3	-
CO6	2	-	-	-	-	-	-	-	-	-	-	-	2	-

Enter correlation levels 1, 2 or 3 as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

If there is no correlation, put “-”.

Recommended Study Material:☐ **Text book:**

1. An Introduction to Data Structures with Applications, Jean-Paul Tremblay, Paul G. Sorenson, McGraw-Hill.
2. Data structure with C, Lipschutz, TMH
3. Introduction to Algorithms: Cormen, Leiserson, Rivest and Stein: Prentice Hall of India
4. Data Structures and Algorithms: Aho, Hopcroft and Ullmann: Addison Wesley.

☐ **Reference book:**

1. Classic Data structures, D.Samanta, Prentice-Hall International.0
2. Data Structures using C & C++, Ten Baum, Prentice-Hall International.
3. Data Structures: A Pseudo-code approach with C, Gilberg & Forouzan, Thomson Learning.
4. Fundamentals of Data Structures in C++, Ellis Horowitz, Sartaj Sahni, Dinesh Mehta, W. H. Freeman.
5. “A Practical Introduction to Data Structures and Algorithm Analysis” by Clifford A. Shaffer
6. Data Structures and Algorithm in Java: Goodrich and Tamassia: John Wiley and Sons.

CE246: Database Management System

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	4	-	8	6
Marks	100	100	-	200	

Pre-requisite courses:

- Data Structure

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introductory concepts of DBMS	04
2.	Relational Model	06
3.	Entity-Relationship model	07
4.	Formal Relational Query Languages	06
5.	Relational Database Design	09
6.	Transaction & Recovery Management	07
7.	Advanced Transaction Processing	06
8.	Database Security	06
9.	Indexing and Hashing	07
10.	Query Processing & Query Optimization	02
	Total hours (Theory) :	60
	Total hours (Lab) :	60
	Total hours :	120

Detailed Syllabus:

1.	Introductory concepts of DBMS	04 Hours	06%
	Introduction and applications of DBMS, Purpose of database, Data Independence, Database System architecture- levels, Mappings, Database users and DBA		
2.	Relational Model	06 Hours	10%

	Structure of Relational Databases, Database Schema, Schema Diagram, Domains , Relations, Relational Query Languages, Relational Operations		
3.	Entity-Relationship model	07 Hours	12%
	Basic concepts, Design process, Constraints, Keys, Design issues, E-R diagrams, Weak Entity Sets, Extended E-R features- Generalization, Specialization, Aggregation, Reduction to E-R database schema		
4.	Formal Relational Query Languages	06 Hours	10%
	The relational Algebra, The Tuple Relational Calculus, The Domain Relational Calculus		
5.	Relational Database design	09 Hours	15%
	Functional Dependency–definition, Trivial and Non-Trivial FD, Closure of FD set, Closure of attributes, Irreducible set of FD, Normalization – 1NF, 2NF,3NF, Decomposition using FD-Dependency Preservation		
6.	Transaction & Recovery Management	07 Hours	12%
	Transaction concepts, Properties of Transactions, Serializability of transactions, Testing for Serializability, System recovery, Two- Phase Commit protocol, Recovery and Atomicity, Log-based recovery, Concurrent executions of transactions and related problems, Locking mechanism, Solution to Concurrency Related Problems, Deadlock, Two-phase locking protocol, Intent locking		
7.	Advanced Transaction Processing	06 Hours	10%
	Transaction-Processing Monitors, Transactional Workflows, Main-Memory Databases, Real-Time Transaction Systems, Long-Duration Transactions		
8.	Database Security	06 Hours	10%
	Views - What are views for?, View retrievals, View updates, Snapshots (a digression), Materialized view, Security – Security and Authentication, authorization in SQL, Data encryption, Missing Information - An overview of the 3VL approach		
9.	Indexing and Hashing	07 Hours	12%

	Basic Concepts, Ordered Indices, B+-Tree Index Files, B+-Tree Extensions, Multiple-Key Access, Static Hashing, Dynamic Hashing, Comparison of Ordered Indexing and Hashing, Bitmap Indices, Index Definition in SQL		
10.	Query Processing & Query Optimization	02 Hours	03%
	Overview, Measures of Query Cost, Selection Operation, Sorting, Join, Evaluation of Expressions, Transformation of relational Expressions, Estimating Statistics of expression results, Query Evaluation plans		

Course Outcomes (COs):

At the end of the course, students will be able to

CO1	Apply the concepts of engineering i.e collecting data, organize the data in the systematic form, arrange the data in a computational way and applying mathematics formation.
CO2	Analyse how data are stored and maintained using data models. Ready to assimilate the concept of data abstraction and design queries using SQL. Identify how data is represented in the relational model and create relations using SQL language
CO3	Identify and evaluate the constructs in the E-R model and issues involved in developing an E-R diagram. Convert an E-R diagram into a relational database schema. Declare and enforce integrity constraints on database using a state-of-art RDBMS.
CO4	Produce aggregate operators to write SQL queries which are not expressible in relational algebra. “More mathematical” notation may apply and also used in research and other venues. Combining these concepts allows production of sophisticated queries.
CO5	Decompose un-normalized tables into normalized compliant tables. Design and implement a normalize database schema for a given problem-domain.
CO6	Compare transactions and their properties with (ACID) and without ACID. Apply locking protocol to ensure isolation. Develop logging technique to ensure atomicity and durability
CO7	Design a logical view which can be used for analytical tasks. Develop practical experience of the design and implement scalable, secure databases.
CO8	Produce strategies to minimise risks of security breaches in a range of network environments and data storage systems. Compute retrieval time and concluding with suitable indexing technique
CO9	Compare and evaluate query execution plan.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

	Total hours:	80

Detailed Syllabus:

1.	Introduction to digital logic Circuit	03 Hours	07%
	Digital Computers, Logic Gates, Combinational Circuits (Half adder, Full Adder), Flip-Flops (SR, D, JK, T, Edge-Triggered)		
2.	Register Transfer and Microoperations	09 Hours	18%
	Register Transfer Language, Register Transfer, Bus and Memory Transfers, Arithmetic Microoperation, Logic Microoperations, Shift Microoperation, Arithmetic Logic Shift Unit.		
3.	Basic Computer Organization and Design	08 Hours	18%

	Instruction Codes, Computer Registers, Computer Instructions, Timing and Control, Instruction Cycle, Memory Reference ,		
	Instructions, Input-Output and Interrupt, Complete Computer Description, Design of Basic Computer, Design of Accumulator Logic.		
4.	Central Processing Unit	05 Hours	17%
	Introduction, General Register Organization, Stack Organization, Instruction Formats, Addressing Modes.		
5.	Pipeline and Vector Processing	05 Hours	09%
	Parallel Processing, Pipelining, Arithmetic Pipeline, Instruction Pipeline, RISC Pipeline, Vector Processing, Array Processors.		
6.	Computer Arithmetic	06 Hours	18%
	Introduction: Binary, Octal, Decimal, Hexadecimal representation, Integer Numbers: Sign-Magnitude, 1's complement, 2's complement, Addition and Subtraction, Multiplication Algorithm.		
7.	Memory Organization	06 Hours	13%
	Memory Hierarchy, Main Memory, Auxiliary Memory, Associative Memory, Cache Memory, Virtual Memory.		
8.	8086, 80186, 80286 Processor	06 Hours	13%
	Architectural differences of 8086, 80186 and 80286 Processors.		
9.	80386 Processors	10 Hours	29%
	System Architecture, Registers, Memory management: Segment Translation, Page Translation, Combining Segment and Page Translation.		
10.	Current Era of Microprocessors	02 Hours	4%
	Comparison of AMD and Intel Architecture, Features of current era of AMD and Intel processors; Tick-Tock: manufacturing pattern of Intel.		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Recognize elements of digital logic circuit. Moving from design of single bit function to multibit function. (Flip flop, Logic Gates, Combinational Circuit). Design circuit for fixed function arithmetic function. Understand the notation of writing register transfer language.
-----	---

CO2	Design and examine the different Arithmetic, Logic and Shift circuit & Design control unit of Arithmetic, Logic and Shift Circuit.
CO3	Conceptualize and evaluate various parallelism employed in microprocessor.
CO4	Demonstrate and evaluate computer arithmetic operations on integer and real numbers using hardwired algorithm.
CO5	Understand and differentiate n-way set associative memory.
CO6	Understand segment and page translation currently employed in microprocessor. Understand basics of architecture of current era of microprocessors.

CE259: PROGRAMMING IN PYTHON

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	0	2	0	2	1
Marks	0	50	0	50	

Pre-requisite courses:

- ☐ High level language (C/C++/Java)
- ☐ Web Programming

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1	Basics of Python	02
2	Data Structures: Lists, Tuples, Dictionaries and Strings	04
3	Control structures and Function	04
4	Modules and Scoping Rules	02
5	Exceptions Handling	04
6	Magic Methods, Properties, and Iterators	04
7	Object Oriented Programming	06
8	Regular Expression and File Handling	04
	Total hours (Theory) :	0
	Total hours (Lab) :	30
	Total hours :	30

Detailed Syllabus:

1.	Basics of Python	02 Hours	07 %
	Using the Python Interpreter, Variables, Identifiers and Keywords, Numbers and Expressions		
2.	Data Structures: List, Tuples, Dictionaries and Strings	04 Hours	13 %
	Common Sequence Operations: Indexing, Slicing, Adding Sequences, Multiplication, Membership, Length, Minimum, and Maximum, Using Lists as Stacks, Using Lists as Queues, List Comprehensions, Nested List Comprehensions, the del statement, Tuples and Sequences, Sets, Dictionaries, Comparing Sequences and Other Types, Basic String Operations		

3.	Control Structures and Functions	04 Hours	13%
	Conditional Branching: if Statements, break and continue Statements, and else Clauses on Loops, pass Statements Loops: while Loops, for Loops, Defining Functions, More on Defining Functions: Default Argument Values, Keyword Arguments, Arbitrary Argument Lists, Unpacking Argument Lists, Lambda Expressions, Documentation Strings, Function Annotations		
4.	Modules and Scoping Rules	02 Hours	07%
	Executing modules as scripts, The Module Search Path, “Compiled” Python files, Packages: Importing * From a Package, Intra-package References, Packages in Multiple Directories		
5.	Exception Handling	04 Hours	13%
	Syntax Errors, Exceptions, Handling Exceptions, Raising Exceptions, User-defined Exceptions, Defining Clean-up Actions, Predefined Clean-up Actions		
6.	Magic Methods, Properties and Iterators	04 Hours	13%
	Constructors, Item Access: The Basic Sequence and Mapping Protocol, Properties: The property Function, Static Methods and Class Methods, <code>getattr</code> , <code>setattr</code> , and Friends, Iterators, Generators, Generator Expressions		
7.	Object Oriented Programming	06 Hours	20%
	Python Scopes and Namespaces, Class Definition, Class Objects, Instance Objects, Method Objects, Class and Instance Variables, Inheritance, Multiple Inheritance, Private Variables, Polymorphism, Using Properties to Control Attribute Access, Creating Complete Fully Integrated Data Types		
8.	Regular Expression and File Handling	04 Hours	14%
	What is a regular expression?, Regular expressions with special characters, Regular expressions and raw strings, Extracting matched text from strings, Substituting text with regular expressions, Writing and Reading Binary Data, Writing and Parsing Text Files, Iterating over File Contents, Writing and Parsing XML Files, Random Access Binary Files		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Interpret the fundamental python syntax, semantics and fluent in the use of python control flow statements. Express proficiency in the handling of strings and functions.
CO2	Determine the methods to create and manipulate python programs by utilizing the data structures like lists, dictionaries, tuples and sets.
CO3	Identify the commonly used operations involving file systems and regular expressions.
CO4	Articulate the Object-Oriented Programming concepts such as encapsulation, inheritance and polymorphism as used in Python along with magic methods.

Course Articulation Matrix:

CE255: SOFTWARE GROUP PROJECT-II

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	0	4	-	4	2
Marks	0	100	-	100	

Pre-requisite courses:

- Programming Language, Software Engineering.

Outline of the Course:

- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Students will work together in a team (at most three) with any programming language.
- Students are required to get approval of project definition from the department.
- After approval of project definition students are required to report their project work on weekly basis to the respective internal guide.
- Project will be evaluated at least once per week in laboratory Hours during the semester and final submission will be taken at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as a solution of particular problem by applying principles of Software Engineering.
- Students have to submit project with following listed documents at the time of final submission.
 - d. Final Project Report
 - e. Project Setup file with Source code
 - f. Project Presentation (PPT)
- A student has to produce some useful outcome by conducting experiments or project work.

Total hours (Theory) : 00

Total hours (Lab) : 30

Total hours : 30

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Identify problems present in society by surveying variety of domains and convert in project definition.
CO2	Explore new ideas and techniques to solve it. Create, select and apply appropriate techniques, resources, modern engineering and IT tools to solve problem.
CO3	Correlate knowledge of different subjects and apply theoretical knowledge to implement project for identified problem.
CO4	Apply ethical principles and commit to responsibilities and norms of the project.
CO5	Write technical report and deliver presentation by applying different visualization tools and evaluation metrics.
CO6	Apply engineering and management principles to achieve project goal.

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	--	02/01	--	30/15	2
Marks	--	100	--	100	

Pre-requisite courses:

- ☐ Ethical Leadership through Giving Voice to Values
<https://www.coursera.org/learn/uva-darden-giving-voice-to-values?skipBrowseRedirect=true>

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Introduction to Values and Ethics	05
2.	Elements and Principles of Values	08
3.	Applied Ethics	08
4.	Value, Ethics & Global Issues	05
5.	Contemporary Issues in Values and Ethics	04
	Total hours (Theory):	--
	Total hours (Practical):	30
	Total hours (Lab) :	--
	Total hours :	30

Detailed Syllabus:

1.	Introduction to Values and Ethics	5 Hours	17%
	Need, Relevance and Significance of Values General, Concept and Meaning of Values and Ethics		
2.	Elements and Principles of Values	8 Hours	26%
	Universal & Personal Values, Social, Civic & Democratic Value		
3.	Applied Ethics	8 Hours	26%
	Universal Code of Ethics, Professional Ethics, Organizational Ethics, Ethical Leadership, Domain Specific Ethics		
4.	Value, Ethics & Global Issues	5 Hours	17%
	Cross-Cultural Issues, Role of Ethics & Values in Sustainability		
5.	Contemporary Issues in Values and Ethics	4 Hours	14%

	Case Studies, Presentations, Projects		
--	---------------------------------------	--	--

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand the concepts and mechanics of values and ethics.
CO2	Understand the significance of value and ethical inputs in and get motivated to apply them in their life and profession.
CO3	Understand the significance of value and ethical inputs in and get motivated to apply them in social, global and civic issues.
CO4	Develop their responsibility towards society.
CO5	Comprehend their own core values and adhere to those values at their workplace.
CO6	Practice Ethical Leadership.

7.	Expert Systems and Optimization Techniques and AI & ML Tools	04

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

Detailed Syllabus:

- | | |
|--|-------------------------|
| 1. Introduction to AI | 10 Hours 20 % |
| <p>What is AI, Applications of AI, characteristics, advantages and disadvantages.</p> <p>Problems, Problems Space and Search, Heuristic Search Techniques</p> <p>Defining The Problems as a State Space Search, Production Systems, Problem Characteristics, Production System Characteristics, Issues In The Design Of Search Programs,</p> <p>Heuristic Search Techniques:</p> <p>Hill Climbing, A*, AO*, Simulated Annealing, Branch and Bound, Nearest Neighbour, Blind Search Techniques: DFS, BFS, Best First Search, Control Strategies.</p> | |
| 2 Logic and Programming Languages in AI | 05 Hours 15 % |
| <p>Logic:</p> <p>Propositional Logic, Predicate Logic and Fuzzy Logic, Monotonic and non-Monotonic</p> <p>Programming Languages:</p> <p>Introduction to Prolog: Syntax & Numeric Function, Basic List Manipulation Functions In Prolog, Functions, Predicates & Conditional, Input, Output & Local Variables, Iteration & Recursion, Property Lists & Arrays. GUI Version of Prolog.</p> <p>Python Programming: Syntax, Data Type, Libraries</p> <p>: NumPy, Numba, NumExpr, SciPy, AstroPy, Pandas, SymPy, Matplotlib, Jupyter, Ipython</p> | |
| 3. Knowledge Representation | 04Hours 10 % |
| <p>Knowledge Representation:</p> <p>Knowledge Representations And Mappings, Approaches To Knowledge Representation.</p> <p>Representing Knowledge using Rules</p> <p>Procedural Versus Declarative Knowledge, Logic Programming,</p> | |

Forward Versus Backward Reasoning.

4 Reasoning 06Hours 10 %

Symbolic Reasoning Under Uncertainty and Statistical Reasoning:

Introduction To Non-monotonic Reasoning, Logics For Nonmonotonic Reasoning

Statistical Reasoning

Probability And Bays' Theorem, Certainty Factors And Rule-Base Systems, Bayesian Networks, Dempster-Shafer Theory

5. Weak Slot-And-Filler Structure and Game Playing and Planning 10 Hours 20 %

Weak Slot-And-Filler Structure:

Semantic Nets, Frames, Ontology, OWL, Reasoner

Game Playing and Planning:

Introduction: Games as Search Problems, Perfect Decisions in Two-Person Games, Imperfect Decisions, Alpha-Beta Pruning, Games That Include anElement of Chance, State-of-the-Art Game Programs : Chess, Checkers or Draughts, Othello, Backgammon, Go

The Blocks World, Components Of A Planning System, Goal Stack Planning, Nonlinear Planning Using Constraint Posting, Hierarchical Planning, Reactive Systems.

6. NLP and Text Analytics and Neural Networks 06 Hours 15 %

NLP and Text Analytics:

Introduction, Syntactic Processing, Semantic Analysis, Semantic Analysis, Discourse And Pragmatic Processing, Text Analytics, Text pre-processing, Bag of Words, Word Cloud, Machine Translation, sentiment analysis

Neural Networks

Introduction: Simple Perceptron, Hopfield Network, Learning In Neural Network, Application Of Neural Networks, Recurrent Networks, Deep Neural Network, Convolution Network, Restricted Boltzmann machine, Transfer learning

7. Expert Systems and Optimization Techniques and AI & ML 04 Hours 10 %
Tools

Expert Systems:

An Introduction To Expert System, Explanation Facilities, Expert System Developments Process, Knowledge Acquisition.

Optimization Techniques and AI & ML Tools:

Genetic Algorithm (GA), Ant Colony Optimization (ACO),
 Particle Swarm Optimization(PSO), Honey Bee
 AI , Machine Learning and Data Analytics Tools

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand the various searching techniques, constraint satisfaction problem and example problems- game playing techniques.
CO2	Apply these techniques in applications, which involve perception, reasoning and learning.
CO3	Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations.
CO4	Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.
CO5	Demonstrate proficiency-developing applications in an 'AI language', expert system shell, or data-mining tool.
CO6	Demonstrate an ability to share in discussions of AI, its current scope and limitations, and societal implications.

Course Articulation Matrix:

1.	Introduction	02
2.	Process Management	04
3.	Inter process Communication	08
4.	Deadlock	06
5.	Memory Management	08
6.	Input Output Management	07
7.	File Systems	06
8.	Unix/Linux File System	04

Total hours (Theory): 45

Total hours (Lab): 30

Total hours: 75

Detailed Syllabus:

1. Introduction	02 Hours	05%
1.1 What is an OS? Evolution of OS		
1.2 OS Services		
1.3 Types of OS		
1.4 Concepts of OS		
1.5 Different Views Of OS		
2. Process Management	04 Hours	08%
2.1 Process, Process Control Block, Process States,		
2.2 Threads, Types of Threads and Dispatching, Concurrent Threads		
3. Inter process Communication	08 Hours	15%
3.1 Race Conditions, Critical Section, Co-operating Thread/Mutual Exclusion		
3.2 Hardware Solution, Strict Alternation, Peterson's Solution		
3.3 The Producer Consumer Problem, Semaphores, Event Counters, Monitors		
3.4 Message Passing and Classical IPC Problems: Reader's & Writer Problem, Dining Philosopher Problem.		
4. Deadlock	06 Hours	15%
4.1 Deadlock Problem, Deadlock Characterization		
4.2 Deadlock Detection, Deadlock recovery		
4.3 Deadlock avoidance: Banker's algorithm for single & multiple resources		
4.4 Deadlock Prevention.		
4.5 CPU Scheduling, Protection: Address space, Address Translation		
5. Memory Management	08 Hours	18%
5.1 Paging: Principle of Operation, Page Allocation, H/W Support For Paging		
5.2 Multiprogramming with Fixed partitions		
5.3 Segmentation		
5.4 Swapping		
5.5 Virtual Memory: Concept, Performance Of Demand Paging, Page Replacement Algorithms, Thrashing and Working Sets		
6. Input Output Management	07 Hours	14%
6.1 I/O Devices, Device Controllers, Direct Memory Access		

6.2 Principles of Input/output S/W: Goals of The I/O S/W, Interrupt Handler, Device Driver, Device Independent

6.3 I/O Software Disks: RAID levels, Disks Arm Scheduling Algorithm, Error Handling.

7. File Systems

06 Hours 15%

7.1 File Naming, File Structure, File Types, File Access, File Attributes, File Operations, Memory Mapped Files

7.2 Directories: Hierarchical Directory System, Pathnames, Directory Operations,

7.3 File System Implementation, Contiguous Allocation, Linked List Allocation, Linked List Using Index, Inodes

8. Unix/Linux File System

04 Hours 10%

8.1 Buffer Cache, Inodes, The system calls: malloc, free, namei, alloc and free

8.2 Mounting and Unmounting, file systems, Network File systems

8.3 EXT file system in Linux

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Visualize and understand Operating system functionality and working of OS. Understanding of functionality, services of operating system and differentiate between different types of OS.
CO2	Define thread and process. Visualize how processes and threads are managed by the operating systems. Simulate and analyze various process scheduling algorithms. Explain and analyze different Inter process communication techniques
CO3	Describe deadlock and classify detection, recovery, prevention and avoidance algorithms. Test scenarios to report deadlock
CO4	Compare and evaluate various memory management schemes. Simulate and analyze Memory management algorithms. Identify and describe the role of I/O devices.
CO5	Understand the file systems. Understand the secondary storage and simulate disk scheduling algorithm.
CO6	Understand the basic commands of Linux file systems

8.	String Matching and Introduction to NP- Completeness	05

Total hours (Theory): 45

Total hours (Lab): 30

Total hours: 75

Detailed Syllabus:

- | | | |
|--|-----------------|-------------|
| 1. Basics of Algorithms and Mathematics | 03 Hours | 05 % |
| 1.1 What is an algorithm? | | |
| 1.2 Performance Analysis, Model for Analysis - Random Access Machine (RAM), Primitive Operations | | |
| 1.3 Time Complexity and Space Complexity | | |
| 2. Analysis of Algorithm | 06 Hours | 14 % |
| 2.1 The efficiency of algorithm, average and worst case analysis, elementary operation | | |
| 2.2 Asymptotic Notation | | |
| 2.3 Analyzing control statement | | |
| 2.4 Analyzing Algorithm using Barometer | | |
| 2.5 Solving recurrence Equation | | |
| 2.6 Sorting Algorithm | | |
| 3. Greedy Algorithm | 07 Hours | 16 % |
| 3.1 General Characteristics of greedy algorithms | | |
| 3.2 Problem solving using Greedy algorithm | | |
| 3.3 Making change problem | | |
| 3.4 Graphs: Minimum Spanning trees (Kruskal's algorithm, Prim's algorithm) | | |
| 3.5 Graphs: Shortest paths; The Knapsack Problem; Job Scheduling Problem | | |
| 4. Divide and Conquer Algorithm | 07 Hours | 16 % |
| 4.1 Multiplying large Integers Problem | | |
| 4.2 Binary Search | | |
| 4.3 Sorting (Merge Sort, Quick Sort) | | |
| 4.4 Matrix Multiplication | | |
| 4.5 Exponential | | |

5. Dynamic Programming **08 Hours** **18 %**

- 5.1 Introduction, The Principle of Optimality
- 5.2 Problem Solving using Dynamic Programming – Calculating the Binomial Coefficient
- 5.3 Making Change Problem
- 5.4 Assembly Line-Scheduling
- 5.4 Knapsack Problem
- 5.5 Shortest Path
- 5.6 Matrix Chain Multiplication
- 5.7 Longest Common Subsequence

6. Exploring Graphs & Backtracking **04 Hours** **09 %**

- 6.1 An introduction using graphs and games,
- 6.2 Traversing Trees – Preconditioning Depth First Search- Undirected Graph; Directed Graph, Breath First Search, Applications of BFS & DFS

7. Backtracking & Branch & Bound **05 Hours** **12%**

- 7.1 Backtracking –The Knapsack Problem; The Eight queens problem, General Template
- 7.2 Brach and Bound –The Assignment Problem; The Knapsack Problem, The min-max principle

8. String Matching and Introduction to NP-Completeness **05 Hours** **10%**

- 8.1 The naïve string matching algorithm
- 8.2 The Rabin-Karp algorithm
- 8.3 The class P and NP Problems
- 8.4 Polynomial reduction
- 8.5 NP- Completeness Problem
- 8.6 NP-Hard problems

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Analyze the asymptotic performance of algorithms.
CO2	Derive time and space complexity of different sorting algorithms and compare them to choose application specific efficient algorithm.

CO3	Understand and analyze the problem to apply design technique from divide and conquer, dynamic programming, backtracking, branch and bound techniques and understand how the choice of algorithm design methods impact the performance of programs.
CO4	Understand and apply various graph algorithms for finding shortest path and minimum spanning tree.
CO5	Synthesize efficient algorithms in common engineering design situations.
CO6	Understand the notations of P, NP, NP-Complete and NP-Hard.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	2	1	-	-	-	-	-	-	-	-	-	-	1	-
CO2	2	2	-	-	-	-	-	-	-	-	-	2	2	-
CO3	3	3	3	3	2	-	-	-	-	-	-	2	2	-
CO4	2	3	3	1	-	-	-	-	-	-	-	-	2	-
CO5	1	-	1	-	-	-	-	-	-	-	-	2	1	1
CO6	3	1	-	-	-	-	-	-	-	-	-	-	1	-

Enter correlation levels 1, 2 or 3 as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) If there is no correlation, put “-”

Recommended Study Material:

❖ Text Books:

1. Introduction to Algorithms by Thomas H. Cormen, Charles E. Leiserson, Ronald Rivest and Clifford Stein, MIT Press

❖ Reference Books:

1. Fundamental of Algorithms by Gills Brassard, Paul Bratley, Pentice Hall of India.
2. Fundamental of Computer Algorithms by Ellis Horowitz, Sartazsahni and sanguthevar Rajasekarm, Computer Sci.P.
3. Design & Analysis of Algorithms by P H Dave & H B Dave, Pearson Education.

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
FACULTY OF TECHNOLOGY&ENGINEERING
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING
CS352: COMPUTER NETWORKS

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	-	5	4
Marks	100	50	-	150	

Pre-requisite courses:

- Introduction to computer and computer architecture.

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Introduction to Computer Networks	04
2	Data Link Layer	08
3	Medium Access Control Sub Layer	10
4	Network Layer	12
5	Transport Layer	08
6	Application Layer	03

Total hours (Theory): 45

Total hours (Lab): 30

Total hours: 75

Detailed Syllabus:

1	Introduction to Computer Networks	04 Hours	09%
1.1	Uses of computer network, brief on Internet, applications and recent trends on computer networks		
1.2	Network hardware, network software		
1.3	OSI model, TCP/IP model, Comparison of OSI and TCP/IP model		
1.4	Example network		
2	Data Link Layer	08 Hours	18%
2.1	Design Issues		
2.2	framing, error control, flow control		
2.3	Error detection and correction		
2.4	Elementary data link protocols		
2.5	simplex, stop and wait, sliding window protocol, HDLC		
3	Medium Access Control Sub Layer	10 Hours	22%
3.1	The channel allocation problem, Multiple Access protocols: ALOHA, CSMA, Collision Free Protocols,		
3.2	Limited Contention Protocols, Wavelength Division Multiple Access Protocols		
3.3	Wireless LAN protocols; Ethernet: Traditional Ethernet, Switched Ethernet, Fast Ethernet, Gigabit Ethernet, IEEE 802.2: LLC, Data link layer switching		
4	Network Layer	12 Hours	27%
4.1	Implementation of connection oriented and connection less service, Comparison of virtual circuit and datagram subnets, Routing algorithms		
4.2	Shortest path routing, Flooding, Distance vector routing, Link state routing, Hierarchical routing, Broadcast routing, Multicast routing, Routing for mobile host		
4.3	Routing in ad hoc network, Congestion control algorithms principles, Prevention policies		
4.4	Congestion control in virtual circuit subnets, Congestion control in		

- datagram subnets, Load shedding,
- 4.5 Virtual circuit, Connectionless internetworking, Tunneling,
Internetwork routing and fragmentation
- 4.6 The network layer in the internet: The IP protocol, discuss IPv4 & IPv6, IP addresses
- 4.7 Internet control protocol, OSPF, BGP
- 5 Transport Layer 08 Hours 18%**
- 5.1 The transport service: Services provided to the upperlayers
- 5.2 Transport service primitives, Socket elements of transport protocols
addressing
- 5.3 Connection establishment, Connection release, Flow control
- 5.4 Multiplexing, Crash recovery the transport protocol: UDP,TCP,
comparative study on TCP and UDP
- 6 Application Layer 03 Hours 06%**
- 6.1 DNS: The DNS name space, Resource records, Nameservers
- 6.2 Electronic mail: Architecture and services
- 6.3 World Wide Web: Architectural overview, HTTP, web services

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Analyze layered network architecture and passage of data over communication links
CO2	Analyze delay models in Data Networks using Queueing Systems for messaging and delay sensitive applications
CO3	Design and analyze routing algorithms for Internet and multi-hop autonomous networks
CO4	Analyze flow and rate control algorithms between a sender and receiver in wide area networks
CO5	Apply the network fundamentals to analyze performance.
CO6	Use key networking algorithms in simulation.

Course Articulation Matrix:

	PO01	PO02	PO03	PO04	PO05	PO06	PO07	PO08	PO09	PO10	PO11	PO12	PSO1	PSO2

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
FACULTY OF TECHNOLOGY&ENGINEERING
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

CS376: ADVANCED JAVA PROGRAMMING (PE-I)

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	2	4	-	6	4
Marks	100	100	-	200	

Pre-requisite courses:

- Java Programming.

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of Hours
1.	JDBC Programming	05
2.	Servlet	06
3.	Java Server Pages	05
4.	Java Server Faces 2.0	03
5.	Hibernate4.0	05
6.	JAVA web Frameworks: Spring MVC	06

Total Hours (Theory): 30

Total Hours (Lab): 60

Total Hours: 90

Detailed Syllabus:

1	JDBC Programming	05 Hours	16%
1.1	The JDBC Connectivity Model		
1.2	Database Programming: Connecting to the Database, Creating a SQL Query, Getting the Results, Updating Database Data		
1.3	Error Checking and the SQLException Class, The SQLWarning Class		
1.4	The Statement Interface, The ResultSet Interface, Updatable Result Sets		
1.5	Executing SQL Queries, ResultSetMetaData, Executing SQL Updates, Transaction Management.		
2	Servlet	06 Hours	20%
2.1	Servlet Model: Overview of Servlet, Servlet Life Cycle, HTTP Methods		
2.2	Structure and Deployment descriptor		
2.3	ServletContext and ServletConfig interface, Attributes in Servlet, Request Dispatcher interface.		
2.4	The Filter API: Filter, FilterChain, Filter Config.		
2.5	Cookies and Session Management: Understanding state and session, Understanding Session Timeout and Session Tracking, URL Rewriting.		
3	Java Server Pages	05 Hours	17%
3.1	JSP Overview: The Problem with Servlets, Life Cycle of JSP Page, JSP Processing, JSP Application Design with MVC, Setting Up the JSP Environment		
3.2	JSP Directives, JSP Action, JSP Implicit Objects		
3.3	JSP Form Processing, JSP Session and Cookies Handling, JSP Session Tracking		
3.4	JSP Database Access, JSP Standard Tag Libraries, JSP Custom Tag, JSP Expression Language, JSP Exception Handling, JSP XML Processing.		
4	Java Server Faces2.0	03 Hours	10%

- 4.1 Introduction to JSF, JSF request processing Life cycle, JSF Expression Language
- 4.2 JSF Standard Component, JSF Facelets Tag, JSF Converter Tag, JSF Validation Tag
- 4.3 JSF Event Handling and Database Access, JSF Libraries: PrimeFaces

5 Hibernate

05 Hours 17%

- 5.1 Overview of Hibernate, Hibernate Architecture
- 5.2 Hibernate Mapping Types, Hibernate O/R Mapping, and Hibernate Annotation.
- 5.3 Hibernate Query Language

6 Java Web Frameworks: Spring MVC

06 Hours 20%

- 6.1 Overview of Spring, Spring Architecture, bean life cycle,
- 6.2 XML Configuration on Spring, Aspect – oriented Spring
- 6.3 Managing Database, Managing Transaction

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Illustrate database access and details for managing information using the JDBC API
CO2	Design to map java classes and object associations to relational database tables with hibernate framework.
CO3	Demonstrate web application lifecycle using servlet, and JSP.
CO4	Identify the user interface control and build custom tag library using JSF
CO5	Develop real-world applications using java frameworks and understands about MVC architecture with its application.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	1	2	2	1	2	-	-	-	-	-	-	-	1	-
CO2	3	2	3	1	3	-	-	-	-	-	-	-	2	-
CO3	2	2	2	2	3	-	-	-	-	-	-	-	-	-

CO4	1	2	2	1	3	-	-	-	-	-	-	-	1	-
CO5	2	3	3	2	3	-	-	-	-	-	-	-	3	1

Enter correlation levels 1, 2 or 3 as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High) If

there is no correlation, put “-”

Recommended Study Material:

❖ Text Books:

1. SCWCD, Matthew Scarpino, Hanumant Deshmukh, Jignesh Malavie, Manning publication
2. Hibernate 2nd edition, Jeff Linwood and Dave Minter, Beginning Après publication
3. Java Persistence with MyBatis 3, K. Siva Prasad Reddy, PACKT publication
4. Spring in Action 3rd edition, Craig walls, Manning Publication
5. Java Server Faces in Action, Kito D. Mann, Manning Publication

❖ Reference Books:

1. JDBC™ API Tutorial and Reference, Third Edition, Maydene Fisher, Jon Ellis, Jonathan Bruce, Addison Wesley
2. Beginning JSP, JSF and Tomcat, Giulio Zambon, Apress
3. JSF2.0 CookBook, Anghel Leonard, PACKT publication

CS377: MOBILE APPLICATION DEVELOPMENTS (PE-I)

Credits and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	2	4	6	4
Marks	100	100	200	

Pre-requisite courses:

- Basic Design concept with XML, Database management system.

Outline of the Course:

Sr. No.	Title of the unit	Minimum Number of Hours
1.	Getting an Overview of Android	2
2.	Working with the User Interface Using Views and View Groups	6
3.	Intents and Fragments in Android	4
4.	Database Connectivity	3
5.	Introduction to Xcode and InterfaceBuilder for iOS	3
6.	Model Development with Swift	6
7.	Intro to Scrollable Views, Tabs and Pages	3
8.	Displaying and Persisting Data	3

Total hours (Theory): 30Hrs.

Total hours (Lab): 60 Hrs.

Total hours: 90 Hrs.

Detailed Syllabus:

- | | | |
|---|-----------------|------------|
| 1. Getting an Overview of Android | 02 Hours | 08% |
| Android OS Architecture, Introducing Development Framework, Dalvik Virtual Machine – DVM, Android Virtual Device and SDK Manager, Developing and Executing the First Android Application, Android Activities- Creating an Activity, Managing the Lifecycle of an Activity, | | |
| 2. Working with the User Interface Using Views and ViewGroups | 06 Hours | 18% |
| Working with Views- Text, EditText, Button, Radio Button, CheckBox, ImageButton, ToggleButton, RatingBar, Working with View Groups- LinearLayout, RelativeLayout, ConstraintLayout, ScrollView, Table, Frame, Table with ActionBar, Binding Data with the AdapterView Class- ListView, Spinner, GalleryView, Creating Menus & Dialogs | | |
| 3. Intents and Fragments in Android | 04 Hours | 14% |
| Intent Objects, Intent Filters, Linking the Activities Using Intent, Obtaining Results from Intent, Passing Data Using an Intent Object, Fragments- Fragment Implementation, Finding Fragments, Adding, Removing, and Replacing Fragments | | |
| 4. Database Connectivity | 03 Hours | 09% |
| SQLite Database, SQLite Data Types, Cursors and Content Values, SQLite Open Helper, Adding, Updating and Deleting Content, XML & JSON Based Web Services, Firebase for Android, Firebase connectivity | | |
| 5. Introduction to Xcode and InterfaceBuilder for iOS | 03 Hours | 09% |
| Xcode Intro: Demo of a basic iOS App, StoryBoards, Source files & wiring them together, COCOA and MVC Framework, Overview of features of latest iOS. | | |
| 6 Model Development with Swift | 06 Hours | 18% |
| Swift language essentials: Data types, variables, constants, operators, Decision making statements, looping, arrays, dictionaries, functions, enumerations, structure, classes, inheritance, Simple connections to the User Interface | | |
| 7 Introduction to Scrollable Views, Tabs and Pages | 03 Hours | 14% |
| Frames and Bounds, Auto Layout, Views, Outlets and Actions, Different View Controller: single view Controller, Master-Detail View Controller, Navigation View Controller, UI Controllers: Label, | | |

Button, Text Field, Slider, Switch, Progress View, Page Control.

8 Displaying and Persisting Data

03 Hours 10%

Using the Table View, ScrollViews, Collection View, Image View, Text View, Web View, Map View, Date Picker. JSON parsing, XML Parsing in iOS.

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand various technologies and business trends impacting mobile applications
CO2	Apply a deep knowledge of mobile device, features, architecture and android functionality.
CO3	Analyse and implement frameworks, database and design patterns in Mobile Applications
CO4	Create a small but realistic working mobile application using features such as data persistence and data communications
CO5	Create a mobile application using the Swift programming language.

Course Articulation Matrix:

CS372: ADVANCED WEB TECHNOLOGY (PE-I)

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	2	4	-	6	4
Marks	100	100	-	200	

Pre-requisite courses:

- Basic Design concept with HTML, CSS.

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1	Web Server	01
2	Server Side Language (PHP)-Part1	08
3	Sever Side Language (Object Oriented PHP)- Part-2	06
4	MySQL	05
5	Reactive Programming	02
6	Design Pattern	02
7	PHP Web services	02
8	PHP Framework	04

Total Hours (Theory): 30

Total Hours (Lab): 60

Total Hours: 90

Detailed Syllabus:

- | | | |
|--|----------------|------------|
| 1 Web Server. | 01Hours | 3% |
| Introduction, Apache Web server, IIS6.0/7.0, WAMP, XAMPP | | |
| 2. Server Side Language (PHP) Part -1 | 08Hours | 27% |
| Embedded PHP in HTML, Adding Dynamic content, Accessing form variable, Understanding Identifier, Operator, Decision and loops, Function, Array and String manipulation, Preserving state with Query Strings, Session and cookies, Working with files and directories, Regular expression, Error and Exception handling | | |
| 3. Server Side Language (Object oriented PHP)-Part 2 | 06Hours | 21% |
| Key OOP concepts: Classes, Objects, Properties, Constant, Constructors and Destructors, Static Class Members. Advanced OOP concepts: Interface, Abstract Class, Object Cloning, Auto loading Class and Namespace, Magic Methods, Optimizing for High Performance | | |
| 4. MySQL | 05Hours | 18% |
| Introduction, Installation, Administration, PHP Syntax, Connection, Create Database, Drop Database, Select Database, Data Types, Create Tables, Drop Tables, Insert Query, Select Query, Where Clause, Update Query, Delete Query, Like Clause Sorting Results ,Using Join NULL Values , Transactions ,Alter Command Indexes ,Temporary Tables ,Clone Tables ,Database Info ,Using Sequences, Handling Duplicates, Database Export, Database Import, MySQL useful Function | | |
| 5. Reactive Programming | 02Hours | 06% |
| Similarities with event-driven programming, Using RxPHP, Installing RxPHP, Observable and observer ,Subject Operator, Writing custom operators , Non-blocking IO , Using React ,Installing React ,React event loop ,Observables and event loop | | |

6. Design Patterns**02Hours 06%**

Base patterns: The registry pattern

Creational patterns: The singleton pattern, The prototype pattern, The abstract factory pattern, The builder pattern, The object pool pattern, Behavioral patterns: The strategy pattern, The observer pattern, The lazy initialization pattern, The chain of responsibility pattern, Structural patterns: The decorator pattern

7. PHP Web service**02Hours 06%**

RPC and SOAP Services: RPC, SOAP: WSDL, PHP SOAP Client and Server. REST: RESTful URLs, HTTP Features in REST: Create Resources, Read Records, Update and Delete Records.

8. PHP Frameworks**04 Hours 13%**

Introduction for Laravel: Installation, Configuration and Directory structure. Architecture Concepts: Request Lifecycle, Service Container, Service Providers, Facades, Contracts Database: Getting Started, Query Builder, Pagination, Migrations Eloquent ORM: Getting Started, Relationships, Collections, Mutators

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	How to use Express JS framework with Node.js with real projects with request
CO2	Handle Form, session and cookies.
CO3	Render Client-side/Server-side website using template engine (Apply)
CO4	Create CRUD operations with MongoDB and Mongoose (Create)
CO5	Build a fast, scalable, feature-rich RESTful API (includes filters, sorts, pagination, and much more) (Create)
CO6	Build a complete, beautiful & real-world application from start to finish (API and server-side rendered website)

CS356: SOFTWARE GROUP PROJECT -III

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	0	2	-	2	2
Marks	0	100	-	100	

Outline of the Courses:

- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Students will work together in a team (at most **three**) with any programming language.
- Students are required to get approval of project definition from the department.
- After approval of project definition students are required to report their project work on weekly basis to the respective internal guide.
- Project will be evaluated at least once per week in laboratory hours during the semester and final submission will be taken at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as a solution of particular problem by applying principles of Software Engineering.
- Students have to submit project with following listed documents at the time of final submission.
 - a. Project Synopsis
 - b. Software Requirement Specification

- c. SPMP
- d. Final Project Report
- e. Project Setup file with Source code
- f. Project Presentation (PPT)
- A student has to produce some useful outcome by conducting experiments or project work.

Total hours (Theory): 00

Total hours (Lab): 30

Total hours: 30

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	An ability to function effectively in teams to accomplish a common goal.
CO2	An ability to apply knowledge of computing and engineering to evaluate project requirements.
CO3	An ability to design, implement and evaluate a computer-based system, process, component, or program to meet desired needs.
CO4	An ability to analyze the local and global impact of computing on individuals, organizations, and society.
CO5	Write technical report and deliver presentation by applying different visualization tools and evaluation metrics.
CO6	An ability to communicate effectively with end user.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CHAROTAR UNIVERSITY OF SCIENCE AND TECHNOLOGY
FACULTY OF TECHNOLOGY&ENGINEERING
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

CS343: SUMMER INTERNSHIP-I

Credits and Hours:

Teaching Scheme	Theory	Practical	Project	Total	Credit
Hours/week	0	0	-	90	3
Marks	0	0	-	150	

Instruction Method and Pedagogy:

- Summer internship shall be at least 90 hours during the summer vacation only.
- Department/Institute will help students to find an appropriate company/industry/organization for the summer internship.
- The student must fill up and get approved a Summer Internship Acceptance form by the company and provide it to the Coordinator of the department within the specified deadline.
- Students shall commence the internship after the approval of the department Coordinator. Summer internships in research centers is also allowed.
- During the entire period of internship, the student shall obey the rules and regulations of the company/industry/organization and also those of the University.
- Due to inevitable reasons, if the student will not able to attend the internship for few days with the permission of the supervisor, the department Coordinator should be informed via e-mail and these days should be compensated later.
- The student shall submit two documents to the Coordinator for the evaluation of the summer internship:
 - Summer Internship Report
 - Summer Internship Assessment Form
- Upon the completion of summer internship, a hard copy of “Summer Internship Report” must be submitted to the Coordinator by the first day of the new term.
- The report must outline the experience and observations gained through practical internship, in accordance with the required content and the format described in this

guideline. Each report will be evaluated by a faculty member of the department on a satisfactory/unsatisfactory basis at the beginning of the semester.

- If the evaluation of the report is unsatisfactory, it shall be returned to the student for revision and/or rewriting. If the revised report is still unsatisfactory the student shall be requested to repeat the summer internship.

Format of Summer Internship Report

The report shall comply with the summer internship program principles. Main headings are to be centered and written in capital boldface letters. Sub-titles shall be written in small letters and boldface. The typeface shall be Times New Roman font with 12pt. All the margins shall be 2.5cm. The report shall be submitted in printed form and filed. An electronic copy of the report shall be recorded in a CD and enclosed in the report. Each report shall be bound in a simple wire vinyl file and contain the following sections:

- Cover Page
- Page of Approval and Grading
- Abstract page: An abstract gives the essence of the report (usually less than one page). Abstract is written after the report is completed. It must contain the purpose and scope of internship, the actual work done in the plant, and conclusions arrived at.
- TABLE OF CONTENTS (with the corresponding page numbers)
- LIST OF FIGURES AND TABLES (with the corresponding page numbers)
- DESCRIPTION OF THE COMPANY: Summarize the work type, administrative structure, number of employees (how many engineers, under which division, etc.), etc. Provide information regarding
 - Location and spread of the company
 - Number of employees, engineers, technicians, administrators in the company
 - Divisions of the company
 - Your group and division
 - Administrative tree (if available)
 - Main functions of the company
 - Customer profile and market share
- INTRODUCTION: In this section, give the purpose of the summer internship, reasons for choosing the location and company, and general information regarding the nature of work you carried out.
- PROBLEM STATEMENT: What is the problem you are solving, and what are the reasons and causes of this problem.
- SOLUTION: In this section, describe what you did and what you observed during the

summer internship. It is very important that majority of what you write should be based on what you did and observed that truly belongs to the company/industry/organization.

- **CONCLUSIONS:** In the last section, summarize the summer internship activities. Present your observations, contributions and intellectual benefits. If this is your second summer internship, compare the first and second summer internships and your preferences.
- **REFERENCES:** List any source you have used in the document including books, articles and web sites in a consistent format.
- **APPENDICES:** If you have supplementary material (not appropriate for the main body of the report), you can place them here. These could be schematics, algorithms, drawings, etc. If the document is a datasheet and it can be easily accessed from the internet, then you can refer to it with the appropriate internet link and document number. In this manner you don't have to print it and waste tons of paper.

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Ability to integrate existing and new technical knowledge for industrial application.
CO2	Executing work with team and teammates from other disciplines
CO3	Get practices and experience related to professional and ethical issues in the work environment
CO4	Experience of demonstrating the impact of the internship on their learning and professional development.
CO5	Understanding of lifelong learning processes through critical reflection of internship experiences.

(HSS ELECTIVE-III)

Credits and Schemes

Sem	Course Code	Course Name	Credits	Teaching Scheme	Evaluation Scheme				
				Contact Hours/Week	Theory		Practical		Total
					Internal	External	Internal	External	
V	HS124.01 A	Professional Communication	02	02	--	--	30	70	100

Course Outline

Module No.	Title/Topic	Classroom Contact Sessions
1	An Introduction Professional Communication • <i>Concept & Applications of Professional Communication</i> • <i>Principles of Professional Communication</i> • <i>Communication networks: personal sanctum, professional sanctum, inner circle, and outer circle; managing the networks</i> • <i>Communication strategies: communicator, audience, message, channel choice, culture</i>	04
2	Professional Communication and Rhetorics • <i>Concepts of “Communication” and “Professional Communication” and “Rhetorics”</i> • <i>Orientation towards the Concepts of Professional Communication and Rhetorics (Speaking)</i> • <i>Importance of Ethos, Logos, and Pathos in Professional Communication</i> • <i>Principles of Professional Communication (visual, oral and non-verbal)</i>	04

3	Cross-cultural Communication and Globalization • <i>Basic Concepts: Culture, Globalization and Cross-cultural Communication</i> • <i>Communicating with People of Different Cultures</i> • <i>Conflicts in Cross-cultural Communication and Tactics / techniques to resolve them</i>	04
4	Written Professional Communication • <i>Importance of Written Professional Communication</i> • <i>Letter Writing, E-mail Writing, Report Writing</i> • <i>Resume Building</i>	06
5	Academic Writing • <i>Importance of Academic Writing</i> • <i>Research Paper Writing</i> • <i>Article/ Review Writing</i> • <i>Reference and Citation</i>	06
6	Effective Presentation Strategies • <i>Why and How in Presentation</i> • <i>Audience Analysis and Supporting Material</i> • <i>Presentation Mechanics and Presentation Process</i> • <i>Managing Yourself during Q and A Session</i> • <i>Fundamentals of Persuasions</i>	06
Total		30

Pedagogy

Teaching will be facilitated by reading material, discussions, task-based learning, projects, assignments and interpersonal activities like group work, independent and collaborative study projects and presentations, etc.

Evaluation

Internal Evaluation

Students' performance in the course will be evaluated on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Assignment	02	05	10
2	Project	01	15	15
3	Attendance			05
Total				30

External Evaluation

University Practical Examination will be for 70 marks to be conducted at the end of the semester. Details are:

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Practical / Viva	01	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	Gain basic conceptual understanding of communication skills in Professional settings
CO2	Develop awareness and competence in communicating across cultures in professional settings
CO3	Develop confidence and competence in speaking in formal interviews and to make formal presentations
CO4	Develop necessary soft skills to work collaboratively in a group and participate in a group Discussion for employment and in the workplace.
CO5	Develop team and group dynamics to work well in multi-disciplinary and cross-cultural work environment
CO6	Develop writing skills to prepare CV's, Resumes, Statement of Purpose and preparation of other formal documents.

CS344: MACHINE LEARNING

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	-	5	4
Marks	100	50	-	150	

Outline of the Course:

Sr. No.	Title of the unit	Minimum number of Hours
1.	Fundamental concepts and Statistical Learning Techniques	06
2.	Neural Networks	08
3.	Bayesian Learning	06
4.	Supervised and Unsupervised Learning	10
5.	Reinforcement learning	02
6.	Kernel Methods	03
7.	Deep Neural Networks	10

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

etailed Syllabus:

1 Fundamental concepts and Statistical Learning Techniques	06 hours	10%
Fundamental concepts: Introduction to Data science, Theory and practices in machine learning, Designing a Learning System, Issues in Machine Learning, Applications of ML, Global Developments of ML, Key challenges to adoption of ML in India.		
Statistical Learning Techniques: Descriptive statistics, Simple Linear Regression, ANOVA, Logistic Regression, Multi Linear regression, Correlation, Moving Average, Random Number Generation, Histogram Smoothing, Sampling, Regularization, Rank Percentile.		
2 Neural Networks	08 hours	20%
Neurons and biological motivation. Linear threshold units. Perceptrons: representational limitation and gradient descent training, Perceptron learning rule, Hebbian learning rule, Delta Learning rule, Multilayer networks and Backpropagation Learning Algorithm, Feed Forward, Activation Functioning, Types of Neural Network Architecture.		
3 Bayesian Learning	06 hours	15%
Bayes Theorem, Bayes Theorem and Concept Learning, Maximum Likelihood and Least Squared Error Hypothesis, Maximum likelihood hypothesis for Predicting probabilities, Minimum Description Length Principle, Bayes Optimal Classifier, Gibbs Algorithm, Naïve Bayes Classifier, Bayesian Belief Network, EM Algorithm.		
4 Supervised and Unsupervised Learning	10 hours	20%
Supervised Learning: Classification, Decision Tree, Naïve Bias, Support Vector Machine, Neural Network, K- Nearest Neighbour.		
Unsupervised Learning: Clustering, Nonparametric Methods, K-means, Hierarchical clustering, Density based clustering		
5 Reinforcement learning	02 hours	05%
Q Learning, Non deterministic rewards and Actions.		
6 Kernel Methods	03 hours	10%
Support Vector Machine, Sparse kernel machines, Bias-Variance trade-off. Regularization and model/feature selection, Sampling Methods.		
7 Deep Neural Networks	10 hours	20%

Introduction to Deep Learning, Deep Neural Network, Restricted Boltzmann machine, Convolution Neural Network, AutoEncoders, Deep Belief Network, Recurrent Neural Network, Transfer learning.

Course Outcome:

At the end of the course, the students will be able to

CO1	Apply basic concepts of Machine Learning and Understanding of standard learning algorithms.
CO2	Analyze mathematical modelling of various Machine Learning algorithms
CO3	Understanding challenges of machine learning like data characteristics, model selection, and model complexity
CO4	Identify strengths and weaknesses of machine learning techniques suitable for a given problem domain and data set.
CO5	Design and implement of various machine learning algorithms in a range of real-world applications.
CO6	Evaluate and interpret the results of learning algorithms.

| 6.2 Algorithms for the Discrete Logarithm Problem | | |
| 6.3 Lower Bounds on the Complexity of Generic Algorithms | | |
| 6.4 Finite Fields | | |
| 6.5 Elliptic Curves | | |

7. Signature Schemes	05 hours 11%
7.1 Introduction	
7.2 Security Requirements for Signature Schemes	
7.3 The ElGamal Signature Scheme	
7.4 Variants of the ElGamal Signature Scheme	
8. Pseudo-Random Number Generation	03 hours 07%
8.1 Introduction and Examples	
8.2 The Blum-Blum-Shub Generator	
8.3 Probabilistic Encryption	
9. Key Distribution & Key Agreement Schemes	05 hours 11%
9.1 Introduction	
9.2 Diffie-Hellman Key Predistribution	
9.3 Key Distribution Patterns	
9.4 Session Key Distribution Schemes	
9.5 Diffie-Hellman Key Agreement	
9.6 Key Agreement Using Self-Certifying Keys	
9.7 Encrypted Key Exchange	
10. Public-Key Infrastructure&Multicast Security	05 hours 11%
10.1 Introduction: What is a PKI?	
10.2 Certificates	
10.3 The Future of PKI?	
10.4 Identity-Based Cryptography	
10.5 Introduction to Multicast Security	
10.6 Broadcast Encryption	
10.7 Multicast Re-Keying	

Course Outcome:

After completion of the course students will be able to

CO1	Define various security goal and understand the security policies such as the CIA triad of Confidentiality, Integrity and Availability.
CO2	Classify various forms of security attacks, where they arise, and appropriate tools or mechanism to quantify them.
CO3	Illustrate a basic understanding of cryptography, how it has evolved, and evaluate symmetric key encryption techniques used today.
CO4	Distinguish modern symmetric encryption standard, key distribution scenario and analyze effectiveness in today's environment.
CO5	Evaluate Asymmetric key encryption techniques, key distribution scenario and calculate public and private components of asymmetric key encryption techniques.
CO6	Develop message integrity and message authentication of message digest.

Outline of the Course:

Sr. No.	Title of the unit	Minimum Number of Hours
1	Introduction	02
2	Mathematical Terms and Theory	08
3	Regular Grammar & Languages, Regular Expression, Finite Automata	22
4	Context Free Grammar & Languages, Push down Automata	18
5	Turing Machine, Recursively Enumerable Languages	08
6	Tractable and Intractable Problems	02

Total Hours (Theory): 45

Total Hours (Lab): 00

Total Hours: 45

Detailed Syllabus:

1.	Mathematical Terms and Theory	08 Hours	14 %
	Alphabets, Strings, Languages, State, Graphs and Trees Concept of Basic machine. Finite State machine Concept of Moore and Mealy FSM, Conversion of Moore to Mealy and Mealy to Moore FSM. FSM with Epsilon moves Minimization of FSM.		
3.	Regular Expression	22 Hours	36 %
	Building RE. Conversion of DFA to RE and RE to DFA Properties of regular sets Decision algorithms for regular sets.		
4.	Grammars	18 Hours	30 %
	Ambiguous grammar, Removal of ambiguity Reduced form grammar - Removal of unit productions, Epsilon productions, Useless symbols, Chomsky hierarchy Context Free Grammars Regular Grammar -Left linear and right linear regular grammar, I Interconversion between left linear and right linear grammar Construction of regular grammar from DFA, Construction of FA from regular grammar Context Free Languages		
5.	Pushdown Stack Memory Machines	08 Hours	14 %
	Power of PDM Deterministic and Non-deterministic PDM Construction of PDA from CFG, Construction of CFG from PDA Production Systems		
6.	Turing Machine	02 Hours	03 %
	Power of TM over FSM PDM and PM Design of TM, Universal TM, TM limitations, Halting problem, Undecidability		

Course Outcome:

After completion of the course, Students will be able to:

CO1	Apply basic concepts of theory of computation in the computer field in order to solve computational problems.
CO2	Construct algorithms for different problems and argue formally about correctness on different restricted machine models of computation.
CO3	Analyze and design finite automata, pushdown automata and Turing machine for formal languages.
CO4	Apply rigorously formal mathematical methods to prove properties of languages, grammars and automata.
CO5	Identify limitations of some computational models and possible solutions.
CO6	Design context free grammars for formal languages.

4	Requirement Analysis and Specification	04 Hours	9%
4.1	Understanding the Requirement		
4.2	Requirement Modeling		
4.3	Requirement Specification (SRS)		
4.4	Requirement Analysis and Requirement Elicitation		
4.5	Requirement Engineering		
5	Software Design	05 Hours	11%
5.1	Design Concepts and Design Principal		
5.2	Architectural Design		
5.3	Process and Component Level Design (Function Oriented Design, Object Oriented Design-UML)		

	(MS Visio Tool)		
5.4	User Interface Design		
5.5	Web Application Design, Design Patterns		
6.	Software Coding & Testing	06 Hours	13%
6.1	Coding Standard and Coding Guidelines		
6.2	Code Review		
6.3	Software Documentation		
6.4	Testing Strategies		
6.5	Testing Techniques and Test Case, Test Suites Design		
6.6	Testing Conventional Applications		
6.7	Testing Object-Oriented Applications		
6.8	Testing Web and Mobile Applications, Testing Tools (Win runner, Load runner)		
7	Quality Assurance and Management	05 Hours	11%
7.1	Quality Concepts and Software Quality Assurance		
7.2	Software Reviews (Formal Technical Reviews)		
7.3	Software Reliability		
7.4	The Quality Standards: ISO 9000, CMM, Six Sigma for SE.		
7.5	SQA Plan		
8	Software Maintenance and Configuration Management	05 Hours	11%
8.1	Types of Software Maintenance, Re-Engineering, Reverse Engineering, Forward Engineering		
8.1	The SCM Process, Identification of Objects in the Software Configuration		
8.2	Version Control and Change Control		
9.	Introduction to SaaS and SOA	03 Hours	7%
9.1	Product Lifetime: Independent Product Vs. Continuous Improvement		
9.2	Software as a Service		
9.3	Service Oriented Architecture		
9.4	Cloud Computing		
9.5	SaaS Architecture		
10	Advanced Topics in Software Engineering	04 Hours	9%

- 10.1 Component-Based Software Engineering, Client/Server Software Engineering, Web Engineering, Reengineering, Computer-Aided Software Engineering, Real-Time Software Engineering
- 10.2 Software Process Improvement
- 10.3 Design Thinking

Course Outcome:

After completion of the course students will be able to

CO1	Understand basics about software engineering principles, methods and practices and to analyze software requirement specification Prepare, SRS (Software Requirement Specification) document and SPMP (Software Project Management Plan) document.
CO2	Apply the concept of Functional Oriented and Object-Oriented Approach for Software Design, To explain the software design strategies and to apply software measurement and metrics using Function point, Cyclomatic complexity and Heald's software science measures.
CO3	Recognize how to ensure the quality of software product, different quality standards and software review techniques.
CO4	Formulate problem by following Software Testing Life Cycle. Apply various testing techniques and test plan in. Design Manual Test cases for Software Project. Use automation testing tool students will be able to test the software.
CO5	Able to understand modern Agile Development and Service Oriented Architecture Concept of Industry.
CO6	Analyze software risk with estimation parameters such as cost, effort, schedule/duration and understand the concepts of software maintenance, reengineering, reverse engineering, software configuration management.

Course Articulation Matrix:

CS378: VIRTUAL & AUGMENTED REALITY (PE-II)

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	-	5	4
Marks	100	50	-	150	

Pre-requisite courses:

- ☐ Introduction to Computer Programming

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1.	Introduction of Virtual Reality (VR) and Augmented Reality (AR)	4
2.	Multiple Modals of Input and Output Interface in Augmented Reality	4
3.	Geometry of Virtual Worlds	4
4.	Light and Optics	4
5.	Visual Physiology and Perception	5
6.	Tracking System	4
7.	Interactive Techniques in Augmented Reality	4
8.	Introduction of Immersive VR Hardware	4
9.	Development Tools and Frameworks in Virtual Reality	4
10.	Application of AR/VR	4
11.	Discussion over research paper in Area of VR/AR	4

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

Detailed Syllabus:

- | | | | |
|----------|---|-----------------|------------|
| 1 | Introduction of Augmented reality | 04 hours | 09% |
| 1.1 | Fundamental Concept and Components of AR/VR | | |

- 1.2 Primary Features and Present Development on AR/VR
- 1.3 Birds-eye view (general), Birds-eye view (hardware)
- 1.4 Birds-eye view (software), Birds-eye view (sensation and perception)
- 2 Multiple Modals of Input and Output Interface in Augmented Reality 04 hours 09%**
- 2.1 Input -- Tracker, Sensor, Digital Glove, Movement Capture
- 2.2 Input --Video-based Input, 3D Menus & 3DScanner
- 2.3 Output -- Visual / Auditory / Haptic Devices
- 3 Geometry of Virtual Worlds 04 hours 09%**
- 3.1 Geometric modeling, Transforming models
- 3.2 Matrix algebra and 2D rotations
- 3.3 3D rotations and yaw, pitch, and roll
- 3.4 Axis-angle representations, Quaternions
- 3.5 Converting and multiplying rotations, Homogeneous transforms
- 3.6 The chain of viewing transforms, Eye transforms
- 4 Light and Optics 04 hours 09%**
- 4.1 Three interpretations of light
- 4.2 Refraction, Simple lenses
- 4.3 Diopters, Imaging properties of lenses
- 4.4 Lens aberrations
- 4.5 Optical system of eyes

Course Outcome:

After completion of the course students will be able to

CO1	Describe how AR/VR systems work and list the applications of AR/VR.
CO2	Understand the design and implementation of the hardware that enables AR/VR systems to be built.
CO3	Understand the system of human vision and its implication on perception and rendering
CO4	Explain the concepts of motion and tracking in VR system
CO5	Describe the importance of interaction and audio in VR systems.
CO6	Develop the creativity and designing skill in 3D development.

Course Articulation Matrix:

CS379: WIRELESS COMMUNICATION AND MOBILE COMPUTING (PE-II)

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	3	2	5	4
Marks	100	50	150	

Pre-requisite courses:

- Computer Networks
- Modern Networks

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1.	Wireless Communication Fundamentals	03
2.	Telecommunication Systems	12
3.	Wireless LAN	18
4.	Mobile Network Layer	12
5.	Mobile Transport Layer	12
6.	Advanced Mobile Technologies	03

Total hours (Theory): 45 Hrs.

Total hours (Lab): 30 Hrs.

Total hours: 75 Hrs.

Detailed Syllabus:

1.	Wireless Communication Fundamentals	03 hours	05%
1.1	Applications		
1.2	A short history of wireless communication.		
1.3	A market for mobile communications		
1.4	Some open research topics		
1.5	A simplified reference model		
2.	Telecommunication Systems	12 hours	21%
2.1	GSM: Mobile services, System architecture, Radio interface, Protocols, Localization and Calling, Handover, Security, New data services		
2.2	DECT: System architecture, Protocol architecture		
2.3	TETRA, UMTS and IMT-2000		
3.	Wireless LAN	18 Hours	28 %
3.1	Infrared vs radio transmission		
3.2	Infrastructure and ad-hoc network		
3.3	IEEE 802.11: System architecture, Protocol architecture, Physical layer, medium access control layer, MAC management, 802.11a, 802.11b, Newer developments		
3.4	HiperLAN: HiperLAN 1, HiperLAN2		
3.5	Bluetooth: Architecture, Radio layer, Baseband layer, Link Manager Protocol, L2CAP, Security, SDP, Profiles, IEEE 802.15		
4.	Mobile Network Layer	12hours	21%
4.1	Mobile IP		
4.2	Dynamic Host Configuration Protocol		
4.3	Mobile ad-hoc networks: Routing, Destination sequencedistance vector, Dynamic source routing		
5.	Mobile Transport Layer	12 hours	21%
5.1	Traditional TCP: Congestion control, Slow start, Fast retransmit/fast recovery, Implications of mobility		
5.2	Classical TCP improvements: Indirect TCP, Snooping TCP, Mobile TCP, Fast retransmit/fast recovery, Transmission/time- out freezing, Selective retransmission, Transaction-oriented TCP		
5.3	TCP over 2.5/3G wireless networks		
6.	Advanced Mobile Technologies	03 hours	04%

6.1	Introduction of 4G, 5G and other advanced mobile technologies	
6.2	The architecture of future networks	

Course Outcome:

After completion of the course, Students will be able to:

CO1	Demonstrate the principles and theories of mobile computing technology
CO2	Characterize the infrastructure and technology of mobile computing technologies
CO3	List applications in various domains offered to the public, employees and businesses through mobile computing technology
CO4	Describes the current technologies to build potential future of mobile computing technologies and applications
CO5	Identify the potential future of mobile computing technologies and applications

Course Articulation Matrix:

	PO01	PO02	PO03	PO04	PO05	PO06	PO07	PO08	PO09	PO10	PO11	PO12

CS374: MODERN NETWORKS (PE-II)

Credits and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	3	2	0	5	4
Marks	100	50	0	150	

Pre-requisite courses:

- Data Communication

Outline of the course:

Sr. No.	Title of the unit	Minimum number of hours
1	Elements of Modern Networking	07
2	Requirements and Technology	10
3	SDN: Background and Motivation	10
4	SDN Data Plane and OpenFlow	05
5	SDN Control Plane&SDN Application Plane	13

Total hours (Theory): 45

Total hours (Lab): 30

Total hours: 75

Detailed Syllabus:

1. Elements of Modern Networking	07 Hours	16%
The Networking Ecosystem, Example Network Architectures, Ethernet, Wi-Fi, 4G/5G Cellular, Network Convergence, Unified Communications		
2. Requirements and Technology	10 Hours	22%
Types of Network and Internet Traffic, Demand: Big Data, Cloud Computing, and Mobile Traffic, Requirements: QoS and QoE, Routing, Congestion Control, SDN and NFV, Modern Networking Elements		
3. SDN: Background and Motivation	10 Hours	22%
Evolving Network Requirements, The SDN Approach, SDN- and NFV-Related Standards		
4. SDN Data Plane and OpenFlow	05 Hours	11%
SDN Data Plane, OpenFlow Logical Network Device, OpenFlow Protocol		
5. SDN Control Plane&SDN Application Plane	13 Hours	29%
SDN Control Plane Architecture, ITU-T Model, OpenDaylight, REST, Cooperation and Coordination Among Controllers, SDN ApplicationPlane Architecture, Network Services Abstraction Layer, Traffic Engineering, Measurement and Monitoring, Security, Data Center Networking, Mobility and Wireless, Information-Centric Networking		

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Measure and Analyse different network parameters.
CO2	Understand working of application layer protocols.
CO3	Understand and Analyse transport layer services and its impacts on data rate.
CO4	Understand basic functionality of network layer devices.
CO5	Understand functionality of multiple access protocol.
CO6	Analyse traditional network and get familiar with Software defined networking.

Course Articulation Matrix:

CS349: SOFTWARE GROUP PROJECT -IV

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	0	4	4	4
Marks	0	100	100	

Outline of the Course:

- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Students will work together in a team (at most **three**) with any programming language.
- Students are required to get approval of project definition from the department.
- After approval of project definition students are required to report their project work on weekly basis to the respective internal guide.
- Project will be evaluated at least once per week in laboratory Hours during the semester and final submission will be taken at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as a solution of particular problem by applying principles of Software Engineering.
- Students have to submit project with following listed documents at the time of final submission.
 - a. Project Synopsis
 - b. Software Requirement Specification
 - c. SPMP
 - d. Final Project Report
 - e. Project Setup file with Source code
 - f. Project Presentation (PPT)
- A student has to produce some useful outcome by conducting experiments or project work.

Total Hours (Theory): 00

Total Hours (Lab): 60

Total Hours: 60

Course Outcome (COs):

At the end of the course, the students will be able to:

CO1	Identify and define the computing requirements of a problem to propose its appropriate solution.
CO2	Correlate knowledge of different subjects and apply it to implement solution of the problem.
CO3	Apply engineering and management principles to achieve project goal.
CO4	Prepare technical report and deliver presentation by applying different visualization tools and evaluation metrics.
CO5	Able to communicate effectively with a range of audiences.
CO6	Recognition of the need for and an ability to engage in continuing professional development.
CO7	Able to work and coordinate with different kind of people in the team

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	3	-	2	-	-	-	-	2	-	-	-	3	-
CO2	3	-	1	1	3	1	1	-	-	-	-	2	1	1
CO3	-	-	3	-	3	1	1	-	2	-	3	2	3	-

**HS134 A: CONTRIBUTOR PERSONALITY DEVELOPMENT (HSS
ELECTIVE-III)**

Credits and Schemes:

Sem.	Course Code	Course Name	Credits	Teaching Scheme Contact Hours/Week	Evaluation Scheme				Total
					Theory		Practical		
					Internal	External	Internal	External	
VI	HS134 A	CONTRIBUTOR PERSONALITY DEVELOPMENT	02	02	--	--	30	70	100

Course Outline

Module No.	Title/Topic	Classroom Contact Hours
1	Concept of Personality: - Meaning of Personality - Types of Personality - Factors contributing to Personality - Personality Traits	06
2	Soft Skills and Personality Development: - Critical, Creative and Positive Thinking - Leadership, Assertiveness and Negotiation Skills - Self-Management - People's Skills - Building Relationship Skills - Being a Team Player	08
3	Developing Contributor Personality – Part I Concept of Contributor	06

	• Characteristics of a Contributor • The Contributor's Vision of Success & Career • The Scope of Contribution • Embarking on the Journey to Contributor ship	
4	Developing Contributor Personality – Part II • Focus on Values • Engage Deeply • Think in Enlightened Self-Interest • Practice Imaginative Sympathy • Demonstrate Trust Behavior • Developing a sense of duty and morality	06
5	Contemporary Issues in CPD • Contemporary Practices & Trends in Contributor Personality Development • Case Study & Presentations	04
	Total	30

Instruction Methods and Pedagogy

The course is based on practical learning. Teaching will be facilitated by reading material, discussion, task-based learning, projects, assignments and various interpersonal activities like case studies, critical reading, group work, independent and collaborative research, presentations etc.

Evaluation

The students will be evaluated continuously in the form of internal as well as external examinations. The practical evaluation is schemed as 30 marks for internal evaluation and 70 marks for external evaluation in the form of University examination.

Internal Evaluation

The students' performance in the course will be on a continuous basis through the following components:

Sl. No.	Component	Number	Marks per incidence	Total Marks
3	Assignment / Project Work / Term Work / Quiz	2	25	25
4	Attendance and Class Participation			05
			Total	30

External Evaluation

The University Practical examination will be of 70 marks and will test the contributory personality aspects and their applications by carrying out practical assessment. The examination will avoid, as far as possible, grammatical errors and will focus on applications.

Sl. No.	Component	Number	Marks per incidence	Total Marks
1	Practical Exam / Viva	01	70	70
Total				70

Course Outcome (COs):

After completion of the course, the student would:

CO1	Develop conceptual understanding of the term Personality and understand one's own personality Traits
CO2	Develop soft skills for holistic personality development for career and in personal life
CO3	Develop assertiveness, self-management and negotiation skills to navigate the personal and professional environment successfully
CO4	Develop conceptual clarity of the term 'Contributor Personality' and develop understanding of the traits of a contributor
CO5	Develop the qualities of a contributor such as trust, strong work ethic, responsibility and accountability at workplace
CO6	Develop relevant skills required to be a contributor at workplace and achieve success in life

CS441: Programming in Python

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	3	2	5	4
Marks	100	50	150	

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1.	Introduction to Python Programming & Data Structure	05
2.	Object Oriented Programming	05
3.	Data Handling, Analysis and Visualization	06
4.	Multithreading	04
5.	Network Programming & Web Scrapping	07
6.	Python Database	03
7.	Graphics & GUI Programming	07
8.	Introduction to Web Framework	08

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours:75

Detailed Syllabus:

1. Introduction to Python Programming & Data Structure 05 Hours 10%

Basic programming fundamentals, Data variables, Identifies, Operators, Indentation in Python, Indexing, Slicing, BasicString Operations, Using Lists as Stacks, Using Lists as Queues, List Comprehensions, Nested List Comprehensions, Tuples, Sets, Dictionaries, User defined Functions, modules , packages, Python errors, exceptions, raising the exception and debugging concept

2 Object Oriented Programming 05 Hours 15%

Python Scopes and Namespaces, Class Definition, Class Objects, Instance Objects, Method Objects, Class and Instance Variables, Inheritance, Multiple Inheritance, Private Variables, Polymorphism, Using Properties to Control Attribute Access, Encapsulation and Information Hiding

- | | | | |
|----|--|----------|-----|
| 3. | Data Handling, Analysis and Visualization
Regular expressions with special characters, Regular expressions and raw strings, Extracting matched text from strings, Substituting text with regular expressions, Writing and Reading Binary Data, Writing and Parsing Text Files, Iterating over File Contents
Python library cover- RE, Numpy, Pandas & Matplotlib. | 06 Hours | 15% |
| 4 | Multithreading
Thread, Starting a thread, Threading Module, Synchronizing thread, Multithreaded priority queue | 04 Hours | 10% |
| 5. | Network Programming & Web Scrapping
Socket, Socket Module Methods for IoT, Client Server
Static web scrapping using URLLIB, Beautiful Soup and request library, XML & JSON Parsing, Dynamic web scrapping with selenium and scrapy | 07 Hours | 10% |
| 6. | Python Database
Database introduction, Connections, Executing queries, Handling Transaction Error, Importing data from Web and CSV | 03 Hours | 10% |
| 7. | Graphics & GUI Programming
Designing GUI application using Tkinter, PyQt and Kivy | 07 Hours | 15% |
| 8. | Introduction to Web Framework
Introduction to Django, Model Layer, View Layer, Templet Layer, Forms, Develop Web Service using Flask Framework | 08 Hours | 15% |

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Identify the basic python constructs with a view of using them in problem solving
CO2	Apply control structures and use of data structure, OOPs concepts for real time problem solving
CO3	Analyze utility of strings and functions in modular programming using python and apply exception Handling, file handling and database operations
CO4	To be able to create socket application, GUI application and Web applications in Python
CO5	To be able to create Multithreaded Programming and work in a team

Course Articulation Matrix:

- Engineering Mathematics

A. Outline of the Course:

Sr. No.	Title of the unit	Minimum number of hours
1.	INTRODUCTION TO DATA SCIENCE	04
2.	STATISTICAL INFERENCE	05
3.	DATA PRE-PROCESSING AND DATA VISUALIZATION	05
4.	INTRODUCTION TO MAP-REDUCE AND HADOOP ARCHITECTURE	05
5.	HDFS, HIVE AND HIVEQL, HBASE	10
6.	APACHE SPARK	06
7.	NoSQL	03
8.	DATA BASE FOR THE MODERN WEB	07
	Total hours (Theory):	45
	Total hours (Lab):	60
	Total hours:	105

B. Detailed Syllabus:

1. INTRODUCTION TO DATA SCIENCE

04 Hours 10%

Introduction of data science and data analytics, defining data science by its key components, Big Data and its importance, Four Vs, Drivers for Big data, Big data applications,

Exploring Data Science in Business, Applications in real-world

- | | | |
|---|-----------------|-------------|
| 2. STATISTICAL INFERENCE | 05 Hours | 08% |
| Event Space, Random Variables and Probability Distributions | | |
| 3. DATA PRE-PROCESSING AND DATA VISUALIZATION | 05 Hours | 15% |
| Dataset, Types of Dataset, Importance of Pre-processing the Data, Data Cleaning, Data Integration and Transformation, Data Reduction, Data Discretization and Concept Hierarchy Generation, Data visualization techniques | | |
| 4. INTRODUCTION TO MAP-REDUCE AND HADOOP ARCHITECTURE | 05 Hours | 12 % |
| Big Data – Apache Hadoop & Hadoop EcoSystem, Moving Data in and out of Hadoop – Understanding inputs and outputs of MapReduce, Data Serialization. | | |
| 5. HDFS, HIVE AND HIVEQL, HBASE | 10 Hours | 20 % |
| HDFS-Overview, Installation and Shell, Java API; Hive Architecture and Installation, Comparison with Traditional Database, HiveQL Querying Data, Sorting And Aggregating, Map Reduce Scripts, Joins & Sub queries, HBase concepts, Advanced Usage, Schema Design, Advance Indexing, PIG, Zookeeper , how it helps in monitoring a cluster, HBase uses Zookeeper and how to Build Applications with Zookeeper. | | |
| 6. Apache SPARK | 06 Hours | 15% |
| Introduction to Data Analysis with Spark, Downloading Spark and Getting Started, Programming with RDDs, Machine Learning with MLlib. | | |
| 7. NoSQL | 03 Hours | 08 % |
| What is it? Where It is Used Types of NoSQL databases, Why NoSQL? Advantages of NoSQL, Use of NoSQL in Industry, SQL vs NoSQL, NewSQL | | |

8. Data Base for the Modern Web**07 Hours 12 %**

Introduction to MongoDB key features, Core Server tools, MongoDB through the JavaScript's Shell, Creating and Querying through Indexes, Document-Oriented, principles of schema design, Constructing queries on Databases, collections and Documents, MongoDB Query Language.

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Use an ethically responsible approach to evaluate and interpret data
CO2	Demonstrate expertise in statistical data processing
CO3	Use of various algorithms as well as mathematical and statistical models and optimization concepts to formulate and the use analyse data appropriately
CO4	Develop the ability to build and evaluate data-based models.
CO5	To learn difference between conventional SQL query language and NoSQL and MongoDB basic concepts
CO6	Utilizing data science principles and approaches to solve real-life situational problems and effectively communicate them.

Course Articulation Matrix:

	PO01	PO02	PO03	PO04	PO05	PO06	PO07	PO08	PO09	PO10	PO11	PO12

CE442: Design of Language Processors

Credit and Hours:

Teaching Scheme	Theory	Practical	Tutorial	Total	Credit
Hours/week	4	2	-	6	5
Marks	100	50	-	150	

A. Outline of the Course:

Sr No.	Title of the unit	Minimum number of hours
1.	Overview of Language Processors & Translators	10
2.	Introduction To Compilers	20
3.	Symbol-Table Management	05
4.	Static & Dynamic Memory Allocation & Memory management	06
5.	Semantic Analysis & Intermediate Code Generation	05
6.	Code Optimization	07
7.	Code Generation	07

Total hours (Theory): 60.
Total hours (Lab): 30.
Total hours: 90.

Detailed Syllabus:

- 1. Overview of Language Processors & Translators 10 17%**
Language processing activities, fundamental of language processing, Operating System, Interpreter vs compiler
Pre-processor & Macro Processors – Subroutine, Macro definition and call, Macro expression, nested macro call, Advanced macro facilities, design of macro pre-processor
Loaders - Compile & go, Absolute, Bootstrap, Relocating, Linking loader
Linkers - Relocation of Linking Concept, Design of Linker, Linker for MS

DOS, Linking for overlays, Linkage editor
 Assemblers - Elements of Assembly Language Programming, Assembly Scheme, Single pass Assembler, Two pass assembler, Data structure of Assemblers

- | | | | |
|-----------|---|-----------|------------|
| 2. | Introduction To Compilers | 20 | 35% |
| | Pass and Phases of Compiler, grouping of phases, Compiler Contraction tools | | |
| | Lexical analyser - Roles of lexical analyser, input buffering, tokens, Regular Expression, finite Automata | | |
| | Syntax analyser - Context free grammar, Ambiguous grammar, Top-down parsing, Bottom-up parsing, LEX, YACC | | |
| 3. | Symbol-Table Management | 05 | 08% |
| | Data structures to implement symbol table, Symbol Attributes, Symbol-Table entries, Local Symbol Table management, Global Symbol Table Structure, Storage bindings and Symbolic Registers | | |
| 4 | Static & Dynamic Memory Allocation & Memory management | 06 | 10% |
| | Data descriptors - Static and Dynamic storage allocation – Storage allocation and access in block structured programming languages – Array allocation and access- Compilation of expressions – Handling operator priorities – Intermediate code forms for expressions – code generator., Register Usage, The run-time stack, Parameter passing disciplines, Code sharing and Position-Independent code | | |
| 5. | Semantic Analysis & Intermediate Code Generation | 05 | 08% |
| | Intermediate Languages, Declarations, Assignment Statements, Boolean Expressions, Case Statements, Back patching, Procedure Calls | | |
| 6. | Code Optimization | 07 | 11% |
| | The Principal Sources of Optimization, Optimization of Basic Blocks, Loops in Flow Graphs, Introduction to Global Data-Flow Analysis, Iterative Solution of Data-Flow Equations, Code-Improving Transformations, Dealing with Aliases, Data-Flow Analysis of Structured Flow Graphs, Efficient Data-Flow Algorithms, A Tool for Data-Flow Analysis, Estimation of Types, Symbolic Debugging of Optimized Code | | |
| 7. | Code Generation | 07 | 11% |
| | Issues in the Design of a Code Generator, The Target Machine, Run-Time Storage Management, Basic Blocks and Flow Graphs, Next-Use Information, A Simple Code Generator, Register Allocation and Assignment, The DAG Representation of Basic Blocks, Peephole Optimization, Generating Code from DAGs, Dynamic Programming Code-Generation Algorithm, Code-Generator Generators | | |

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand design and processing of different language processor, loaders and linkers
CO2	Design top-down and bottom-up parsers
CO3	Identify different memory management schemes of language processors
CO4	Develop semantic analysis scheme to generate intermediate code
CO5	Apply different code optimization techniques
CO6	Develop algorithms to generate code for a target machine

Course Articulation Matrix:

CE443: CLOUD COMPUTING

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	3	2	5	4
Marks	100	50	150	

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1.	Cluster Computing, Grid Computing Systems and Resource Management at Glance	08
2.	Fundamental of Virtualization	06
3.	Fundamental Concepts and Models	06
4.	Cloud-Enabling Technology	05
5.	Fundamental Cloud Architectures	07
6.	Advanced Cloud Architectures	08
7.	Implementation of Cloud	05

Total Hours (Theory):
45**Total Hours**
(Lab): 30**Total**
Hours: 75

Detailed Syllabus:

- 1 Cluster Computing, Grid Computing Systems and Resource Management at Glance** **08 Hrs 18%**
Introduction, Eras of Computing, Scalable Parallel Computer Architectures, Towards Low Cost Parallel Computing and Motivations, A Cluster Computer and its Architecture, Clusters Classification, Commodity Components for Clusters, Grid Architecture and Service Modelling, Grid Projects and Grid Systems Built, Grid Resource Management and Brokering, Software and Middleware for Grid Computing, Grid Application Trends
- 2. Fundamental of Virtualization** **06 Hrs 12%**
Type of Virtualization, Virtualization Technologies, virtualize your Environment, Managing Virtualization Environment, Storage Virtualization
- 3. Fundamental Concepts and Models** **06 Hrs 15%**
Roles and Boundaries, Cloud Characteristics, Cloud Delivery Models, Cloud Deployment Models

- | | | | |
|----|--|--------|-----|
| 4. | Cloud-Enabling Technology
Broadband Networks and Internet Architecture, Data Center Technology, Virtualization Technology, Web Technology, Multitenant Technology, Service Technology | 05 Hrs | 14% |
| 5. | Fundamental Cloud Architectures
Workload Distribution Architecture, Resource Pooling Architecture, Dynamic Scalability Architecture, Elastic Resource Capacity Architecture, Service Load Balancing Architecture, Cloud Bursting Architecture, Elastic Disk Provisioning Architecture, Redundant Storage Architecture | 07 Hrs | 16% |
| 6. | Advanced Cloud Architectures
Hypervisor Clustering Architecture, Load Balanced Virtual Server Instances Architecture, Non-Disruptive Service Relocation Architecture, Zero Downtime Architecture, Cloud Balancing Architecture, Resource Reservation Architecture, Dynamic Failure Detection and Recovery Architecture | 08 Hrs | 17% |
| 7. | Implementation of Cloud
Study of Cloud computing Systems like Amazon EC2 and S3, Google App Engine, and Microsoft Azure, Build Private/Hybrid Cloud using open source tools, Deployment of Web Services from Inside and Outside a Cloud Architecture. MapReduce and its extensions to Cloud Computing, HDFS, and GFS. | 05 Hrs | 08% |

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Assess and examine advantages and disadvantages of virtualization technology.
CO2	Compose services in a distributed computing environment to achieve tasks relevant to a knowledge-based business or public service
CO3	Evaluate a set of business requirements to determine suitability for a cloud computing delivery model.
CO4	Explore the various cloud computing architectures and paradigms.
CO5	Deployment of cloud and identify security implications in cloud computing.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	2	2	2	1	0	1	-	-	-	1	2	-

CS471: MOBILE COMPUTING (ELECTIVE- III)

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

Pre-requisite courses:

- Computer Networks
- Modern Networks

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1.	Wireless Communication Fundamentals	03
2.	Telecommunication Systems	12
3.	Wireless LAN	18
4.	Mobile Network Layer	12
5.	Mobile Transport Layer	12
6.	Advanced Mobile Technologies	03

Total Hours (Theory): 60

Total Hours (Lab):

30 Total Hours: 90

Detailed Syllabus:

- | | | |
|--|-----------------|-------------|
| 1. Wireless Communication Fundamentals | 03 Hours | 05 % |
| 1.1 Applications | | |
| 1.2 A short history of wireless communication | | |
| 1.3 A market for mobile communications | | |
| 1.4 Some open research topics | | |
| 1.5 A simplified referencemodel | | |
| 2. Telecommunication Systems | 12 Hours | 21 % |
| 2.1 GSM: Mobile services, System architecture, Radio interface, Protocols, Localization and Calling, Handover, Security, New data services | | |
| 22 DECT: System architecture, Protocol architecture | | |
| 23 TETRA, UMTS and IMT–2000 | | |

3. Wireless LAN	18 Hours	28 %
31 Infrared vs radio transmission		
32 Infrastructure and ad-hoc network		
33 IEEE 802.11: System architecture, Protocol architecture, Physical layer, Medium access control layer, MAC management, 802.11a, 802.11b, Newer developments		
34 HiperLAN: HiperLAN 1, HiperLAN2		
35 Bluetooth: Architecture, Radio layer, Baseband layer, Link Manager Protocol, L2CAP, Security, SDP, Profiles, IEEE 802.15		
4. Mobile Network Layer	12 Hours	21 %
41 Mobile IP		
42 Dynamic Host Configuration Protocol		
43 Mobile ad-hoc networks: Routing, Destination sequence distance vector, Dynamic source routing		
5. Mobile Transport Layer	12 Hours	21 %
51 Traditional TCP: Congestion control, Slow start, Fast retransmit/fast recovery, Implications of mobility		
52 Classical TCP improvements: Indirect TCP, Snooping TCP, Mobile TCP, Fast retransmit/fast recovery, Transmission/time-out freezing, Selective retransmission, Transaction-oriented TCP		
53 TCP over 2.5/3G wireless networks		
6. Advanced Mobile Technologies	03 Hours	04 %
61 Introduction of 4G, 5G and other advanced mobile technologies		
62 The architecture of future networks		

Course Outcome (COs):

CO1	Demonstrate the principles and theories of mobile computing technology
CO2	Characterize the infrastructure and technology of mobile computing technologies
CO3	List applications in various domains offered to the public, employees and businesses through mobile computing technology
CO4	Describes the current technologies to build potential future of mobile computing technologies and applications
CO5	Identify the potential future of mobile computing technologies and applications

Course Articulation Matrix:

	PO01	PO02	PO03	PO04	PO05	PO06	PO07	PO08	PO09	PO10	PO11	PO12
CO1	3	1	-	-	-	-	-	-	-	-	-	-
CO2	1	2	1	-	-	-	-	-	-	-	-	-
CO3	1	2	2	-	2	-	-	-	-	-	1	-
CO4	-	3	1	1	-	-	1	-	-	-	-	-
CO5	-	3	1	1	-	-	1	-	-	-	-	-

Recommended Study Material:

❖ Text Books:

1. Jochen Schiller, “Mobile Communications”, PHI/Pearson Education, Second Edition, 2003.
2. “Mobile Computing: Technology, Applications and Service Creation” by Asoke K Talukder and Roopa R Yavagal, TMH, ISBN: 0-07-058807-4

❖ Reference Materials:

1. William Stallings, “Wireless Communications and Networks”, PHI/Pearson Education, 2002.
2. Kaveh Pahlavan, Prasanth Krishnamoorthy, “Principles of Wireless Networks”, PHI/Pearson Education, 2003.
3. Uwe Hansmann, Lothar Merk, Martin S. Nicklons and Thomas Stober, “Principles of Mobile Computing”, Springer, New York, 2003.
4. Hazyszt of Wesolowshi, “Mobile Communication Systems”, John Wiley and Sons Ltd, 2002
5. Research papers from IEEE, Springer etc.

❖ Web Materials:

1. www.ietf.org – For drafts
2. www.ieee.org – For standards and technical research papers

CS472: CYBER SECURITY AND CYBER LAW (ELECTIVE- III)

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1	Introduction to Cyber Security	04
2	Cyber Security Vulnerabilities and Cyber Security Safeguards	09
3	Securing Web Application, Services and Servers	05
4	Intrusion Detection and Prevention	12
5	Cryptography and Network Security	09
6	Introduction to Cyberspace and the Law	03
7	Cyber Forensic	03

Total Hours (Theory): 45

Total Hours (Lab): 30

Total Hours: 75

Detailed Syllabus:

- 1 Introduction to Cyber Security 04 hours 10%**
 - 1.1 Overview of Cyber Security
 - 1.2 Internet Governance – Challenges and Constraints
 - 1.3 Cyber Threats:- Cyber Warfare-Cyber Crime-Cyber terrorism-Cyber Espionage
 - 1.4 Need for a Comprehensive Cyber Security Policy, Need for a Nodal Authority, Need for an International convention on Cyberspace.
- 2 Cyber Security Vulnerabilities and Cyber Security Safeguards 09 hours 20%**
 - 2.1 Cyber Security Vulnerabilities-Overview
 - 2.2 Vulnerabilities in software, System administration, Complex Network Architectures, Open Access to Organizational Data, Weak Authentication, Unprotected Broadband communications, Poor Cyber Security Awareness.
 - 2.3 Cyber Security Safeguards- Overview
 - 2.4 Access control, Audit, Authentication, Biometrics, Cryptography, Deception, Denial of Service Filters
 - 2.5 Ethical Hacking, Firewalls, Intrusion Detection Systems, Response, Scanning, Security policy, Threat Management.

3	Securing Web Application, Services and Servers	05 hours	10%
3.1	Introduction, Basic security for HTTP Applications and Services, Basic Security for SOAP Services		
3.2	Identity Management and Web Services, Authorization Patterns		
3.3	OWASP Top 10, Security Considerations, Challenges		
4	Intrusion Detection and Prevention	12 hours	25%
4.1	Introduction of Intrusion Detection and Prevention, Physical Theft, Abuse of Privileges, Unauthorized Access by Outsider, Malware infection		
4.2	Intrusion detection and Prevention Techniques, Anti-Malware software		
4.3	Network based Intrusion detection systems, Network based Intrusion Prevention Systems		
4.4	Host based Intrusion prevention Systems, Security Information Management		
4.5	Network Session Analysis, System Integrity Validation		
5	Cryptography and Network Security	09 hours	25%
5.1	Introduction to Cryptography		
5.2	Symmetric key Cryptography, Asymmetric key Cryptography,		
5.3	Message Authentication, Digital Signatures, Applications of Cryptography.		
5.4	Overview of Firewalls- Types of Firewalls, User Management		
5.5	VPN Security Protocols: - security at the Application Layer- PGP and S/MIME		
5.6	Security at Transport Layer- SSL and TLS, Security at Network Layer-IPSec		
6	Introduction to Cyberspace and the Law	03 hours	05%
6.1	Introduction, Cyber Security Regulations		
6.2	Roles of International Law, the state and Private Sector in Cyberspace, Cyber Security Standards		
6.3	The INDIAN Cyberspace, National Cyber Security Policy 2013.		
7	Cyber Forensics	03 hours	05%
7.1	Introduction to Cyber Forensics, Handling Preliminary Investigations, Controlling an Investigation		
7.2	Conducting disk-based analysis, Investigating Information-hiding		
7.3	Scrutinizing E-mail, Validating E-mail header information, Tracing Internet access, Tracing memory in real-time.		

Course Outcome(Co):

At the end of the course, the students will be able to

CO1	After learning the course, students should able to learn about cyber-attack, type of cybercrimes
CO2	Learn cyber security vulnerabilities and security safeguard, prevent the web using different web application tools.
CO3	Learn about how to protect the network using different network tools and Intrusion detection and prevention techniques, Learn basis of Cryptography and network security
CO4	Understand about cyber laws
CO5	Learn about cyber Forensics and investigation of information hiding.
CO6	Learn about how to protect them self and ultimately society from cyber- attacks.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12
CO1	3	2	-	3	-	-	-	-	-	-	2	-
CO2	-	3	2	2	3	2	2	-	-	-	-	-

CO4	-	-	-	-	-	2	-	3	-	2	-	2
CO5	-	-	3	3	3	-	-	3	-	-	2	-
CO6	2	-	-	-	-	3	-	-	3	-	-	2

Recommended Study Material:**❖ Text Books:**

1. Cybersecurity: The Beginner's Guide Dr. Erdal Ozkaya

❖ Reference Books:

3. Digital Privacy and Security Using Windows: A Practical Guide By Nihad Hassan, Rami Hijazi, Apress
4. Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives by Nina Godbole and Sunit Belpure, Publication Wiley

CS473: Block Chain Technology & Applications

Credit and Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	4	2	6	5
Marks	100	50	150	

Outline of the Course:

Sr No.	Title of the unit	Minimum number of Hours
1	Backbones of Blockchain: Cryptography and Hashing	07
2	An Introduction to Blockchain Technology	06
3	Block-Chain Consensus Mechanisms	12
4	Introduction to Cryptocurrency: BitCoin	12
5	Blockchain hyperledger	05
6	Solidity Programming and Decentralized Application	08
7	Blockchain in Real World	10

Total Hours (Theory): 60

Total Hours (Lab): 30

Total Hours: 80

Detailed Syllabus:

- 1 Backbones of Blockchain: Cryptography and Hashing** **07 hours** **12%**
Symmetric key cryptography, Public key cryptography, Digital Signature, Cryptographically Secured Hash Functions, Cryptographically Secured Chain of Blocks, Merkle Trees.
- 2 An Introduction to Blockchain Technology** **06 hours** **10%**
Evaluation of Blockchain Technology, Distributed Systems, The History of Blockchain and Bitcoin, Types of Block-Chain
- 3 Block-Chain Consensus Mechanisms** **12 hours** **20%**
Practical Byzantine fault tolerance algorithm, Proof of Work, Proof of Stake, Proof of Authority, Proof of Elapsed time
- 4 Introduction to Cryptocurrency: BitCoin** **12 hours** **20%**
Digital keys and addresses, Transactions, Mining, The Bitcoin network, Wallets, Bitcoin payments

- 5 **Blockchain hyperledger** 5 hours 8%
- Fabric architecture, implementation, networking, fabric transactions, demonstration, smart contracts
- 6 **Solidity Programming and Decentralized Application** 08 hours 13%
- Using the Remix IDE, Data Types and Functions, Creating Inline Assembly Functions, Mappings, Modifiers, Structs, and More, Generating ERC-20 Tokens, Extending Token Security (ERC-223), Deploying the ERC-20 TokenContract, DAPP using Ehtereum, DAPP using Hyperledger.
- 7 **Blockchain in Real World** 10 hours 17%
- Blockchain applications, eGovernance, smart cities, smart industries, use cases, trends on blockchains, serverless blocks, scalability issues, blockchain on clouds, Blockchain in IOT.

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Understand the Basic Cryptography behind the Blockchain Technology and Bitcoin.
CO2	Define the structure of a Blockchain and classify why and when it is better than a simple distributed database.
CO3	Analyse the consensus mechanisms in a Blockchain Technology and critically assess its applicability in Blockchain based application.
CO4	Analyse to what extent smart and self-executing contracts can benefit automation, governance and transparent environment.
CO5	Design decentralized distributed application and measure the performance of Blockchain against centralized system.
CO6	Attain awareness of the new challenges that exist in monetizing businesses around Blockchain.

Course Articulation Matrix:

Marks	0	100	100	

Outline of the Course:

- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Students will work together in a team (at most **three**) with any programming language.
- Students are required to get approval of project definition from the department.
- After approval of project definition students are required to report their project work on weekly basis to the respective internal guide.
- Project will be evaluated at least once per week in laboratory Hours during the semester and final submission will be taken at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as a solution of particular problem by applying principles of Software Engineering.
- Students have to submit project with following listed documents at the time of final submission.
 - a. Project Synopsis
 - b. Software Requirement Specification
 - c. SPMP
 - d. Final Project Report
 - e. Project Setup file with Source code
 - f. Project Presentation (PPT)
- A student has to produce some useful outcome by conducting experiments or projectwork.

Total Hours (Theory): 00

Total Hours (Lab):30

Total Hours: 30

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Identify problems present in society by surveying variety of domains and convert in project definition.
CO2	Explore new ideas and techniques to solve it. Create, select and apply appropriate techniques, resources, modern engineering and IT tools to solve problem.
CO3	Correlate knowledge of different subjects and apply theoretical knowledge to implement project for identified problem.
CO4	Apply ethical principles and commit to responsibilities and norms of the project.
CO5	Write technical report and deliver presentation by applying different visualization tools and evaluation metrics.
CO6	Apply engineering and management principles to achieve project goal.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	-	3	-	2	-	-	-	-	-	-	-	-	-	-
CO2	-	-	3	-	-	-	-	-	-	-	-	-	-	-
CO3	3	-	-	-	-	-	-	-	-	-	-	-	3	-
CO4	-	-	-	-	-	-	-	3	2	-	-	-	-	-
CO5	-	-	1	-	3	2	-	-	-	3	-	-	-	-
CO6	3	2	2	1	2	1	-	-	2	3	-	1	-	-

Enter correlation levels 1, 2 or 3 as defined below:

1: Slight (Low) 2: Moderate (Medium) 3: Substantial (High)

If there is no correlation, put “-”

Recommended Study Material:

1. Reading Materials, web materials, Project reports with full citations
2. Books, magazines & Journals of related topics
3. Various software tools and programming languages compiler related to topic

CS446: SUMMER INTERNSHIP-II

Credit and Hours:

Teaching Scheme	Project	Practical	Tutorial	Total	Credit
Hours/week	90	-	-	90	3
Marks	150	-	-	150	

Outline of the Course:

1.	Instructional Method and Pedagogy
	• Summer internship shall be at least 90 hours during the summer vacation only. • Department/Institute will help students to find an appropriate company/industry/organization for the summer internship. • The student must fill up and get approved a Summer Internship Acceptance form by the company and provide it to the Coordinator of the department within the specified deadline. • Students shall commence the internship after the approval of the department Coordinator. Summer internships in research centers is also allowed. • During the entire period of internship, the student shall obey the rules and regulations of the company/industry/organization and those of the University. • Due to inevitable reasons, if the student will not able to attend the internship for few days with the permission of the supervisor, the department Coordinator should be informed via e-mail and these days should be

	compensated later. • The student shall submit two documents to the Coordinator for the evaluation of the summer internship: • Summer Internship Report • Summer Internship Assessment Form • Upon the completion of summer internship, a hard copy of “Summer Internship Report” must be submitted through the presentation to the Coordinator by the first day of the new term. • The report must outline the experience and observations gained through practical internship, in accordance with the required content and the format described in this guideline. Each report will be evaluated by a faculty member of the department on a satisfactory/unsatisfactory basis at the beginning of the semester. • If the evaluation of the report is unsatisfactory, it shall be returned to the student for revision and/or rewriting. If the revised report is still unsatisfactory the student shall be requested to repeat the summer internship.
2.	Format of Summer Internship Report
	The report shall comply with the summer internship program principles. Main headings are to be centered and written in capital boldface letters. Sub-titles shall be written in small letters and boldface. The typeface shall be Times New Roman font with 12pt. All the margins shall be 2.5cm. The report shall be submitted in printed form and filed. An electronic copy of the report shall be recorded in a CD and enclosed in the report. Each report shall be bound in a simple wire vinyl file and contain the following sections: • Cover Page • Page of Approval and Grading • Abstract page: An abstract gives the essence of the report (usually less than one page). Abstract is written after the report is completed. It must contain the purpose and scope of internship, the actual work done in the plant, and conclusions arrived at. • TABLE OF CONTENTS (with the corresponding page numbers)

- LIST OF FIGURES AND TABLES (with the corresponding page numbers)
- DESCRIPTION OF THE COMPANY/INDUSTRY/ORGANISATION:
Summarize the work type, administrative structure, number of employees (how many engineers, under which division, etc.), etc. Provide information regarding
 - Location and spread of the company
 - Number of employees, engineers, technicians, administrators in the company
 - Divisions of the company
 - Your group and division
 - Administrative tree (if available)
 - Main functions of the company
 - Customer profile and market share
- INTRODUCTION: In this section, give the purpose of the summer internship, reasons for choosing the location and company, and general information regarding the nature of work you carried out.
- PROBLEM STATEMENT: What is the problem you are solving, and what are the reasons and causes of this problem.
- SOLUTION: In this section, describe what you did and what you observed during the summer internship. It is very important that majority of what you write should be based on what you did and observed that truly belongs to the company/industry/organization.
- CONCLUSIONS: In the last section, summarize the summer internship activities. Present your observations, contributions and intellectual benefits. If this is your second summer internship, compare the first and second summer internships and your preferences.
- REFERENCES: List any source you have used in the document including books, articles and web sites in a consistent format.
- APPENDICES: If you have supplementary material (not appropriate for the main body of the report), you can place them here. These could be schematics, algorithms, drawings, etc. If the document is a datasheet and it

	can be easily accessed from the internet, then you can refer to it with the appropriate internet link and document number. In this manner you don't have to print it and waste tons of paper.
	Total hours (Project) : 90
	Total hours : 90

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Ability to integrate existing and new technical knowledge for industrial application.
CO2	Executing work with team and teammates from other disciplines
CO3	Get practices and experience related to professional and ethical issues in the work environment
CO4	Experience of demonstrating the impact of the internship on their learning and professional development.
CO5	Understanding of lifelong learning processes through critical reflection of internship experiences.

Course Articulation Matrix:

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	3	1	-	-	1	-	-	-	-	-	-	-	-	-
CO2	-	-	-	-	-	-	-	-	3	2	1	-	-	2
CO3	-	-	-	-	-	-	1	3	-	1	-	-	-	1

B.Tech. (Computer Science & Engineering) Programme

SYLLABI (Semester – 8)

**CHAROTAR UNIVERSITY OF SCIENCE AND
TECHNOLOGY**

CS447: SOFTWARE PROJECT MAJOR

Credit Hours:

Teaching Scheme	Theory	Practical	Total	Credit
Hours/week	0	36	36	20
Marks	0	600(250+350)	600	

Outline of the Course:

- Software Project includes course work on a specialized Subject or a Seminar.
- The course work shall be related to the area of his/her project research work.
- Students have to take 3 months training to the other software industry as the project work.
- The major project work provides students an opportunity to do something on their own and under the supervision of internal guide as well as guide from industry.
- Student at the beginning of a semester may be advised by his/her supervisor (s) for recommended courses.
- Project will be evaluated at least thrice during the semester by internal guide of the project and final submission at the end of the semester as a part of continuous evaluation.
- Project work should include whole SDLC of development of software / hardware system as solution of particular problem by applying principles of Software Engineering.
- A student has to produce some useful outcome by conducting experiments or project work.
- Student can learn all aspects & functionality of specialized software from the industry.
- Students have to submit SRS, SPMP, Design documents, Code and Test Cases in form of Project report.

Instructional Method and Pedagogy:

- Students can select the topic based on the industry requirement.
- Students can select the topic based on the research areas of available supervisor/guide.
- Each student has to prepare a synopsis, SRS, SPMP, Design documents and Final Report in prescribed format only. The report typed on A4 sized sheets and bound should be submitted after approval by the guide and endorsement of the Head of Department.
- Performance of students at the Project will be assessed by the department faculty. The supervisor/guide based on the quality of work and preparation and understanding of the candidate shall do an assessment of the project.
- Following format for documentation for the project be followed:
 - A. Forwarding Page
 - 1. Title of the project
 - 2. Objectives
 - 3. Definitions of Key Term Approach to Problem solving Limitations, if any

4. Output Generated
5. Details of Hardware Performed
6. Details of Software Tools used
7. Implementation issues (clearly defining the area of application)
8. Miscellaneous
9. Signature of candidate & date

Course Outcome (COs):

At the end of the course, the students will be able to

CO1	Identify and justify/analyse the requirements of the projects with enhancement of the required tools and technology by individual and team.
CO2	Solve challenging projects for commercial, societal and environment benefit.
CO3	Apply the engineering knowledge to full fill the requirements of the projects pertaining to any discipline.
CO4	Explain the importance of planning, documentation, punctuality and work ethics.
CO5	Document the work which is carried out in proper format with industry standards.
CO6	Showcase the soft skill.

Course Articulation Matrix:

	PO01	PO02	PO03	PO04	PO05	PO06	PO07	PO08	PO09	PO10	PO11	PO12	PSO1	PSO2
CO1	3	3	-	2	3	-	1	-	3	1	1	1	3	1
CO2	2	-	3	-	-	3	2	-	-	-	-	-	2	2
CO3	3	2	1	1	1	-	-	-	1	-	2	1	3	1
CO4	3	1	2	-	-	-	-	3	-	-	1	2	2	3
CO5	3	-	2	2	-	-	-	-	-	2	-	3	1	1
CO6	1	-	1	1	-	-	-	3	1	3	1	1	1	3

Recommended Chapters/sections

1. Microscope Summery
2. Details of candidate and supervisor along with certificate of
 - original work;
 - Assistance, if any;
 - Credits;
3. Aims and Objectives
4. Approaches to Project and Time Frame
5. Project Design Description with appendices to cover
 - Flow charts/Data Flow Diagram – Macro/Micro Level
 - Source code, If any
 - Hardware platform

- Software Tools
- Security Measures
- Quality Assurance
- Audit ability
- 6. Test Date and Result

Recommended Study Material:

- 1 Reading Materials, web materials, Project reports with full citations
- 2 Books, magazines & Journals of related topics
- 3 Various software tools and programming languages compiler related to topic

❖ **Web Materials:**

1. www.ieeexplore.ieee.org
2. www.sciencedirect.com
3. www.elsevier.com
4. <http://spie.org/x576.xml>
